The LITTLE BUSINESSMAN

THE VOICE OF SMALL BUSINESS

Vol. 6, No. 6 | Saturday, April 22, 1944 | Subscription $3.00 a Year

WHY A FOURTH TERM PRESIDENT?

By WILLIAM CASTLEMAN, President
Little Business Men's League of America

WHEN WE ASK the question, why a fourth term President, immediately we raise the thought in the minds of our readers — have the officers of the League and the editor of the Little Businessman become party minded? The answer, of course, is no. Anyone who has advocated for years that the small business man can not afford to be political party minded is not likely to change his views overnight. Your editor has consistently emphasized this position and it is stated in our program, that small business must oppose all men in public office who are not friendly to the interest of small business, be they Democrats or Republicans.

However, we are now engaged in the most gigantic war the world has ever witnessed. This war MUST be won in the shortest possible time and with the least loss of human life. This is our primary objective. How can we achieve this end quickly? Can we do it by changing our leadership? In doing this would we not be endangering our ties with our allies?

Our President has the confidence and good-will of the strongest man in this war — Josef Stalin. If we change commanders we may not be able to hold that confidence and good-will which is so necessary to the winning of the war in the shortest possible time. That understanding between the United States and Russia can be maintained only by those who made the agreement. This is why we cannot afford to risk any substitution in commander and chief.

Many small business men do not like the Democratic party. A great many do not like either, and are hoping that someday there may be a new political party which will wipe out the many shortcomings that exist in both old parties. They would prefer to see the day when all branches of government are operated honestly, efficiently and economically, without special privileges to anyone.

But, this is 1944. The hands of the clock do not turn backwards. Like our world — keeps moving forward — ever forward — to either peace and good will or toward greater destruction.

The American people hold the key to a lasting world peace or to greater destruction of human life and property. It is on their decision that the future of the world rests today. They have been able to produce the weapons of war in breath-taking abundance. Will they be able to hold our ship of state on even keel until there is again peace and prosperity?

Yes, it is true, we have many domestic problems, but we are in the midst of war. Sherman said, with remarkable understatement — war is hell. It is high time that we all realized that the hardships and the many problems prevailing, not only for business men, but for everybody, are mostly the result of war. If we are worried about our business, we ought to take a good look at the business picture of Europe, and after analyzing their situation, thank God that we have been saved from such a catastrophe. It could have happened here had we not had a man in the White House with a far-sighted foreign policy, regardless of the faults of his domestic policies. He has many, and so have we.

Our system of free enterprise, in fact our capitalist economy rests upon our being able to end the war quickly. If we should have a war lasting five or ten years more, and a loss of life of five to ten million of our young men and women, our economy will not be worth saving. We will be completely bankrupt, morally and physically.

We may not agree with the Russian economy, and we have very emphatic reasons why we do not like dictatorship, yet, there is enough sportsmanship in every American to run an economic race with Russia to see which economy can produce the highest standard of living and the happiest people. We are firmly sold on our way of life — they are sold on theirs. After the war they will be in the market for heavy machinery and other equipment, and we will need their furs, timber, magnesium, etc. What a wonderful opportunity for both nations to enjoy amicable relations. We are the most productive nation in the world. Let us keep it that way. We enjoy the highest standard of living. Let us not endanger it by creating a situation that will make for a long lasting war just because some of us do not like the Russian economy and yearn to sever ties with a magnificent fighting ally.

In the seven years of existence of the Little Business Men's League of America, it has never advocated the election of a Democrat or a Republican. It has fought the election of some Democrats and some Republicans for opposing legislation favorable to small business. This it will continue to do. But, in this critical period the leaders of the League and the editor of the publication cannot sit by idly when great dangers are seen on the horizon that not only threaten the life of small business, but all business. Yes, even the life of the Republic.

The business men who are foolish enough to think that a candidate for President sponsored by the McCormick and Hearst press,

if elected, will be able to hold the good-will of Josef Stalin should begin immediately to do a little straight thinking. The election of such a candidate is bound to turn over the Allied war machine. This can set off new forces of destruction which might be far more destructive and far more devastating than those of Hitler.

The mothers and the fathers of our young men and women in the service are most vitally interested in a short war and are not likely to accept political leadership which might lead to a long war. If business men are so foolish as to place their selfish interest above the lives of these young men and women, let them beware, for the useless destruction of life might be placed on their shoulders, and our free enterprise system might tumble on their heads. Business cannot afford to take such a chance in the midst of this terrible conflict. That is why we advocate the drafting of Roosevelt. It's time that we let him know that he must keep leading the nation until peace comes.

Is it not then high time for business men to become more practical on International problems, problems created by the war and the depression. Men who were able to build a great country like ours and produce the weapons of war in abundance ought to be able to realize that in 1944 they cannot use the same yardstick by which they were guided in the twenties. The mistakes of 1920 must not be repeated.

Our President, years before Pearl Harbor, saw the serious dangers of a world war. He realized then that the forces of destruction were rapidly developing, but our people at that time did not even give the thought of our being forced into war any consideration whatsoever. He has been able to pick the right men to lead our armed forces. If we can remember where we were two years ago, it is obvious that our military chiefs have been successful far beyond our imagination. Industry has done an incredible job also. Our President has been able to co-ordinate our productive forces and our armed forces so that in the space of two years we have astonished the world. Is it not high time to ask yourself — can we afford to change that leadership now?

The small business men and women are democratically minded. They are not for third and fourth term Presidents. Some are not even for second terms. Under normal conditions they would oppose any Democrat or Republican seeking a third or fourth term.

The little business men and women of America must assume greater responsibility in their communities if the things they hold most dear to their heart — liberty and opportunity — is to prevail after this war. If big business fails to see the dangers which may befall our country by a long drawn out war to our free enterprise system, then it is up to small business to take over business leadership in order that we may save ourselves from destruction. The little business men cannot afford to take chances with leaders totally unfamiliar with our international problems; they cannot afford a long lasting war; they cannot afford to put a man in the White House who lacks understanding, or is unsympathetic to their problems.

The time for small business to assert itself is now! We must DRAFT Roosevelt! He must continue in office until the end of the war. He must finish the job before we can afford to set him free from the heavy duties which a world conflict has laid upon him. We must draft him before it is too late, for the blind forces of reaction might cause him to let business stick out its neck so that Josef Stalin can cut off its head.

Small business and its friends MUST obtain millions of signatures on petitions to DRAFT Roosevelt regardless of the time and energy required. These signatures MUST be secured before the Democratic Convention meets. They must be presented to the Convention so that the delegates may know, in no uncertain terms, what the American people expect of them.

Yes, the war, restrictions, shortage of goods to do business, inability to get help necessary to carry on your business — these are serious problems, but they are nothing when compared with the small business men's problems of Europe, or when compared with the trials and the tribulations of living and fighting in fox holes and swamps of the South Pacific Islands or the facing of shells in Italy.

Act today! Begin work now! Send for free petitions and help the small business men obtain the millions of signatures in the shortest possible time. It is your duty to help DRAFT Roosevelt. He alone is able to finish the job of war quickly. DRAFT Roosevelt before blind obstructionists again gain control of our government and set the forces loose which will make for another war — a conflict that may destroy our freedom and our civilization.

Who Let Loose these Poisonous Reptiles?

Long before the political campaign of 1944 begins, the enemies of our President are rapidly spreading falsehoods — they are saying, that Roosevelt brought us into this war — that our boys are being sacrificed to keep him in office — that he did not keep his promise that he would not send an American boy across the sea.

These false and seditious whisperings spread among those who do little thinking for themselves by the traitors, fools and knaves in our midst should be stopped quickly and effectively. If those who listen to such seditious utterings would only do a little thinking about what occurred in our relationship with the Japs prior to Pearl Harbor, they would know that this nation tried hard to keep the Japs peaceful. We sold them everything they wanted — even scrap iron to make guns. We were that anxious to remain at peace with them. But in spite of all our peaceful efforts and conciliatory attitude — they stabbed us in the back.

Freedom of Enterprise for Small Business

By JESSIE H. JONES
Secretary of Commerce

The Department of Commerce has long endorsed proposals to aid small business men through programs of research and management counsel. These programs are in the national interest since they have the fundamental objective of maintaining production at minimum cost by increasing efficiency and making for a sounder business structure. The Government for many years past has aided small farmers with such programs and the results have served both farmers and consumers. Similar Government aid should be extended to small business.

In wholesaling and retailing, little conversion has been possible. As inventories have run out, retailers have faced a very serious situation. Acute labor shortages confront retailers as more men are drawn into the armed forces and into war industries. Because the great majority of small businesses are in the distributive trades, this area is in the heart of the small business problem.

Studies of business problems are required to discover new

Freedom of Enterprise for Small Business

(*Continued from page* 2)

facts, and to arrive at practical solutions which can be generally applied. It should be pointed out, however, that small business men have difficulty in interpreting statistical information, market data, historical price data, production indexes, and the like. The small business man is more interested in how he can increase his own volume of business, lower his own cost of operation, do a better merchandising job, meet his own competition more effectively, how he can obtain capital on favorable terms. Consequently, business research and aid to small business is indicated on a case basis, wherein the practices of successful businesses are outlined as a practical demonstration of greater efficiency in buying, merchandising, pricing and all the other phases of practical business management.

The Department is presently engaged in research in natality and mortality data—a serious gap in governmental and private statistics. Comprehensive, detailed and reliable figures on business births and deaths will be required to shape sound public policy over the war years and also in peacetime. We should, moreover, know what is happening to small concerns during their life span. Such data are available on big business from a number of sources but information on small business is still very scant.

Effective aid to small business must include management counsel such as that which is already available to large business enterprises. The larger enterprises, in addition to scientific research departments, have expert management talent to investigate questions of plant location, trends in the use of products, costs, margins, prices, efficient technique in production and selling, and close contacts with governmental control agencies. Small business enterprises lack resources to carry on these activities for themselves.

The problems of managing a business are such that competent engineers are required on such problems as location, layout and manufacturing methods; marketing experts on questions of selling, advertising and competitive practices; accountants to assist in control and cost systems; and finally authoritative advice on problems arising out of changing general economic conditions, and regulations of the Government. Expert advisory service is needed to preserve the health of small business since no one small businessman can hope to study these rapid changes and developments in all fields and still carry out the day-to-day operations of his business. Until he does have the benefit of advice of specialists, his judgment will continue to be handicapped by inadequate facts and lack of perspective.

After the war, we must retain and strengthen the free enterprise system in which fair competition is assured, efficiency rather than monopolistic control is rewarded, and wherein individuals with small resources will have the opportunity to develop their own enterprise and make their individual contributions to the increased wealth of the Nation.

The inevitable concentration of economic power during wartime makes this long run objective, from a social point of view, an exceedingly important question in government policy. The small business men in the smaller towns of the Nation are the backbone of community life. They are the socially stable elements. Their independence and their opportunity must be given free scope and protection.

The Department of Commerce also recognizes the needs of small business for long-term credit and capital on more favorable terms than have hitherto been available.

The amount of money invested as equity capital, sometimes spoken of as risk capital or net worth of a business, has a definite relation to other factors of the business enterprise. In each group or segment of industry and trade, these relations vary. Ratios of equity capital to working capital, to inventory, to current assets, to fixed assets, to current liabilities, to funded debt, to net sales, are well established for practically every class of business. Sound management recognizes these relationships and is governed by them because they are the stop or go signals to successful results. Too often, otherwise promising small enterprises have failed because of reliance on short-term loans rather than on permanently invested equity capital. Today profits of small concerns, after payment of taxes, are not large enough to plow back profits into the business. Taxation on the present and prospective scale prevents small enterprises from building up a strong equity capital position either through the creation of adequate reserves or through the establishment of earned surpluses. Lacking these reserves, and a sound equity position, these small businesses will be extremely vulnerable to failure on recessions in business activity.

The Government, consequently should give consideration to the granting of credits or rate differentials to small business concerns as part of its tax program. The effect of such tax considerations would be in the direction of helping to broaden the equity capital foundation of small business. In the long run, it is believed that the Treasury would benefit in revenue collections by such measures.

The tax factor is rapidly becoming the dominant problem in the administration of small business enterprises, particularly of those whose products or services are in such public demand that expansion of the enterprise is indicated. The taxation of small businesses at rates as heavy, or nearly as heavy, as those applied to old, large and established concerns serves to create and sustain business monopolies through the elimination of actual and potential competition.

The policy of the Department of Commerce may be defined, therefore, in these fundamentals of a free and democratic economy:

1. That uncontrolled concentration of wealth and the accompanying trend toward monopolies are destructive to the national economy; the two forces must be combatted;

2. That the rights of free entrance into and exit from business should not be abridged;

3. That small businessmen are entitled to a fair chance and full opportunity in the competitive system;

4. That voluntary investment of capital in business enterprise, under the profit system, should be encouraged;

5. That the access of small business to capital and long-term credit should be facilitated;

6. That small enterprise should be helped to improve its management methods and practices;

7. That small business should be assisted to develop its opportunities through access to experience-tested research and business counsel; and

8. That the management talents of business leaders within communities should be stimulated to coordinated action in the interest of community self-help.

All segements of the economy must become aware of the needs of small business and must take appropriate constructive action in order to maintain our traditional way of life. Small business and

(*Continued on page* 4)

The Program of Small Business

1. **The abolition of sharp and unethical business practices, loss leader selling, and misleading advertising.**

   It is high time that the jungle law in the field of business be abolished and the principle of "live and let live" be again restored throughout our land.

   When large corporations sell goods below the cost of producing them in order to eliminate small competitors their aim is to create a monopoly.

2. **A government-created financial credit structure to enable small businesses and new enterprises to borrow money at a low rate of interest, on character as well as on collateral.**

   We cannot re-employ the millions in the service and the millions doing war work unless 98% of America's business has an opportunity to expand. New enterprise must be encouraged by enabling creators of new products to obtain money at low rates of interest.

   The great business tragedy of the thirties was the inability of small businesses to secure money from banks to tide them over a distressed period. They were compelled to go to loan sharks and pay usurious rates. The extinction of thousands of small businesses and greater unemployment followed because of it.

   We advocate a government credit structure because private banks would be unable to meet the needs of small business and new enterprise. The job is too big.

3. **A fair distribution of war plant facilities now owned by the government, and equal access to raw materials after the war.**

   The billions of dollars (the people's money) invested by the government in machinery, buildings, materials, equipment, etc., should be fairly distributed after the war to make possible more jobs and greater productive capacity in small business.

4. **The rights of workers to organize and bargain collectively.**

   Small business is not opposed to legitimate Trade Unions. It is only when labor's leaders conspire with monopolists to destroy their small competitors that the small business man demands of government the protection he is entitled to under the Sherman Anti-Trust Act.

5. **Political Parties.**

   Small business cannot afford to be political party minded. It must support all men and women seeking public office who favor a healthy state for small enterprise, and oppose those, be they Democrats or Republicans, who work against the interest of the little business men.

"We must beware of trying to build a Society in which nobody counts for anything except a politician or an official, a Society where enterprise gains no reward, and thrift no privileges"

—Winston Churchill

all the rest of the national economy have an inseparable community of interest upon which depend national well-being and security through the welfare of all its members.

The Department seeks to encourage those who have an interest in the welfare of small business to contribute, as each is best able, to the success of this program. Many hopeful forces, fortunately, are at work. Mention can be made of a few:

Financial interests, for example, have a greater realization of the financil needs of small business.

Mnagement of larger concerns are inquiring into ways by which smaller concerns can be aided in improving their operations and making their activities more profitable.

Government, at all levels, is studying the needs of small business and taking the steps necessary to provide required services not available from private sources.

Associations and civic groups are aware of their opportunities and responsibilities to aid small enterprise through research and counsel.

Educational institutions are assisting small business by performing needed research and by the development of educational programs for the proprietors and employees of smaller concerns.

Most important, small business itself has been stimulated to work out its own welfare, to study its own needs, to improve its methods of operation, to seek the counsel and advice it requires, and to cooperate with Government, labor, big business, and other parts of private initiative.

The present study embodies a discussion of legislative bills for the assistance of small business which have been introduced in Congress during the last 10 years and is offered as an indication of legislative thinking. It is hoped that the material may prove a useful indicator for action in behalf of small business.

The task that lies ahead must be performed by the cooperative efforts of Government and private initiative if small enterprise is to retain its rightful place in our tradtional system of competitive capitalism. Each can accomplish much in its own sphere. But primarily the challenge is to private initiative. It is a serious challenge.

Where private initiative is unable to make available the necessary management advice and counsel, or to assist smaller concerns to secure adequate trained manpower, or to facilitate access by small business to equity capital and long-term credit, Government must provide the necessary aid.

SALVAGE SMALL BUSINESS

Since Pearl Harbor, more than 500,000 firms have gone out of business, about one-sixth of the nation's total. The principal victims of the war have been small businessmen.

Coupled with these facts is the growing concentration of American industry. During this war the large corporations have been growing bigger and have been getting the lion's share of war contracts.

All of this adds up to one fact: the property of this country is being turned over to a few, and the many have no productive property of their own. We are becoming, if not already so, a nation of proletariats.

All, however, is not lost. For if we are sincerely interested in giving the little businessman a boost and saving him from the hands of monopoly and giant finance, we can do something.

There are in this country about 2,550 government owned plants, built at an estimated cost of fifteen billion dollars. Why can't Congress, by its legislative powers, give purchasing priorities on these factories (1) to small businessmen, who have been war casualties, (2) to cooperative groups, and (3) to new small investors? Why can't Congress release these plants, not to the highest bidders, but at cost or market price (whichever is lower) to the thousands of small businessmen in the nation.

The backbone of America is not in the Goliaths of industry but in the Davids of good will who can do great things if only given an opportunity.

—Catholic Labor Alliance

SWITCHING ON THE LIGHT

By Richard Riley Shepard

One need not be told that the United States is engaged in a World War, but most people need to be reminded that this is not exclusively America's War: it is a war of the United Nations against the armed might and political and economic intentions of the Axis Nations. One should always bear this in mind when discussing the problems of the coming peace, and remember too that our Allies were fighting and dying in this war long before we made our ignoble entrance after the Japanese kicked us in Pearl Harbor.

The average person tends to overlook the important fact that when we entered this war and accepted England, China and the Soviet Union as our Allies, that these nations already had definite war aims which we did not ask them to change or forego. When we accepted them as our allies, we automatically accepted their war aims — so far as their aims were known to us; and we cannot expect them to fight for only those things and ideas which we hold to be proper now that allied victory is assured. Nevertheless, as Allies we do have one thing in common—the enemy! Everyone is agreed that this enemy must be defeated, and that no allied nation can make a separate peace.

Since neither nation may make a separate peace, each nation is obligated to help the other win the peace. This then is the world situation in brief: so far as the west is concerned, the only thing we are fighting for — individually or collectively is to defeat the enemy. The problems that arise (and have arisen) due to this world situation, are not the reasons for the War but the results of it. However, problems have arisen, and doubtless more will arise, and they require serious consideration because they demand solution and settlement. For the most part these are problems of peace which shall affect not one nation singly but all nations combined, especially the Allies. Therefore, the major problem of the war (next to defeating the enemy) is to win the peace. And this cannot be done by one nation insisting that its policies be pursued and the policies of other nations dispensed with. The peace can only be won by the sincere cooperative efforts of the Allies—which means compromise to all, superiority to none.

As Allies we can and will win the War, BUT AS ALLIES WE CAN AND MAY LOSE THE PEACE! Now, there is only one way to win the peace and that is to get along with our Allies, and for them to get along with us. If any one of the Allies fail to cooperate sincerely with the others, the peace shall be lost and the third World War inevitable. If for no other reason than to avoid other wars, America (every American!) must sincerely and wholeheartedly seek to cooperate and extend trust to the Allies which this war has given us.

The New World is indeed on the move, and nothing and nobody can stop it. As a nation, America must follow even if it does not desire to lead. The people of America will long regret the day that they permit themselves to forget this and be led astray by those who gain more than they lose by bigger and better wars.

IN GRATITUDE TO RUSSIA

We have sent 5,200 tanks and tank destroyers, over 190,000 trucks, 36,000 jeeps and almost 30,000 other military motor vehicles. American tanks manned by Russian crews have supplemented the much larger numbers of Soviet-made tanks in the Russian offensives. American trucks have continued to play a vital roll in meeting the transport and supply needs of the Red Army, which has advanced more than 800 miles since Stalingrad and is now smashing into the Balkans.

SHOE STAMP NOW GOOD

Airplane Stamp 2 in War Ration Book Three may be used for buying one pair of rationed shoes beginning May 1, 1944, the Office of Price Administration said today. The stamp, like Airplane Stamp 1 now valid, will continue to be good indefinitely.

As announced previously, Stamp 18 in War Ration Book One, which has been valid for shoe buying since June 16, 1943, will expire on April 30. Thus on May 1 two shoe ration stamps, both in War Ration Book Three, will be good: Airplane Stamp 1, which became valid last November 1, and the new one, Airplane Stamp 2.

Liberty is the one thing you can't have unless you give it to others.

The South Carolina Committee of the Southern Regional Council

29 East Calhoun Street

Sumter, South Carolina

The South Carolina Committee of the Southern Regional Council is endeavoring to attain through research and action programs, the ideals and practices of equal opportunity for all people in the State.

The activities of the Committee are financed by memberships and contribution. The membership is open to all interested in the promotion of the program.

FACING FACTS IN SOUTH CAROLINA

Of course, I am grateful for this invitation. But I should like you to understand that mine is a restrained gratitude. From this subject—Facing Facts in South Carolina—I infer that the program committee felt that there was some dirty linen to be washed in public and looked about for a rash and indiscreet laundryman. By a process of elimination among a very few candidates the mantle fell upon me. I recall that the old pre-Benito Romans were wont to chop off the head of a messenger bringing bad news. Now, I don't think that my innocent remarks on this occasion could possibly be considered as bad news; but, if you should feel otherwise, please remember that I am but the spokesman of your program committee and deal with us all, not with me alone, as you think we deserve.

A few years ago someone with a morbid interest in statistics waded through the then current volume of Who's Who in America. He emerged with the discovery that there were listed in that volume 43 persons who had moved from other states to South Carolina, whereas there were listed 135 persons who had moved from this to other states. Presumably, the same ratio would prevail today. If so, there could hardly be a fact of larger significance for South Carolinians.

Who's Who may not be perfectly compiled. There may be many persons listed on a very slender record of attainments. Many men and women of equal or greater attainments may be excluded. For example, I have just had occasion to go through the Ws in the 1944 volume—went through with the aid of a magnifying glass, a fine toothed comb and a trained blood hound. I regret to report one inexcusable omission. But, making all due allowance for such lamentable error, Who's Who's authority in its field is generally recognized. Generally speaking, one must have excelled to some extent in some field to secure admission to its pages.

A rather bad economic situation is presented when the balance of trade is against us in such commodities as minerals, dairy products, wheat, meats or fruits. That means that more dollars are leaving the State than come into it. But this is a relatively trivial matter compared with having against us a balance of trade in ideas, in brains, in talent, or in genius. If, in fact, as the figures indicate, we are sending out of the State three men and women of exceptional ability for every one that comes into the State, we are depleting our reserves in a really vital sector.

Why should this trend exist? Why should three exceptional men and women, born here and attached by every sentimental tie to this State, reach the decision to wrench themselves loose and send their roots down in an alien soil while only one such person from across the line decides to risk his fortunes and destiny in South Carolina? I suggest that a student of Converse College might serve her State very well by writing to the persons involved and asking one group: Why did you decide to leave South Carolina? and asking the other group: Why did you decide to come to South Carolina? The answers might support an interesting thesis.

But this talk cannot wait on the returns from such questionnaire. This talk has to be made tonight. It has the disadvantage of not knowing what the answer would be and the consequent advantage of opportunity for unlimited speculation. One guess may be as good as another, but I suggest one which seems to be reasonable and at least has the merit of being tenuously related to the subject assigned me—Facing Facts in South Carolina.

Exceptional men and women leave South Carolina, in part, because of the unwillingness of many South Carolinians to do what we are trying to do here tonight—face the facts.

The exceptional man is usually an informed man, he deals in ideas, he applies reasoning to facts and he is under the compulsion to state the conclusions at which he arrives without tincture or dilution. Such inquiry as he conducts is a free inquiry which knows no blind alleys, no taboos. What he speaks or writes is, as he sees it, the truth without sugar coating or palliation.

As one South Carolinian to another, and almost with a sense of treason, I ask: Does there exist in this State a body of public opinion which encourages that kind of expression? Is there applause for scholarship if scholarship turns the light on the disagreeable? Is there approval of research if research reveals our vulnerability?

Spartanburg is close to Asheville. You know Thomas Wolfe. You have read his poignant "You Can't Go Home Again". That is, you can't go home after you have spent yourself and every ounce of your strength and power in writing the truth about your people. You can't go home because a part of that truth is disagreeable and your friends and neighbors—home folk—don't want to be told the truth—don't want to face the facts.

It may be difficult to prove that the mass of South Carolinians shy off from disagreeable truth but there exists evidence that is highly persuasive: Men who run for public office admittedly avoid giving offense to the public—the voters. How far would a candidate get if he reminded the voters: The homicide rate of South Carolina is approximately double the national average. Other states reduced their rates by State police systems divorced, so far as possible, from political control. South Carolina's rejectees under the Selective Service Act were more than twice the national average, largely because of illiteracy and venereal disease. Federal participation in education and public health might have its advantages, even if, alas, some Negroes were benefitted thereby. The Constitution and the courts require that there shall be equity in distribution of school funds between the races, but no one contends for an instant that actually there is equity.

The very fact that men who know the public mind best—candidates for office—studiously avoid touching upon any such controversial matters is fairly persuasive evidence of our indisposition to face the facts.

Of course, that indisposition is not peculiar to South Carolina. It is rooted in human nature and, hence, ubiquitous. The question is one of degree of indisposition. Is it more prevalent or more pronounced among us than in some other American States? Again, one must conjecture.

In Virginia, Virginius Dabney in his editorial columns advocates repeal of Jim Crow laws as to buses. The University of North Carolina Press publishes a volume by Negroes entitled "What the Negro Wants". Georgia repeals the poll tax law—a source of irritation for decades. Those are neighboring and Southern States. New York enacts its own Fair Employment Practices Act. Pennsylvanians are concerned with a model program of conservation of natural resources. California creates a great State library system. And so on. There seem to be the thrill and throb of life elsewhere in the land. But here at home our great issues are the issues of the 1870s. Our political battle cry is still "White supremacy". That in 1945.

Now, the editorial writer must have a public which tolerates his views. Mr. Dabney must have it in Virginia. A state University, dependent upon the public for sup-

port, must have a public which tolerates liberal action and attitude. The great University at Chapel Hill seems to have such a public in North Carolina. Those of us on the side lines determine to a large extent the quality of utterance of our writers and thinkers. There is a solemn obligation upon us to see that the atmosphere is provided in which genius may flourish. For it is in the nature of things that genius will seek a congenial soil.

It is, of course, not enough that our people have the willingness to face facts—tolerance for an opposing point of view. Tolerance is a virtue. But uniformed tolerance may amount merely to a complete lack of conviction. We must have the capacity to evaluate facts, to discriminate between fact and assumption, between sound argument and appeal to prejudice. In short, we must have an educated citizenship.

I do not mean education in any merely formal or technical sense, as highly desirable as that may be. And let me here and now, as one gleam in all this fog of gloom, say that you and I as citizens may take pride in the educational progress of our State. While still far below national standards, for the past three decades, by all proper tests, we have advanced much more rapidly in education than the national average. This progress has been due to the willingness of our people, out of per capita incomes far below the norm, to make sacrifices that their children may learn.

No one of us now fails to perceive that education is a never ending process, that knowledge is accumulating and being made available with dizzying rapidity, and that even one with a Ph.D. degree, who lets five years go by without reading, is, judged by the necessities of this age, an illiterate.

Here again we have cause for mixed pride and shame. For the past ten years library progress in this State has been greatly accelerated. But we are still tragically short of our requirements.

South Carolina spends per capita for public libraries one-fourth of the amount spent by New England and one-sixth of the amount spent by the far Western States.

How does this work out in the reading habits of the people? The circulation of books per capita in South Carolina is one-tenth of the national average. It is one-sixteenth of the average of New Hampshire.

Now, making all due allowance for the innate superiority of our people, about which we are reminded every campaign year, is it not reasonable to suppose that when two citizens of New Hampshire meet and carry on a conversation there may be more play of wit, more interchange of ideas, better considered opinions on men and events than when two citizens of South Carolina "pass the time of day"?

But it is not primarily as an aid to conversation that the library is important. Rather it is in the development of the critical faculties—this capacity to judge men and events.

In a democracy the vote of the most ignorant man is fully as potent mathematically as the vote of the most learned and best informed. A lead pencil in the hand of an ignorant man in a voting booth may be as dangerous a weapon as a bomb.

Because ignorance is a fertile breeding ground for demagogy.

On the other hand one who has read widely and deeply is apt to be immune to the poison of demagogs. When a candidate, for instance, blows upon the embers of an ancient prejudice, the well-read man does not throw his hat into the air, but smiles contemptuously and remarks to himself that the device of the candidate is shabby and

threadbare with age. One who is familiar with the demagogs of Greece and Rome may not be expected to be swept off his feet by the comparatively inartistic performance of our local talent.

This State should face the fact that reforms in its Government will come only as there is an elevation in the level of information possessed by its citizens. This means that they must have the material upon which the habit of reading may be fostered. Books, books, books, for our people.

This State has many spectacles of considerable natural beauty. There is none that exceeds in significance the library truck stationed at some rural crossroads.

Should we not face the fact that there is a wide discrepancy between our pretentions and our practices? Let me illustrate what I have in mind.

One of the things of which the State may be proud is its relatively large church membership. In that field and in the contributions which we make to the churches as compared with our incomes, we are considerably above the national average. This is naturally a cause for satisfaction and pride.

Now, if religion teaches anything, it teaches the brotherhood of man—a brotherhood which is not limited or circumscribed by considerations of differences in race and color. Yet the same people who, with so much sacrifice, support their churches, tolerate mouthings of politicians and editorials in some quarters—happily greatly reduced in number—about "white supremacy". We seem strangely unaware that when we talk or write or think about the superiority of one race over another, we are echoing sentiments that lie at the heart of Nazi philosophy.

There are no people more outspoken in their attachment to the principles of democracy than are the people of South Carolina. Now, if democracy means anything, it means equality before the law and equality of opportunity to make a living.

Yet, are we not reasonably complacent in the face of a system designed to exclude Negroes from the polls, from jury service, from holding public office or, indeed, from receiving the same pay as a white man for service rendered?

We live under a Constitution framed by white men and interpreted by Courts composed of white men. These Courts have said that the Constitution means that there shall be no exclusion from a political primary or from jury service because of color, and no discrepancy in salaries paid to teachers because of color. *Our* Constitution and *our* Courts.

Yet we have seen two or three successive Legislatures using all of their cunning to escape the consequences of stitution and OUR Courts.

Even now there is pending in the Legislature a bill designed to spend almost eight million dollars upon the white colleges of South Carolina and only two hundred and fifty thousand dollars on the lone State Negro college.

We profess a devout attachment to Anglo-Saxon principles of fair play. Yet we see public funds distributed between the races for parks, play grounds, hospitals and the like on a basis which cannot remotely be called fair.

Those who seek to justify these discrepancies resort to the argument that Negroes receive benefits in proportion to the taxes they pay.

In the first place, this is pure assumption, which may or may not be supported by the facts.

In the second place, we do not follow that policy to its logical conclusion and discriminate between white children upon the same basis. By such a policy a great

many white children would receive no education because their parents pay no taxes. All pretense of a *public* school system would be abandoned by such a procedure.

In the third place, isn't the proper conception of money that it represents work, and the Negro sharecropper or mill hand may have contributed his full share to the tax dollar which a landlord or company treasurer pushes across the Tax Collector's window?

So there exists this wide discrepancy between our pretentions and our practices. There will, of course, always be a gap between the ideal and the actual. The reach must always exceed the grasp. Even in the exact science of mechanics a tolerance of one-thousandth of an inch is permitted in airplane motors—a negligible failure to attain perfection. But as this margin of error increases the machine becomes inefficient and finally it destroys itself. The spiritual entity is subject to the same law.

We cannot go on being split personalities. We do damage to our own natures by pretending one thing and practicing another. The subjective effects upon us of a policy of subterfuge and evasion may be more damaging to us than would be even the lack of schools. There is a question of morals involved and we can't run away from a moral issue.

Facts are not merely stubborn things, they may be exceedingly disagreeable things as well. They lose none of their disagreeable character by being ignored. Those who ignore them themselves lose character.

A meeting such as this and similar meetings which are being held here and there throughout the State give cause for hope that men and women in private life and with no axe to grind, are moving more rapidly and courageously than are their so-called leaders. But the leaders will always respond to public pressure.

The first duty of a citizen of this State is, therefore, to create here the spirit and atmosphere which will permit anyone to discuss facts, however disagreeable, and to advocate a course of action which may break with tradition but which will square what is honorable and right.

We hear the statement frequently made nowadays that the world is getting smaller. Actually, what we really mean is that the community is getting larger—not that the world is narrowing and contracting about us, but that the influence of any community may now be extended to and felt everywhere throughout the world. The citizen of South Carolina is today, more than he has ever been, a citizen of the world at large.

Heretofore, the institutions, policies and customs of South Carolinians were not matters of particular concern to any other part of the world. We had to take into account only our own opinions about such customs, or, at most, Southern opinion. From this point on our customs are going to be judged before the court of *world* opinion. It is a matter of legitimate concern to people throughout the world that those customs and institutions shall accord with enlightened opinion of civilized man everywhere.

Prejudices and discrimination may have been luxuries which we could afford in a day now past, though I do not think so. But in the world of today and in the world of the future, they constitute excess baggage which we must fling overboard if our presence is to be tolerated by the other passengers.

The times, therefore, as never before, call for men and women who are courageous enough to face the facts and to adjust their conduct and attitudes to accord, not with what is merely historic or traditional, but with what is wise, liberal and honorable.

State of South Carolina

Department of Education

JAS. H. HOPE
STATE SUPERINTENDENT OF EDUCATION

COLUMBIA, S. C.

The Division of Veterans Education bears the responsibility for approving establishments desiring to offer

(1) on-the-job training
(2) apprenticeship
(3) cooperative training with local high s chool

to veterans under Public Law 346 of the G. I. Bill of Rights.

In exercising such approval, the Division of Veterans Education of the State Department of Education naturally wishes to protect the interests of the veteran by (1) assuring that the person bearing the chief responsibility for training the veteran is adequately experienced and otherwise qualified to teach his trade; (2) that the training takes place in a reputable, bona fide establishment; (3) that sufficient equipment for such training is available and (4) that a training program outlining the major jobs or skills to be taught is planned and followed.

In determining your establishment's qualifications for offering (1) on-the-job training; (2) apprenticeship; (3) cooperative training with local high school, the application form as completed by you will aid this Division. Once your establishment has been approved, periodic checks on the continued adequacy of the veteran's training will be made. The purpose of this application form and of the supervision is to determine that the veteran when he completes his training will be ampl y skilled in all phases of the work, and will be satisfactorily employable in his chosen occupation.

Because we share with you the responsibility for assuring the veteran of adequate training and also the desire to train him thoroughly, the Division of Veterans Education, through the Division of Vocational Education, offers assistance in planning an adequate training program.

If you wish to offer training to veterans, please complete the enclosed form in triplicate and mail all three copies to W. A. Schiffley, Director, Division of Veterans Education, Columbia (10), South Carolina.

Sincerely yours,

W. A. Schiffley, Director
Division of Veterans Education

WAS-fr

BASIS FOR APPROVAL OF BUSINESS OR INDUSTRIAL ESTABLISHMENTS FOR

I. On-the-job training
II. Apprenticeship training
III. Cooperative training

I. On-the-job training

The schools should exhaust every possibility to provide either apprentice or cooperative occupational training. If it is not possible to provide either apprentice or cooperative occupational training programs, business or industrial establishments may be approved to provide on-the-job training.

Training programs carried out by business or industrial establishments should be approved only in cases where the business or industrial establishment agrees to provide a bona fide training program to prepare a veteran for a specific occupation.

The following criteria should be considered in approving a business or industrial establishment to carry out a training program:

1. The supervisor or foreman possesses the training or other qualities necessary to provide effective on-the-job instruction.

2. The management, supervisors, and foreman understand the purposes or objectives of the veteran's training program.

3. The business or industrial establishment has adequate equipment and facilities to make an effective training program possible.

4. The business or industrial establishment agrees to continue the trainee in required operations and processes of the trade or occupation to the point of efficiency in the job but not unreasonably beyond that point.

5. The business or industrial establishment agrees to require the trainee to keep daily records of job experience.

6. The business or industrial establishment will furnish the Veterans Administration such information as is required concerning the wages, working conditions, and progress of the trainee.

7. The employer will pay the veteran in accordance with the progressively increasing scale of wages, which over the term of training will average at least 50% of the average trained-worker rate in the occupation in the establishment.

8. The business or industrial establishment will submit in writing a specific training program for veterans specifying the occupations for which the veteran is to be trained, the length of the training period, a schedule of the job experience organized in logical sequence, and the approximate time to be spent on each phase.

9. The management of business and industrial establishments approved for on-the-job training shall be expected to utilize any or all facilities available to the end that the veteran trainee may develop the abilities and attitudes necessary for efficiency and success in the occupation for which he is training.

10. The trainee will be required to attend classes in subjects related to his trade for at least 144 hours each year for the term of his training.

II. Apprentice Training

Apprentice training involves definite written agreements between management, labor, and the apprentice in recognized trades or occupations requiring 4,000 hours or more of on-the-job experience plus a minimum of 144 hours a year of related technical instruction in a school. The trainee is indentured and is under the supervision of a joint apprenticeship council.

The agreement specifies the schedule of processes, the approximate amount of time to be spent in each process, and the wage scale throughout the program of indenture, which scale must average at least 50% of the journeyman's wage during the period of indenture.

The apprentice program will be developed cooperatively with the state or local apprenticeship councils, the educational authorities, the apprentice training service, and the Veterans Administration.

The apprentice training program will conform to recognized standards of apprentice training.

The foregoing shall not exclude the approval of established apprenticeship program operated by local, regional, or national firms or establishments.

III. Cooperative Training

The cooperative Occupational Training Program will be under the direction of the school. The business or industrial establishment in which the veteran secures work experience will be considered a definite part of the total training facilities made available by the school.

The cooperative training program is provided to meet the needs of veterans who may find it impracticable to enroll in a regular vocational school or to participate in an apprenticeship training program.

In a cooperative training program, the learner will spend 16 (sixteen) hours or more per week in school and such time on the job as may be necessary to develop work efficiency. The ratio in school and on the job may be varied or adjusted to meet specific industrial needs. The local school accepts the responsibility for seeing that a satisfactory instructional pattern is carried out in the school and on the job.

The training program should be specific as to a schedule of work experience, and the coordinated and related technical training.

Arrangement for the placement of the veteran on the job will be made by the school, and there will not be any agreement directly between the business or industrial establishment and the Veterans Administration.

The business or industrial establishment will furnish the school or the Veterans Administration such information as is required concerning wages paid, working hours, etc. Agreements governing the work experiences will be between the veteran, the school, and the business or industrial establishment.

A written agreement governing the schedule of work progress, wages, school instruction schedule, work conditions, length of training period, and the type and degree of responsibilities of the business or industrial establishment will be formulated by the business or industrial establishment, the school, and the trainee.

APPLICATION FOR APPROVAL

Division of Veterans Education
Columbia 10, South Carolina

Gentlemen:

I hereby make application for approval to offer

( ) 1. On-the-job training

( ) 2. Apprenticeship

( ) 3. Cooperative training with local high school

as described in this application to veterans eligible for such training under Public Law 346 (G. I. Bill of Rights).

It is my understanding (1) that such approval, when granted, applies to the training in any period of not more than the number of veterans designated on the approval form; (2) that such approval may be terminated by the Division of Veterans Education of the State Department of Education on fifteen (15) days notice; and (3) that the Division of Veterans Education of the State Department of Education will exercise supervision of the training program and make periodic checks as to the continued adequacy of training and equipment.

I agree to offer to the veteran such training, according to a planned program approved by the State Department of Education, as will render him satisfactorily employable in his chosen occupation.

The statements submitted by me in support of my application are true and correct to the best of my knowledge and belief.

Signed _____

_____ Date of application

_____ Applicant or firm

_____ Address

By _____

STATEMENT OF APPLICANT

A. PERSONAL: Information regarding the person who will bear the chief responsibility for training the veteran.

1. Name: _____ 2. Age: ____

3. Sex: _____ 4. Race: _____ 5. Nationality: _____

6. Years of school completed: elementary _____; high school ____ college _____; trade or technical school _____ 7. Name of last school attended _____

8. Experience in trade to be taught:

Date of employment	Name and address of employer	Nature of your duties

9. Have you trained persons in your trade? ____ How many? ____

10. Personal references: give the names of two persons qualified to speak of your character and ability to train persons in your trade.

_____ _____
Name Address

_____ _____
Name Address

B. THE ESTABLISHMENT

1. Name of establishment _____

2. Address _____

3. Business engaged in _____

4. When founded _____. 5. Under present ownership since ___

6. Name of manager _____

7. Business references, including bank references _____

_____ _____
Name Address

_____ _____
Name Address

C. THE EQUIPMENT

1. Equipment available for instructional purposes: _____

_____

_____

_____

_____

_____

_____

_____

_____

_____

2. Required tools and equipment to be provided by veterans:

_____

_____

_____

3. How many veterans are you equipped to train? _____

4. Approximate length of course _____

_____

D. THE PROGRAM OF INSTRUCTION

1. Show below the major jobs or skills you propose to teach. Under each major job, please give a schedule of the job experiences organized in logical sequence, and in the approximate time to be spent on each phase.

3. Employment objective: What job will the veteran be qualified to fill when he completes the training you offer? _____

_____

_____

_____

4. It is required that the trainee attend classes in subjects related to his trade for at least 144 hours each year for the term of his training. Classes for these trainees can be secured through the Trade and Industrial Division of the State Department of Education. See your local school officials about details. Will you agree to see that this training is provided? _____

_____

5. Progress Wage Schedule:

Beginning .....$_____for _____Months

Second period..... _____for _____Months

Third period..... _____for _____Months

Fourth period..... _____for _____Months

Fifth period..... _____for _____Months

Sixth period..... _____for _____Months

Seventh period..... _____for _____Months

Eighth period..... _____for _____Months

Ninth period..... _____for _____Months

Tenth period..... _____for _____Months

JOURNEYMAN'S WAGE .....$ _____

The veteran trainee is to be paid on the same basis as any other person learning a trade or vocation in an establishment.

Under the provisions of Public Law 346 of the G.I.Bill of Rights, the Wage Schedule must progressively come nearer to the wage set up for the journeyman, which is the amount he will receive when his training period is completed. Hence, at the closing period the wage schedule of the veteran would closely approximate the journeyman's wage.

For a long training period, one covering three or four years, you would necessarily have a greater number of increases. In outlining your progressive wage schedule for a shorter training course, there would be fewer increases.

STATE DEPARTMENT OF EDUCATION
Columbia, S. C.

Valuable

EDUCATIONAL OPPORTUNITIES

for

SOUTH CAROLINA VETERANS OF WORLD WAR II

W. A. Schiffley, Director
Division of Veterans Education

of the

State Department of Education
James H. Hope, State Superintendent
Columbia, South Carolina

September, 1945

Tentative Edition

Should be checked w Schiffley for
bringing up to date.

From one to 41 state and territorial supervisors in seven years!

Guidance Grows

By W. T. MARKHAM

Supervisor, Occupational Information and Guidance, Kansas

THE program of Occupational Information and Guidance Service is rapidly coming into its own. At the present rate of development it will soon have been permanently established in every state and territory.

Prior to 1938 there was but one full-time state supervisor. Now 38 states, the District of Columbia, Hawaii and Puerto Rico have supervisors. In two states, Massachusetts and Wisconsin, and in the District of Columbia there are two full-time supervisors.

Vocational guidance on a nation-wide scale had its beginning in February of 1938 when the U. S. Commissioner of Education made a ruling that Federal funds provided by the Smith-Hughes and George-Deen Acts could be made available for state supervision in this area. Pursuant to this ruling a new activity known as the Occupational Information and Guidance Service under the Division of Vocational Education of the Office of Education was established.

Formal organization of the service was effected upon the appointment, April, 1938, of Harry A. Jager as chief. Since that day the service has been active and has grown in personnel and responsibility throughout the country.

AVA at Initial Conference

The most important single conference held in connection with the establishment of the Occupational Information and Guidance Service took place at Jackson, N. H., in August, 1938. This conference was attended by J. C. Wright, Assistant U. S. Commissioner for Vocational Education, and members of the newly created service staff. For AVA members, however, chief interest lies in the important representation of the Association. Among those present were George H. Fern, at that time director of vocational education in Michigan; Lindley H. Dennis, executive secretary, AVA; Robert O. Small, at that time director of vocational education in Massachusetts; John J. Seidel, director of vocational education in Maryland; and Walter H. May, director of vocational education for New Hampshire.

Said Commissioner Studebaker describing establishment of the new service: "One of the noteworthy achievements was the conclusion that an occupational information and guidance service in order to serve vocational education well must also serve the institutions from which training schools recruit their membership. It is fair to report as the general sentiments of the conference two other conclusions: No factor which may affect the occupational outlook or educational competence of pupils should be omitted from a guidance program; and there is a further obligation, to make the educational world aware that the problems of earning a living are inseparable from the whole of educational processes."—*The New National Occupational Information and Guidance Service, John W. Studebaker, U. S. Commissioner of Education.* ***Occupations Magazine,*** *November,* 1938.

In his opening address at the 1938 annual meeting of the AVA in St. Louis, Paul W. Chapman said: "In the light of newly established policies which make possible state leadership for the establishment of occupational information and guidance services, the St. Louis Convention of the American Vocational Association for 1938 will go down in history as marking another important milestone in the progress of Vocational Education."—*Paul W. Chapman, Dean of the College of Agriculture, University of Georgia. Speech at the opening of the general session, AVA. St. Louis,* 1938.

Planks in a Platform

During this same meeting of the American Vocational Association much time was devoted to purposes and plans of the newly established Occupational Information and Guidance Service. Mr. Jager, who also addressed some of the sessions of the meeting, explained at this time to the membership some of the principles and the resulting practices which were adopted as a result of the Jackson conference, and of succeeding conferences, in which many persons noteworthy in guidance and vocational work took part. The functions of a local guidance service were represented as falling into the following six general categories, which today govern to a large extent the programs as they are developing throughout the country:

(1) The individual inventory of each person with whom a guidance program may deal, so as to make possible the accumulation, interpretation and the use of facts about his personal characteristics.

(2) The accumulation, interpretation and use of occupational facts on national, area, state and local bases.

(3) The counseling of individuals in the solution of their personal problems, involving the skillful interpretation of data just described under 1 and 2.

(4) The exploration of resources, in school and out, which may be used by the individual for his further training and education, and particularly to supplement experiences not available within the school walls.

(5) Placement and adjustment activities comprehensive enough to include both employment and any other phase of post-school experience.

(6) Follow-up activities, both of a service and an evaluative nature, so that opportunities may be discovered on the one hand to give further assistance through guidance activities to the individual in his post-school life; and on the other hand to secure data for the school for possible modification of its guidance and curricular practices.

Starting with the above philosophy and pronounced functions as a nucleus, the guidance movement on the Federal-State level has developed materially. With the

ever increasing importance of pre-service, professional, and in-service training of counselors and other officials, the colleges and universities have come into the picture as never before. They have employed specially trained personnel and established basic courses on the graduate level designed to provide for the training of counselors. They have made available summer work shops and special courses for counselors in service. As a result we shall soon have available throughout the country a much greater number of specially qualified counselors than we have had to date.

The present demand for counselors and other personnel workers in industry and in the many Federal agencies has amplified the need for guidance workers at the local level. The schools realize this need and are making available counseling services, in many instances, on a part-time basis relying on in-service training and summer school programs for the training of counselors.

Vocational guidance has made its phenomenal growth during the seven years of its existence because: (1) it has had for its leadership a body of intelligent persons devotedly giving their attention to this particular area of educational effort; (2) it has cooperated continually with other agencies and movements—school administrators, economists, personnel directors, psychologists, vocational educators, professional organizations, and other influential groups; (3) it has maintained its integrity by continuously outlining more clearly its own functions, and, best of all, by refusing to dodge its legitimate responsibilities.

If vocational guidance can continue to enlarge its field of service and produce measurable outcomes in those services, it will be able to render valuable assistance to local communities and local youth through the several areas in which it operates. Likewise its effect on vocational education will be beneficial through its program for the selection of better students, more attention to matching men and jobs and preparation for placement and vocational adjustment.

South Carolina Educ

PETERSON NAMED STATE DIRECTOR

VERD PETERSON, state supervisor of agricultural education for South Carolina since 1920, was appointed full-time state director of vocational education on September 15, 1945.

Increased need for both vocational education and vocational rehabilitation in the state as veterans return from the services and the nation demobilizes its war workers, prompted the South Carolina State Board of Education and state superintendent J. H. Hope to recommend appointment of Mr. Peterson to this new full-time position.

Mr. Peterson, oldest member in point of service in the state education department, started his work in South Carolina before the Smith-Hughes Act was passed and was the first state supervisor and state teacher trainer of agricultural education. Through the years he has worked to establish a program which would reach all of the farm people through organized instruction in all-day, day unit, and adult work in agriculture. Closely paralleling the agricultural program has been the homemaking education program and in recent years distributive education has been expending its services to the rural people in this predominantly agricultural state.

South Carolina had begun the establishment of community canneries and school farm shops before the advent of the Food Production War Training program and was able to provide a pattern which other states might follow in starting such cannery projects to meet the war emergency need. With added FPWT funds available, a rapid expansion was possible. There now are more than 250 school-community canneries in the state and every vocational agriculture department has a school farm shop. Both in-school youth and men and women of the communities utilize these facilities. Girls and women who come to the canneries to process their home-grown foods bring household equipment to the farm shop where they learn simple maintenance and repair.

The program of rural distributive education has been closely connected with farmer cooperatives and the F.F.A. and the schools now have feed mills for grinding feed (some owned and operated by the F.F.A.), incubators for hatching chicks, refrigeration units, and about 75 sweet potato curing houses holding 3,000 to 5,000 pounds of sweet potatoes each.

In addition to working directly with the farm people of the state through their local schools, Mr. Peterson has for fifteen years given courses in administration of vocational education in the summer session of the University of South Carolina Graduate School. Many general educational superintendents have enrolled to obtain information and assistance in the establishment and operation of their programs of vocational education.

Looking ahead Mr. Peterson sees an expansion in all of these services to the state.

"We now have vocational agricultural departments in three-quarters of our schools and growing programs of homemaking and distributive education. We need two vocational agriculture teachers in many of these schools and vocational programs in all of them. We need to work closely with all agencies and keep all, especially our school people, familiar with the different phases of vocational education so that all can cooperate for the improvement of agriculture, distribution, and home living in South Carolina."

Mr. Peterson is a graduate of the University of West Virginia in agriculture and education and did post graduate work at Cornell.

FARM TRAINING FOR VETERANS

Division of Vocational Agriculture

****

South Carolina State Department of Education
January, 1946

PROVISIONS FOR FARM TRAINING

Eligible veterans, under the Servicemen's Readjustment Act of 1944, are entitled to farm training. The veteran's eligibility for this training can be determined by filing his application for training with the Veterans Administration, Columbia, South Carolina. On approval by the Director of Veterans Education in the State Department of Education, farm training may be offered through any school with an active vocational agriculture department.

The veteran taking full-time training may receive subsistence as allowed by the Veterans Administration. Full-time training includes 344 hours annually. This training includes a combination of approximately 4 hours per week (200 hours annually) at the vocational department or suitable place; an average of 3 hours per week individual instruction on the farm (144 hours annually), and a minimum of 36 hours work experience per week on the farm under the supervision of the teacher of agriculture.

Part-time training may be taken by a veteran and he would receive subsistence allowance accordingly. The school through which the training is given will receive the proportionate part of the cost allowed for training.

Qualifications of Instructor

Regular teachers of vocational agriculture may teach up to 3 veterans on non-school time not covered by contractual commitment. They may receive monthly $12.50 per trainee, and a maximum of $5.00 travel expense per trainee incurred in the individual instruction on the farm. The charges listed above for teachers of vocational agriculture have been fixed with due consideration given to payment made by Federal Government for such courses under Smith-Hughes, George-Deen or other laws. When 4 or more veterans are placed in training, an assistant vocational agricultural instructor must be obtained. This may be done at the outset by cooperating with other schools in part-time services of an assistant instructor. When the assistant instructor is employed the regular vocational agricultural teacher may continue to receive a maximum of $37.50 per month for teacher training, supervision, and promotion work.

Assistant vocational agricultural teachers are expected to have one year or more of college agriculture plus farm experience. Such teachers must be approved for this program by the State Supervisor of Vocational Agriculture and be required to take necessary training arranged for and approved by the State Supervisor of Agriculture. This training will be carried out under the supervision of the district supervisors of vocational agriculture assisted by the Teacher-Training Department of Clemson College. Salaries of the assistant teacher of agriculture are to be set by the school board, as in the case of the regular teachers of vocational agriculture, based on training and experience and approved by the State Supervisor of Agriculture. Instructors meeting the qualifications and actually engaged in farming may be employed on a part-time basis when the circumstances are deemed justifiable.

Procedure for the Veterans

A. Veterans who are eligible for training (Public Law 346).
   1. Secure from Veterans Administration, Columbia, South Carolina or County

Service Officer Form 1950, fill out, and mail with a certified copy or photostatic copy of discharge to the Veterans Administration. In return the veteran will receive a Certificate of Eligibility Entitlement showing the maximum duration of the training period.

2. Contact his local school superintendent or teacher of vocational agriculture and get approval of his plans for farming, the training desired, etc. Complete the Plan for Farming Blank and submit to the local agricultural teachers or institution responsible for offering the training for approval and as a basis for the instruction to be given. Supervision of the training of veterans under Law 346 is entirely the responsibility of the school authorities.

B. Veterans having service connected disabilities (Public Law 16).
The Veterans Administration will be responsible for inducting disabled veterans into the agricultural courses. It is suggested that the veteran contact the Veterans Administration relative thereto.

Procedure for the School

School people secure cooperation of veterans organizations and other agencies in informing returned veterans of the opportunities for training.

Encourage veterans in filling out and filing Veterans Administration Form 1950.

Teacher of vocational agriculture assist veteran in planning his farming program and completing Plan for Farming Blank.

Each veteran taking farm training must be enrolled in a group made up of veterans for which training is provided.

The Certificate of Eligibility and Entitlement must be indorsed by the school, giving the information asked for on the reverse side and return to Veterans Administration, Columbia, South Carolina. No veteran will be enrolled for this training or entitled to subsistence until these forms are returned.

It is the responsibility of the school authorities and teacher of agriculture to see that these forms are promptly returned to the Veterans Administration, Columbia, South Carolina.

A. Suggestions to Agriculture Teachers:

1. Agriculture Teachers may locate and contact veterans through:
   a. FFA members and other pupils.
   b. County Service Officer.
   c. Civic and farm organizations.
   d. Local selective service boards.
   e. Preachers, doctors and other citizens.
2. Find out type of agricultural training the veteran desires.
3. Help the veteran fill out the necessary forms to qualify for this training.

Farm Training Program

1. Each school giving this farm training will work out an over-all course of study adapted to the types of farming in that area. Show hours of training required for each type of farming. This outline must be submitted to the Veterans Administration.

2. A teaching outline must be worked out for each veteran enrolled in farm training. This outline must be based on his farm worksheet. It must, also, contain jobs and activities necessary for training the veteran in the type of farming he is carrying on. This outline must be in the school file and one copy submitted to the District Supervisor of Vocational Agriculture and one to the Veterans Administration, Columbia, South Carolina.

It is understood that regular agriculture teachers can teach a maximum of three trainees on time other than his contractual commitment. A maximum of $25.00 per pupil per month including instructor's travel will be paid the school district.

Schools In South May Get Federal Aid

Senator Hill, Rep. Pace Say Bill May Pass

By JEAN CARPENTER

Washington, D. C.—Boys and girls in the South may get better schools.

It looks like there is a good chance congressmen from the South will get together and help pass a Federal Aid for Education bill. If the "folks back home" let their congressmen know they want this money for schools, the bill may be passed in time for next year's school term.

Senator Lister Hill, of Alabama, has been backing a bill in the Senate for some time. Now Representative Stephen Pace, of Georgia, has started a bill in the House.

Under these bills $300,000,000 would go to the states for education. Since they have more children, and need the money most, the Southern states would get more of this money. Schools in the South would get almost as much money from this bill as they now get from all the State Departments of Education.

Senator Hill has been fighting for Federal Aid for years. He has the support of a number of other Southern senators. "There is no section of the country which needs this money for its schools more than the South." Senator Hill says.

When he introduced his bill, Representative Pace said: "I want the boys and girls of the South to have just as good schools and training as the boys and girls who live in the rich states have."

Both Senator Hill and Representative Pace have made sure that the federal government will not control or supervise schools. The schools will continue to be run by the states. To get the money each state would have to agree:

1. To keep on spending as much money for schools as it is now spending.

2. To divide the federal money fairly between white schools and Negro schools.

Southern leaders think these are fair provisions and that all fair-minded Southerners will agree that they should be in the bill.

The National Education Association is backing the bill. Dr. R. B. Marston, who is with that organization, says that no matter how hard the South tries, it cannot catch up with other states in education. The South just doesn't have the money.

Education leaders say a Federal Aid for Education bill would put the South's schools 15 or 20 years ahead of what they are now. Without this aid they believe the South's boys and girls will always have a harder time in life because they do not have a chance to get a good education.

Loan To Britain Would Help Sell Cotton, Tobacco

By ESTES KEFAUVER
Member of Congress from Tennessee

The farmer will benefit if we can build up our trade with other countries. This is the only way we can sell our surplus farm products.

Foreign nations are like a farmer whose house and barn burned down. They have to borrow to rebuild the cities, factories, and bridges that were destroyed. Until they can do this they can't buy or sell much.

We in the South have to sell two of our biggest crops to foreign countries. Too much cotton and tobacco are grown to use just in the U. S.

The Flannagan Act which puts a limit on tobacco crop shows how the cutting off of foreign markets has affected the farmer in the U. S. In this case, our servicemen overseas had built a foreign market for American cigarettes, with their high burley content. One cigarette out of every three went to soldiers and sailors overseas.

Few people want to use crop control as a permanent way to keep prices up. Especially since we hope for an economy of abundance here in America. Our burley farmers are looking for a way to make burley-growing profitable without strict crop control.

Some say our veterans will buy cigarettes here at home as civilians just as they did overseas as soldiers and sailors. But the difference in prices will make quite a difference in the number of cigarettes they buy. Overseas they could get cigarettes at 50¢ per carton.

About the only way to increase the use of burley is by selling more to people in other countries. Many foreigners learned to like American cig-

(Continued On Page Eleven)

Do You Want Better Schools? Here's The Way You Can Help

If enough fathers and mothers let Congress know they want better schools, the Federal Aid for Education bill will pass.

Here are the ways mothers and fathers in the South can help get the Federal Aid Bill passed.

1. Write to your senators and representatives.

2. Get your P.-T.A.'s, farm organizations, church groups, home demonstration clubs, and other groups to send letters or resolutions. All it takes to get a letter written about this bill is for one man or woman to get up at a meeting and ask that the letter or resolution be sent. The secretary can write the letter.

3. Talk to senators and representatives who are running for Congress this year. Ask any candidates who are running against your senator or representative how he feels about it.

Send letters and resolutions to your senator to: Senator————, Senate Office Building, Washington, D. C.

Send letters and resolutions to the representative from your district to: Rep. ————, House Office Building, Washington, D. C.

Here is a list of Senators:

ALABAMA	MISSOURI
Sen. John Bankhead	Sen. Frank P. Briggs
Sen. Lister Hill	Sen. Forrest C. Donnell
ARKANSAS	NORTH CAROLINA
Sen. J. Wm. Fullbright	Sen. Josiah Bailey

Sen. Alben Barkley	Sen. Kenneth McKellar
Sen. Stanfil	Sen. Tom Stewart
LOUISIANA	TEXAS
Sen. Allen J. Ellender	Sen. W. Lee O'Daniels
Sen. John H. Overton	Sen. Tom Connally
MISSISSIPPI	VIRGINIA
Sen. Theo Bilbo	Sen. Carter Glass
Sen. James O. Eastland	Sen. Harry Byrd
WEST VIRGINIA	
Sen. Harley M. Kilgore	
Sen. Chapman Revercomb	

Word Contest Prize Winners Announced

William H. Fletcher, of Carrollton, Georgia won the first prize of $200 in cash in the Southern Farmer word contest. This was the first radio contest for new subscribers with the words, "You Should Read Southern Farmer."

Prizes for the second contest will be announced in the May issue. The third contest is now under way.

Second prize of $100 went to Mrs. Allen Tucker, Massillon, Ohio. Miss Pearl Block, Sarcoxie, Missouri, won the $50 prize, and W. Lindsay Lane, New Orleans, La., won fourth prize of $25.

All entries were carefully judged in the contest. The other 65 prize winners are listed on page 12.

Time To Use Your Vote

Your grand-daddy had a rifle that hung over the mantel piece. Chances are he didn't have to use it during his life-time.

There was a time when men took down their rifles and got into a fight because they wanted to vote. They even died to get that right.

The vote is like those old rifles. If you get practice in using it, you can do it well. If you don't the vote gets rusty.

There will always be a need for the right to vote. The common man in the South will have a better chance if he learns all he can about men who are running for office. He will have a still better chance if he speaks out and says what he thinks.

As the politicking season gets under way, every man and woman should begin getting ready to vote. Talk to your neighbors every day. Ask some questions. Make up your mind. Speak out.

GEORGIA **SOUTHERN FARMER** EDITION

Vol. 107 MONTGOMERY, ALABAMA, MAY, 1946 No. 5

Senator Taft Joins Friends Of Federal Aid

Washington, D. C.—Boys and girls in the South may have a good chance for better schools next year.

Senator Robert Taft, of Ohio, has joined with Senator Lister Hill, of Alabama, in backing the Federal Aid for Education Bill. This means there is now a better chance for the $300,000,000 bill to pass than ever before.

Senator Taft was against Federal Aid in the past. He is a conservative Republican. Friends of education here are glad that he has changed his mind. They are glad to give him credit for the help he has given them in getting behind the bill.

This bill, which Senator Hill has been trying to get passed for many years, leaves complete control of education in the hands of the states. It's purpose is to give boys and girls from poor states an equal chance in life with those from richer states.

Friends of education here believe that if the people throughout the country now get behind their Senators and Representatives the bill has a good chance to pass before the next school year. It will still take strong backing from voters throughout the country to get the bill through Congress.

You Can Help!

Maybe you don't like every thing the OPA has done. But if those "OPA price" tags are thrown away, you will pay even higher prices for shoes, clothes, plows, fertilizer.

Farmers all over the South are putting in crops now. They don't have much time for politics. If the "get rich quick" manufacturers have their way, it will take 15 pounds of cotton to buy a shirt instead of 10. So they are spending a little time writing letters to their Senators and Representatives.

The more who write, the more who get their lodges, farm organizations and other groups to write, the better the chance will be to save OPA.

Cutting Off The Dead Wood

Day Of The Demagogues Past?

Southerners are going to the polls to beat the machine politicians and demagogues as never before.

The machine politicians and demagogues were beaten in Augusta, Ga., recently. There the Cracker Party, led by Roy Harris, Speaker of the House, took a real licking. The independents led by young Bill Morris beat the Crackers 12,500 votes to 7,700.

Now it seems certain that Gene Talmadge will be beaten, either by young James V. Carmichael or E. D. Rivers.

In every Southern state, young Southerners, farmers, veterans, women, and working people are joining together in these fights.

In Tennessee young Ned Carmack already has a big following and is out to beat Senator McKellar, enemy of the TVA.

Senator Bilbo has two opponents and may have a third. Church leaders, farmers, women, and veterans are joining in the anti-Bilbo campaign.

The South already has many statesmen in Congress and State capitals. If these fights are won, it will have more of them.

Congressmen Cut Heart From OPA Bill

By GOULD BEECH

Washington, D. C.—The nation is on its way down the reckless road to inflation.

The OPA has been cut to pieces by the House. This means that if the Senate does not change the bill passed by the House, price control will be ended June 30. The bill passed by the House will do no good at all. Only a mass protest from the people can save the OPA.

Chester Bowles and Paul Porter, two leaders in the fight to save price control for another year, say that if the Senate doesn't act prices will go up at least 50%. But this price rise will benefit big industries most. The price the farmer gets will not go up anything like as much as the price he will have to pay for shoes, work shirts, tractors, plows, fertilizer, etc.

Wrecking the OPA is part of Big Industry's plan to "cash in" on the war. Every gun, plane, ship and tank produced by an industry during the war was turned out for a profit. Now that there are shortages of shoes, clothes, foods, tractors, building materials, these same manufacturers want to hit the public with more high prices.

The fight to kill the OPA was led by the Republicans. Many Southern Democrats joined the Republicans in cutting the heart out of OPA.

President Truman said he had hopes the Senate would pass a better bill that might save the OPA. However, powerful lobbies have been at work for months in Washington to kill the OPA.

It may be that OPA has not been run perfectly. However, the question is whether the farmers and wage-earners would be better off with OPA or with no OPA at all.

After OPA is dead it will be too late to stop inflation. The same men who want to kill OPA today are the ones who led the country through inflation after World War I followed by the crash of 1921. In that crash more than 450,000 American farmers lost their farms in 24 months.

Georgians Rally Behind Carmichael After Harris Defeat

(Special To The Southern Farmer)

Atlanta, Ga.—The political machines and the demagogues are not as happy in Georgia now as they were a few weeks ago.

Roy Harris and his Cracker Party, one of the strongest political rings in the country, have taken a bad beating in Augusta. The smashing defeat of Bill Morrison and the Independents has thrilled people all over the State who believe in decency and honesty in government.

Harris failed completely to stir up race hate in Augusta. His claim that he was leading a crusade to save the white primary was laughed at. Even after the election was over he was still shouting, "the Negroes did it." While the count did show that Negro voters in the county had voted against Harris by 4 to 1, it also showed that a big majority of white voters had also decided they had had enough of the Cracker Party. The final count showed 12,500 for Morris, 7,700 for Harris.

Now progressives throughout the state are ready to give Gene Talmadge the worst licking he's ever taken in politics. Talmadge as usual will try to win by stirring up race hatred. Since Harris couldn't win with the race issue, even with machine support, it is believed it will be easy to beat Talmadge.

However, it will take the solid support of all progressive forces in the state to insure a complete Talmadge defeat by a big majority.

This backing seems to be getting behind young James V. Carmichael. At the age of 36, Carmichael has already made a name for himself throughout Georgia. He served in the Legislature for two terms, and during the war was the manager of the big Bell bomber plant at Macon.

Immediately after Carmichael announced he would run, 22 newspapers in the state announced their support. Groups of voters who are in favor of decent, honest government also began working for him.

E. D. Rivers has also announced he will run. If Rivers stays in the race, it is expected that he will run third. Many fear that he may split the vote of those who are opposed to Talmadgeism.

Georgia has profited so much from Gov. Arnall's record that a big majority of the people do not want to go back to Talmadgeism.

SOUTHERN FARMER

Vol. 7. No. 8. August, 1946

'Well, Gene, We Got Him On The Wrong Road Again'

Georgia Chooses Four More Years Of Gene Talmadge

Atlanta, Ga.—Georgia is going to have four more years of Eugene Talmadge.

The combined Carmichael-Rivers-O'Kelly vote showed that at least 58 Georgians were against Talmadge to every 42 who were for him. Talmadge got a majority of the unit vote.

Talmadge succeeded in getting enough Georgians to believe that he was needed to save "white supremacy."

He created so much interest in "white supremacy" that he was able to get people to forget his record. He got them to forget the filthy chain-gangs, his veto of old-age pensions, the way he almost wrecked the State's colleges, and the way he used the National Guard like it was a bunch of Nazi storm-troopers.

Those who remember Talmadge's other three terms as a governor say there's no predicting what he will do. One thing is certain—he will look out for the interests of Gene Talmadge, Herman Talmadge and a few favored friends.

There are thousands of Georgia people, including many small farmers, who still have faith in Talmadge. They believe that "Old Gene" is really interested in their welfare.

In the past they have been satisfied to hear "Old Gene lay it on them." But many of them may be more interested in what Talmadge does for schools, roads, old-age pensions, farm markets, and keeping the prisons and chain gangs cleaned up.

So the test of Talmadge in the next four years will be what he actually does, rather than what he says.

'Thrill Of A Life-Time' For Texas Housewife Who Wins New Ford Car

When Mrs. Lois E. NesSmith answered her phone and heard the words, "You've won the new Ford Deluxe," we thought she would faint.

"It was the thrill of a life-time," Mrs. NesSmith wrote after the call. Mrs. NesSmith had never won a big prize before in a contest. Her husband is a rig-builder with an oil-well drilling crew. She has one daughter who is 19 years old.

Mrs. NesSmith is a housewife who likes to sew and can. "My pantry shelves are fairly bulging with cucumbers, beets, beans, tomatoes and peaches," she writes. "Everything but the peaches were raised in our garden."

Although entries in the contest came from many states, another Texas woman won the $200 second prize. She is Mrs. Carl Mullins, Rt. 3, McKinney, Texas.

Albert Robichaud, of Worcester, Mass.; won $100, the third prize. Maxine C. Prater, Jacksonville, Florida, won the fourth prize of $50.

All entries in the contest were judged carefully. Many of those who sent in lists of words failed to follow the rules. The most frequent violations were on plurals and proper names.

A committee of judges which included J. Mac Jones, outstanding young attorney; Mrs. Albert Thomas, leader in many civic activities and member of the Alabama State Personnel Board, and Miss Mary Elmore Persons, English teacher, decided the winners.

"We want to thank all who entered the contest," said Aubrey Williams, Publisher of the Southern Farmer. "All of the entries were judged fairly—and our only regret is that every person who entered could not win a prize. We will show our appreciation by continuing our efforts to make the Southern Farmer the friendliest and most interesting paper in the country—as well as the champion of all farm people."

Names of winners of $10 and nylon hose prizes are on Page 11.

What Does The South Need Most?

The South needs a program. It needs a program that may take 5, 10 or even 20 years to work out.

It needs a program because there's no sense in Southern people being satisfied with less than the people of any other section have. The Southern Farmer believes that Southern people can produce as much, and earn as much, as people anywhere—if they have the opportunity.

But Southern people don't have as much. Southern farmers don't have as much, and Southerners who have moved to town don't have as much.

We'd like to hear from our readers about what they think. We'd like to know what they feel are the reasons why Southerners on the farm and in town don't have as much. We'd like to know what they feel can and should be done to change this. Write us if you have any ideas.

Crippled OPA Passes, Congress Ready To Quit

Washington, D. C.—Congress finally passed an OPA bill. The bill has been cut and whacked in so many places that it may not work too well.

The feeling in Washington is that it's better than nothing. President Truman seems to believe that the only thing to do is to try to make it work. It is the only hope of heading off rising prices that would wreck the country.

Big manufacturers held down prices after the OPA was killed. They had hopes the country would be fooled into forgetting price control. In a few places new automobiles with an OPA price of $1,200 were selling for $2,500.

If there was no price control this would mean that tractors would probably sell for $3,000, and trucks at the same price.

From all over the country there were reports that people had stopped buying. Stores which sell to farmers said that Saturday trade had dropped off. After a week without price control, city people were also buying fewer things.

There was the general feeling that "we had better save our money because there are hard days ahead if inflation comes." There was even less buying on things that did not go up in price.

Selfishness, Greed

Now that the war is over, many people were trying to get rich quick off their neighbors. Every selfish group wanted to get the highest possible price for its product—and keep price controls on the other fellow. It was clear from the beginning that it would be unfair to keep price controls on some things and take them off others.

Many Congressmen who have the interest of the people at heart kept fighting against selfishness and greed. But they didn't have a majority. Too many could be bought, or influenced by lobbyists who had money to spend in the fight.

Congress Going Home

Now Congress is ready to go home. It leaves behind a lot of work. Very little of the administration's program has been passed. Here are some of the bills that were not passed:

Federal Aid for Schools. Still in committees. This means that hopes for more money for schools by September has been lost.

A housing bill. Veterans are still walking the streets looking for a place to live. The Senate passed a housing bill in April. The big real estate lobby has kept this bill from being passed by the House.

A health bill. Nothing has been done about this.

TVA fertilizer plant. This plant was killed on a day when only about half the members of the House were present.

Atomic Power. Not much has been said about the fact that the power of the atom can be used like electricity, gasoline or coal. Powerful business interests want to control this power. Others want the military brass hats to control it. But it should be kept in the hands of the people through government. Congress has not passed the bill which would guarantee government control.

SOUTHERN FARMER

VOL. 108. NO. 2. February, 1947

Governor Folsom Will Fight For Average Citizen

The biggest crowd in Alabama's history turned out to hear Big Jim Folsom take the oath of office as Governor on January 20. More than 100,000 farmers and working people who had supported the 6 foot, 8 inch champion of a revival of democracy were on hand.

Big Jim, who is only 38 years old, is the youngest Governor in Alabama's history. Those who know

Governor "Big Jim" Folsom

him say he will lead Alabama forward in a way that will challenge every Southern State.

He campaigned with his Strawberry Pickers, a hill-billy band from the farm country around Cullman County, and a mop and suds bucket. He promised to sweep out the old order. Here are some highlights from the speech he made at his inauguration:

"I believe in the kind of Democracy that goes back to the branch-heads and bush arbors. That's the kind of democracy that gives the average man and woman more to say about the way their government is run. That means we're going to get rid of worn-out restrictions on voting (the poll tax).

"If our democracy is strong, it has to have a regeneration every now and then. . . . I am not afraid of too much democracy. I am afraid of what happens to people when they have too little democracy.

"Our children are going to have a nine months school, free textbooks and an opportunity for a college education. A child must not be penalized for being born in Alabama.

"We must see to it that our old people are provided all the necessities of life. (A $40 a month old-age pension is his goal.)

"We're going to have cheap electric power all over Alabama. We're going to have it at every farmer's doorstep and in every factory.

"Those who own our natural resources—our ores, our coal, our river valleys—have got to use these resources for the development of our state."

o

Contest Winners

Names of winners in the latest Southern Farmer word-building game to be judged will be found on pages six and thirteen.

What does a Loan Cost You?

CREDIT FOR THE SMALL FARMER

How much you make on a crop this year may depen[illegible] on what you have to pay for c[illegible] Do you need to know wher[illegible] an cheap?

There w[illegible] n small farmers pai[illegible] r each $1.00 they b[illegible] pay 50% interest to [illegible] " it means that out o[illegible] les of cotton you raise [illegible] terest.

Here [illegible] e a few fa[illegible] credit that may help [illegible] loan at the lowest rate.

Where you go to get a [illegible] pends on—

What the money is to be used for.

How much you need.

How good your record is on paying back money.

How much assets you have—land, livestock, equipment.

At this time of year most farmers who need a loan want to use the money for putting in a crop. So let's

take a look at the Production Credit Associations. There is one of these associations near you. If you don't know where it is located, ask your county agent, vocational agriculture teacher, or another farmer.

The Production Credit Associations were made possible by the federal government. They are run by the farmers themselves.

If you need money for seed, feed, fertilizer, livestock, a tractor, plow, or other necessary expense, the Production Credit Association is the best place to go.

These loans are made for short terms. When you borrow from a PCA, you give a first mortgage on your crop. You pay only 4½¢ on the dollar for a Production Credit loan. And you pay interest only for the months you use the money.

There are, of course, good private banks which also make loans to farmers. You have to have good credit, though, and the interest rate is usually 6%.

Every farmer who gets a PCA loan has to join the association. His stock

costs him about $5.00 for each $100 loan. But he can sell this stock back as soon as the loan is paid.

Some farmers may not be able to get a loan from a private bank or a Production Credit Association. If you can't do this, the thing to do is to go to the nearest office of the Farm Home Administration. This used to be called the FSA, or Farm Security.

If you want to borrow money to put in a crop, or for livestock or workstock, the FHA can lend you money if you can't get a loan from a bank or any other agency.

The FHA makes "operating" loans for from one to five years. The interest rate is 5%.

On one year loans—which is the old "Seed Loan" program — you don't have to have a farm and home plan. If the loan is for more than one year, the FHA has to make

certain your farm program will be good enough to get you on your feet.

Suppose you want to buy a farm?

If you have some money to pay down, the best loan for you may be from a Farm Loan Association. These are under the Federal Land Bank system. There is probably a Farm Loan Association near you. These associations make loans up to

65% of the normal farm value of farm land. So usually you have to have some money to pay down to get one of these loans. The interest rate is 4%. The loans can be made for a long period of time. You can also get a Federal Land Bank Loan to pay off an old mortgage on your farm.

But maybe you don't have any money in the bank to make a down payment. There's still a chance you can buy a farm.

The Farm Home Administration makes loans to tenant farmers to buy farms. This agency can finance a farm purchase with no down payment. The cost of building a house or fixing up an old one can be in-

cluded. But, the farm tenant must have a good record. That is, he must be a good farmer and have a good reputation in the community. The interest rate on these loans is 3½ percent, and the loans can run up to 40 years.

The person to see about an FHA loan is your county FHA supervisor.

Right now it may not be a good idea to buy a farm. In some sections the price of farm land is too inflated. This makes it hard to find a farm that can pay off a mortgage if farm prices go down later.

Georgia Fears Talmadge Planning Dictatorship

Atlanta, Ga.—The big question in Georgia today is "Will our state have a dictatorship?"

Herman Talmadge has shown that he will use force if necessary to grab and keep Georgia under his control. "We read about dictators in Europe and South America grabbing power this way, but we didn't think it could happen here." This is the way one woman put it as she watched Talmadge's gang using force to clear out Georgia's state capitol.

When it became clear that Talmadge was not going to wait for the courts to decide the issue, the people of Georgia became aroused. They have made it clear that they are not willing for the courts to be put aside and replaced by the bayonet. Protest meetings have been held all over the state. Once the members of the Legislature learned how the people felt, they began to cool off too.

Young Talmadge got only a few hundred votes for Governor. It was on a basis of these votes that the Legislature "elected" him Governor. He would not have led with these votes except that when the boxes were counted from his home county there had been a mysterious increase in the number he received.

Talmadge has let it be known that he plans to stop the court cases against the Ku Klux Klan and the Columbians, which follows Hitler's "Youth Movement." It is also known that Georgia railroads put a lot of money into Talmadge's campaign fund. It is believed that if he becomes Governor he will forget all about the anti-trust suits against the railroads. These cases are part of the fight to get freight-rate justice for Georgia and the South.

Meantime, Lt. Gov. M. E. Thompson is waiting for court action to decide the case. He was also sworn in as acting Governor, and the Georgia Senate refused to remove the record of this action.

There is widespread fear in Georgia that if Talmadge does become Governor, democratic government will be lost. He has openly approved the Ku Klux Klan. It is believed that the Klan and the Nazi-inspired Columbians will carry out the same kind of program that Hitler's storm troopers and brown shirts did in Germany.

It is also clear that there are those around young Talmadge who are ready to carry out a widespread program of graft and bribery.

REPORT

OF THE

Adjutant General

OF THE

STATE OF FLORIDA

Salvation Army
Service Men's Center (white)
Service Men's Center (Negro)
Travelers Aid Lounges
YMCA - Servicemen's Program
YWCA - Servicemen's and Women's Program

III. Governmental Agencies Supported by Taxes

Atlanta Public Housing Authority
Carnegie Library
Atlanta Parks Department, Recreation Division
Decatur Recreation Board
College Park Recreation Council
East Point Recreation Council
Schools of Atlanta, Decatur, Fulton and DeKalb (Informal Education Programs)

CENTRAL SERVICES

The following organizations, financed through the Community Fund provide the central services described below.

Atlanta Community Fund

Conducts and Administers an annual financial appeal in the interest of 31 private member agencies.

Social Planning Council

Serves as the medium for fact-finding, coordinating, and planning for all programs of social and health services - governmental and private - in the Atlanta area; endeavors to build public opinion in support of sound programs of welfare and health by dissemination of information.

Social Service Index

Maintains a central index to the case records of social agencies thus aiding agencies; (1) in preventing duplication and overlapping of service, and (2) in planning, in the light of available information, their study and treatment of families and individuals applying for service.

Note: Two organizations, the Humane Society and the Atlanta University School of Social Work, which receive small allocations from the Community Fund do not appear on the preceding pages since their services do not fall into any of the catagories listed.

PLEASE ADDRESS ALL OFFICIAL COMMUNICATIONS TO THE STATE DIRECTOR

March 23, 1945

Mr. Guy B. Johnson, Executive Director,
Southern Regional Council, Inc.,
Room 432, 63 Auburn Ave., N.E.,
Atlanta 3, Georgia

My dear Mr. Johnson:

We have your letter of March 19, 1945 and have noted carefully the constructive aims of your Council. As we informed National Headquarters of Selective Service, we will be glad to be of any service within the range of the practicalities.

Concerning your desire to obtain statistical data on the selectees and volunteers from the one hundred and twenty counties in Kentucky, having in mind the heavy duties with which our boards presently are charged, a complete survey and preparation of data outlined would be a heavier burden than our local board clerks could undertake at this time. Recently through the Department of Education and the Dean of Kentucky State College, certain data were obtained and published in a mimeographed brochure under the general subject, "NUMBER AND CHARACTERISTICS OF THE RETURNING VETERANS AND PROVISIONS FOR TRAINING". Table 3 of that study embraces figures on the educational level of inductees. Trusting that it may be of some interest and value to you, we are taking the liberty of enclosing a copy of Table 3. The manner in which these figures were determined is described in the enclosure. While the sampling could not be regarded as very satisfactory, since only four out of 165 local boards in Kentucky are represented, there was considerable work in connection with its preparation on the part of the Department of Education, the efforts of which were supplemented by a representative of this State Headquarters.

Trusting this may be of some interest to you and with best wishes for your organization in the attainment of its objectives, we are

Very sincerely,

Frank D. Rash

First year college	2.6	1.1	7.9	1.2
Second year college	3.0	.3	4.9	.9
Third year college	1.4	.6	3.5	.3
Four year college	3.5	.3	0.0	.0

In Table III is presented a sampling which represents a total of 5,697 persons who were inducted or who enlisted in the services according to the records of four different draft boards in Kentucky. The sampling includes one large area in the west central section, one western area, and one northeastern section of the state. In the attempts to gather figures, every other name which appeared in the records of the four draft boards was chosen. The percentages found in the Table below represent 4,662 white persons and 1,035 Negroes.

When the data in this table are considered in connection with the percentages which were presented in Table II, it is found that slightly larger percentages of the disabled veterans are found in the lower grades than occur in the percentages of the sampling of white and Negro inductees. Also, it may be noted that although a larger percentage of the disabled veterans reached the eighth grade level than those represented by the sample, fewer disabled veterans attained the high school level than did the inductees. Of the disabled veterans who attended college, there appear larger percentages in the first and fourth years than for the inductees. For each of the four years of college, the general average of percentages of the disabled veterans is higher than that for Negro inductees.

March 30, 1945

Mr. Guy B. Johnson, Executive Director
Southern Regional Council, Inc.
Room 432, 63 Auburn Avenue, N. E.
Atlanta 3, Georgia

Dear Mr. Johnson:

In accordance with request contained in your letter of March 19, 1945, there is attached hereto a list of the number of selectees and volunteers from the various Local Boards of Louisiana by race.

Information as to the schooling and other characteristics is not available. Probably the information furnished will be of some value to you in planning your program.

With best wishes, I am,

For the State Director:

W. D. SHAFFER
Colonel, AGD
Executive Officer

Spiers** Sunday at 3 o'clock from the chapel of Awtry & Lowndes,

News of Atlanta's Negro Community

By WILLIAM Y. BELL JR.

Under the leadership of Hubert M. Jackson, University Homes project manager; President Rufus E. Clement, of Atlanta University, and Robert Wilson Jr., local businessman, Negro Atlantians, tomorrow will launch a Red Cross campaign for funds which is expected to exceed by a wide margin the amounts contributed in former years.

"Because of a happy circumstance, I have been fortunate enough to learn at first-hand about the immense amount of work currently being undertaken wherever American forces are located by the American Red Cross," said Chairman Jackson, who only recently returned from duties in the South Pacific as a Red Cross field director.

"If the people back home are able to imagine only a small part about what the Red Cross means to the men in the fox holes, those behind the lines, and to their families here at home," he continued, "I know that they will give unstintedly during the approaching campaign."

He announced that an excellent corps of volunteer workers has been obtained for the drive and expressed the hope that additional solicitors will donate their services to support further the work of the following chairmen and the groups they will cover:

Group Chairmen

Dr. Forrester B. Washington, Atlanta School of Social Work; President J. W. Haywood, Gammon Theological Seminary; President J. P. Brawley, Clark College; President W. A. Fountain Jr., Morris Brown College; President Rufus Clement, Atlanta University; President B. E. Mays, Morehouse College, and President Florence Read, Spelman College.

C. A. Brown, Guaranty Life Insurance Company; S. W. Walker and Jack Johnson, Pilgrim Life; W. M. Clement and S. S. Abrams, North Carolina Mutual; Gilbert Earle DeLorme Sr., Atlanta Life; and J. A. Batts, Afro-American Life Insurance Company.

Lucius Smith, Herndon Homes; J. R. Henderson, Eagan Homes; Mrs. A. R. Hill, Grady Homes; H. M. Jackson, University-John Hope Homes.

Miss Ella Ramsey and Mrs. Lucille Keele, beauticians' groups; George Ogletree, barber shops; A. C. Christal, service stations; Colonel A. T. Walden, taxicabs and theaters; H. M. Ivey, morticians; J. R. Wilson Jr., other retail stores.

Mrs. Rosa Walker, Parent-Teachers' Association groups; Miss B. E. Usher, public schools; John Glenn, labor unions; Dr. C. W. Reeves, physicians; Dr. L. V. Reese, dentists; James Hunter, social agencies; V. W. Hodges, publicity.

School Needs Listed

Nearing the end of their report on public school facilities for Atlanta's Negro school children, members of the special research committee listed several specific needs, the satisfaction of which they believed would improve not only the school system, but would result ultimately in widespread civic betterment as well.

In the absence of population data on Negro children 5 years of age, and of information on the percentage of these children who would attend kindergartens, it was necessary to make an approximation of the kindergarten needs. Researchers arrived at the approximation by assuming that the Negro kindergarten-elementary school ratio would be the same as the corresponding white ratio.

"This assumption gives an estimated kindergarten enrollment of 1,694," they said. "This estimate is probably low since Negroes, because of their economic status, may be more likely to take advantage of public kindergartens than whites. Using the teacher-pupil ratio of 50 for white kindergar-

Hines to Track '4 Freedoms' for Negro Veterans

NEW YORK, March 17.—Brig. General Frank T. Hines, administrator of Veterans Affairs and administrator of Retraining and Reemployment, promised this week at a meeting of the National Urban League, in Times Hall, according to the New York Times, that the government agencies under his direction would observe a policy of "four freedoms" for Negro war veterans.

These freedoms, which General Hines said were based upon programs that already have been adopted by many Negro leaders, were: "Freedom from discrimination in the administration of the law; freedom from inequality in expenditures for health, hospitalization and rehabilitation; freedom from obstacles and prejudices, which prevent equal work opportunity and equal pay."

Mrs. Lillian N. Poses, regional attorney for the War Manpower Commission; J. Raymond Walsh, economist for the Congress of Industrial Organizations; Nelson H. Cruikshank, director of the social insurance activities of the American Federation of Labor, and Captain C. S. McDowell, general manager of the Arma Corporation, were others who discussed post-war employment opportunities for

Lawyers' Title Here Insures $370,277

Local realty transactions on which titles were insured last week by the Lawyers' Title Insurance Corporation, including those examined by its affiliated attoneys and the Atlanta Title Company, totaled $370,277.

This included 46 property transfers, involving $217,067, which were listed, and other transactions, mostly loans, which were not detailed. The latter amounted to $74,020. Tittles insured on properties in other Georgia counties amounted to $79,190, making the total $370,277.

Building Products

Many of the building products placed on the market after the war will be produced in the new modular sizes, Tyler S. Rogers, chairman of the Technical Committee of Producers' Council, Inc., has announced.

666 MORELAND AVE., N. E., corner Blue Ridge. This two-story, 12-unit brick apartment has been bought by J. E. Faver from Yancey Investment Company. The transaction was handled by Charles A. Ewing, of the J. H. Ewing Realty & Loan Company, realtors.

Real Estate

GEORGE ERWIN, Real Estate Editor

State Real Estate Board Parley Opens Monday

Taxation, Rent Controls, Urban Development And Building Laws to Be on Agenda

Real estate board presidents and secretaries of the Georgia Association of Real Estate Boards will open their conference here Monday at the Biltmore Hotel. Van Holt Garrett, Denver, newly elected president of N. A. R. E. B., will conduct the meeting, which will last throughout the day.

Subjects to be covered on the conference program, according to C. D. LeBey, president of the Atlanta board, include incentive taxation for the encouragement of postwar construction; increased fiscal powers for local government; local taxation; residential and commercial rent control; urban redevelopment, and removing obstructions to the building industry.

The Atlanta Real Estate Board will be host to the presidents and secretaries coming from this area.

RUSE, Mr. Clarence L., of 76 Maddox Dr., N. E., died March 17, 1945. Surviving are his wife; sisters, Mrs. P. R. Lochicotte, Mrs. Katrina Ruse Harris; neice, Mrs. Enos Hartman; nephew, Mr. L. J. Harris Jr.

GARVIN Lynn, the little son of Mr. and Mrs. Leonard J. Garvin, of 377 Peeples St., S. W., died March 17, 1945. Also surviving are his grandparents, Mr. and Mrs. F. C. Garvin.

ministrator of Retraining and Reemployment, promised this week at a meeting of the National Urban League, in Times Hall, according to the New York Times, that the government agencies under his direction would observe a policy of "four freedoms" for Negro war veterans.

These freedoms, which General Hines said were based upon programs that already have been adopted by many Negro leaders, were: "Freedom from discrimination in the administration of the law; freedom from inequality in expenditures for health, hospitalization and rehabilitation; freedom from obstacles and prejudices, which prevent equal work opportunity and equal pay."

Mrs. Lillian N. Poses, regional attorney for the War Manpower Commission; J. Raymond Walsh, economist for the Congress of Industrial Organizations; Nelson H. Cruikshank, director of the social insurance activities of the American Federation of Labor, and Captain C. S. McDowell, general manager of the Arma Corporation, were others who discussed postwar employment opportunities for Negro veterans at the forum.

General Hines estimated that after the war there would be a load of at least 1,000,000 Negro veterans to be served in re-employment. He said that 750,000 of these came from the South, and that about 70 per cent of this number were from farms. Asserting that it was unlikely that all of them would wish to return to the farms or even to the South, he urged that studies be made as to the best place and method of utilizing the new skills they have acquired.

Declaring that the Negro has not always had an opportunity to receive an education commensurate with his ability to absorb and utilize advanced learning, General Hines predicted that the "GI Bill of Rights" would open doors that are now closed to him. After defining the "four freedoms," General Hines continued:

"I do not pretend that these freedoms are always easy to attain. Indeed, the present conflict proves that those rights to which we are often most entitled are the most difficult to attain. But in the administration of my responsibilities it shall be my continued official and personal policy to secure for all veterans, irrespective of race, color or creed, the full measure of right to which they are entitled by reason of the laws which Congress has written and by reason of the glorious pages of our history which the veteran himself has written."

During a question and answer period General Hines was asked whether the Veterans Administration intended to follow a policy of segregation in building future veterans' hospitals. He replied that before deciding that question he would attempt to find out what Negro veterans really wanted.

IF RHEUMATIC PAIN
HAS YOU DOSING AND HOPING
Then prove to yourself what effective results you can get now with this medicine

Open your own way toward deliverance others have enjoyed. Make up your mind you're going to use something that gets to work on rheumatic pain. You want help you can feel. So get C-2223, if you suffer from rheumatic pain or muscular aches. Don't be put off with ifs or buts. Caution: Use only as directed. First bottle purchase price refunded if not satisfied. 60c and $1.00, get C-2223.

If You Get Up Nights You Can't Feel Right

If you have to get up 3 or more times a night, your rest is broken and it's no wonder if you feel old and run-down before your time. So if you Get Up Nights or suffer from Bladder Weakness, Painful Passages, Backache, Leg Pains, Nervousness, Rheumatic Pains, or Swollen Ankles, due to non-organic and non-systemic Kidney and Bladder Troubles, you should try **Cystex** (a physician's prescription). Usually, the very first dose of **Cystex** goes right to work helping the Kidneys flush out excess acids and wastes which may have caused your trouble. So take **Cystex** exactly as directed and watch for quick help and a rapid increase in pep, more youthful feeling and joy in living. **Cystex** must surprise and delight you, and satisfy completely or you simply return the empty package and your money back is guaranteed. Don't suffer another night without trying guaranteed **Cystex**—only 35c. *Tear this out: take to your druggist; be sure to get genuine, guaranteed* **Cystex.**

John Glenn, labor unions; Dr. C. W. Reeves, physicians; Dr. L. V. Reese, dentists; James Hunter, social agencies; V. W. Hodges, publicity.

School Needs Listed

Nearing the end of their report on public school facilities for Atlanta's Negro school children, members of the special research committee listed several specific needs, the satisfaction of which they believed would improve not only the school system, but would result ultimately in widespread civic betterment as well.

In the absence of population data on Negro children 5 years of age, and of information on the percentage of these children who would attend kindergartens, it was necessary to make an approximation of the kindergarten needs. Researchers arrived at the approximation by assuming that the Negro kindergarten-elementary school ratio would be the same as the corresponding white ratio.

"This assumption gives an estimated kindergarten enrollment of 1,694," they said. "This estimate is probably low since Negroes, because of their economic status, may be more likely to take advantage of public kindergartens than whites. Using the teacher-pupil ratio of 50 for white kindergartens, we find that 34 kindergarten teachers and classrooms are needed for Negroes."

Following their earlier comments, members concluded that a vocational high school, centrally located, should be provided for Negro pupils.

Need Teachers

The need for additional teachers also was pointed out by the committee. Applying the white teacher-pupil ratio of 29 to the 1941-42 Negro elementary pupil load, members found that 409 teachers were needed on the basis of standards. This represents a present need of 254 additional Negro elementary teachers.

"In 1941-42," they went on, "there were 3,726 Negro junior high pupils, who on the basis of 29 per teacher, would require 128 teachers. This represents a need of 58 additional teachers for the junior high division.

"In 1941-42, there were 1,940 Negro senior high students, who, on the basis of a teacher-pupil ratio of 29, would require 67 teachers. This represents a need of seven teachers in the senior high division."

All in all, the educators found that on the basis of the 1941-42 data, there is need for an addition to the teaching force of 353 Negro teachers. It also was learned that Atlanta is not employing at least 100 teachers for which the State Department of Education already has funds and is willing to subsidize.

Van Paassen Talk Wednesday Night

Pierre Von Paassen, journalist and lecturer, will speak Wednesday at 8:30 p. m. at the Progressive Club, 1050 Techwood Drive, N. W. His subject will be "The World Situation and the Winning of the War and the Peace." His address is being sponsored by the local district of the Zionist Organization of America.

As a feature writer and roving correspondent for the New York Evening World, Mr. Van Paassen scored many journalistic scoops. He has toured Italy and crossed Germany several times since the Hitler regime. He was with the Ethiopian forces in the resistance against the Italian Facists and in Spain after the outbreak of civil war there.

Mr. Van Paassen's book "Days of Our Years," published in 1940, reportedly sold close to 500,000 copies. Among his other best sellers are "The Time Is Now," "That Day Alone" and "The Forgotten Ally."

The lecture will be open to the general public and there will be no admission charge.

Survived Broken Neck

BOSTON—(U.P.)—Massachusetts' new U. S. senator—Leverett Saltonstall—is probably the only man in Congress who has broken his neck. He suffered the often-fatal

Many of the building products placed on the market after the war will be produced in the new modular sizes, Tyler S. Rogers, chairman of the Technical Committee of Producers' Council, Inc., has announced.

666 MORELAND AVE., N. E., corner Blue Ridge. This two-story, 12-unit brick apartment has been bought by J. E. Faver from Yancey Investment Company. The transaction was handled by Charles A. Ewing, of the J. H. Ewing Realty & Loan Company, realtors.

CAPITOL VIEW MANOR—587 Erin Street, S. W. This modern five-room gray asbestos weatherboard home, in the $7,500 class, was bought by Mrs. J. B. Baker Jr., from Mrs. Lillie A. Summerour. The sale was handled by Roscoe B. Gann, of Gann Realty Co.

PRETTY DECATUR BUNGALOW—154 McLean Street. This one-and-one-half story asbestos bungalow was recently purchased for a home by Guy B. Foster from Dr. Fred Mayes. The transaction was handled by Mrs. Paul Green, of Cary Bone Realty Company, realtors.

MORNINGSIDE BRICK—1697 Pelham Road, N. E. This home was recently purchased by Harry Goodman from Dr. W. T. Rogers. The transaction was handled by Milton Smith, of D. L. Stokes & Co.

Brewer-Head Sales Amount to $71,300

Recent sales closed by Brewer-Head Realty Company, realtors, amounted to $71,300, it was announced here Saturday by Capus B. Brewer, firm member. Details of transactions follow:

Estate of E. P. Dobbs to Mrs. Helen C. Wallace, 729 McMillan Street; Mrs. T. E. Harrison to Nick Johnson, 581 Angier Avenue; Suburban Coach Co., Inc., to A. D. Brochi, vacant lot, corner Merritts Avenue and Bedford Place; Rhodes Estate to Clifford Sloan Drennon, vacant lot, Garnett Street; Fred Archer to Harry and Odessa Hough, 570 Whitehall Terrace; Elizabeth Sims to Harry Paschal Jr., 897 Mitchell Street; Mrs. Faye Brown to J. R. Wilson Jr., vacant lot, Forrest Avenue; Rhodes-Haverty Investment Company to Dr. Murdock Equen, vacant lot, Juniper Street; Mrs. Cynthia G. Aiken to Mrs. Helen T. Yarbrough, 773 Cascade Avenue; Fred Archer to Henry Lee Harrington, 572 Whitehall Terrace; W. J. Davis Jr. to J. D. Benton, 652 Hugh Street; J. H. Porter, trustee to Norciss and Matilda Waller, 131 Pear Street; Mrs. Ella Rosser to Mrs. Edna Daniel Bowden, 569, 630 and 632 Utoy Road; Mrs. Jeanette Kornegay and Mrs. Georgiana Manoe to E. E. Graham, 1449 Graham Street; Mrs. Mae S. Atwell to L. M. Mann and Florine N. Mann, 772 Cascade Avenue; Chas. C. Schoen Sr. and Chas. C. Schoen Jr., to Mrs. W. A. Dodge, 494-502 Connally Street; Chas. C. Schoen Sr. to Mrs. W. A. Dodge Jr., 443 Fraser Street and 37 Solomon Street.

Adams-Cates Sales $35,350 for Week

Three sales totaling $35,350 were closed last week by Adams-Cates Company, realtors, it was announced Saturday by Henry H. Robinson, salesmanager. Details follow:

Mrs. Alice Orr Miller and Mrs. Lena Orr McCray to Ben J. Massell Jr., a vacant lot on Walton Street, through John O. Chiles; Mrs. Nellie Stewart Dean to Estes E. Parker, 26 Ivy Street, also handled by Mr. Chiles; Sidney E. Goldberg to Mrs. Mary Jane Altman, 814 Highland Terrace, N. E., through W. Hoke Blair.

Rankin-Whitten Sales $175,200 in Two Weeks

Sales closed by the Rankin-Whitten Realty Company, realtors, for the first two weeks in March amounted to $175,200, it was reported Saturday by Jack Salmon, salesmanager. This comprised 10 homes, one vacant lot, one business property and one duplex. Salesmen participating in this volume were R. C. Bell, C. H. Britt, Harold Denson, Elkin Rice and Nat Thornton.

FHA Dividend Checks

The Federal Housing Administration has begun delivery of its first dividend checks to home buyers, with the payment of the initial dividend check to Gerald O. and Jean Holdridge, in Baltimore. This is in line with the recent announcement that approximately 13,000 home buyers who paid off their FHA-insured mortgages in full during 1944 would receive dividends from the Mutual Mortgage Insurance Fund.

Approximately 13,000 home buyers who paid off in full mortgages insured by the Federal Housing Administration during 1944 will receive mortgage prepayment dividends in the next 60 to 90 days, it has been announced by FHA Commissioner Abner H. Ferguson. He stated that the FHA has paid all expenses and losses out of income, and now has approximately $83,000,000 in the Mutual Mortgage Insurance fund to pay future losses.

1145 W. PEACHTREE ST., N. E.—This two-story brick veneer apartment of 19 units has been sold by the Lipscomb-Ellis Company, realtors, to Miss Jean Lochridge.

Lane's to Enlarge Buckhead Store

Lane Drug Stores Saturday announced plans for remodeling and enlarging their Buckhead store at 3081-85 Peachtree Road. H. C. Naylor, president of the drug chain, said that the changes will provide for a large superstore embracing more than 5,000 feet of floor space.

"This is in line with the general Lane plan of building large superstores in the better shopping centers throughout the Southeast," said Mr. Naylor.

The owner of the property, Mrs. Elizabeth Reid LeBey, is represented by C. D. LeBey, while Mr. Naylor handled negotiations for Lane.

Alleged Forger Admits Guilt, Is Given Bond

Ewell A. Nix Jr., 21, 1231 Woodland Avenue, S. E., an employe of the U. S. Division of Engineers, was free under $100 bond here Saturday after pleading guilty Friday before U. S. Commissioner David J. Meyerhardt to charges of forging an endorsement and attempting to cash a check for $190.31.

When arraigned before the U. S. commissioner, Nix said he had endorsed a check with the signature of John H. Triplett, but was unsuccessful in trying to cash it.

SAFE LOANS
for Home Owners

1. **Where is your mortgage? Is it held by a local, friendly institution with local directors who understand your problems? Will it be sold?**
2. **Is it the safest plan? Do interest payments become smaller each month? Are there hidden interest charges? Does it give your family a clear home within a definite period?**
3. **Is it the easiest way to pay for your property? Is it a prepayable plan?**
4. **Does it provide for tax payments and proper insurance? Can it be rewritten?**

If you cannot answer these questions with satisfaction, we invite you to have a friendly chat with the officers of the

IN REPLYING REFER TO NO.

1-18-000 (Restricted Information)

March 31, 1945

Southern Regional Council, Inc.
Room 432
63 Auburn Avenue, N. E.
Atlanta 3, Georgia

Attention: Mr. Guy B. Johnson
Executive Director

Dear Sir:

Reference is made to your letter of March 19, 1945 in which you request statistics on selectees from the various counties in Texas. We regret that Selective Service Regulations read in part as follows:

> "No cumulative figures or totals will be released by anyone in the Selective Service System covering a period of time or a geographical area by which either total registration or total induction may be computed, averaged, or reasonably estimated, either on a local board, State or National basis."

We may say however that approximately 80,000 Negroes have entered the armed forces from Texas. No educational statistics on registrants or selectees have as yet been compiled.

We have made a sample study of the principal causes for the rejection of registrants examined during a five months period in Texas. You will find attached a list showing the principal cause for rejection and the percentage of white and Negro registrants rejected under each cause. It is believed that this will be of greater help to you than any other figures which we are permitted to furnish at this time.

Please bear in mind that all of this information is restricted and must not be published, disclosed, or furnished to the public. It is given you for planning purposes with the full knowledge that it will be held in confidence. We regret that we cannot give you further information until the emergency has passed but feel sure that the percentage figures given on the attached list will be of great assistance in planning your worthy campaign to improve the condition of the Negro.

Very sincerely yours,

J. WATT PAGE
Brigadier General, USA
State Director of Selective Service

Attention - Mr. Guy B. Johnson
Executive Director

Gentlemen:

We are enclosing herewith some statistical data which we trust will aid you in developing the program you mentioned in your letter of March 19, 1945.

Please note that the data shows the number of men in the service, discharged, fathers and non-fathers, white and colored. These figures were obtained from national reports we received from time to time and obviously there is a considerable time lag involved. If you will add 25% to the figures shown you will more closely approximate the actual numbers involved as of May 1, 1945.

We regret very much that it is impractical to give you such other information as you requested. Confidential matter, of course, cannot be furnished to you. Information such as school records would necessitate making a survey of all the local boards in the State which would be very costly and for which neither personnel nor funds are available.

For the State Director:

John Roehlk
Captain - CAC-AUS
Ass't. Manpower Officer

TABLE II

General Estimated Distribution By Plans
of Negro Enlisted Men

	Per cent[a]	Total Negro EM (1.2 million)	Negro EM Returning to South (694,000)
Full-time school	8.0	96,000	56,000
Own businesses	9.5	114,000	66,000
Full-time farming[b]	8.5	102,000	87,000
Government jobs	15.0	180,000	104,000
Stay in Armed Forces	1.0	12,000	
Join labor force as workers[c]	58.0	696,000	375,000

Source: Reports of Army Service Forces and Table I of this discussion.

[a] An arbitrary percentage arrived at by taking the total percentage with definite plans plus one-half the percentage with tentative plans in each category (see Tables B and D). This gives a rough estimate as to the magnitude of various categories.

[b] Eighty-five per cent of the men in this category plan to return to the southern region.

[c] Includes those men who may take industrial refresher courses, apprentice training, or part-time regular schooling.

VETERANS

YOUR GUIDE TO SURPLUS PROPERTY

WAR ASSETS ADMINISTRATION
DIVISION OF INFORMATION
Washington, D. C.

To Veterans of World War II

Your Guide to Surplus Property

It is the job of the Administrator of War Assets to see that every World War II veteran who wants to buy surplus property gets an opportunity to choose from available stocks.

This booklet tells you about your priority rights and how to exercise them in buying what you want.

But please remember—WAA can sell only what has been declared surplus by the Federal agencies—including the military services. Many of these items are in short supply. These have been set aside for veterans but there will not be enough for all who want them.

It will require patience and persistence to secure many surplus items. You may be disappointed in not getting what you want.

Give this brief guidebook your careful attention if you are interested in buying surplus stocks. Call on your nearest WAA regional offices for assistance. I want to help every veteran get the surplus item he needs, if it is possible.

Robert M. Littlejohn
Administrator.

PRIORITY RIGHTS OF WORLD WAR II VETERANS

Your veteran's priority to buy surplus goods requires proof that you served in the Armed Forces after September 16, 1940, and were honorably discharged or released.

You are a Veteran, so

You can buy for personal use or for business, professional or agricultural use, certain items *set aside* for sale to veterans. These *items* are listed on the *Set Aside List* posted at each WAA office. *(Items for personal use may not be so purchased for resale.)*

You have a priority below that of Federal agencies for their own use. You may buy any surplus property (except real estate) for use in your own business, professional, or agricultural enterprise (including an initial stock for re-sale), or for a use directly required by your employment.

For example:

A doctor (veteran) may purchase medical equipment or supplies, a merchant may buy his store fixtures, or a lawyer might buy desks and other office equipment. Depending on the ability to buy and the type of business, a veteran can purchase an initial stock to start a new business. A veteran may have a job requiring him to own a tool kit. Such use also gives him a priority to buy.

FIRST:
apply for a Veterans Certificate

1. Be certified as eligible to buy surplus *with priority* by giving evidence of your veteran status at the nearest Veterans' Certification Office in person or by mail.

2. Bring or send your Honorable Discharge or a photostatic copy to any of the 138 Certification Offices located throughout the United States. (See list, pages 8 & 9.)

3. When your application is approved you receive a certificate authorizing you to purchase surplus stock offered or listed for sale.

How to Use Your WAA Veteran's Certificate

1. When you are certified ask that your name be placed on the WAA mailing list in your region. You will be notified by mail if the surplus you desire is offered. *Also* watch local newspapers for advertised sales.

2. Watch the newspapers closely for announcement of time and days during which surplus items are offered for sale *exclusively* to veterans.

3. Present your certificate at time of sale.

4. Veterans purchasing items for resale will be sold only such surplus (known as an *initial stock)* as they require to establish their business.

Aid to Veterans

You can get all available information on how, what, when and where to buy surplus stocks by inquiring at your nearest WAA regional and certifying offices.

Veteran's consultants (themselves veterans) are in each WAA office to help you find the property you want, and otherwise assist you.

A Reminder:

You follow these steps to buy surplus . . .

1. Decide what you want.
2. Get certified as a veteran, eligible to buy.
3. Watch for announcement of sales.
4. Take certificate to sale.
5. Buy surplus you want.
6. Arrange for delivery.

SET ASIDE LIST

World War II veterans have been given the buying preference on major surplus stocks in short supply.

WAA has *set aside* these short-supply items for sale to *veterans*. (Emergency requirements of the Federal Public Housing Authority, the Civilian Production Administration and the Army and the Navy may be met out of such surplus.)

These are goods in heavy demand by all buyers, but WAA has given veterans first call on them.

Bear in mind that there are not sufficient amounts of these set-aside items to satisfy the demands of all veterans.

Therefore, in fairness to all, veterans are offered set-aside items in the order in which they have been certified.

You may secure information about current items on the veteran's set-aside list by inquiring at any WAA office.

HOW YOU CAN BUY SURPLUS

As a certified veteran you may buy surplus:

1. Through a WAA regional or sub-regional office.
2. At a "Site Sale," where accumulations of surplus are sold "at the site" of their location.
3. At a "Spot Sale," where mixed lots are brought together in a convenient place for sale, and at auctions.

In each case you should look for announcements of surplus sales in advertisements. Wherever possible, WAA makes provision for prior inspection of the surplus products or of samples of items on sale.

You Can...

Visit or write your WAA regional and sub-regional sales offices which handle most types of surplus. (See list on back for the WAA office nearest you.)

Always list the surplus products you want. You must make your inquiries specific, using customary trade specifications.

You Should Know that...

Fixed Prices prevail wherever possible. In practice these are largely below the original cost, depending on condition, model and date of construction.

Veterans have top priority on the "Set-Aside" list and No. 2 priority, next to the Federal Government, on other surplus.

You should watch for Sales-at-Site, which are announced by newspaper advertisements and often by radio announcements. For some sales, certified veterans will also receive individual advance notice. These Site Sales are on a "First Come, First Served" basis.

You may inspect and purchase *set-aside items* at Sales-at-Site when such items are offered *but only when notified to do so by the Veterans' Division at the regional office.*

You may exercise your priority on set-aside items by presenting your Veteran's Certificate, together with your WAA advance notice, at the Site Sales office.

As a veteran, you may also buy other than set-aside items at Site Sales under your general veteran's priority.

Non-Priority Purchases

Veterans, if they wish, can also buy without priority, at such times or sales when surplus is offered on a non-priority basis.

To Sum up:

As a veteran there are *three* ways in which you may buy:

1. From the Set-Aside lists, exclusively for veterans.

2. From WAA stocks (other than set-aside items) with veteran's priority next to Federal Government.

3. With the general public, without priority.

You May Use Your Credit

War Assets may extend credit to financially responsible buyers. For complete information, visit or write to the Credit Division in the War Assets Regional Office for your region.

Shipping

War Assets will prepare and load all purchases for shipment but the purchaser must give shipping instructions at time of sale and must pay shipping costs.

FREE BOOKLET ON SURPLUS PROPERTY

For description of major classes of surplus goods and how they are sold, request copies of informational pamphlets describing "How," "What," "Where" of Surplus Disposal—free upon request at your WAA regional office.

How... What... Where...

OFFICE OF INFORMATION • WAR ASSETS ADMINISTRATION • WASHINGTON 25, D. C.

ATLANTA AGENCY
RECONSTRUCTION FINANCE CORPORATION
M. E. EVERETTE, MANAGER

THE VETERAN AND SURPLUS PROPERTY SALES

VETERANS' PREFERENCE

THE SURPLUS PROPERTY ACT OF 1944 GIVES A VETERAN OF WORLD WAR II THIRD PRIORITY IN PURCHASING SURPLUS PROPERTY FOR HIS OWN SMALL BUSINESS, AGRICULTURAL AND PROFESSIONAL ENTERPRISE. UNDER REGULATIONS OF THE SURPLUS PROPERTY ADMINISTRATION, A VETERAN, TO TAKE ADVANTAGE OF THIS PREFERENCE IN SURPLUS SALES, MUST FIRST BE CERTIFIED BY THE SMALLER WAR PLANTS CORPORATION AS NEEDING THIS PROPERTY FOR BUSINESS PURPOSES.

HOW TO ESTABLISH PREFERENCE

A VETERAN'S FIRST STEP TO TAKE ADVANTAGE OF THE PREFERENCES GRANTED HIM BY CONGRESS IS TO CONTACT, EITHER BY PERSONAL VISIT OR LETTER, THE NEAREST SMALLER WAR PLANT CORPORATION OFFICE. (A LIST OF SOUTHERN SWPC OFFICES IS ATTACHED). HE SHOULD PRESENT HIS DISCHARGE, OR PAPERS SHOWING THAT HE IS ON TERMINAL LEAVE OR FINAL FURLOUGH OR THAT HIS STATUS HAS BEEN CHANGED FROM "ACTIVE" TO "INACTIVE." A VETERAN IS DEFINED BY SPA REGULATIONS AS ANY PERSON IN THE ACTIVE MILITARY OR NAVAL SERVICE OF THE UNITED STATES DURING THE PRESENT WAR, OR ANY PERSON WHO SERVED IN THE ACTIVE MILITARY OR NAVAL SERVICE OF THE UNITED STATES ON OR AFTER SEPTEMBER 16, 1940 AND PRIOR TO THE TERMINATION OF THE PRESENT WAR, AND WHO HAS BEEN DISCHARGED OR RELEASED THEREFROM UNDER HONORABLE CONDITIONS.

THE VALUE OF VETERANS' PREFERENCE

CERTIFICATION BY SWPC THAT A VETERAN REQUIRES SURPLUS PROPERTY FOR BUSINESS PURPOSES ENTITLES SUCH A VETERAN TO PURCHASE SURPLUS PROPERTY AT THE LOWEST ESTABLISHED FAIR VALUE. IT ALSO MEANS THAT AFTER THE PRIORITIES HELD BY FEDERAL AGENCIES AND STATE AND LOCAL GOVERNMENTS ARE FILLED, THE VETERAN IS NEXT IN LINE TO OBTAIN SURPLUS PROPERTY BEFORE IT IS OFFERED FOR SALE TO OTHERS.

WHAT IS SURPLUS PROPERTY?

SURPLUS PROPERTY IS A PRODUCT OR COMMODITY-- AN AIRPORT OR A PENCIL, AN INDUSTRIAL PLANT OR A BATCH OF SAFETY PINS, A B-24 BOMBER OR A SWIVEL CHAIR-- PROPERTY THAT HAS BECOME SURPLUS TO THE GOVERNMENT NEED AND IS THEREFORE AVAILABLE FOR OTHER USE. IT IS ESTIMATED THAT OVER 27 BILLION DOLLARS WORTH OF SURPLUS PROPERTY WILL BE OFFERED FOR SALE BY JUNE 1946 THROUGH RFC ALONE. IT IS ESTIMATED THAT THE GOVERNMENT OWNS OVER 4 MILLION DIFFERENT ITEMS-- PRODUCED FOR THE GREATEST WAR OF ALL TIMES-- AND MOST OF THESE WILL EVENTUALLY BE OFFERED FOR SALE.

WHO SELLS SURPLUS PROPERTY?

THE CONSUMER GOODS DIVISION OF RECONSTRUCTION FINANCE CORPORATION SELLS THOSE ARTICLES WHICH YOU COULD NORMALLY EXPECT TO BUY FROM YOUR HOMETOWN RETAIL STORE. CONSUMER GOODS INCLUDE SUCH THINGS AS TRUCKS AND TRACTORS, HARDWARE, SURGICAL EQUIPMENT, MEDICAL SUPPLIES, AGRICULTURAL TOOLS, FARM SUPPLIES, FURNITURE AND OFFICE FIXTURES, WEARING APPAREL, TEXTILES, HOUSE WARES, PLUMBING AND HEATING EQUIPMENT, STATIONERY AND OFFICE SUPPLIES, LABORATORY EQUIPMENT, ETC. THE SOUTHERN REGIONAL OFFICE OF THE CONSUMER GOODS DIVISION IS LOCATED IN THE BELLE ISLE BUILDING IN DOWNTOWN ATLANTA. THE TELEPHONE IS WALNUT 4121. SALE OF ALL CONSUMER GOODS FOR THE REGION IS HANDLED HERE WITH THE EXCEPTION OF AUTOMOTIVE VEHICLES. STATE OFFICES OF THE CONSUMER GOODS DIVISION HANDLE THE SALE OF AUTOMOTIVE VEHICLES WITHIN THEIR RESPECTIVE STATES. (A LIST OF THESE OFFICES IS ATTACHED). ORDINARILY, A CERTIFIED VETERAN IS THE ONLY INDIVIDUAL WHO MAY PURCHASE SURPLUS PROPERTY THROUGH CONSUMER GOODS DIVISION, FOR THEIR SALES OTHERWISE ARE RESTRICTED TO OTHER FEDERAL AGENCIES, STATE AND LOCAL GOVERNMENTS AND ESTABLISHED DEALERS.

(OVER)

THE SURPLUS PROPERTY DIVISION OF RFC SELLS CAPITAL AND PRODUCER GOODS AND AIRCRAFT. CAPITAL AND PRODUCER GOODS INCLUDE SUCH THINGS AS INDUSTRIAL PLANTS AND THEIR EQUIPMENT AND INDUSTRIAL REAL ESTATE, MACHINE TOOLS, PRODUCTION EQUIPMENT, ELECTRICAL, COMMUNICATION AND TRANSPORTATION EQUIPMENT, METALS, ORES, FIBERS, PETROLEUM AND COAL PRODUCTS, PAINTS, LACQUERS, DYES, CHEMICALS, LUMBER, BUILDING MATERIAL, ETC. CAPITAL AND PRODUCER GOODS ARE SOLD TO ANYONE EXCEPT SPECULATORS; BUT HERE, TOO, THE VETERAN'S PREFERENCE ENTITLES HIM TO THIRD PRIORITY IN PURCHASING AVAILABLE SURPLUS PROPERTY AND TO THE LOWEST ESTABLISHED FAIR VALUE (GENERALLY WHOLESALE PRICE). THESE TWO DIVISIONS OF RFC WILL HANDLE OVER 90 PERCENT OF THE SALABLE SURPLUS PROPERTY IN THIS COUNTRY.

OTHER DISPOSAL AGENCIES

THE U. S. MARITIME COMMISSION, RIGGS BANK BUILDING, WASHINGTON 15, D. C., SELLS SURPLUS MARITIME PROPERTY AND SHIPS UNDER ONE THOUSAND TONS ARE SOLD BY THE WAR SHIPPING ADMINISTRATION, WASHINGTON 25, D. C.

THE COMMODITY CREDIT CORPORATION OF THE DEPARTMENT OF AGRICULTURE SELLS SURPLUS AGRICULTURAL COMMODITIES AND FOODS. OFFICES ARE LOCATED IN ATLANTA, DALLAS AND WASHINGTON.

THE FEDERAL PUBLIC HOUSING AUTHORITY OF THE NATIONAL HOUSING AGENCY WILL SELL HOUSING AND HOUSING FACILITIES. (LITTLE HOUSING IS AS YET SURPLUS AND THEREFORE AVAILABLE FOR SALE).

HOW TO BUY CAPITAL AND PRODUCER GOODS

CAPITAL AND PRODUCER GOODS (INDUSTRIAL PLANTS, MACHINE TOOLS, BUILDING MATERIAL, ETC.) ARE SOLD BY NEGOTIATION, INFORMAL BID AND ON A FIXED PRICE BASIS TO ANYONE IN ALMOST ANY QUANTITIES. A VETERAN DESIRING THIS CATEGORY OF SURPLUS PROPERTY SHOULD VISIT THE NEAREST RFC SURPLUS PROPERTY DIVISION OFFICE, WHERE HE WILL BE DIRECTED TO THE SALESMAN HANDLING THE PARTICULAR TYPE OF PROPERTY HE DESIRES. THE GEORGIA RFC SURPLUS PROPERTY DIVISION IS LOCATED AT 699 PONCE DE LEON AVENUE. THE TELEPHONE IS CYPRESS 1961. (A LIST OF OTHER SOUTHERN RFC AGENCIES HANDLING CAPITAL AND PRODUCER GOODS IS ATTACHED). IF A PERSONAL VISIT IS IMPOSSIBLE, A VETERAN SHOULD WRITE TO THE NEAREST RFC AGENCY, LISTING THE SPECIFIC TYPES OF PROPERTY HE NEEDS AND REQUESTING THAT HE BE PLACED UPON THE RFC MAIL LIST. HE WILL BE FURNISHED PERIODICAL CATALOGUES DESCRIBING PROPERTY OF THIS NATURE WHICH HAS BECOME SURPLUS AND IS FOR SALE. HE SHOULD WATCH THE NEWSPAPERS FOR ADVERTISEMENTS AND NEWS STORIES ANNOUNCING SPOT SALES. AT THE PRESENT, MOST SURPLUS PROPERTY IS SELLING SO FAST THAT IT IS IMPOSSIBLE TO TELL TODAY WHAT WILL BE AVAILABLE FOR SALE TOMORROW.

HOW TO BUY CONSUMER GOODS

AUTOMOTIVE VEHICLES ARE SOLD BY THE CONSUMER GOODS DIVISION OF RFC THROUGH VARIOUS STATE FIELD OFFICES LOCATED IN EACH OF THE SOUTHERN STATES. (A LIST OF THESE OFFICES IS ATTACHED).

AT PRESENT THE DEMAND BY VETERANS FOR AUTOMOBILES AND TRUCKS FAR EXCEEDS THE NUMBER OF VEHICLES BEING TURNED LOOSE BY THE ARMED SERVICES. SALES OF AVAILABLE SURPLUS VEHICLES EXCLUSIVELY FOR THE BENEFIT OF VETERANS ARE HELD FROM TIME TO TIME. SUCH SALES ARE USUALLY ADVERTISED IN THE NEWSPAPERS, BUT ONLY VETERANS CERTIFIED BY SWPC ARE ELIGIBLE TO PURCHASE. YOU SHOULD REQUEST YOUR STATE FIELD OFFICE, CONSUMER GOODS DIVISION, RFC, TO KEEP YOU ADVISED OF THESE SALES. YOU SHOULD ALSO WATCH FOR PUBLIC ANNOUNCEMENTS.

SUCH CONSUMER GOODS AS TEXTILES, WEARING APPAREL, OFFICE FURNITURE, EQUIPMENT AND SUPPLIES, HARDWARE, ELECTRICAL APPLIANCES, AUTOMOTIVE PARTS AND ACCESSORIES, BOXES, CRATES---ITEMS NORMALLY PURCHASED IN OVER-THE-COUNTER SALES IN YOUR HOMETOWN RETAIL STORES--- MAY BE BOUGHT BY CERTIFIED VETERANS THROUGH THE CONSUMER GOODS DIVISION, RFC, BELLE ISLE BUILDING, ATLANTA. THIS IS A REGIONAL OFFICE, WHICH CONTROLS THE SALE OF SUCH ITEMS IN THE SEVEN SOUTHEASTERN STATES.

THE VETERAN SHOULD WRITE THE CONSUMER GOODS DIVISION, RFC, QUOTING HIS SWPC CASE NUMBER, LISTING THE ITEMS IN WHICH HE IS INTERESTED, AND REQUESTING THAT COPIES OF CURRENT NOTICES OF AVAILABLE PROPERTY BE FURNISHED HIM. IN THE EVENT THE ITEMS REQUESTED ARE NOT IMMEDIATELY AVAILABLE, HIS NAME WILL BE PLACED ON THE MAIL LIST TO RECEIVE SUBSEQUENT PERIODICAL CATALOGUES UNTIL THE GOODS HE DESIRES HAVE BEEN LOCATED AND HIS ORDER FILLED. ONCE HE LOCATES THE ITEMS HE DESIRES IN A CATALOGUE, HE SHOULD MAIL THE SWPC CERTIFICATE WITH AN ORDER FOR THE GOODS. HE WILL BE NOTIFIED TO FORWARD A CERTIFIED CHECK WHEN THE GOODS ARE READY FOR DELIVERY. AFTER A VETERAN HAS ACQUIRED THE PROPERTY FOR WHICH HE WAS CERTIFIED, HE SHOULD REQUEST THAT HIS NAME BE DELETED FROM THE CONSUMER GOODS CATALOGUE LIST.

RETRAINING and REEMPLOYMENT ADMINISTRATION
UNITED STATES DEPARTMENT OF LABOR

NUMBER 6 APRIL 25, 1946 WASHINGTON, D.C.

SURPLUS PROPERTY FOR SCHOOLS

BARRACKS, QUONSET HUTS

By RRA Order #5, a Federal interagency committee to assist State agencies and non-profit educational institutions in the acquisition of surplus Government materials and facilities for the expansion of schools and colleges was set up recently by Major General Graves B. Erskine, USMC, Head of the Retraining and Reemployment Administration.

"Hampered by wartime restrictions on construction materials and training equipment, our schools and colleges today are facing enormous difficulties in attempting to provide for the expanding enrollment of both veterans and non-veterans," explained General Erskine. "They must have quick access to additional buildings for instruction and living quarters and laboratory equipment and books.

"Now that the shooting war is over, we have a grave responsibility to see that those who won the war receive adequate training for keeping the peace. It is the purpose of this committee to help them get it by doing everything possible to provide facilities for it."

Under General Erskine's order, the committee will determine the needs for and availability of training facilities, equipment, and materials and make recommendations for the fastest possible disposition of available materials to educational institutions in accordance with their need.

Federal agencies participating on the committee under General Erskine's chairmanship include the Federal Security Agency, the War Assets Administration, the War Department, and the Navy Department. The Veterans Administration also is requested to designate a member of the committee.

* * * * * * *

NEW ADVANTAGES UNDER G.I. BILL

HOME STUDY

Veterans Administration announced on April 15 that it has negotiated contracts with 38 educational institutions throughout the country authorizing them to furnish correspondence and extension courses by mail to veterans eligible for educational benefits under veterans legislation. Courses offered by these schools cover virtually every

educational field, making available to veterans instruction by correspondence in everything from academic subjects to a wide variety of trades and professions.

Under the original Servicemen's Readjustment Act (G.I. Bill) a veteran could not enroll for a correspondence course because the language of the Act specified "attendance" at a school or other training institution. As amended last December, the Act now authorizes such courses with the proviso that VA negotiate contracts individually with each school offering courses to supply them at a cost deemed "reasonable and fair".

The veteran receives no subsistence allowance while pursuing a correspondence course and the total cost of all such courses he takes may not exceed $500. A charge of one-fourth of the time spent in following a correspondence course is made against the veteran's period of eligibility for educational benefits. A correspondence course also may be taken in conjunction with regular institutional or job training.

Of the 38 contracts thus far signed, 25 are with colleges and universities in 19 States. Fifteen of these offer high school as well as college courses. Only one high school--Phoenix Union at Phoenix, Arizona--has contracted to furnish correspondence courses to veterans, and only to Arizona veteran-residents.

The 25 colleges and universities are:

Central Missouri State Teachers College, Warrensburg
Colorado State College of Education, Greeley
University of Colorado, Boulder
University of Denver, Denver
University of Florida, Gainesville
University System of Georgia, Atlanta
Indiana State Teachers College, Terre Haute
University of Kentucky, Lexington
Louisiana State U., A&M College, Baton Rouge
University of Minnesota, Minneapolis
Southwest Missouri State Teachers College, Springfield
University of Nebraska, Lincoln
University of Nevada, Reno
Northeastern State College, Tahlequah, Oklahoma
Ohio University, Athens
Oklahoma A&M College, Stillwater
University of Oklahoma, Norman
Oregon State System of Higher Education, Eugene
University of South Carolina, Columbia
University of South Dakota, Vermillion
State College of Washington, Pullman
University of Tennessee, Knoxville
University of Utah, Salt Lake City
University of Washington, Seattle
University of Wisconsin, Madison

There are 13 trade and business schools on the approved list, offering courses in such diversified subjects as refrigeration, radio electronics, engineering, television, journalism, Federal income tax, machine drafting, hotel training, traffic management, accounting and filing.

The trade and business schools covered by contracts for correspondence courses are:

La Salle Extension University, Chicago
International Accountants Society, Chicago
Remington Rand, Inc., Buffalo
Commercial Trades Institute, Chicago, Illinois
DeForest's Training, Chicago, Illinois
Industrial Training Institute, Chicago, Illinois
Lewis Hotel Training School, Washington, D. C.
Capitol Radio Engineering Institute, Washington, D. C.
International Correspondence Schools, Scranton, Pa.
John Marshall College, Jersey City, New Jersey
National Radio Institute, Washington, D. C.
Newspaper Institute of America, New York, N. Y.

Eligible veterans who wish to enroll for correspondence courses should make application at the nearest VA regional office.

****

In this connection, there is available, free, from the National Home Study Council, Washington 6, D. C., a "Blue Book and Directory of Private Home Study Schools and Courses" which have been approved by the National Home Study Council. Not all of the schools are included in the VA list, but the references are useful for those other than veterans who may wish to study at home.

HOUSING PRIORITIES

MORE HOMES

Expansion of the priorities system for the building of veterans' housing, to include new classes of individuals and kinds of housing, was announced on April 12 by the Civilian Production Administration and the National Housing Agency, through the amendment of CPA's Priorities Regulation 33. (Copies of this amendment together with other CPA regulations are currently being mailed to Advisory Centers.)

Builders of non-veteran housing accommodations which were under construction before the issuance of the building control order (see Bulletin No. 3, page 2) on March 26 may now apply for priorities assistance to complete these houses and apartments. However, except in unusual circumstances these applications will not be approved if the proposed sales price is over $15,000, or the shelter rental over $120 a unit per month.

Housing construction needed for the production of essential foods or scarce products, as well as the reconstruction of homes destroyed by disaster, is now also provided for in Priorities Regulation 33.

The National Housing Agency now has authority over applications for priorities assistance under PR-33 for almost all kinds of non-veteran as well as veterans' housing, and for authorization to do housing construction, repair or alteration which would otherwise be prohibited under Veterans' Housing Program Order #1. (Text of this Order also being sent to Advisory Centers.) The authorizations, and HH (housing) priorities are issued through the State and district offices of the Federal Housing Administration (FHA), a unit of the National Housing Agency.

"Veterans'-Preference" in building, or buying or renting housing accommodations built with HH priorities assistance, is extended by the amendment to a larger group of people. In addition to veterans of World War II, Priorities Regulation 33 now applies to present members of the Armed Forces and the Merchant Marine, Americans who served with allied forces in the war, and the widow or widower of a member of the Armed Forces who died in service in World War II, or the spouse of a deceased veteran of World War II, if the spouse is living with a child of the deceased.

Kinds of housing to which Priorities Regulation 33 now applies are buildings primarily designed for family occupancy, farm houses including bunkhouses for temporary farm labor, apartment hotels not primarily for transients, and dormitories or group housing accommodations put up by educational or public institutions for veterans.

PR-33 does not cover institutional housing (except for veterans), nor military housing, hotels for transients, trailers, camps, nor buildings which contain both housing accommodations and business space if more than 25% of the floor space is used for non-housing purposes, in the case of one-and two-family dwellings, or more than 15% in the case of multiple family dwellings.

Products on which priorities assistance under PR-33, Schedule A, apply are:

common and face brick	millwork
concrete blocks	hardwood flooring
clay sewer pipes	construction plywood
bathtubs	prefabricated houses
structural clay tile	prefabricated sections
warm-air furnaces	prefabricated panels
cast iron soil pipe and fittings	gypsum board
	gypsum lath
cast iron radiation	lumber

CLAIMS: WHERE TO WRITE

LOST PROPERTY, BACK PAY, ETC.

Veterans with back pay, property loss and similar claims may discuss method of filing with members of District Offices of the Armed Services, but the actual filing is handled at specific central locations, depending on the claim in question.

Following are the most recent addresses for claims problems:

ARMY

Soldiers' Deposits
Office of Special
Settlement Accounts
27 Pine Street
New York 5, N. Y.

2nd or 3rd Payments on Mustering-Out Pay
Finance Officer
Separation Center where
discharged

Lost Property
Effects Quartermaster
Army Effects Bureau
Kansas City Quartermaster
Kansas City, Mo.

Back Pay & Other Monetary Claims
Central Field Fiscal Office
Army Service Forces
4300 Goodfellow Blvd.
St. Louis 20, Mo.

MARINE CORPS

All Claims
The Commandant
U. S. Marine Corps
Headquarters Marine Corps
Washington 25, D. C.

COAST GUARD

All Claims
The Commandant
U. S. Coast Guard Headquarters
13th and Pennsylvania Ave.
Washington 25, D. C.

NAVY

All Monetary Claims
Bureau of Supplies
and Accounts
Field Branch Office
U. S. Navy
Cleveland 15, Ohio

Lost Property
Supply Officer in Command
Personal Effects Distribution
Center, U. S. Navy
Farragut, Idaho

Claims for personal property returned in damaged condition are sent to the Bureau of Supplies and Accounts.

NON-HOUSING CONSTRUCTION

STORES, GARAGES, ETC.

Addresses of those District Construction Offices which already have been established to handle applications under the Civilian Production Administration's order controlling construction (Veterans Housing Program Order 1, March 26) have been announced recently by the CPA. Construction field office addresses in other cities will be published as soon as the district managers have been able to secure office space.

These District Construction Offices have one function only, and that is the handling of area non-housing construction problems. (Queries and applications dealing with urban housing--non-veteran as well as veteran--are handled by the local Federal Housing Administration offices. Immediately after (March 27) issuance of Veterans Housing Program Order 1, CPA transferred to NHA authority to approve application for all housing construction, non-veteran as well as veteran.) Matters dealing with farm housing or other farm construction are handled through the County Agricultural Conservation Committees.)

We wish to thank Advisory Centers who have sent in pictures of their Center. A few have mailed photos printed in publications, which we cannot reproduce. We must have prints. Glossies 8" x 10" are preferred if they are available. We hope soon to run a page of these pictures in an issue of the Bulletin.

Advisory Centers can feel free to quote the Bulletin at any time.

The Bulletin is a regular weekly publication. If you miss an issue, write to the Public Information Division, RRA, Washington 25, D. C., and we will send you the copy you did not receive.

ARTIFICIAL LIMBS INDICTMENTS

"NOISELESS," "CUSTOM BUILT"

Trade practice rules for the Artificial Limbs Industry were established on April 16 by the Federal Trade Commission to "Protect physically handicapped persons from misrepresentation and deception" in buying artificial limbs and similar prosthetic devises or appliances and accessories.

This action was partly the result of an indictment last November which charged 45 corporations and 34 individuals with violating the Sherman Anti-Trust Law. The FTC pointed out that there are 600,000 users of artificial limbs and devices in the country, including 16,000 veterans of World War II. The annual sales volume of artificial limbs in the U. S. aggregates $10,000,000. It was charged that the manufacturers named in the indictment handled about 75% of the artificial limb business of the nation.

Some points covered in the unfair trade practices follow:

1. It is considered unfair trade practice to sell, distribute, or promote the sale or distribution of any product which deceives the purchaser as to construction, absence of

noise in operation, strength, appearance, fit, etc. In this connection it is also unfair trade practice to state or infer, unless it is completely true, that the product will give use and satisfaction to the wearer equivalent or entirely equivalent to that afforded by the human limb.

2. Any member of the industry must disclose to the purchaser of an industry product any and all latent defects in his product of which the manufacturer is aware. The manufacturer must also point out to the user of the limb, in the case of a recent amputation, that though fitting properly at the time of delivery the prosthetic device may not continue to be a proper fit owing to stump shrinkage.

3. Misleading pictures or testimonials are prohibited, as well as deceptive demonstrations.

4. The terms "custom made," "custom built," "tailored," etc., are illegal unless the device is actually made and fitted to the individual needs.

A full statement of all the rules pertaining to the limb industry is contained in a 14-page release called "Trade Practice Rules for the Artificial Limb Industry," which is available from the Federal Trade Commission, Washington 25, D. C.

** ** ** ** ** ** ** ** ** ** **

SURPLUS JEEPS

WARNING

According to the ARMY & NAVY BULLETIN, veterans who survive the avalanche of paper work necessary to buy a surplus Army jeep are apt to wind up with a ticket five minutes after they drive off in their new purchase.

Because no provisions have been made as yet by War Assets to give prospective buyers information necessary to obtain license tags before collecting the jeep, few get home without a run-in with the law.

It is advisable for jeep buyers to get, in advance of collecting the purchase, all details necessary to buy a license tag so that he can take along the tag when calling for the jeep. But do not buy tags until you know definitely that a vehicle has been sold to you.

** ** ** ** ** ** ** ** ** ** **

VETERANS EDUCATION

STATE AIDS

The Governor of New Jersey recently signed into the law a Senate Bill providing $1,074,000 for the expansion of education facilities in the State for veterans entitled to benefits under the G.I. Bill of Rights.

The measure sets up a revolving fund of $750,000 for college, vocational and adult courses and authorizes reimbursement of up to $324,000 to secondary schools which will operate approved high-school courses for veterans.

In order to alleviate the present acute crowding in the colleges of New Jersey, the recently signed law permits the State Department of Education to create in the six New Jersey State Teachers' Colleges courses of collegiate grade in the arts, sciences, business administration, teacher training, and other branches of higher education.

Courses will be established in local school districts to provide for expansion of vocational education and refresher and retraining work. To serve veterans not desiring college or vocational training, there will be created in local school districts courses in the field of education for adults and out-of-school youths.

****

EMERGENCY PAYMENTS

At a meeting of college and university officials called by Governor Ralph F. Gates of Indiana, problems of G. I. students were discussed, particularly delay in receiving Federal checks. As a result of this meeting, Indiana will finance a program of emergency aid to G.I. students whose Federal funds have been delayed. The money is lent to the institution, which in turn lends it to the student. Repayment is made as Federal checks arrive. The program is being handled by the State Veterans Affairs Department.

** ** ** ** ** ** ** ** ** ** **

CERTIFICATION PROCEDURE

SURPLUS PROPERTY

The War Assets Administration, which controls the disposition of surplus property, has issued a new statement on the certification process. For your information and guidance, we outline below the procedure governing the disposal of surplus property.

1. Declaration: As equipment becomes surplus to the needs of the Armed Services, it is declared to disposal agencies of which War Assets Administration is one.

Under the law this property is offered first to Federal agencies, second to State and local governments, and third to veterans, before disposition through regular channels.

NOTE: AT PRESS TIME, HIGHER VETS PREFERENCES SEEM IMMINENT, WATCH NEWS OR FUTURE BULLETIN FOR ANNOUNCEMENT.

2. Veterans Preference: The Surplus Property Act of 1944 and supplementary instructions give to veterans a preference subordinate only to the rights of Federal agencies and State and local governments. This preference is limited to veterans who desire to establish or maintain their own small business, professional or agricultural enterprises, or are required by their employment to have their own tools or equipment. This latter does not apply to items for resale.

3. Filing Applications: Veterans desiring to exercise their preference must file their applications with a Certifying Office (these are listed below) of WAA on Form 66, available from the nearest regional office. One copy must be filled out and returned to the office in person or by mail with a certified or photostatic copy of discharge or a certificate of honorable completion of active military duty. Originals of these documents should in no case be mailed to the Certifying Office. Applicants are advised instead to secure from their clerks of court or counties certification documents. In describing surplus property items requested a complete description must be given. It is also necessary to specify how far you are willing to travel to inspect items of surplus located for you and the areas from which you will pay shipping charges. The search expiration date must also be noted.

4. Certification: Upon receipt of your application and satisfactory evidence of your eligibility, this office will issue to you a certificate which will establish your eligibility for preference in the purchase of items requested.

5. Search: We will immediately file a copy of your request with the proper Regional Office for search purposes. They will screen their available inventories for the items applied for. This search will extend over the entire territory you are willing to cover to inspect items located or pay shipping charges.

6. Notice of Availability: When the item is located, you will be notified by our sales office as to approximate price, when and where it may be inspected, and how it may be bought.

7. Purchase: If you are satisfied with the item after inspection, you will complete arrangements for purchase, payment, and delivery with the WAA representative indicated to you in the letter advising you of the items available.

Note: Contrary to previous practice, you are not expected to locate the desired items yourself. Experience has shown that such unorganized searching activity results in confusion and would add materially to your expense.

****

NEWS AND IDEAS FROM THE CENTERS

TELEPHONES

In NEW YORK CITY, the Veterans' Service Committee has written a 14-page leaflet on telephone answers for the use of receptionists. The leaflet covers fully all types of questions which test a receptionist's imagination, and also makes useful suggestions concerning the do's and don'ts of telephone manners,

The leaflet gives explicit ways of handling vague questions, outlines the most efficient procedure for keeping a written record of information calls, and offers many tips designed to help both the person calling and Advisory Center personnel answering the calls.

NEW BUSINESS

In MILWAUKEE, WIS., the Veterans' Information and Referral Center has worked out an arrangement with the Milwaukee Junior Association of Commerce for the guidance of veterans who wish to go into business for themselves. When a veteran applies to the Center for information about starting a new business, the Center contacts the Junior Association of Commerce and within a day or two an appointment is made by one of their members with an individual who is active and successful in the type of business in which the veteran is interested. The JAC arranges appointments covering a wide range of enterprises, among which are sporting goods stores, men's furnishings stores, florists and candy shops, electrical appliance stores, taverns, gas stations, and grocery stores.

The Center is currently working on an arrangement with the JAC for referrals to the professional groups for both employment and counseling. This service will be for veterans with training in the fields of medicine, engineering, accountancy, etc.

FIRST ANNIVERSARY

In PHILADELPHIA, PA., the Veterans' Advisory Center has just released the organization's first annual report. Approximately 60,000 veterans have been served by the Center, 10,000 of which were clients requesting employment counseling, loans under the G.I. Bill, and business guidance. About 8,000 veterans sought information on school and vocational guidance and another 1,000 needed legal assistance. Personnel services numbered 6,000 cases, medical aid was given to 560, and miscellaneous information to 9,700. The United War Chest has allotted $69,200 to the work of the Center in 1946.

HOUSING

In INDEPENDENCE, MO., the 4-months old Veterans' Information Center is working hard on a tough housing situation. Through the Mayor's help, 8 Army barracks were obtained for conversion into 24 housing units to take care of the most urgent cases. A Share-the-Home Campaign is underway, as well as a program to promote the conversion of existing dwellings through the use of CPA priorities. Community sense of responsibility towards this rapidly developing Center is exemplified by one of the local lumber dealers who is helping the program through advertising.

TRAINING

In BRIDGEPORT, CONN., the Community Advisory Center conducts a free training course the first week of every month, for personnel engaged in advising or otherwise aiding veterans. This

intensive training and refresher course is designed to give advisers of veterans a complete overall picture of facilities and services available to veterans. The course is maintained by the State, and application for enrollment is made to the Director of the Connecticut Veterans Reemployment and Advisory Commission.

** ** ** ** ** ** ** ** ** ** **

LEGISLATION: MISSISSIPPI

The 1946 session of the Mississippi legislature, which has recently closed, passed a good many laws of interest to veterans. The following laws pertain to housing - next week we will print those relating to education and miscellaneous subjects.

House Bill 161, the Farm and Home Loan Act, sets up a Farm and Home Loan Board of six members appointed by the Governor to assist veterans in buying a farm or home to cost not in excess of $5,000 where it can be shown a qualified veteran has been unable to obtain a loan in his own county or community. Under this Act the State may purchase a home or farm for a veteran and resell it to him with financed payments, at 4 percent interest, over a period of not to exceed twenty-five years. World War II veterans may use the G.I. home loan guaranty in financing a State Farm and Home Loan and veterans of World War I may qualify by paying as much as 10 percent cash down payment. All loans under this Act must be approved by a local county committee selected by the State Board, and the property must qualify as to appraised value and all title requirements. This Act will become operative as soon as the Board is appointed and administrative procedure adopted.

House Bill 1021, appropriates $5,000,000 for the administration of the Farm and Home Loan Program, limiting administrative expense to not more than $25,000 a year.

Senate Bill 292, is an Act authorizing cities and counties to establish housing authorities as legal corporations to operate veterans' housing projects and to acquire housing facilities from the Federal Government, to borrow money to carry out the Act and to accept grants and gifts from any agency in establishing emergency veterans' housing facilities.

Senate Bill 260, authorizes municipalities to execute contracts with the Federal Government for war housing, prefabricated houses or any other housing facilities, and to provide sites for houses and construct sewers, streets and other facilities necessary to establish and maintain, during the housing emergency, temporary facilities for veterans and their families.

House Bill 864, is an Act amending existing State laws and regulations in order to permit any bank, insurance company or lending institution to make loans to veterans under the G.I. Bill and authorizing all lending agencies, with the exception of insurance companies, to make unsecured loans to veterans up to $1,000, provided one-half of the loan is guaranteed by a Federal agency.

Senate Bill 427, authorizes the State Building Commission to subdivide into lots to be sold to veterans at non-inflationary prices 153 acres of State-owned land known as the Tripps Crossing area, bordering Highway 51 just north of the city limits of Jackson.

House Bill 10 , provides for a general revision of the Homestead Exemption law in Mississippi, with specific changes to permit a veteran who purchases a home under the G.I. Bill of Rights without any cash equity in the home or farm so purchased to be eligible for complete homestead exemption if otherwise qualified.

Senate Bill 192, qualifies any veteran for Homestead Exemption for the years 1942 to 1946 to apply for retroactive exemption for the past years if the only reason he did not obtain such exemption was due to his absence in the Armed Services.

Senate Bill 191, appropriates $25,000 to reimburse veterans for Homestead Tax exemptions paid since 1942 if eligiblity for exemption can now be established.

House Bill 161, heretofore referred to as the Farm and Home Loan Act, also contains a section which enables any county in Mississippi to appropriate funds for the support of local Veterans' Service Centers. The amount to be appropriated by the counties varies according to size, population, and assessed valuation, with a maximum of $750 and minimum of $250 a month. The appropriation may be paid from the general county fund, and the Board of supervisors may levy a one mill tax if necessary to care for the expense.

READING LIST: OF INTEREST TO VETERANS AND OTHERS

BOOKS, PAMPHLETS, ETC.

Higher Education Looks Ahead (Bul. No. 8, 1945): A roundup on postwar planning in higher education, this 98-page bulletin covers forces and agencies that condition State and local planning, State-wide planning, action taken and proposed, and selected institutional plans including plans for education of veterans. Published by the U. S. Office of Education, and for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 20¢.

Journal of Rehabilitation: A professional magazine published quarterly by the National Rehabilitation Association, deals with Rehabilitation of the physically handicapped in articles contributed by members of the various agencies working in this field, and includes benefits available through the State Rehabilitation Services. $2.00 per year, or 50¢ per single copy. Write to 1114 56th St., Des Moines 11, Iowa.

What You Can Do With Your Army Training as a Civilian, and What You Can Do With Your Navy Training as a Civilian: Two separate illustrated charts, prepared to show the ex-serviceman what jobs he can fill by using his service training in civilian occupations. Published by the B'nai B'rith Vocational Service Bureau, 1746 M St., N.W. Washington, D. C., at 20¢ per copy. Free to Government and service agencies.

Careers in Retail Business Ownership: A guide in choosing a retail business, this book gives up-to-date information on 35 retail fields to aid in deciding whether or not to plan career in retail business ownership, and if so, what specific line to consider. Compiled with assistance from Department of Commerce, Dun & Bradstreet, and specialists in various retail fields. 347 pp. Paper-bound $2.00; cloth-bound $3.00. Write to B'nai B'rith Vocational Service Bureau, 1746 M St., N.W., Washington, D. C.

Schools Giving Courses in Range Management: (No. 0-17, Feb., 1946) A descriptive list compiled to aid in answering inquiries regarding college instruction in range management. Write to Division of Information and Education, U. S. Forest Service, Department of Agriculture, Washington 25, D. C. Free.

Professional Nurses: (Bul. 203, No. 3) Published as one of a series of the Women's Bureau of the Department of Labor on the outlook for women in occupations in the medical and other health services, this pamphlet discusses the future outlook for women in nursing, and reviews their prewar and wartime role in this service. For sale at the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.,at 15¢.

Employment Opportunities in Characteristic Industrial Occupations of Women: Bul. No. 201. A 50-page pamphlet illustrates the way in which women's work in industry during the war has extended over a varied range of occupations closely allied with peacetime manufacturing. Published by the Women's Bureau, Dept. of Labor, and for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C., at 10¢.

MEAT PRICE CONTROL THREATENED

The meat packers' lobby in Washington has succeeded in developing the most highly inflammable danger to price control yet to be witnessed in Congress. In Senate hearings the meat packers have falsely blamed price ceilings for present shortages. They seek to capitalize on public dissatisfaction to win approval of their scheme to raise prices, pile up huge profits and practically wreck the nation's entire price control program.

Yet the meat packing industry has carefully avoided saying that the country's total meat supply would be any greater if price ceilings were raised. Truth is that price regulations have not kept cattle production down. Present cattle population—approximately 80 million head—is at all-time high.

Another pertinent fact: OPA will increase price ceilings on any product where facts show higher prices are necessary. Chester Bowles has resisted "pressure," and insisted on facts. American Meat Institute, however, wants to stampede Congress into forcing OPA to raise ceilings.

Senate Banking and Currency Committee knows facts, but public has not been informed. Evidence completely fails to support charges that OPA refused to take action while meat packing industry was suffering severe hardship and will be destroyed unless Congress takes action. **Profits have soared,** not only among biggest meat packers, but have been shared fully by medium sized and small packers—**seven times more profits in 1944 than the 1936-1939 average,** despite 25% less volume of business.

Tennessee Labor, and consumers, should write or wire Senators K. D. McKellar and Tom Stewart at once, asking them to oppose the Packer's amendment to the Price Control Act, and to support strong penalties against black market operators, including jail terms.

IN REVIEW

The greatest friend labor ever had in the White House died April 12. And the hundreds of thousands of workers and farmers in Tennessee knew he was their friend.

During President Roosevelt's administration, organized labor's strength grew from less than 3 million members in 1933 to more than 14½ millions today.

With this growth of unions, assisted by the passage of such Federal laws as the National Labor Relations Act, Social Security Act, Farm Security Act and the Wage-Hour bill, to mention only a few of the New Deal measures sponsored by organized labor and farmers, the living standards of American workers, both urban and rural, have been elevated to the highest in history. Wages are higher, hours are shorter, working conditions are better, housing facilities are improved, educational standards have reached new highs, and workers enjoy a measure of job security for the first time.

Franklin Delano Roosevelt was largely responsigle for giving to American workers and farmers a taste of and an appetite for more industrial democracy and economic independence.

OUR NEW PRESIDENT

Tennessee labor does not know how Harry S. Truman will stand on labor as President of the United States. His record on labor and progressive issues in Congress is good. He is nobody's fool, has a mind of his own and is recognized as a smart politician. He is regarded as a friend of trade unions, but will not do their work for them. Organized labor and working farm groups must support their common programs now as never before, **by intelligent political action at the polls,** or else take risky chances. Labor cannot stand still. It either goes forward or backward. Truman's future attitude, as well as labor's future status, depends on the course labor takes.

H. R. 7, ANTI-POLL TAX BILL

Discharge Petition No. 1 is now being circulated in the House of Representatives for signatures. 175 Congressmen had signed at Easter recess. 218 signatures are needed to force H. R. 7 to floor for a vote. Congressman Estes Kefauver is only Tennessean to sign so far. Labor will be disappointed if Congressman Percy Priest does not also sign.

Reports from National Committee to Abolish the Poll Tax give good reason to believe Senate filibuster in 1945 can be beaten.

Abolition of poll tax in Federal elections would mean end of all poll taxes as pre-requisite to voting. This above all is what people like McKellar, Bilbo, Cox, Rankin, etc., do not want. The poll tax was conceived by the "big boys" to keep the "poor white trash," as well as Negroes, from voting.

TENNESSEE TIME TABLE

AFL Teamsters' Southern Conference in Memphis April 19-20 formed State Council of Truck Drivers' Unions to direct Legislative and Educational policies. Policy Committee also decided to form tie-up with other Arkansas labor legislative groups, following Tennesese pattern. Same plan may be adopted in other southern states later.

National Farmers Union locals in Tennessee may be organized on large scale if plans now in talkative stage are translated into action. **CIO, AFL Teamsters, Railroad Trainmen** and **B of L F & E** may undertake to divert manpower and subsidize financial costs of intensive campaign. Organized labor groups realize more and more need of practical working relationship with working farmer groups.

Tennessee Citizens Political Action Committee has mapped careful plans to build PAC units in all 95 Tennessee counties. Membership will be enrolled at "not less than $1.00" contribution each year. CIO and Railroad Trainmen already quietly signing up members; surprising success is reported in big industrial cities.

Politically minded labor leaders are watching with unusual interest the experiment of the Teamsters' Union in ten southern states **to require every member to be a qualified voter as a condition of good standing membership.** It means amending the By-Laws of each Local. Enforcement would be delayed until registration dates in each state have afforded members who have never voted, opportunity to register. Poll taxes would be paid immediately, and before members could pay dues for stated month he would have to produce poll tax receipt and registration certificate proving qualification to vote.

* * *

AROUND THE STATE CAPITOL

During the 74th General Assembly Labor withheld appraisal of Employment Security Director W. O. Hake, believing the key to his policies would be found in his future appointments. His new 3-man State Advisory Council "to advise on matters of policy, administration and law" is considered slap at CIO. Chairman E. W. Palmer (Kingsport Press) represents indus-

LABOR-MANAGEMENT PEACE CHARTER

The new code of principles signed by Presidents Philip Murray of CIO, William Green of AFL and Eric Johnston of U. S. Chamber of Commerce is of such tremendous importance to labor the full text is being printed in this issue of the BULLETIN:

"We in management and labor firmly believe that the end of this war will bring the unfolding of a new era based upon a vastly expanding economy and unlimited opportunities for every American.

"This peacetime goal can only be attained through the united effort of all our people. Today, we are united in national defense. Tomorrow, we must be united in the national interest.

"Management-labor unity, so effective in lifting war production to unprecedented heights, must be continued in the postwar. To this end, we dedicate our joint efforts for a practical partnership within the framework of this code of principles:

"1. Increased prosperity for all involves the **highest degree of production and employment at wages assuring a steadily advancing standard of living.** Improved productive efficiency and technological advancement must, therefore, be constantly encouraged.

"2. The rights of **private property** and free choice of action, under **a system of private competitive capitalism,** must continue to be the foundation of our nation's peaceful and prosperous expanding economy. Free competition and free men are the strength of our free society.

"3. **The inherent right and responsibility of management to direct the operations of an enterprise** shall be recognized and preserved. So that enterprise may develop and expand and earn a reasonable profit, **management must be free as well from unnecessary governmental interference or burdensome restrictions.**

"4. **The fundamental rights of labor to organize and to engage in collective bargaining** with management shall be recognized and preserved, free from legislative enactments which would interfere with or discourage these objectives. Through the acceptance of collective bargaining agreements, differences between management and labor can be disposed of between the parties through peaceful means, thereby discouraging avoidable strife through strikes and lockouts.

"5. The independence and dignity of the individual and the enjoyment of his democratic rights are inherent in our free American society. Our purpose is to cooperate in building an economic system for the nation which will **protect the individual against the hazards of unemployment, old-age and physical impairments, beyond his control.**

"6. An expanding economy at home will be stimulated by **a vastly increased foreign trade.** Arrangements must therefore be perfected to afford the devastated or undeveloped nations reasonable assistance to encourage the rebuilding and development of sound economic systems. Inter-national trade cannot expand through subsidized competition among the nations for diminishing markets but can be achieved only through expanding world markets and the elimination of any arbitrary and unreasonable practices.

"7. An enduring peace must be secured. This calls for the establishment of **an international security organization,** with full partici-

try. W. R. Manier, Jr., Nashville corporation attorney, is public member. AFL's Lev Loring, of Memphis, was named to represent labor.

The Crump political machine is already at work to secure the reelection of Senator McKellar in 1946. "The boss" has spoken. He wants to keep McCord as Governor. Senator Tom Stewart promptly said, "Me too". To many people that settles the question.

But 1946 may bring some big surprises to the Crump-McKellar-McCord forces. One prediction is certain: both McKellar and McCord will have opposition. If no progressive Democrats win nominations, liberal Republican candidates stand best chance in many moons to win.

Governor McCord has appointed a 7-man committee to recommend any needed revisions in the State Constitution. Chairman and representative of the state-at-large is Gen. Wm. L. Frierson of Chattanooga. Capt. Mitchell Long of Knoxville and Homer A. Goddard of Maryville are East Tennessee members. Representing Middle Tennessee: Cecil Sims of Nashville and H. Brad McGinnis of Carthage. West Tennessee members: John T. Gray of Brownsville and Will Gerber of Memphis. Such a step is needed, although some say this committee will keep the poll tax where it is.

* * *

WASHINGTON NEWS NOTES

Here are the records of Members of the Tennessee Congressional Delegation in Washington on matters concerning the welfare of labor and the common people of the United States, covering the period of January 1, 1943 through January 3, 1945:

Senators	For Labor	Against
K. D. McKellar	8	14
Tom Stewart	9	11
Representatives		
Jere Cooper	15	9
Wirt Courtney	14	7
Clifford Davis	14	8
Harold H. Earthman	. no record .	
Albert Gore	13	7
Estes Kefauver	21	2
Tom Murray	4	15
Percy Priest	20	4
John Jennings	3	17
Carroll Reece	3	15

pation by all the United Nations, capable of preventing aggression and assuring lasting peace.

"We in management and labor agree that our primary duty is to win complete victory over Nazism and Japanese militarism. We also agree that we have a common joint duty, in cooperation with other elements of our national life and with government, to prepare and work for a prosperous and sustained peace. In this spirit we agree to create a national committee, composed of representatives of business and labor organizations. This committee will seek to promote an understanding and sympathetic acceptance of this code of principles and will propose such national policies as will advance the best interests of our nation."

NEW MURRAY-WAGNER-DINGELL HEALTH BILL

The 1945 version of this well-known prepaid medical care bill, **providing adequate medical care for all Americans,** will soon be introduced in Congress. Last year's bill by the same authors died with the end of the 78th Congress, victim of lethal hypodermics administered by the American Medical Association and high-priced physicians throughout the country, who termed it "socialized medicine."

Less than 5% of our population is protected against illness through voluntary prepayment plans for medical care, established by industry, medical societies and other community groups. **South's need of Murray-Wagner-Dingell bill is clearly shown by fact that 49.6% of inductees in thirteen southern states were rejected because of physical deficiencies. 35.9% were rejected for same reasons in America's other 35 non-southern states.**

Every average day finds 7,000,000 Americans "out of commission" through illness or accident. About 3½ millions of these are in the labor force, or would be, if able. Lost wages amount to $3-$4 billion a year. Our industrial effort loses from 1.5 to 3.3 million man-years each year in this way.

FULL EMPLOYMENT BILL 60,000,000 JOBS

Hearings are scheduled soon before Senate Banking and Currency Committee on S. 380, by Senators Murray, Wagner, Thomas (Utah) and O'Mahoney. This bill declares it to be the policy of the United States **to foster free enterprise and private capital investments and to enable all Americans able to work and who are seeking work to secure useful, remunerative, regular and full-time employment.**

This is a bill good for labor and all the people. It should be supported by Senators McKellar and Stewart. **The 60,000,000 jobs program after the war cannot become a reality without Federal legislation of this character.**

BRETTON WOODS HR 2211, S.I. 540

The Bretton Woods Bill deserves labor's earnest support. Designed to promote world trade and prevent economic aggressions, it means jobs for American workers, markets for American industry and for our farms.

Opposed to the Bretton Woods Bill are the reactionaries, the isolationists and a group of bankers headed by the American Bankers Association, which seeks to cripple the Bill by amendment and delay. They are against it because it does not suit their selfish interests to

SEN. KENNETH D. McKELLAR

McKellar claims to have voted for more labor-supported bills in Congress than any other Senator now living. He has been there longest. Until 1941 Labor supported McKellar. He received Labor's support in 1940. His Labor record was good until 1941, when his votes began to go against Labor in a majority of instances.

The important question facing Labor in 1946 is: **How about McKellar's labor record since 1940?**

Divorce pleas are not denied married women today when the petition is based on proof that her husband beats her three days a week, even though he is a kind old man and during the first twenty years of their married life seldom blacked her eye.

McKellar's opposition to TVA Chairman David E. Lilienthal's reappointment is spiteful. Labor expects Truman to keep faith with the will of the majority of the people of the Tennessee Valley by reappointing Lilienthal, and not become a party to McKellar's selfish political patronage aims.

* * *

Local unions and Brotherhood lodges receiving this bulletin should file each copy for permanent reference. Every five and ten-cent store sells 2 or 3-ring note books in which the punched Bulletins will fit.

* * *

Hearings are already under way in Washington on S-555, **to create a Missouri Valley Authority.** This is important to success of 60,000,000 jobs program. We know what Tennessee Valley Authority has meant to the people in the way of cheaper power, more jobs in new industries, efficient utilization of natural resources. **Unions should write Senate Commerce Committee expressing hope S-555 will be favorably acted upon.**

* * *

Congressional tax makers are getting ready to prime the reconversion pump with millions of dollars of corporate excess profits tax refunds immediately after V-E Day. Look for legislation to make speedily available to big business the 10% excess profits tax credits estimated to exceed $850,000,000 which have been paid in over last four years. Under present law, these refunds could not start earlier than 2 years after the war.

No mention is made about refunding any taxes paid in by workers and farmers.

have low interest rates and an international bank with power to make loans directly to foreign countries at reasonable interest rates. They want to retain unmolested control of foreign loans, a power they used in the past to make or break foreign governments and to dictate policies in these countries through financial control.

The Bretton Woods bill would prevent the financial anarchy that followed the end of World War I, which played a role in bringing about World War II. It would stabilize currency and promote orderly trade and prosperity throughout the world.

Adoption of the Bretton Woods agreement, according to authorities in position to know, means 5,000,000 more jobs in post-war America, and these are conservative estimates.

LABOR'S INTEREST IS THE PEOPLE'S INTEREST

From time to time this Bulletin will note how Tennessee Senators and Members of the House of Representatives vote on various matters in Congress. Some Members of the Tennessee Congressional Delegation complain that they should not be held accountable to labor except on the basis of their voting records on legislation of a strictly labor character.

For example, Senators McKellar and Stewart do not concede that their votes against Senate confirmation of Henry Wallace's appointment as Secretary of Commerce and Aubrey Williams' appointment as REA head should be considered "anti-labor".

We contend that every Presidential appointment, every Congressional investigating committee and every legislative proposal relating to promotion of the war effort, improvement of social security, better education, higher health standards, greater recreational opportunities, restrictions of the right to vote, abolition of racial discrimination, etc., are of direct concern to the labor movement.

The Joint Labor Legislative Committee will, therefore, give all possible attention to such matters. Labor cannot be expected to restrict its interest to a narrow program which does not recognize the needs of the people as a whole.

VOL. I. NO. 11 | JUNE, 1945 | $2.50 PER YEAR

GOVERNMENT-OWNED PLANTS

Government cooperation, in addition to free enterprise and joint efforts of industry and labor, will be needed if full-employment program succeeds in post-war America.

Of total present U. S. production capacitl, Government now owns:

- 40% of steel producing capacity
- 50% of capacity to build machine tools
- 70% of aluminum capacity
- 90% of synthetic rubber capacity
- 90% of aircraft production facilities
- 90% of shipbuilding and repairs
- 96% of magnesium capacity

LABOR GIVES TOO

The CIO War Relief Committee has estimated that CIO members contributed $20,000,000 to the War Fund Drive in 1944, topping the 1943 total by 2 million.

This figure does not include nearly $10,000,000 given to Red Cross, or amount contributed to Community Chests.

EDUCATION

During the 1941-42 school term, Mississippi spent an annual average of $32 per pupil on education. New York spent five times that much. Tennessee's average was $60.29.

Fifty per cent of Mississippi school teachers today are paid under $600 a year. Tennessee figures are not available.

In Louisiana, 35.9% of the population is Negro, but Negro schools received only 14% of state and local money spent on education.

In every state where Negroes are discriminated against because they happened to be born of a different race, white children receive a lower grade education because they happened to be born in such states.

There is no fundamental justice in the fact that southern school children are handicapped by notoriously low educational standards just because they were born in one state and not another.

TRUMAN REAPPOINTS LILIENTHAL

President Truman's reappointment of David E. Lilienthal as Chairman of the Tennessee Valley Authority represents a victory not only for the democratic majority of the people, it indicates that our new President does not intend to be bossed in the would-be biggest "boss" in the U. S. Senate, "Kay-Dee" McKellar. Senator Stewart lost prestige, too, because he benignly said "me too" when McKellar opposed Lilienthal's reappointment.

Supporters of TVA must continue to be on guard, however, lest McKellar-Stewart forces succeed in passing the Byrd-Butler Bill, which is aimed at forcing TVA to seek its operating revenue from the Senate Appropriations Committee, of which McKellar is head man by reason of the inactivity of Sen. Carter Glass, committee chairman.

MISSOURI VALLEY AUTHORITY

Enemies of MVA are the private power interests and their stooges. The same interests fought TVA. Like TVA, the development of MVA means more electricity to more people at lower costs. If MVA opponents win, people in Missouri River Valley area will suffer because of higher electric power costs, continuing flood damage, stifling of industrial development and slower electrification of farm homes. Missouri Valley Authority Bill (S555, by Senator Murray) should be passed, whether people like Louisiana's Sen. Overton like it or not.

HOW THEY VOTED

Listed below are the voting records of Senators McKellar and Stewart in Washington on issues of interest to labor which were acted upon the first three months of the 79th Congress. Each of the bills has been analyzed and given a number for purposes of this item.

In the Senate. No. 1. Vote on motion to consider confirmation of Henry Wallace prior to George Bill, S. 375. Defeated 43 to 41. **No. 2 George Bill, S. 375.** February 1, 1945. Provided for separation of Reconstruction Finance Corporation from Department of Commerce. Passed 74 to 12. **No. 3. Wallace confirmation.** March 1, 1945. This was the vote on the confirmation of Henry A. Wallace to the position of Secretary of Commerce. Confirmed 56 to 32. **No. 4. Aubrey Williams' nomination.** March 23, 1945. Vote on confirmation of Aubrey Williams as Administrator of the Rural Electrification Administration. Rejected 36 to 52. **No. 5. Manpower (HR 1752) Bill.** This bill, the Kilgore-O'Mahoney amendment to the May-Bailey bill, gives War Manpower Commission Statutory authority. Passed 63 to 16, March 9, 1945. **No. 6. Manpower (HR 1752) Bill; Conference Report.** April 3, 1945. Refer to House analysis on Conference Report of Manpower Bill. Senate rejected Conference Report

A CONSTRUCTIVE PROGRAM

Dr. Frank P. Graham, President of the University of North Carolina and one of the South's most intelligent and practical liberals, recently proposed a 12-point program for the postwar development of the South which deserves far more consideration than it has received.

In announcing the program, Dr. Graham called upon the "Southern people, regardless of party, race, creed or economic position, to unite in support of the program," which he outlined:

"1. Reduction of 'uneconomic tariffs.'

"2. Elimination of discriminatory freight rates 'signally recognized in the preliminary and far-reaching decision of the Interstate Commerce commission.'

"3. Federal aid to the states for the public schools without Federal control and increased pay and equal pay for teachers of equal competence as steps toward providing equal educational opportunity for all youth.

"4. Elimination of the poll tax as a prerequisite to voting and provision for the equal suffrage rights of all citizens in primaries and general elections.

"5. More and diversified industries in the south and responsible collective bargaining between organized business and organized labor.

"6. State minimum wage laws in line with the Federal minimum; fair employment practices and equal pay for equal work.

"7. More diversification of agriculture; conservation development of soils, forests, minerals and waterpower, promotion of agricultural cooperative societies, farm and home ownership, and the establishment of a clear and equitable status for tenants.

"8. Adequate state and Federal support not only of applied agricultural and industrial research but also of fundamental scientific, economic, historical, social and humanistic research as indispensable to southern production and human well being.

"9. The development of great university centers in the south to equal Harvard in the East, Chicago and the great state universities in the Middle

LABOR'S RIGHTS AGAIN THREATENED

It makes no difference how good a law Congress or a State Legislature enacts, all its benefits can be wiped out by the same or a later Congress or law-making body by failure to appropriate money to insure enforcement. A good law can also be weakened by amendments.

Background: The National Labor Relations Act (generally known as the Wagner Act), passed in 1935 after one of the hardest-fought battles in the Congress, is generally regarded as labor's "Bill of Rights". It made effective the right of labor to organize and bargain collectively; outlawed company unions, and provided for the holding of elections in which labor could choose without interference, its bargaining representatives. The National Labor Relations Board was created by this law to administer the Act.

The importance of the NLRB to development of constructive, harmonious management-labor-community relationships in a large and complicated industrial society, such as exists in America, was never more apparent than during these war years. NLRB has played a major role in helping labor achieve decent living standards, and in helping keep production interruptions to a minimum, thus guaranteeing that America meet the gigantic war needs.

Time and time again anti-labor employers and their stooges in Congress have tried to cut the guts out of the Wagner Act by amendments. They have made some headway but are now licking their chops over current prospects of really "doing a job" on the Wagner Act and the Board. They are trying to secure Congressional approval of the following amendments to exempt certain industries from NLRA coverage, reduce the appropriation for the NLRB so the Act cannot be adequately enforced and otherwise restrict the Board from carrying on its functions:

(1) A cut of $500,000 from the appropriation. This would be a 22% cut from even the modest budget requested, and seriously cripple and limit the work.

(2) Renew the so-called "Frey rider" which anti-labor forces pushed through Congress last year. This prevents NLRB from spending funds in any case in which a contract has been signed for more than 3 months. It thus protects contracts with minority unions and unions assisted by employers, thus contradicting the intent of the Wagner Act.

(3) Bar the NLRB from spending any of its reduced appropriation for any case involving agricultural processing (canning, vegetable packing, etc.). This is being pushed by the big packing, canning and citrus interests. By keeping NLRB from handling agricultural cases, the bargaining rights of thousands of agriculture processing workers organized in both AFL and CIO unions would be destroyed. These include processing workers in the sugar beet fields, potato sheds, dairies, and fruit-packing houses as well as canneries.

West, and the University of California in the Pacific West.

"10. State aid for rural health centers and a state-wide medical care and hospital program for all the people in the states.

"11. State aid for county-wide libraries; for adult education; workers' education; institutions of government; state symphonies and folk drama; and recreational, cultural and spiritual programs for all the people.

"12. Most important of all, vigorous support now for the winning of the war in Asia; for Dumbarton Oaks, Bretton Woods and the international organization of justice and peace in the world."

AROUND THE STATE CAPITOL

Railroad workers are alarmed over the growing disregard of rail carriers of the safety, health and comfort—not to say convenience—of the traveling public and the railroad workers in Tennessee.

Brotherhood representatives are complaining to Railroad and Public Utilities Commission, and warned that current "inspections" to re-assess public utility properties for taxation purposes, while probably long overdue, should not be allowed to cripple railroads or result in higher passenger farmes and steeper freight rates. Brotherhood members also insist that inspections should be made of safety requirements and provisions, and improvements should be made mandatory.

"FOR YOUR CHILDREN, TOO"

The Southern Conference for Human Welfare, 506 Presbyterian Bldg., Nashville 3, Tennessee, has just published a new pamphlet, "For Your Children, Too." This is one of the most readable stories we have ever seen, and is **must reading** for every union member and every plain citizen interested in labor and the workers of our next generation.

SUPREME COURT DECISIONS

In two major labor decisions, the U. S. Supreme Court has upheld the right of labor unions to solicit mem-

(4) Prohibit the NLRB from handling cases involving foremen, and thus bar it from putting into effect new policies regarding foremen and supervisors. This is being pushed particularly by the Automotive (industry) Council as part of its fight to keep foremen out of unions.

These attacks on the NLRB are serious attacks on the welfare of the entire nation, and intimately affect the war production and future plans of all. Moreover, the whole issue of protecting the democratic processes of government is involved here—of making sure that a few well-organized lobbyists for special interests do not, through tricky use of amendments to appropriations bills, in effect actually repeal or fundamentally alter an important act passed by Congress (such as the National Labor Relations Act, as in this instance). This is indeed a problem of all citizens, not just of organized labor.

RECIPROCAL TRADE AGREEMENTS ACT

Few matters have come before Congress which are more important to labor in the post-war period than the question of renewing the Reciprocal Trade Agreements Act. Passage of this extension occurred in the House of Representatives on May 26, after Knutson's motion to recommit the bill to the House Ways and Means Committee was rejected 181-212. The vote on passage was 239-153.

Listed below are the votes of Tennessee Congressmen on the Knutson motion to recommit, and passage. "R" means vote with labor; "W" means vote against labor.

	Knutson Motion	Passage
Reece	W (Paired)	W (Paired)
Jennings	W	W
Kefauver	R	R
Gore	R	R
Priest	R	R
Earthman	R (Paired)	Did not vote
Courtney	R	R
Murray	R	R
Cooper	R	R
Davis	R	R

The Reciprocal Trades Agreement now goes to the Senate, where it is reported to have rough sledding ahead. Labor has good reason to hope and work for its passage.

PRICE CONTROL THREATENED—WIRE NOW OR PAY LATER

Congress and the big boys are out to scuttle price control. If they succeed, the flood of inflation let loose will wash away every wage gain and every improvement in living standards labor has achieved in years of struggle.

Everybody has a complaint against OPA. Its job is an almost impossible one. And the black marketeers and the profit-hungry industries with their political power over certain Congressmen have not made the job any easier.

But the alternative—the sky-rocketing cost of living which would result from no controls over prices—is enough to make us think twice before we start back-biting OPA.

Think of 26 cents a lb. for sugar, the price during World War I,

bers on company property on the time of the individual solicitors. The twin decisions upheld the long practice of the NLRB that such activity was proper.

In one case the Republic Aviation Corp. of Suffolk County, N. Y., was involved with a general plant rule against **"soliciting of any type."** An employee who passed out union application cards on his own lunch time was fired for violation of the rule.

Later Republic discharged three workers for **wearing shop steward buttons** of their union, the United Auto Workers (CIO), in the plant after being ordered to remove them. The management argued that this indicated its acknowledgment of the union and the steward's authority to represent the workers although at the time the union had not won bargaining rights.

The second case covered the Le Tournea Company of Georgia, manufacturers of earth-moving equipment. The firm suspended two workers for a short period for **distributing union literature** on their own time in a company-owned parking lot. The management claimed it had a rule against such distribution long before the union started to organize the shop.

The Supreme Court held that the actions of both companies discouraged membership in a labor organization within the meaning of Section 8 (3) of the National Labor Relations Act.

Any state anti-labor laws which conflict with the provisions of the Wagner Act were outlawed by the U. S. Supreme Court in a decision June 11, junking Florida's Christian-American-inspired "right-to-work" amendment.

The Court specifically declared unconstitutional the provisions of the law requiring union organizers and business agents to register with a state board and requiring local unions to file financial reports and lists of their officers.

Associate Justice Hugo Black, longtime friend of labor, wrote the opinion for the majority of the Supreme Court.

as compared to the 7 cents a lb. ceiling today. Think of having to pay **$1.00 a lb. for butter** as people did during World War I. **Even though we can't get as much as we would like, without price control we would be paying twice, or more, what we pay today.** During World War I eggs brought 80 cents a dozen—today, 45 cents a dozen.

The price of undermining OPA with thoughtless grumbling and a do-nothing attitude is too great. We are the people who benefit most from a strong OPA with the power to enforce its regulations. It is up to us. The meat packers, the big plantation-owner type farmers and the clothing manufacturers are out to kill it.

Unless the Price Control Act is renewed, without inflationary amendments, by June 30 we can expect a steadily increasing rise in prices which will cut our pay checks by half. The time is short. **Wire your Congressman that you want the Price Control Act extended with no crippling amendments and with sufficient enforcement funds to put the black market operators where they belong—in jail for the duration!**

POLL TAX GOING?

H. R. 7, to abolish the poll tax in all Federal elections, has again passed in the House of Representatives. It now goes to the U. S. Senate, where certain well-known southern poll-tax Senators are again threatening to filibuster it to another death.

Before this measure could be brought to the House floor for a vote, where its passage was assured, 218 signatures of Representatives to Discharge Petition No. 1 were required to force it out of the Rules Committee. Congressmen Reece, Jennings, Kefauver, Gore and Priest were the only Tennessee Representatives to sign this Petition.

Recorded as voting for H. R. 7 were Kefauver, Gore and Priest, with Jennings being paired in favor. Earthman was listed among those whose position on the matter is concealed under a general pair. Davis, Cooper, Murray and Courtney voted against passage.

Senators McKellar and Stewart should be reminded that labor, along with the overwhelming majority of other Tennessee citizens, favors repeal of the poll tax and wants H. R. 7 to become law.

VOL. I. NO. 12 JULY, 1945 $2.50 PER YEAR

AROUND THE STATE CAPITOL

Your committee's report upon the 1945 session of the State Assembly noted the generally reactionary influence of the administrative arm at all points at which progressive legislation should have been obtained, and the utter lack of promise in the "official family" for the future. It is necessary now to observe the aptness of our earlier estimation.

Governor Jim McCord thus far has exerted himself in the people's behalf mainly by indulging his love of speech-making. His average of almost a speech a day somewhetre gives him a record in this regard never approached by any of his predecessors, even the most loquacious. In these numerous addresses he has said nothing that would allow us to revise our assessment of the caliber of his "leadership." It seems apparent that by the end of his term the state will be paved over with his platitudes.

Meanwhile, the creation of soft posts for the favorites of the political machines continues in the various administrative departments, an atmosphere of "muddling through" hangs over Capitol Hill, and it is clearer than ever that the hopes of our state for responsive, progressive government hinges upon the political awareness and the elective weight of Labor and its friends at the next access to the polls.

CONGRESS RECESSES

The tempo of the war in the Far East makes it probable that Japan may collapse before the summer is out. In these circumstances the people must feel regret, and indeed alarm, that the House of Congress has taken a long recess, many of the members having departed for remote corners of the world. Urgently required legislation to aid reconversion and to sustain the purchasing power of the workers during reconversion waits on the table. A sudden end of the war in the Pacific could bring the nation close to catastrophe because of this unpreparedness.

GENERAL REGISTRATION

Labor, represented by the Joint Labor Legislative Committee, have by this time received and read the Joint Labor Legislative Report, wherein is reported the actions and omissions of the recent Seventy-Fourth Tennessee General Assembly, as they affected the interest of labor and the general welfare of Tennesseans.

Upon examination of the record (Legislative Report), it can be readily seen that the Seventy-Fourth Assembly, like its two predecessors, was extremely callous in its treatment to the needs of labor, and in its attitude to the popular will of the people for democratic government.

Such important and necessary legislation as Repeal of the Poll Tax, Child Labor Amendments, State Wage and Hour Legislation, Amendments to Tennessee's Workmen's Compensation Law, Employment Security, Minimum Crew-Maximum Train Length, etc., were either defeated or received no consideration whatever, simply because in most instances the bosses were opposed to legislation of this type.

The foregoing is not intended just to point out exceptions and to register complaints against the General Assembly, instead, its intent is to impress you with the urgent necessity of registering and otherwise qualifying to vote in the 1946 elections. It becomes increasingly plain with each session of the legislature, that unless labor, its families and friends in Tennessee, will qualify themselves to vote and then vote on election days, they will receive even less consideration from the hand-picked boss-controlled legislators and public office-holders who make and administer the laws under which they and their children live.

During the month of August there will be a general registration in all Counties and Cities where registration is required of voters. Every member of labor should register and make every possible effort to see that the members of his and/or her family as well as their friends, who are of voting age, register, pay poll tax, and above all, **VOTE. Labor in Tennessee must realize that only through intelligent and united political action, can it determine the quality of the public office holders who make and administer their laws.**

We have registration only in six of the larger counties. That registration is biennial. However, twenty days before election a supplementary registration period is held so that anyone who really cares to qualify himself in that manner to vote and has reasonable qualifications can do so. The poll tax in Tennessee is one dollar levied by the state and the counties can levy an additional dollar. Poll taxes must be paid before one is qualified to vote.

REGISTER — PAY POLL TAX — AND VOTE!

AMERICAN ANTI-LABOR GROUPS EXPOSED

Eight hundred anti-labor organizations are said to be operating in the U. S. The most important ones, with the names of the men who back them, many of them in high places, and descriptions of their common pattern of activities may be found in a new book (by E. A. Piller). Tennessee labor will be especially interested in the chapter on Vance Muse's Christian America, which has spearheaded the drive against labor in Tennessee and other Southern legislatures. Read this book if you want to know who are the many dangerous enemies of democracy in the United States.

A REAL ANTI-LABOR BILL (HR 3384)

Long infamous as a foe of labor and progress, Mississippi Representative Rankin whose record includes attacks on the soldier's right to vote, obstruction of the GI Bill of Rights, and most recent attempts to block constructive discussion of Veterans' hospitals, now proposes through legislation to set American War Veterans against American Union Labor.

Under the guise of helping Veterans, Rankin has introduced and railroaded through the House Veterans' Committee, a bill which would use Veterans as a wedge to undermine labor unions and cause friction between workers and ex-service men. Under the bill, Veterans applying for jobs in plants having "Union Shop" agreements could not be required to join the union.

There might be some excuse for this type legislation if there were any labor organizations which barred veterans from membership, but the facts are, practically all labor organizations have kept their members who went to war in good standing.

Representatives of labor, industry, government and veterans are working out veterans reemployment problems in friendly conferences, with good prospects of success. This is no time for half-baked legislation such as Rankin's edition of the "Christian American Right of Servicemen to Work."

Suggested Action: If your Congressman is spending his vacation at home, contact him. If he is touring Theatres of War at your expense, write him stating your opposition to the Rankin Bill.

SIXTY-FIVE CENTS MINIMUM WAGE ASKED

Over ten million American workers, even in these boom days, are making less than 65c an hour and cannot afford a decent standard of living for their families.

A bill (HR 3719) just introduced by Senator Mead and Representative Hook, would amend the Wage and Hour Law whereby the minimum wage rate would be increased to 65c per hour with a further provision that it would raise to 75c per hour in two years.

A Senate sub-committee, headed by Florida's Senator Pepper, has recently recommended to the War Labor Board that its present 55c minimum wage be increased to 65c. The Committee pointed out that any wage less than 65c was "insufficient to provide even the barest minimum standard of living consistent with health and decency". The Committee also declared that the expense of a 65c minimum would not upset our economy, pointing out that "the cost can be absorbed by industry without substantially affecting current profit levels and in most instances within the existing price ceilings".

Thus Senator Pepper's Committee answered its critics who claim that providing a decent living to American workers would wreck the country. When a 30c an hour minimum wage first was proposed in the last decade, Southern employers howled that it would put them out of business but on the contrary Southern industry has grown and our whole economy has prospered.

The new bill would also cover three groups not now under the provisions of the Wage Hour Bill: workers employed in canning and other processing of fish and allied products, seamen and workers employed within "the areae of production".

The bill has been referred to the House Labor Committee, which is generally pro-labor, with Representative Mary Norton as Chairman, but there are no chances of hearings on this urgent measure before late November and strong opposition is expected from employer groups. **Suggested Action:** Write your Congressman urging him to support the Mead-Hook Wage and Hour Amendment.

MORE MONEY FOR UNEMPLOYED WAR WORKERS

President Truman has told Congress that of first importance is the reconversion program increasing the present unemployment compensation which now averages around $15 a week. Not until this week, however, did Senator Harley Kilgore and Representative Robert Doughton introduce a bill in Congress which would make provision for the thousands of workers who are being laid off in war cutbacks each week.

The new law (HR 3736) would: (1) increase the weekly benefits to jobless workers to a maximum of $25; (2) Raise the number of weeks of compensation to 26; (3) Extend unemployment compensation benefits to maritime and United States Government workers.

Though the law is supported by all branches of labor and is urgently needed for the more than a million and a half workers already laid off, there was every indication that the bill would be stalled in the House until late fall. It was referred to the House Ways and Means Committee which has a number of members who are known as unfriendly to labor. It was predicted that the bill might not reach the House floor until November.

THE ANTI-LABOR CONSPIRACY

The proposed Federal Industrial Relations Act (S1171), sponsored by the so-called committee to promote industrial peace under the chairmanship of the corporation lawyer, Donald R. Richberg, and introduced into the Senate on June 20th by Senators Carl A. Hatch, Democrat, New Mexico; Harold H. Burton, Republican, Ohio; and Joseph H. Ball, Republican, Minnesota, is of the same inspiration as the notorious provocative Smith-Connally law. Both measures are characterized by a fundamentally hostile approach to organized labor in the United States. Both would aggravate differences between labor and management, rather than help their solution. The bill contains the following fundamental threats to all labor. They are: (1) A weakening of the Norris-LaGuardia anti-injunction Act; (2) The institution of a scheme of compulsory abritration; (3) The destruction of the right to strike on the part of the public utility workers; (4) The denial to one million and one-half employees of 285,000 small concerns of the right to engage in collective bargaining; (5) Encouragement of splinter or break-away labor groups with a consequent weakening of legitimate labor organizations, and last but not least, the creation of chaos and uncertainty in the feld of labor relations for an indefinite period while the courts of the land pass on the constitutionality of various phases of the Act.

It is shocking to say the least that men like Senators Ball, Burton and Hatch would ape Hitler by attempting to cripple organized labor at a time when it is accomplishing the greatest production job in history, with a minimum of work stoppages. Labor is proud of its wartime record.

FILIBUSTER

Majority rule is the foundation stone of American democracy. Yet this is the very principle that some Senators from the South are seeking to undermine in their attacks on the anti-poll tax bill and the FEPC.

Filibuster is their tactic. Filibuster means preventing a vote by the elected representatives of the American people. Filibuster means throwing sand into the gears of our constitutional process. Filibuster means rule by a minority.

Regardless of the merits of the FEPC or the Anti-Poll Tax bill, every truly democratic member of labor must demand of his Senators: MAJORITY RULE and NO MORE FILIBUSTERING.

Recent Gallup Polls shed light on the way the American people feel about President Truman's recommendation. One showed that a majority of U. S. Workers have not been able to save enough to tide them and their families over an unemployment period. Another indicated that 63 per cent of the population believe the government "should give money to workers who are unemployed for a limited period of time until they can find another job".

HOW THEY VOTED

Listed below are the voting records of Tennessee Congressmen on issues of interest to labor which were acted upon the first three months of the 79th Congress. Each of the bills has been given a number for purposes of this item, and analyzed.

In the House of Representatives. No. 1 Permanent Investigating (Dies) Committee. January 3, 1945. This was the vote to make the Committee to investigate Un-American Activities a permanent committee. Under the chairmanship of former Congressman Martin Dies this committee was one of the greatest farces ever put over on the American people. Passed 207 to 186. **No. 2. Committee to Investigate Executive Agencies. January 18, 1945.** This committee, headed by Howard Smith of Virginia, a bitter enemy of labor and of the administration, to investigate any division of the executive branch of the Government which seemed to the committee to be overstepping its authority. This committee in the past has attacked Price and Rent Control Divisions of OPA; the War Labor Board and other Executive Agencies vitally concerned with winning the war in the shortest possible time. **No. 3. Agricultural Census.** February 7, 1945. Originally enacted by Republican Congress in 1924. Reenacted in 1925, 1930, 1935 and 1940. Necessary for collecting data in working out post-war agricultural problems. Since most of the personnel for taking the Census would be selected from Democratic ranks, Republicans were opposed, passed 198 to 171. **No. 4. George Bill S-375.** The significant vote in the House was on the motion to recommit the George Bill to committee. The Republican leaders made this a strictly party issue and mustered all their strength in the Yea votes on this motion, which, if passed, would have bottled up the George Bill and jeopardized Wallace's confirmation by the Senate. The only Republicans who voted right on this bill were Welch of California and Fulton of Pennsylvania, while all but 22 Democrats voted Nay. When the motion to recommit failed, the House passed the bill by a vote of 399 to 2. **No. 5. Manpower.** The three House roll call votes on manpower legislation are: Passage of May-Bailey Bill, February 1, 1945. Passed 246 to 165. **No. 6.** Referring the House and Senate bills to conference. March 14, 1945. Passed 211 to 177. **No. 7.** The vote on accepting the conference report which was stronger than either the House or Senate Bills and gave sweeping powers to the Director of War Mobilization and Reconversion March 27, 1945. Passed 167 to 160.

These votes are listed separately because many Congressmen friendly to labor voted in opposition to labor policy because the President and the military authorities insisted on strong legislation as necessary to win the war speedily, and similarly many foes of labor voted in accordance with the labor position but from a desire to

PEACETIME MILITARY CONSCRIPTION

Feverish efforts are being made to confuse the American people and rush this legislation through while they are war-minded, thereby changing America's historic policy of peace and freedom to one of militarism. This proposed legislation has no relationship to the winning of the war. Further, it is a personal post-war planning project designed to make more secure the jobs and promotions of the many army and navy officers created out of this war.

Labor Supports Preparedness

We are as anxious as anyone that our country be fully prepared at all times, and we are not unmindful of the unconquerable spirit of free men. Though our men and women of the armed forces are not the product of years of militarism, who will deny their ability as soldiers? Locked in combat with the automatons of Prussian and Japanese militarism, we have marched steadily toward victory and with fewer casualties than our enemies have suffered.

In the future, even more than in this war, technology and science will fight wars, and technology and science will not be developed to the maximum by taking our aspiring young men from laboratories and peaceful pursuits, to become conscripts in a military machine. Even in this war, we had men available before we had machines of war available. In the early days of training for this war dummy wooden guns were used and hayracks were employed as dummy tanks for training purposes.

Labor For Enduring Peace

There is something pitifully ironic about a nation fighting for enduring world peace by delaying consideration of the problems of peace while vigorously considering the problems of preparing for the next war. Labor is bitterly opposed to peacetime military conscription. Contact your Senators and Congressmen and demand their vigorous opposition to this legislation. Let them know we do not propose to install militarism in free America after fighting a bitter cruel war to destroy it in other parts of the world.

hamper the war effort rather than from any desire to see war production increased by voluntary means.

FOR YOUR CHILDREN TOO

A new publication of the Southern Conference for Human Welfare is a message to Tennesseans and Southern people about labor unions, their aims and work, in terms of what they have done for children.

Too many Tennesseans are ignorant and misinformed about the labor movement. We believe "For Your Children Too" will help interpret unions to these thousands of people. No effort is more important today as our native rabble-rousers are trying desperately to stir up anti-labor feelings among veterans, farmers, women and religious groups. This pamphlet spreads the facts that are needed to counteract this propaganda—thirty-two pages of heart-warming pictures with a fresh approach to the subject "For Your Children Too" deserves a wide circulation. We recommend that every local union and lodge purchase and distribute as many of these pamphlets as they can afford, for we know of no better means to dispel the idea cherished by many, that labor aims are measured only in dollars and cents.

The pamphlet is available at $7.50 per hundred. Mail your order to Southern Conference for Human Welfare, 506 Presbyterian Building, Nashville 3, Tennessee.

VOL. I. NO. 13 | AUGUST, 1945 | $2.50 PER YEAR

REGISTRATION

The results of the biennial registration indicate the Labor's program to make the workers in Tennessee conscious of their obligations as citizens has been fruitful.

Results so far obtainable reveal the largest registration in history. Present figures from our four largest counties are: 78,000 in Shelby County, 52,000 in Davidson County, 27,000 in Hamilton and 10,000 in Knox County.

The Joint Labor Legislative Committee and the Tennessee Citizens Political Action Committee deserve a large measure of credit for getting workers and their families to register in such wholesale lots.

FARMERS ARE ORGANIZING IN TENNESSEE

Organization of at least four new County Locals of the National Farmers Union is reported underway by Myles Horton, State Representative.

At Dechard, Tennessee, in Franklin County, the first contract for selling potatoes collectively was signed by the Green Haw Farmers Union, and brought 15c above market price for the members' potatoes.

In Green County over 100 farmers voted to set up an NFU Local at their first meeting. An East Tennessee District Farmers Union office has been established at Greenville, and a District Director employed.

The organization of farmers is vitally important to the future welfare of industrial workers in Tennessee. The National Farmers Union needs our help, including financial help. All Labor Organizations should rally to the support of the farmers now.

TENNESSEE SAFETY

Alarmed by the increase in traffic fatalities, the State Safety Commission is going to make every effort to keep our highways safe and protect

TELEPHONE RATE CASE

The Joint Labor Legislative Committee has decided to intervene in the case now pending in the Davidson County Chancery Court between the State Railroad and Public Utilities Commission and the Southern Bell Telephone Company. The Telephone Company is attempting to put aside the order of the Commission requiring it to lower its charge for long distance calls made inside the state. For several years, it has been cheaper to make long distance calls outside the state than from one point to another inside the state for the same mileage. The Federal Government has set lower interstate rates per mile than were in effect on intrastate calls.

Mr. Leon Jourolmon, a member of the State Railroad and Public Utilities Commission, who has been trying to correct this discrimination for several years, finally succeeded with the help of the Nashville Trades and Labor Council, in having an order entered on July 3, 1945, requiring the Telephone Company to reduce its long distance rates inside the state to the same rate per mile charged on calls across the state line.

The Company has refused to comply with this order until forced to do so by the State Courts, and has filed a court test. Your Committee has entered this case and filed an answer in reply to the Company's court test, in order that action can be taken from the standpoint of the actual consumer and to insure refunds on excess charges to our membership and the general public, when the Commission's order is finally upheld. The Joint Labor Legislative Committee will take all steps in its power to uphold the Commission in its fight to regulate this giant monopoly in behalf of the public.

THE PEOPLE'S RECONVERSION PROGRAM

A cold chill swept across the country this month—the month of victory over Japan. The Atomic Age is being greeted by millions of jobless people. One million people were reported out of work twenty-four hours after total victory was declared. Reconversion Mobilizer Snyder expects 8 million unemployed before spring. Another government source predicts 10 million before Christmas. In Tennessee, over 21,000 have been laid off since V-J Day, according to the State Unemployment Compensation office.

There is no adequate way to measure possible unemployment as we write this Bulletin. But reports of layoffs are coming in from all over the nation. No provisions have been made to prevent mass unemployment, to care for the jobless, or to keep the purchasing power of the people from dropping disastrously. The people of the nation are accusing Congress of being asleep on "this second, economic Pearl Harbor" which hit the country on V-J Day.

the traveling public, it has been announced in the daily newspapers.

Labor wholeheartedly supports any move to promote the public safety. We further believe that safety should not be provided for only one segment of the public. We would like to see the drive to protect travelers on the highway extended to include travelers on railroads, and workers in factories, mines and railroads. The Department of Labor, the Railroad and Public Utilities Commission should join with the Department of Safety and make the safety drive general.

AROUND THE STATE CAPITOL

Under this head the April issue of the Tennessee Labor Bulletin stated ". . . Labor withheld appraisal of Employment Security Director W. O. Hake, believing the key to his policies would be found in the future. . ." We believe that Commissioner Hake's position on proposed Federal Unemployment Legislation furnishes the key.

Mr. Hake is opposing Senate Bill 1274, a bill which would increase unemployment compensation payments to $25.00 per week for twenty-six weeks. He favors the slow starvation plan which would keep payments to a low level over a longer period of time.

According to press reports, Governor McCord in reply to questions from Senator Mead, answered in effect, federal legislation would in no wise affect state unemployment payments as the state, under existing law, would not be required to credit payments made by the federal government against the unemployment benefits paid under the state law.

This is not the first occasion that Commissioner Hake has been at variance with labor since being made head of the Department of Employment Security.

TENNESSEE'S UN-AMERICAN LAWS

Two laws on the statute books of Tennessee should be repealed by the next General Assembly. One forbids the teaching of the theory of evolution in public schools; the other bars a naturalized citizen from teaching in the public schools.

A school-teacher in Norris, Tennessee, with a college degree and many years of experience was recently forced to leave the school under this

In Tennessee, men of industry are calmly announcing that unemployment won't amount to much, and even if it does, a little taste of it won't hurt. It has been said that some men of industry would like to go back to the days of 10 or 15 million unemployed. Such men hope to use a hungry mob of unemployed war workers and veterans to break down good working conditions we have worked hard to establish and to beat down demands for higher wages.

Plan for Reconversion

The people's plan for reconversion is based on the belief that our country can provide the good things of life for all its citizens in peace time as well as in war. We have seen infant and child care, housing, maternity care of wives of servicemen, more ample supplies of good food, physical fitness activities, steady jobs at better wages, more complete use of the labor and skill of all Americans. Are these things going to pass away? Are we concerned about these things only when we ask our husbands, fathers and sons to die or be mutilated, so that people can live in a world free from want and fear? Are we then to forget the cause we asked these men to die for? The answer is in your hands.

In previous editions of this Bulletin we have outlined the reconversion program labor is supporting. Because of the importance of action NOW from the "grass roots" in support of the program we are again presenting it:

FULL EMPLOYMENT BILL (Murray-PattonBill)—S-380—HR-2207

The Murray-Patton Bill recognizes the obligation of the government to assure full employment and full production. The President of the United States will present Congress with a national budget stating jobs available and the number of potential job seekers, January of each year. It will be the responsibility of Congress to recommend action to make up any indicated work deficit, (1) through all possible aid to private business, and (2), through promotion of public works. This Bill does not automatically provide everyone with a job—it provides the machinery which can be used to make jobs available.

Action in the Senate

The Senate Banking Committee, under the chairmanship of Senator Robert Wagner, is now holding hearings on this Bill. Leaders of all labor organizations, as well as such prominent officials as Secretary of Agriculture Anderson, Secretary of Commerce Wallace, and the recent Secretary of the Treasury Morgenthau, have appeared before the Committee and endorsed the Bill. The Chief Executives of America's two largest cities—Mayor LaGuardia of New York, and Mayor Kelley of Chicago—told Congress that the federal government has a definite responsibility to prevent the American people from going hungry. Here in the South, W. Cooper Green, Mayor of Birmingham, Alabama, said he believed the Bill would prevent depressions.

Delegations of union members in cities throughout Tennessee should call on the Mayor and ask him to follow Mayor Green in support of this Bill. Letters should pour in on Governor Jim McCord, Senators Kenneth McKellar and Tom Stewart, urging them to throw their support behind the Full Employment Bill.

law because she was born in Norway. The authorities overlooked the fact that she had been teaching for almost thirty years. She came to this country when two years of age and became naturalized under our laws. This law is thoroughly un-American.

SOUTHERN CONFERENCE OF TEAMSTERS

The Policy Committee of the Over-The-Road Division of the Southern Conference of Teamsters met at the Peabody Hotel in Memphis the week-end of August 17 and 18.

40 delegates and International Representatives discussed problems which Teamsters face now that the war is over.

The Chairman of the Conference which represents the organized Teamsters of ten Southern states (Arkansas, Alabama, Florida, Georgia, Oklahoma, Tennessee, and Texas) is Frank Prohl, President. Organization headquarters are in Atlanta, Georgia.

LABOR'S WAR RECORD

Labor Day will have an extra added significance this year—when labor can throw out its chest over the swell war job now completed. Listed is a part of the record for which labor is justly proud.

Production: Labor produced five billion dollars worth of munitions per month, at the peak of our war effort. General George C. Marshall, Chief of Staff, U. S. Army, termed this record a "miracle."

Strikes: Work stoppages averaged less than 1/10th of 1% of the time put in by the nations' workers on the job.

Transportation: Railroad workers accomplished what pessimists termed the "impossible," by carrying a load more than double pre-war levels though short of equipment and manpower. American seamen delivered the goods to the far flung outposts of the war despite the danger of constant torpedoing.

Armed Forces: Three million members of organized labor entered our armed forces. Many thousands gave their lives in battle, while Big Business was getting bigger. A recent United Press survey reveals that **eleven private business enterprises have been added to the Billion Dollar Group during the war.**

House to Act Soon

The House Committee on Executive Expenditures will start hearings on HR-2207 soon. Chairman Carter Manasco (D., Ala.) has already termed the Bill as "vague and unrealistic". This is an indication of the reception the full employment measure will receive in his Committee.

Write Representative Manasco, and your State Congressmen asking them to support the Murray-Patton Bill. Representative Estes Kefauver of the 3rd District has publicly stated his support for the Bill.

A New Wage Policy

Full production and full employment rests primarily upon the purchasing power of the American people. When people have money they can buy the products industry produces, thereby keeping the wheels of the factories moving. Purchasing power is now threatened through loss of weekly earnings, the return to civilian production with lower rates of pay, and unemployment. An immediate revision of our national wage policy to provide for a substantial increase in basic wage rates for American workers is necessary to avoid depression.

Since the War Labor Board issued General Order No. 40, the way has been paved to negotiate any wage increases without regard to the Little Steel Formula, or other controls, **providing** the employer seeks no price relief. Wage increases requiring price relief, or dispute cases, must go to the Board. The retroactive date established for such negotiated wage increases is not affected by the date of the General Order, August 18, 1945.

65c Minimum Wage, S-1282—HR-3837

This Bill would amend the Fair Labor Standards Act to provide a minimum wage of 65c an hour (instead of the present 40c) with permission for industry committees to establish a minimum wage of 75c per hour for specific industries.

Even during war time, over 10 million American workers made less than 65c an hour, and thus could not afford a decent standard of living for their families. A minimum wage of 65c will help maintain the purchasing power of the people at a higher level. Employment Commissioner W. O. Hake pointed out only recently that the average wage of war workers laid off and made eligible for unemployment benefits in Tennessee was only a little over $22 a week. With a 65c minimum, the **minimum** weekly wage for a 40 hour week would be $26.

No action is being taken on this Bill at present. It is up to Labor to get action started. When the Wage and Hour Bill was first introduced, it met with the same reception for two years. Write your Congressmen to support the 65c Minimum Wage Bill.

Federal Unemployment Compensation (Kilgore-Forand Bill)

This Bill is an emergency measure to provide additional federal payments to enable unemployment compensation to be increased to $25 per week for 26 weeks. It extends unemployment compensation to maritime and United States Government workers.

In Tennessee, the maximum benefit a worker can draw when he is laid off is $15 for 16 weeks. A recent survey disclosed that the national average maximum benefit was $20.

ANTI-POLL TAX BILL HR-7

The House of Representatives passed HR-7 just before Congress recessed. It is now in the Senate Judiciary Committee, and has been referred to a Sub-Committee.

This bill, which if enacted, would give 10,000,000 people in seven southern poll-tax states a free vote in federal elections, has two times before passed the House only to be filibustered to death in the Senate by a small minority of Poll-tax Senators.

Labor has a tremendous stake in the fight for a free suffrage for all American citizens and the killing of the poll-tax system. Examination of the record clearly reveals this fact. Approximately eighty per cent of the vicious anti-labor legislation introduced in Congress is introduced by poll-tax Senators and Congressmen.

The elimination of the poll-tax is just as essential to peace and prosperity, as full employment, Bretton Woods, reconversion and other legislation designed to bring about economic security. We can never expect to have all the benefits of the latter without the first. Every member of organized labor should enter the fight for freedom at home.

Suggested Action:

Write Senator Carl Hatch, Chairman Senate Judiciary Sub-Committee, urging that he immediately report the bill out favorably.

Write Senator Pat McCarran, Chairman of Senate Judiciary Committee, urging that he immediately report the bill out favorably for passage.

Write your Senator urging that he vote for cloture to prevent a filibuster and to vote for the bill. The addresses of all Senators are: Senate Office Building, Washington 25, D. C.

ORGANIZED LABOR ON THE MARCH

Organized labor has reached its greatest numerical strength in American history, according to reports released by the United States Department of Labor.

More than 14,500,000 workers are now working under collective bargaining contracts. According to Bureau of Labor Statistics only 8,000,000 employees were covered by contract in 1939. In less than six years, Labor has nearly doubled its numerical strength. Keep on the March.

The House Ways and Means Committee and the Senate Finance Committee opened hearings on this Bill this week. Governors are going to Washington to make known their views on this Legislation. Several State Commissioners of Unemployment Compensation are known to be fighting this Bill. The opposition will be strong. Write your Senators and Representatives to appear before the Committee in support of the Unemployment Compensation Bill, and ask them to vote for it themselves.

New Wagner-Murray-Dingall Bill—S-1050—HR-3293

This Bill amends the present Social Security Act to improve old-age pensions, to federalize unemployment compensation, and to establish a nation-wide health insurance program. Workers and their families for the first time will be able to get complete medical care from their own doctor without debt. Services of specialists, laboratory fees, X-rays, 30 days hospitalization are included.

The 1944 health bill died with the 78th Congress. This 1945 version will meet the same fate unless Labor lines up its Congressmen behind the bill.

Other Measures

Labor's program also call for the creation of a permanent Fair Employment Practices Committee; amendments to the G. I. Bill of Rights to provide for increased mustering out pay, increased advances for education and business opportunity, and greater protection and facilities for the disabled veterans; and revision of tax legislation to provide relief to low income groups.

We recognize that the objectives of full production and full employment can only be secured through the unified efforts of labor, management and government. Industrial strife should be avoided. Labor organizations are calling on employers to join with them in renewing their pledge to adhere to their contractual obligations in letter and in spirit. On the basis of the program outlined above, a labor-management conference can make a real contribution to swift reconversion to full civilian production and employment.

THE TIME IS NOW

As this Bulletin goes out in the mail, your Senators and Representatives are boarding trains and airplanes for Washington. If Labor is to see its program of full production and jobs for all at decent wages achieved, the **Time Is Now**. The alternative is an economic depression far worse than we experienced in the 30's.

VOL. I. NO. 14 SEPTEMBER, 1945 $2.50 PER YEAR

AROUND THE STATE CAPITOL

After having held a few meetings, Governor McCord's Commission on Constitutional Revision have, according to available reports, held that few constitution changes are needed to adapt the present constitution fully to present day needs.

Most Tennessee workers will agree that the desired results of a constitutional revision does not depend on the number of changes made but instead, they depend on the changes most needed. As yet, the Commission has shown no indication of being guided in their deliberations by the maxim of "First Things First."

The Commission has mentioned three of its recommendations which are incidentals that probably will be the cause of few objections. They are:

(1) Lengthening of the Governor's term.
(2) Making a majority a quorum in the legislature.
(3) Raising legislators' pay, all of which can be easily obtained if essential changes are listed at the top.

It is hoped the Commission's final report will justify its existence by recommending these constitutional changes and giving them absolute priority.

(1) A free vote.
(2) Simplify the means of amendment.

WATCH ANTI-LABOR USE OF STATE GUARD

The McCord administration is now thumping up increase in State Guard membership. Training programs emphasize "expert" use of tear gas, breaking up "riots."

Labor organizations easily remember how State Militia has been used in the past to break strikes—so employers could destroy unions and force wage cuts and other impositions on workers. All signs point to same intentions now. No other reasons seem reasonable.

McCord comes up for re-election in the August Democratic primary in 1946.

LABOR REPRESENTATIVES WRITE SENATOR McKELLAR

October 1, 1945

Hon. Kenneth McKellar
Senate Office Building
Washington 25, D. C.
Dear Senator McKellar:

America is now witnessing evidence of the most convincing nature that Labor, by and large, observed its no-strike pledge during the war. This no-strike pledge was kept 99 and 99/100 per cent perfect. The no-strike pledge was given for the war's duration only.

Since V-J Day the obviously necessary cutbacks of war orders have left a terrific vacuum in their economic wake. Millions of workers have been laid off. Those still employed are working on shorter work-week schedules with resultant drastic curtailment in weekly earnings. We are finding that work in civilian production frequently gets considerably lower earnings per hour than the same employees previously received in war work.

PREDICTION BY LABOR CORRECT

It is obvious today that labor's prediction eight weeks ago was correct—that many employers, determined to continue their vendetta against trade unions, would endeavor to provoke labor into strike action and, with the help of certain Members of Congress, thereby place at labor's doorstep the responsibility for the difficulties which are now confronting the nation.

We are cognizant today, as we were several weeks ago, that all this bodes ill for our reconversion and postwar economy unless—with a singleness of purpose—immediate and concrete steps are taken by labor, management and the government.

65c MINIMUM PAY ESSENTIAL

By and large, the strikes in progress today and those which appear to be imminent are over the issue of an immediate revision of our national wage policy necessary to provide for a substantial increase in basic wage rates. Labor has felt all along, and has given expression to such feelings, that all wage cuts of any description or through whatever guise must be combatted and prevented. We have been saying for some time and we still say the minimum wage should be immediately raised to 65c per hour.

Your attention is called to the fact that a 65c hourly minimum wage rate will provide only $1300 annual income if 52 weeks of 40 hours are worked. We know you will agree that $1300 is a mighty small income. Yet, statistics show that some ten million workers may possibly be affected. Translated in terms of purchasing power for such low income groups you will immediately recognize the value of such a minimum wage. It will help the workers and their families

GOVERNOR McCORD REVEALS ANTI-LABOR BIAS

Governor Jim McCord may as well have said he was against organized labor and opposed to high wage standards when he declared that Commissioner W. O. Hake, of Tennessee's Department of Employment Security, spoke for the "Administration" when he went to Washington (at Tennessee taxpayers' expense) to oppose Kilgore-Forand Bill's provision for maximum $25 unemployment benefits for 26 weeks.

Labor representatives are now speaking out in the open, claim their position is now sustained by Governor McCord himself. Labor feels McCord personally separated Unemployment Compensation Division from Department of Labor (by special Act in 1945 Legislature) in order to have tight control over UC Division. Hake is McCord's appointee. No Commissioner of Labor would have dared oppose Kilgore-Forand Bill and McCord, former Congressman, knew such a measure would be up in Congress in 1945.

SENATOR STEWART AGAINST $25 WEEKLY UNEMPLOYMENT BENEFITS

Following appearance of Tennessee Employment Security Commissioner W. O. Hake before Congressional Committee in opposition to $25 maximum unemployment compensation payments to unemployed in Tennessee, Senator Tom Stewart voted against this provision of the Kilgore-Forand Bill.

Labor is seething mad about Stewart's vote. Tennessee Citizens PAC says it is receiving largest and most numerous $1.00 contributions yet since Stewart subscribed (by vote) to Hake's position that $25 per week to unemployed would make loafers out of workers.

"FIGURES DON'T LIE"

So say the professors of the school of confusion, who are deliberately attempting to sell the public on the idea that there are plenty of jobs if only the workers would take them instead of "loafing" on fat unemployment benefit payments. (Average weekly benefit check: Tennessee $12.10.)

Reports released for September, by the Tennessee Employment Security Department, reveal that total job layoffs numbered 35,766 while total job directly affected, as well as farmers and other producers of basic food and living essentials.

Full production and full employment rest primarily upon the purchasing power of the American people. This is threatened now through loss of weekly earnings, changeover to civilian production with lower rates of pay and unemployment.

MUST MAINTAIN PRICE CONTROL

Effective price control simply must be maintained to prevent inflation. Now and in the immediate future, more than ever, it is essential that profiteering be curbed. Control of prices must not be weakened. Demagogic appeals by profiteers for elimination of controls should be exposed and their true design revealed as but attempts to gouge the American public. The extortionate profits which corporations have amassed during the war reflect the increasing labor efficiency and productivity resulting in decreased costs and demonstrate the absence of any justification for increases in the cost of living.

ACTION BY CONGRESS IMPERATIVE

The foundation, upon which the American people desire to build their future, was laid by President Roosevelt in his historic Economic Bill of Rights. This reflects the aspiration of our people. Nothing less will suffice. It means jobs for all with steadily increasing wages, decent homes, health and education facilities for all, full opportunity to all businessmen to compete in a free market and a decent return to farmers.

Action is imperative to attain these conditions. Real action. Action by Congress. Expressions of pious hopes proved disastrously insufficient in 1929.

We deeply regret that the Senate failed to pass the Kilgore-Forand Emergency Unemployment Compensation Bill with the $25 weekly maximum benefit provision left intact. We certainly hope the House will restore this provision.

We are glad the Senate has approved the Murray-Patman Full Employment Bill, although we do not know exactly at this moment what the amendments were. We feel quite strongly, however, that Congress must recognize the obligation of the government to assure full employment and full production.

We are for the Wagner-Murray-Dingell Social Security amendments to improve old-age pensions, federalize unemployment compensation, and establish a basis for genuine health insurance for all the people.

Over 50,000 of the more than 300,000 members of the armed forces from Tennessee are union members. Amendments are necessary to the G. I. Bill of Rights to provide for increased mustering out pay, increased advances for education and business opportunities, and greater protection and facilities for the disabled veterans. The red-tape should be removed.

TAX RELIEF FOR LOW INCOMES

There is no longer any excuse for the heavy tax levies on those unable to pay. We say to you Senator, that there is drastic need for sharp revision of tax legislation to provide for relief to low income

openings were 19,246. The report does not show what percent of lay-offs were male or female, nor does it show what proportion of job openings were for male or female.

An attempt to simplify the employment situation by comparison of total employment with total jobs available is a trick long used to put labor in an unfavorable light—as at present to prevent federal unemployment insurance. Only those who believe "Figures Don't Lie" will be fooled.

THE PARABLE OF MRS. DOE

Mrs. Doe, a widow and mother of three, had been earning $45 a week during the war. After losing her job on V-J Day, she registered for unemployment benefits. She was offered a job in a wet-wash laundry at $12 a week. She explained that one of her children was ill with a brain tumor and she had to have more money, that she could not take the job. Results: Denial of all benefits.

Perhaps Commissioner Hake who so easily solved the problems of Mr. X might be able to furnish the answer to this one.

SOMETHING TO REMEMBER

President Dan Tobin of the Teamsters International Union, who is also head of the labor division of the Democratic Party, recently uttered some fine words of wisdom:

"President Truman should say in unequivocal language to those reactionary, labor - hating Democrats: 'What are you trying to do, wreck the Democratic party, throw it out of office for the next 12 or 20 years, as happened after the first World War?'"

Tobin warned the Democrats may lose control of Congress next year and Truman defeated in 1948 because of "labor-hating Democrats." Obviously he was referring to southern Democrats whose hatred of labor has caused them to team up with reactionary Republicans to beat various progressive legislative measures in Congress.

Remember! It happened after the first World War. The Republicans came back, and the Democrats were restored to majority status in Congress and the White House only because of labor's vote. Labor will not keep on supporting any party or administration which permits the workers to be knifed in the back.

groups by way of increased exemptions for married couples and increased credits for dependents, elimination of taxes on low incomes, extension of the benefits of the "carry-back" to individuals similar to those now enjoyed by corporations, and special relief for small business to encourage the maximum initiative in the coming full production era.

UNEMPLOYMENT MUST BE CONQUERED

The objective of full production and full employment can only be achieved through the united efforts of labor, management and government. Industrial strife should be avoided and certainly not provoked. There is no need for or place for the Ball-Burton-Hatch Bill. The problem of industrial disputes cannot be solved merely through some labor-shackling machinery to handle such disputes.

Industrial accord cannot be achieved through legislation punitive to labor. But with the enactment and implementation of a constructive program, designed to meet the needs of the people and assuring an expanding economy with full production and full employment, we can achieve industrial accord.

We realize this is a long communication, and, at the same time, we know you are very busy these days. But we want you to know our position. We want you to consider our recommendations. We want you to help put the program suggested herein into effect.

We would be pleased to hear from you on these suggestions.

Respectfully yours,
JOINT LABOR LEGISLATIVE COMMITTEE

H. V. REID

PAUL R. CHRISTOPHER

SUGGESTIONS ON HOW TO USE VOTING RECORDS

The voting record is one of many pieces of ammunition for your legislative work. Only one. It tells a great deal about your Congressman—but it won't solve all your problems in one easy short cut. Make use of it, but—Don't pass final judgment on the basis of only one issue.

Labor is interested in leaders who will do a good job for **all the people** and the postwar world. No single vote can either condemn or justify a man's record.

Don't add up votes like a score on a school-marm's test and figure a Congressman's "percentage" of goodness or badness.

FILE EACH COPY OF YOUR BULLETIN

The right way to use the record is to study it issue by issue until you know exactly what kind of a man your Congressman is—Whose rights he fights for, or who he knifes in the back. **Talk Issues, not statistics.** Your Congressman is not a sum in arithmetic. He's the man who fought hard for foreign trade as a part of the postwar full employment program. Or, he's the man who voted to "amend" price control out of existence.

Or, maybe he's the man who votes right, always says the right things for publication—but just isn't around when there's a job to

CIO DELEGATIONS TO WASHINGTON

Thirty days ago informed labor representatives were pessimistic over chances of securing favorable Congressional action on such important labor bills as those to lift the wage freeze, liberalize unemployment compensation payments to provide maximum of $25 for 26 weeks, amend present 40c Wage & Hour minimum to 65c, improve Social Security laws as suggested in Murray-Wagner-Dingell Bill, and fair employment practices.

State CIO legislative delegations throughout the country have been going to Washington to talk en masse and personally with Congressmen and Senators about these matters, however, and latest inside report indicates future may very well bring about change in Congress' attitude.

A WEIRD MOVE BY CONGRESS

The House Ways and Means Committee's vote to postpone action indefinitely on the unemployment compensation bill in order to punish all labor for the acts of a few who were forced into strikes is indeed a weird move.

Unemployment compensation benefits usually go only to workers who are involuntarily jobless, organized and unorganized alike. To say that Tom, out of work through no fault of his own, should be denied benefits because Dick is on strike 500 miles away is idotic and indicates temper and petty thinking on the part of twenty-four members of Congress and will leave a mark even should the Committee change its stand.

ANTI-POLL TAX BILL TO SENATE

The Senate Judiciary Committee has reported favorably the Anti-Poll Tax Bill (HR 7). The Committee reported favorably Senator O'Mahoney's resolution which proposes a constitutional amendment.

Constitutional amendment requires State action by thirty-six states. Southern State Legislatures would not concur. Remember what happened to proposed Federal Child Labor Amendment. Substitution of the O'Mahoney Constitutional Amendment for HR 7 as best means to baolish poll tax would practically nullify our efforts to secure a free ballot.

Write your Senators urging that they accept no substitution for HR 7, and that they oppose any attempt to prevent a Senate vote (Filibuster).

be done in his committee or a tough floor fight to be organized to pass a particularly vital piece of legislation.

If you think about what it takes to be an active and influential member of organized labor, you will have a good standard to measure your congressman as a member of his organization—A member of Congress.

Although the voting record has its limitations, it is the **basic** information you need in order to know your Congressman. USE IT!

SENATOR McKELLAR'S REPLY TO LABOR

October 2, 1945

Joint Labor Legislative Committee,
608 Warner Bldg., Nashville, Tennessee
My dear Sirs:

The joint letter of yourself and others dated October 1 has just been received. I am glad to have your views about these matters.

I voted for the Full Employment Bill which has now gone to the House and also for the Emergency Unemployment Compensation Bill, but not for the twenty-five dollar weekly minimum benefit provision.

The twenty-five dollar provision was cut down but extended in time because it was believed that in its original form it would bring about more unemployment than it would remedy. You and I know some people who would be glad to be unemployed for twenty-five dollars a week free from the Government. We must not mislead ourselves. I expect I am as strong for labor as you are though I do not belong to a union. I have been a daily worker all my life and have supported labor all my official life because in practically all cases they are right. Don't you know a lot of people who, if they were receiving twenty-five dollars a week from the Government free, would not seek employment at all as long as they receive it? I do and I believe you do. I am writing as a friend of labor and my uniform record in the Congress shows that I have uniformly been the friend of labor. I have been told by some who have made it their business to examine the record that I have been more uniformly for labor than any one member of the Congress.

I think that industry and labor must get together. Since the war ended this is vitally necessary. I agree with you that the war taxes should be lessened and especially the tax levies on those unable to pay should be removed.

With kindest regards, I am

Sincerely your friend,
KENNETH D. McKELLAR.

TENNESSEE
Industrial Planning
NEWSLETTER

INDUSTRIAL DEVELOPMENT DIVISION
TENNESSEE STATE PLANNING COMMISSION
432 SIXTH AVENUE NORTH, NASHVILLE 3

Vol. 1, No. 9 Geo. I. Whitlatch, Editor January 1, 1946

MATCHLESS CAPABILITIES OF TENNESSEE

By Col. J. B. Killebrew*

"The State of Tennessee is singularly favored in almost everything that contributes to the excellence, uplifting, and welfare of the human race. Possessed of the most genial climate, that makes existence itself enjoyment; with a surface configuration so varied as to give to it the climates of all the States by reason of different elevations; with resources so diversified that every natural gift may be said to belong to it; with soils of an abounding fertility derived from almost every geological formation, and having every adaptability; with timber of every variety found in the United States and Canada; with building stones so beautiful and so valuable that a demand for them for ornamentation comes from every State in the Union, and from almost every country in Europe; with more field crops than are grown in any other locality in the whole wide world, and more garden vegetables and fruits than were ever grown elsewhere within the same limits; with an abundant rainfall, that assures the greatest certainty in the yield of all the numerous crops planted; with springs or brooks, or creeks or rivers flowing through or passing by almost every country homestead in the State, watering and freshening and vitalizing the land; with healthfulness so great that invalids are tempted to come within its borders from both North and South, making it a health resort for the people of the North during winter and for the people of the South during summer; a land where soils, topography, production, and the amount of sunshine and humidity are so beautifully ordered and so happily blended as to give the greatest perfection of form to all kinds of domestic animals, and the highest excellence to every species of vegetation; where the degree of cold is just sufficient to destroy the germs of disabling disease, invigorate the physical system, and ameliorate the condition of the soil; where the landscapes are grand, inspiring, and beautiful; where great rivers break through lofty mountains into fruitful and bewitching valleys, teeming with the fatness of the earth, and bear upon their bosoms the products of mine, field, and forest; where coal and iron, zinc and copper, lead and marble, clays and phosphates abound in such quantities as to lay the foundation for a thousand industries that will furnish profitable employment to millions of persons; with all these advantages, opportunities, adaptabilities, comforts, and surroundings, Tennessee should be literally the garden spot of all the earth!

In all the world."

- - -

*We are indebted to Mr. F. A. Clarkson, Secretary, N.C. & St. L. Railway, for bringing to our attention the above quotation from the writings of Col. Killebrew, who was State Commissioner of Agriculture from 1875 to 1881. Unfortunately, the exact source of the quotation has not been identified, but we think Col. Killebrew's tribute to Tennessee is as valid today as when written in yesteryear. - Editor

INDUSTRIAL HONOR ROLL OF 1945

On the basis of a 20% return of confidential questionnaires distributed to Tennessee industries, plus records kept by this Division, industrial expansion in the State during 1945 amounted to approximately $50,000,000, creating new sources of employment for about 15,000 workers. Included in the compilation are only those new industries and expansions of existing industries which are already under construction or for which definite plans have been reported for new buildings and/or equipment. Many small service establishments and numerous small-scale local industries, as cinder block plants, are omitted.

The continuing trend of State-wide diffusion of industry is especially notable. Of the total 227 additions and expansions reported, more than one-third are in towns of less than 5,000 population. Continuance of this trend, plus the existing high degree of industrial diversification, assures to Tennessee in the future increasingly better economic balance.

Towns and cities listed on Tennessee's Industrial Honor Roll for 1945 follow:

Towns of Less Than 2500	
Algood	(1)
Ardmore	(1)
Carthage	(1)
Centerville	(1)
Dresden	(2)
Englewood	(1)
Greenback	(1)
Hohenwald	(1)
Jasper	(1)
Jonesboro	(1)
Lafayette	(1)
Lyles	(1)
Madison	(2)
Manchester	(1)
Rutherford	(1)
Savannah	(2)
Selmer	(1)

Cities of 2500-5000	
Brownsville	(1)
Clinton	(1)
Covington	(1)
Dickson	(2)
Erwin	(3)
Franklin	(2)
Lenoir City	(1)
Lewisburg	(3)
Loudon	(1)
McKenzie	(1)
Martin	(2)
Newport	(1)
Rockwood	(1)
SouthPittsburg	(1)
Sparta	(2)
Trenton	(1)
Winchester	(2)

Cities of 5000-10,000	
Alcoa	(1)
Athens	(4)
Elizabethton	(2)
Fayetteville	(1)
Gallatin	(1)
Greeneville	(2)
Harriman	(1)
Humboldt	(1)
Lebanon	(1)
Maryville	(1)
McMinnville	(4)
Morristown	(7)
Murfreesboro	(2)
Old Hickory	(1)
Paris	(2)
Shelbyville	(1)
Springfield	(3)
Tullahoma	(4)

Cities of 10,000-50,000	
Clarksville	(3)
Cleveland	(3)
Columbia	(3)
Dyersburg	(4)
Jackson	(1)
Johnson City	(10)
Kingsport	(8)

Cities of More Than 100,000	
Chattanooga	(49)
Knoxville	(39)
*Memphis	(15)
*Nashville	(7)

*Compilation of returns incomplete. Revised figures will be published next month.

If a new industry was established in your city, or if expansion of an existing plant was planned or completed during 1945, and is not included in the above list, please notify this Division, giving name of company, address, products manufactured, and estimated cost and approximate number of employees involved in the new development.

NEW GLOVE PLANT PLANNED FOR BROWNSVILLE

The Brownsville Development Corporation, recently organized under a State charter to construct locally needed industrial facilities, was reported in mid-December to be preparing to build a factory for the Wells-Lamont Company, Chicago, nationally known work-glove manufacturer. The proposed plant will employ about 300 persons, and company officials soon expect to start training of key personnel in some temporary location at Brownsville.

The Brownsville Development Corporation has a fund of some $80,000, subscribed by more than 100 local businessmen. Officers include Mayor Clifford Dinwiddie, president; Frank Clark, vice-president, and A. M. Carlton, secretary.

* * *

SPANISH PIMENTOS NEW AGRICULTURAL CROP

Raising of Spanish pimentos in the Manchester area during the past summer is an interesting innovation in Tennessee agriculture. Of a total of 72 acres planted and harvested, the average yield is reported to have been about 3 tons per acre at a market price of around $50 per ton. The crop was canned by the Manchester Canning Company.

This new Tennessee crop appears to offer a very high-value per-acre return, because local information indicates that closer setting of plants than done in the 1945 experimental crop is practical and that yields of 5 to 6 tons of pimentos per acre are possible.

Practically all domestic growing of Spanish pimentos heretofore has been confined to Georgia, although a few hundred acres are annually grown in California. Markets include the stuffed-olive trade for A-1 grades, and cheese, meat, and other food-packing concerns for the off-color and other lesser grades of pimentos.

S. KARPEN & BROS. TO LOCATE AT DYERSBURG

S. Karpen & Bros., well-known Chicago furniture manufacturers, have announced completion of arrangements for immediate construction at Dyersburg of a new manufacturing unit of 35,000 sq. ft. Approximately 150 persons will be employed initially, and the company is said to be already considering plans for expansion of the Dyersburg operation.

Living room furniture, pullman car and bus seating, mattresses, and similar items are made by the Karpen organization.

Mr. Leo Karpen, president, and Mr. H. E. S. Craig, general manager, represented the Karpen interests during their negotiations with the Industrial Development Committee of the Dyersburg Chamber of Commerce, of which Mr. James P. Lanier is president.

* * *

INDUSTRIAL BUILDINGS AND PLANT SITES AVAILABLE

Industrial Buildings

East Tennessee

Town of 1,870 population: Two-story brick building, slate roof, hand-operated elevator, wooden floors, total 10,584 sq. ft. To rear is another building, 5,000 sq. ft., formerly used as a boiler room. About 150 yards from siding, mainline railroad. Owner offers very nominal rental for one year and will consider construction of additional industrial buildings.

Middle Tennessee

Town of 609 population: Frame, one-story, building of about 4,000 sq. ft., concrete floors, with wooden support posts to roof. Situated between highway and railroad. Site has sufficient space for 50 x 100 ft. addition.

City of 10,600 population: Brick building, totaling 20,000 sq. ft., currently in use by garment manufacturer, available shortly after Jan. 1, 1946 for lease or purchase on very reasonable terms.

City of 2,760 population: Two-story building, 40 x 80 ft. (64,000 sq. ft.). Located near business district and suitable for light industries.

Plant Sites

East Tennessee

City of 3,570 population: Fifteen to 20 acres of level land, bounded by river on one side and major highway and mainline railroad on other. Area not subject to flood. Four miles from city and especially suited to larger industries requiring big volumes of water. Similarly situated areas, up to 50 acres, within two miles of city.

City of 4,370 population: Twenty-five to 30 acres, slightly rolling, between spur switch of mainline railroad and good gravel road to river, which is about one-eighth of a mile distant. Gravel and clay base will permit economical grading of area. River affords 9-foot navigation channel for water transportation.

Area of some 200 acres of level agricultural land, fronting river, also available.

City of 170,000 population: El-shaped tract of 180 x 432 ft. on one side and 546 x 200-300 ft. on the other, crossed by mainline railroad and fronts on two city streets; railroad spurs can be laid to each part of tract.

Town of 609 population: Building lot, 400 x 600 ft., highway and power line on one side, railroad and telephone lines on the other; sewer and water mains to site. Local financing available for industrial plant building of around 20,000 sq. ft., on very reasonable terms. Structural steel already on ground; cinder block and crushed stone are obtainable from local sources.

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any of the industries listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

69. Wallpaper: Manufacturer of wallpapers wants a new plant location which, for market reasons, should be in East Tennessee at some point north of Knoxville, on mainline railroad. Middle Tennessee locations might be considered.

Required plant building should approximate 100 x 350 ft., one-story, with 16-18 ft. ceilings. A wider building can be used, if it can be purchased advantageously.

Local financing of construction of needed building will be considered on long-term amortization basis, with annual rentals of between 5%-10% paid monthly. Company has other property currently being acquired on similar basis.

73. Garments: Well-rated manufacturer seeks building for sewing operations, to start as soon after January 1 as possible. Will employ 200 to 400 men and women.

Needs approximately 20,000 sq. ft. space, preferably on one floor. Rental of an existing building is desired, and, initially, can use one of lesser size, provided site affords space for construction of an addition.

Construction of new building will be considered only if early completion assured.

75. Men's Hats: Preliminary inquiry by well-rated manufacturer for 75,000 to 100,000 sq. ft. of floor space. No details available at press-time on employment or specific needs. Interested communities should suggest their possibilities, either existing vacant buildings or basis for financing construction of required structure.

* * *

SALES OPPORTUNITY

Pipe Stems: Manufacturer seeks supplier of stout reed pipe stems, as commonly used in corncob and clay pipes. Stems should measure 8-10 in. long, 3/8-in. diameter, with unobstructed opening of about 1/8-in. diameter.

* * *

THE WOOD WHITTLERS

The Wood Whittlers is a group of native craftsmen organized at Gatlinburg, Tenn., for the production and sale of hand-turned book-ends, salt-and-pepper shakers, and other wooden novelties. Wild cherry, black walnut, maple, and other native hardwoods obtained from the nearby Smoky Mountains are among the woods used. These mountain woods also lend themselves admirably to the manufacture of plates, trays, goblets, and similar items which will be available for sale after February 1st.

The Metropolitan Museum of New York has honored the Wood Whittlers with an exhibit.

Address Shirl Compton, the Wood Whittlers, Gatlinburg, Tenn., for illustrated folder and price list.

NORTHERN INTERESTS BLOCK SOUTHERN FREIGHT RATE REDUCTION

An interlocutory injunction, filed on December 21 in the northern New York district Federal Court, temporarily enjoins the Federal government from enforcing compliance of the Interstate Commerce Commission's order to increase freight rates in northern and eastern states. Nine states - New York, New Jersey, Delaware, Pennsylvania, Indiana, Maryland, Michigan, Wisconsin, and Ohio - signed the writ.

The ICC order, handed down last May, was scheduled to take effect on January 1 and would have boosted class rates in the so-called northern "Official Territory" by 10% and would have reduced these rates by 10% on southern and western lines. (See Newsletter, May 25, 1945)

In granting the stay in rate changes, the federal court is reported as asserting that "a 10 per cent increase would impose upon industry, shippers, and receivers of freight transported within official territory an increased cost of many millions dollars a year." It was the court's further observation that "reasonable grounds" exist for believing the ICC order should be "permanently annulled".

* * *

"HOW WE CAN MAKE JOBS FOR MILLIONS"

The above last-minute move by northern industry against the South's long fight for greater equality in freight rates comes as an enlightening commentary to an article by J. A. (Cap) Krug, retiring WPB chairman, in the December issue of The American Magazine. Under the title of "How We Can Make Jobs For Millions", Krug - formerly TVA manager of power, points out that "less than 10 per cent of (the United States') area has 65 per cent of the manufacturing industry. This tiny area is pretty well concentrated in the Northeastern region of the United States. It consists of Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Ohio, Michigan, Illinois, Delaware, and Maryland. (Compare with states above-listed that are fighting reduction of southern freight rates - Editor).

"This region - it might better be called a district - produces only 4 per cent of our lumber and 26 per cent of our minerals. In natural resources, when compared with the vast underdeveloped regions of the nation (the South and West), it is comparatively poor. Yet it contains 43 per cent of our total population and receives, as of 1940, 56 per cent of our national income."

On the other hand, Krug continues, only 20 per cent of the nation's manufacturing is accounted for in the vast 75 per cent of the geographical area of the United States, mainly the southern and western states, which contains not only 40 per cent of our population but most of our natural resources - our basic wealth.

In the early days of the nation, Krug admits, there may have been some justification for concentration of industry along the northeastern seaboard. "But since that time," he says, "we have discovered America. We have found that most of the wealth of the nation lies elsewhere than in the little empire of the Northeastern states - that the West and South are far richer in timber, ore, and agricultural products for fabrication than the 11 states which have two-thirds of our industry.

"We have found too, that the now underprivileged and underdeveloped regions of the nation can produce more power more cheaply than the rest of the nation . . . The nation is criss-crossed with highways and railroads. The South and West have

seacoasts. Everything necessary for the development of industry is at hand in these regions, yet they have no industry. Why?

"One reason is that some of the industrialists of the East won't let them. For years they have lobbied and publicized their cause. They are still doing it. They cry their old economics, which won't stand up any more. They don't want to decentralize industry . . . No labor out there, they cry. To them I say that skilled labor has already been widely distributed in the United States because war plants were widely distributed . . . No transportation out there, they say. There is cheaper transportation than ever before, because recently the Interstate Commerce Commission granted an equality of freight rates to the West and Middle West, which will make it possible for shippers there to compete with the Panama Canal. Why wasn't this equality granted before? The established and entrenched magnates were afraid of competition. If they persist in their ways, they will ruin not only themselves, but the national economy as well."

- - -

Editor's Note: Quotations from Mr. Krug's article are with the special permission of the editor of American Magazine. You will find William S. Knudsen's article, "The Next Ten Years", in the same issue of The American Magazine, to be equally stimulating.

PRODUCTION LINE NEWS AND NOTES

Murfreesboro Organizes Industrial Group

Murfreesboro Industries, Inc., with a membership of more than 70 local businessmen, has been organized "to promote increased industrial activity" in Rutherford County. The Murfreesboro Chamber of Commerce, various other civic groups and committees, and many citizens are reported to have been active in effecting the new organization.

Members of the organization are subscribing to a fund that can be used for the construction of locally needed industrial facilities.

Fifty-five Tennessee Firms Earn "E" Award

Fifty-five Tennessee industrial concerns earned the Army and Navy "E" award for excellence of production records under war contracts, according to a final compilation recently announced by the Army and Navy departments. Renewal or "Star" awards, for each six-months period of continued excellence in production after the original award, were won two or more times by 31 of the plants. In view of the fact that only 5 percent of the nation's war plants earned these awards, Tennessee's industrial production record is certainly outstanding.

Union City Plans Industrial Development Fund

The Union City Chamber of Commerce, in late November, voted unanimously in favor of requesting all citizens and firms to leave on deposit the $51,250 fund raised for financing the Majestic Stove Company project, now abandoned (see Newsletter for December). Suggested future use of the fund would be for plant construction on a lease-rental basis to responsible concerns, with sufficient rentals to assure eventual return to all contributors of their principal plus interest. Further granting of money subsidy to any concern is not favored, according to local news reports.

"101 Small Business Opportunities" List Available

Copies of a list of 101 suggestions as to small businesses that may be started on limited capital investments are now available free on request to this Division. Each listed business has an estimated figure for initial required capital and comments on the chief requirements essential to successful operation.

As corollary reading, we suggest Arthur E. Morgan's "A Business of My Own". This 160-page book is replete with lists and suggestions on the possibilities for establishing small industries and other self-employment occupations. Reviewed are hundreds of interesting examples of how people with ideas and only limited capital have achieved commercial and industrial successes. The book can be obtained at 75¢ per copy from "Community Service News", Community Service, Inc., Yellow Springs, Ohio.

Also recommended are "Opportunities for Limited Capital" and "Opportunities Unlimited", published in booklet form by B. C. Forbes & Son Publishing Co., Inc., 120 Fifth Avenue, New York, N. Y. Discussed are the opportunities for limited individual investments in photography, foreign trade, game and fur farming, plastics, aviation, light metals, tourist courts, and many other small businesses and industries. Copies may be obtained from the publisher at small cost.

RFC Sets Up Surplus Goods Offices

Sales of surplus government-owned consumer goods will be handled in Tennessee by the RFC, Office of Surplus Property, Consumer Goods Division.

The Nashville office, covering all the State except West Tennessee (west of Tennessee River), will be in charge of Kenneth Hunt, 5th Floor, Nashville Trust Bldg. The Memphis office will be in charge of Ray C. Podesta, Sterick Bldg.

Research Labs Being Listed

Tennessee industries with operating research laboratories should register that fact with the National Research Council, National Academy of Science's Bldg., Washington, D. C., in order to assure listing in their directory of "Industrial Research Laboratories of the United States", which is scheduled to go to press in the near future.

Aids to Tourist Court Operators and Other Small Business

With Tennessee tourist business "booming", many locations in the State offer excellent opportunities for starting new tourist courts. The national average profit in this business is around 30%. A 22-unit court can be financed on initial cash capital of about $10,500.

One of the essentials of success in the business is attractive appearance of the courts. To assist prospective operators, the Division of State Information, Dept. of Conservation, State Office Bldg., Nashville, has available for inspection a copy of The Tourist Court Plan Book (issued by "The Tourist Court Journal", Temple, Texas - $25 per copy). In this book are dozens of blueprint plans, architect sketches, and landscaping layouts of modern tourist courts. If interested, it will pay to see Mr. B. T. Gregory, Director of the Division of State Information.

The U. S. Department of Commerce has issued recently the following pamphlets on other small business opportunities:

Establishing a Sporting Goods Store
Establishing and Operating a Small Business in Aviation
Establishing and Operating a Trucking Business
Establishing a Women's Apparel Store

Address requests to: U. S. Dept. Commerce, 603 Rhodes Bldg., Atlanta 1, Ga.

Ripley Forms Chamber of Commerce

At a meeting of 75 business men and women in Ripley, late in November, action was taken to form the group into a temporary organization as a Chamber of Commerce. Joseph Tucker, Jr., was selected as temporary chairman; Roy Roberson, as temporary secretary. An Industrial Committee also was appointed to plan a program of local expansion.

Citizens from Brownsville and Halls were guest speakers at the meeting and explained to the group their own local activities in planning for new industries.

* * *

TULSA UNITES FOR NEW INDUSTRIES

Tulsa, Oklahoma, according to Business Week (11/24/45), has developed a workable solution for bringing new industries to that city. Forming "Tulsa Industries, Inc., composed of local manufacturers and distributors - chartered in Delaware, the new organization now includes 26 representatives of local industrial plants and takes credit for bringing $300,000 of new business to its members in the first three weeks of full operation.

Tulsa Industries, Inc., operates similar to the New England Industrial Development Corporation, serving as a central clearing agency in obtaining financial, technical, and other assistance for promising projects. As a preliminary step, the organization made preparations, prior to V-J day, to offer to outside industrialists the men and machines for manufacturing in Tulsa such part of their production destined for distribution in the Southwest and on the West Coast. The resultant possible savings in shipping costs under this procedure were carefully tabulated.

Interchange of facilities and procurement of new machines, when needed, were provided for within Tulsa Industries, Incorporated's own membership. Local surveys of skilled labor supplies, wage scales, available machine tools, and similar pertinent factors were among other preliminary steps taken by the organization.

Unlike the Louisville Industrial Foundation, the Tulsa cooperative has no revolving fund and is financed by fees ranging up from $50 per month, collected from its members according to their industrial size. Credit on the fees is given members against service commissions on business acquired.

Tulsa's action is illustrative of the U. S. Department of Commerce's statement that "most of the answer to postwar development and employment of discharged veterans and war workers lies in community action". Examples of what p[illegible] other southern cities have developed are reviewed in "Planning Their Postwar Plans", free on request from the U. S. Dept. of Commerce.

* * *

PAGE PARTIALLY ILLEGIBLE

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Tennessee Aircraft, Inc., Nashville - now designated as Skyfarer Division of the General Aircraft Corp., has announced plans for production of a popular-price all-metal plane. Full data on the new plane will be released early in 1946. Other products of the local plant will include an aluminum 14-foot sport boat and aluminum child's scooter.

- - -

Delta Chemical Co., Baltimore, has announced plans for construction at Chattanooga of a new plant for the manufacture of laundry, cleaning, and disinfecting supplies.

- - -

Valley Fibre Box Co., Memphis, is reported to be planning construction of a new modern one-story brick plant, estimated to cost $300,000. The site selected is on Hollywood St., north of the Union Railway (E-N-R, 12/6/45). J. T. Mendenhall is president of the Company.

- - -

Mylan-Spencer Co., Inc., and Mylan-Winchester Co., Inc., have been granted State incorporation charters for the manufacture, purchase, and sale of wearing apparel. Incorporators are Joseph Yastan, Phillip L. Handsman, and Ethel Herman. The Mylan organization, offices in Nashville, currently operate a plant at Sparta. As indicated by the new charter names, the company apparently contemplates expansion of operations to Spencer and Winchester.

- - -

Missouri Portland Cement Co., St. Louis Mo., is planning to build at Memphis a 750,000 - barrel mill, estimated to cost $2,500,000.

- - -

Cherokee Porcelain Enamel Corporation, Knoxville, is constructing a new plant on Kingston Pike for the production of finished enamel display signs, store fronts, show cases, refrigerator cases, and similar products. Production is scheduled to start May 1. Ed L. and Wm. Hicks, owners of the local Post Sign Co., and R. L. Reid, Cleveland, O., are charter incorporators of the new concern.

- - -

Bert Novey, Chicago sportswear manufacturer, has been identified as the industrialist for whom Jackson will construct a new plant facility, as announced in last month's "Newsletter". The new factory, for which ground was to be broken about January 1, will employ 500 persons.

- - -

Lannom Manufacturing Co., Grinnell, Iowa, has established a baseball glove manufacturing unit at Lynchburg. Temporarily, the company's operations will be in a leased local garage building, until a planned $30,000 factory building can be built.

Baseballs and softballs are made by this company in a plant at Tullahoma. The Lynchburg unit is Moore County's second industrial plant, the other being the famous Jack Daniel Distillery - sole distillery operated in the State.

- - -

Stratton-Edwards Manufacturing Co., Memphis, has been granted a State charter "to manufacture, buy, sell, and deal in household furniture, etc". L. M. Stratton, Jr., B. A. Edwards, and C. W. Cresham are listed as incorporators.

- - -

Magnet Mills, Clinton, is continuing to hire trainees in anticipation of full-scale production of hosiery, with expanded operations in nylon and other synthetic fibers.

- - -

Martin Manufacturing Co., which has operated the garment factory in Martin for the past two years, sold out its interests in mid-December to a group of New York bankers. The new owners will continue the present full-scale operation of the plant under the name of Southland Garment Co. Future expansion of the plant is reported under consideration.

- - -

Peggy Craft Marine is a small-scale boat-building and marine service business recently started at Lenoir City.

- - -

Rohm & Haas' $3,000,000 war-built plexiglass plant at Knoxville halted production on December 1, and the plant has been listed for sale by the RFC. According to news reports, R & H is negotiating for a deal that would permit later resumption of operations under either a lease or purchase. Approximately 300 persons were laid off by the production halt; about 1600 workers were engaged at the plant during full-scale war output.

- - -

A new concrete block plant and a 402-locker food storage plant are under construction at Sweetwater. International Harvester Company also is building a large service and supply warehouse in the city.

- - -

Tennessee Eastman Corporation, Kingsport, on completion of planned plant expansions calling for annual $5 million expenditures during 1946 and 1947, will be able to increase by about 30 percent the output of "Tenite", its well-known cellulose acetate plastic. Similar increases in rayon staple and yarn outputs also will be possible. About 2,000 new employees will be added to the current payroll of 7,000.

- - -

International Harvester Co., Memphis, is reported to have completed grading and construction of drainage system on the site of their new $5,000,000 plant.

- - -

Murfreesboro's famous red-cedar bucket factory, long reputed as the only one of its kind in the world, was slated to go on the auction block on December 22. This old factory, established more than 100 years ago, produced distinctive brass-bound cedar buckets, churns, and similar items. The sale to dissolve the Patterson family partnership, under which the plant had operated throughout its history, was occasioned by the recent death of one of the partners.

- - -

The Sparta-White County Chamber of Commerce recently voted its support in providing facilities for expansion of the local Mylan Manufacturing Company's box plant, which currently supplies containers for the company's output of dress shirts. Under plans now being discussed, a new plant, employing about 100 persons, would be built as an addition to the present small box factory and would manufacture corrugated paper boxes for the trade. The proposed addition would be built with local funds and then rented to the "Mylan" organization.

- - -

Kit Co., Inc., Nashville, has been granted a State charter to manufacture and repair tools and equipment and to sell machinery parts. Incorporators are R. R. Neil, Jr., J. P. Dickson, and E. M. Charlton.

- - -

McEwen Manufacturing Co., operating for the past year at McEwen in a temporary location, plans to move into a new modern 28,000 sq. ft. factory building to be constructed by that city. A $50,000 bond issue was voted recently for partial financing of the building.

Up to V-J day, the McEwen plant made Navy dungarees, employing about 75 persons. The projected expansion will provide employment for 300 or more.

- - -

Mid-South Oil Co., Memphis, is reported building a bulk plant and warehouse, estimated to cost $175,000.

- - -

McAleer Manufacturing Company, Rochester, Mich., in mid-December was completing at Greenback, Tenn., a new plant for the production of "atomized" or powdered metals, used in the war-developed science of "powder metallurgy". Greenback Industries, a research unit, has operated there for the past two years.

Under the process developed by this company, aluminum, copper, tin, and other metals can be "atomized" or reduced to powder form. Relatively large use of electric power is required for the process. This new plant employs 21 persons.

- - -

The Brown Shoe Company, St. Louis, Mo., is constructing its third operating unit in Savannah, Tenn. The new factory building, reported as 382 x 160 feet, will cost an estimated $300,000 and will accommodate 800 additional workers. Three hundred workers are now employed in the two smaller units operated at Savannah.

- - -

National Cylinder Gas Co., Memphis, early in December had pending before the City Board of Adjustment for variation in zoning regulations, an application to permit construction of a new brick and steel 90 x 100 ft. oxygen manufacturing unit. The company already operates another plant in Memphis.

INDUSTRIAL TENNESSEE IN 1945

By Editor

(Abstract of an article appearing under the same title in the February issue of The Tennessee Planner, bimonthly publication of this Commission.)

Industrial activities in Tennessee during 1945 reflect the changing economic conditions created nationally by the termination of hostilities. In the early part of the year, reconversion plans were shelved temporarily in favor of maintenance of maximum output. Following V-J Day, Tennessee industry was absorbed largely in the task of cancelling war contracts and shifting to a peacetime basis. At year's end this transition apparently was progressing smoothly, with a minimum of interruptions and unemployment.

Bomb Project Revealed

The entire industrial record of Tennessee during 1945 is completely overshadowed by the revelation that Clinton Engineer Works at Oak Ridge was the prime production center of the atomic bomb materials. The production facilities built there constitute the largest industrial plant in the world; 90,000 workers were employed at peak operations. Oak Ridge, the modern city founded to serve the project, has grown to a population of 75,000, fifth largest in the State.

Of a total of $1,665,000,000 expended on the entire atomic bomb project, the Clinton Engineer Works and the City of Oak Ridge are reported to have cost $1,106,000,000.

Industrial Expansion Continues

Industrial construction awards, to the end of November, amounted to $52,295,000, plus more than $16,000,000 of planned awards - exclusive of all construction at Clinton Engineer Works.

During the year, private business concerns were issued a total of 598 State charters. Both wholly new developments and corporate changes of existing industries are included in the total reported. However, State Department of Labor figures for the first three quarters of the year show a total of 1099 new business enterprises against 913 casualties, with more than half of the latter being in the trade group.

Retail Trade Up - Textiles and Lumber Suffer

Retail sales continued high, with 3% to 18% increases over 1944 in the various metropolitan centers of the State.

Textile and lumber mills were unable to expand their 1945 output, as both industries continued to suffer the shortages of labor and non-availability of new machinery and

equipment that had harassed them in the preceding year.

Natural Resources Development

Mining and similar developments of natural resources in 1945 were distinctly limited because of manpower and equipment shortages. Output of coal for the year was appreciably below the 1944-level.

Tennessee Copper Company opened a new mine at Ducktown. TVA's new pilot plant for experimental research on defluorination of phosphate began operation at Godwin; and the Tennessee Natural Gas Lines, Inc. received final Federal approval for construction of a pipeline to bring natural gas to the Nashville area from the trunk-line of the Tennessee Gas & Transmission Company.

New Industrial Expansion Offsets Losses

Among the major industrial casualties of the year were the various ordnance plants at Milan, Memphis, Chattanooga and Kingsport. Ending of the war also caused cancellation of plans for the Mohawk Rubber Company's plant at Chattanooga, and the Goodyear Tire & Rubber Company's plant at Nashville. Rohm & Haas suspended operation of their plexiglas plant in Knoxville early in December, and Monsanto Chemical Company's "Duck River" phosgene unit, built for Chemical Warfare Service, was closed early in the year.

New industrial plants or expansions of existing industries are offsetting these losses in the State's productive capacity. The more important new plants and expansions completed, under construction, or definitely committed for the State at year's end include: Belding Heminway's $1-million thread-throwing mill at Morristown; Tennessee Eastman Corporation's $10-million expansion at Kingsport; International Harvester's new $5-million plant at Memphis; J. I. Case Manufacturing Company's large assembly plant in Memphis; Ford Motor Company's $1-million expansion at Memphis; the $500,000 expansion of Air Products, Inc., at Chattanooga; S. Karpen and Brothers' new furniture manufacturing unit at Dyersburg; O. B. Andrews Company's new paper-container plants at Knoxville and Johnson City; the new $500,000 plant of Modern Packages, Inc., at Memphis; and Florence Stove Company's $1½-million expansion at Lewisburg.

Industrial Economy Balanced

During the war, Tennessee's basic economy reached a balance between agriculture and manufacturing, with respect to employment. At the end of 1945, this balance was being essentially maintained, with 23.6% of the estimated total of 985,000 employed workers being engaged in manufacturing against 27.1% engaged in agricultural pursuits.

Unemployment Not Serious

Peak wartime employment, reached in July, 1944, totaled 1,051,000, of which 279,000 were employed in manufacturing. By November, 1945, total employment had decreased to 985,000, with 40,000 of the decrease being in manufacturing alone.

In December, total unemployment in the State was estimated at 83,000, including returned service men and war workers. In no single area had unemployment reached serious proportions, but it is not likely that the peak in unemployment has been reached. Estimates at the beginning of 1946 indicated possible expansion of manufacturing employment in the State during the current year at approximately 20,000, with 7500 of such expansion being that afforded by new industrial plants. Although some expansion of existing industrial facilities is indicated for Memphis, Chattanooga,

Knoxville and Milan during 1946, estimated employment increases from such sources by no means will compensate for the layoffs in those areas. In Nashville, practically no expansion is indicated, while in Kingsport the expansion should almost equal the layoffs. The general trend of new industries is toward the location of relatively small plants in non-industrialized small towns.

Construction employment will undoubtedly expand, but there are too many unknowns to make an estimate possible.

Unemployment by major labor market areas, at the beginning of 1946, was estimated as follows: Memphis, 8600; Nashville, 5500; Chattanooga, 5300; Knoxville, 7000; and Kingsport, 4200.

INDUSTRIAL BUILDINGS AND PLANT SITES AVAILABLE

Industrial Buildings

West Tennessee

City of 300,000 population: Brick and iron-clad building, totaling 165,200 sq. ft. of floor space. Consists of 90,375 sq. ft. section, brick walls, car-level concrete floors; adjoining are a 29,000 sq. ft. section - iron-clad walls and concrete floor - and a 36,800 sq. ft. warehouse - iron-clad walls and wood floor. Entire building equipped with sprinkler system, lights, ventilators; all space, except warehouse, heated with blower-type gas units. Toilets and locker facilities for 1360 employees.

Modern office, 2166 sq. ft., on second floor; additional shipping offices on first floor, with loading platforms to 4 spur tracks having total 30-car capacity. Escalator leading to river.

Plant site totals 5.38 acres, enclosed by heavy duty "cyclone" fence.

Can be leased in part or as a whole, at 25¢ per sq. ft. annual rental.

Middle Tennessee

City of 175,000 population: One-story brick building 200 x 200 ft. with concrete slab floor and reinforced concrete, pan-type roof with felt surface supported by 42 concrete columns on 25-ft. centers. Ceiling height, 16 2/3 ft., two doors on each side of building opening 12 ft. Equipped with stoker-fired low-pressure steel boiler heating system; separate boiler room and coal bunker.

* * *

THE SOUTH, NEW INDUSTRIAL FRONTIER

The South, termed the nation's "new industrial frontier", is shown in a recent issue of The Index published by the New York Trust Co., to be outstripping the rest of the country in converting to peacetime operation. Pointing out that the war telescoped into a few years a generation of industrial development in the South, The Index forecasts that this region will continue its development because of favorable supply of labor, resources, and power, plus a congenial climate. Of the $35 billions of war contracts and $9 billions in new facilities, the study shows that the greater growth of the latter was in Tennessee, Texas, Alabama, Louisiana, and West Virginia. "The outlook for new factories and expansion of existing facilities seems bright", according to The Index. "Throughout the whole southern area in recent years, many new industries have been developed, while older ones have been expanding".

"THERE'S MONEY IN THE RIVER"

The growth of river traffic during the war is the subject of an article - "There's Money in the River ", by Harry Henderson & Sam Shaw, in the January 26 issue of Colliers.

Roughly 100,000,000 net tons of war materials -equivalent to 38,000 trains of 50 cars each,were carried by barge over the Mississippi River system last year, the article states. In addition, over two million tons of war shipping - landing craft, tankers, destroyer escorts - were built at inland yards and floated down to the Gulf.

In 1921, the article points out, the Jones & Laughlin Steel Corp., Pittsburgh, began river shipping of steel pipe to Memphis for distribution in the South and West. As Jones & Laughlin were thus able to fill orders faster than their competitors, most of the big steel companies followed suit, and, eventually, "whole industries followed because Memphis is a key distributing point for Mississippi, Louisiana, Texas, Oklahoma". Citing the fact that barge rates are 20% to 50% under rail rates, the authors state that "most heavy industries have laid their postwar plans with an eye on water transportation. That is why it didn't take International Harvester, whose other eye was on mechanization of southern agriculture, long to decide to build a new $5,000,000 plant at Memphis now".

* * *

SEARS SETS UP NEW SOUTHERN OFFICES

Sears, Roebuck & Co., in furtherance of decentralization of its operations, has announced that after February 1 its Southern operations will be directed from headquarters in Atlanta.

In selecting Philadelphia over New York as headquarters for the company's new Eastern territory headquarters, Robert E. Wood, board chairman, is reported to have said that "New York is the worst possible center from which to direct a nationwide business".

Always, the road of industry seems to be Southward.

* * *

SOUTHERN MINES SET HIGH OUTPUT RECORD

The South's mineral production in 1944 was valued in excess of $3¼ billion or nearly 47% of the total U. S. output value, according to a report recently released by the U. S. Bureau of Mines. In 1900, the South was contributing less than 7%, or $129,875,000, of the U. S. total.

"Whether the factories of the nation toil for the war god Mars, or whether they produce for a world at peace, it is to the South that they must look for a major portion of their critical supplies".

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibl meet the needs of any of the industries listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

84. Rayon Weaving: Eastern textile interests seek locations for several rayon weaving mills in towns of 1,000 to 8,000 population. Immediate need is for an existing plant building. Also will give consideration to locations for future construction of two or three additional mills. Each mill will employ 100-300 persons, 50% male.

General specifications for these mills include: 40,000 to 100,000 sq. ft., of which 25,000 sq. ft. must withstand vibrating load; one-story, with concrete floor preferable; frame bldg., two-story is least desirable; minimum width of bldg., 50-75 ft.; prefer R.R. siding but not essential; water and fuel requirements nominal.

Plant sites should be around 5 acres, with access to good highways.

85. Dress Shirts: Manufacturer wants 5,000 to 10,000 sq. ft. of floor space suitable for sewing operations. Building should be sprinkler equipped or property owner agree to install. Will consider any structure suitable for remodeling. Employ about 100 workers.

86. Children's Garments: Experienced textile operators want 15,000 to 20,000 sq. ft. of floor space for immediate occupancy. New company being formed to manufacture children's garments. Will employ initially 100 or more workers, depending on space available. Any building considered must be sprinkler-equipped.

Urgent Need for Industrial Buildings

Numerous inquiries to this Division in recent weeks are for vacant plant space, ready for immediate occupancy. Such space is at a premium throughout the State, and we strongly urge any community organization, bank, realtor, or others having for rent or sale industrial property, ranging upward from 5,000 sq. ft., to send us details for reference on inquiries made to this Division. Many of the smaller industries seeking space do not want to risk the possible loss of time in trying to construct new facilities during the present period of material shortages.

* * *

SALES OPPORTUNITIES

Wooden Dowels: Company seeks source of wooden dowels.

Furniture: Old established wholesale concern would like to purchase various types of furniture from Tennessee manufacturers. Assures purchases in considerable volume on annual basis.

* * *

IMPORTANT
LAST-MINUTE INDUSTRIAL INQUIRY
(Renewal of Investigations)

31. Children's Apparel: Nationally known manufacturer, in business over 50 years and rated AAA-1 by Dun & Bradstreet, wants to obtain a Tennessee location for branch factory, preferably in area easily reached by both plane and rail from their Middle West Headquarters.

Company is coming South solely because of expansion needs. Initially will employ about 175 persons, mainly women, and location selected must afford adequate labor for anticipated future expansion. Hourly wages "compare favorably with any in the industry."

Company needs plant space of about 30,000 sq. ft., preferably on one-floor but not over two floors. Will lease or make other arrangements to obtain use of plant building.

We recommend consideration of this inquiry by all communities within 50 miles of major airport facilities and with direct railroad connections to Cincinnati. Interested communities able to meet requirements of this company should submit to this Division, at once, details on available building space or proposition to furnish same.

IS YOUR CITY GETTING AN INDUSTRIAL "BRUSH-OFF"?

Noted elsewhere in this issue (see p.3) is the evidence, during 1945, of the continued trend by new industries to select plant locations in the smaller cities This trend also is being confirmed by the contacts this Division has with prospective industrialists. With all major factors being equal, numberous of the larger developments projected for Tennessee specify preference for the smaller cities.

In some instances, the reasons for preferring the smaller community over the metropolitan area are clearly the economic advantages of so-called decentralization. Yet, in other instances, the lack of consideration given to some of our larger cities, particularly certain metropolitan areas, apparently stems from unfavorable but correctable physical conditions existing in those cities. Again, the fault is not always physical but rather is due to lack of civic leadership and vision - in brief, non-progressive leadership of the community, or if you prefer, lack of leadership.

Without any desire to deal in specific examples, we think that our purpose can be achieved by recommending for serious study two very excellent pamphlets - "Selling A City To Industry" and "Streamlining A City For Industry".*

In the latter publication the statement is made that "No city enjoying a healthy industrial condition loses within a few years - - - a substantial part of its industry. When such a situation occurs, there is something basically wrong with either competitive conditions or the civic leadership in the community. Before such a community can resume its normal industrial development, it must remedy these conditions - - - In some cases these shackles may be high tax rates, high water rates, high rail rates, high insurance rates". Numerous other factors that can handicap a city's development might be cited.

The above statement is equally applicable to cities failing to show a substantial industrial expansion, particularly here in the South and during the current period. If your city is not getting what appears to be reasonable consideration for new industries, perhaps there's a reason.

* * *

PRODUCTION LINE NEWS AND NOTES

Col. Grace Heads Memphis C of C Industrial Division

Colonel Porter Grace was recently appointed manager of the Memphis Chmaber of Commerce's Industrial Division, succeeding Chas. S. Peete. Colonel Grace, prior to his four years' military service - during which he rose from a lieutenant of field artillery to an executive position on General Eisenhower's European staff - was director of the Membership Division of the Memphis organization.

New Industrial Designing Service for Memphis

Charles S. Peete, recently resigned as manager of the Memphis Chamber of Commerce Industrial Division, has entered the industrial designing field, in partnership with Kirby Stringer of Memphis. The new firm of Stringer & Peete, with offices at 226 Dermon Bldg., Memphis, will furnish a complete service, including machinery design, process studies, and flow diagrams. This new firm affords Memphis industry a type of service not previously available in that city.

---

*Obtainable from Herbert S. Swan, Industrial Consultant, 299 Broadway, New York 7, N.Y. Prices 40¢ and 20¢, respectively.

War Assets Corporation - New RFC Disposal Agency

War Assets Corporation is a new subsidiary agency of RFC, organized to handle the disposal of all government-owned property declared surplus by the Army, Navy, and other government agencies. This new subsidiary will continue to dispose of surplus producers' and capital goods, aircraft, and plants formerly handled directly by RFC and surplus consumer goods formerly handled by the U. S. Department of Commerce. No change in offices or personnel results from the transfer, and WAC will direct the activities from the regional RFC office at Nashville and branch offices at Knoxville, Chattanooga, and Memphis.

Included in recent offerings through the War Assets Corporation are ready mixed paints at 65¢ per gallon; 1½ kva automatic gasoline-driven electric generating sets at $435 each; hand-chain and electric hoists, 1- to 5-ton capacities; semi-special machine tools; arc welding machines; chemicals; brass, aluminum, and steel sheet, strip, tubing, rods, etc; fans and blowers; dust collection equipment; and numerous other items of industrial utility.

War Camp Lands Offered for Sale

Some 4800 acres of farmland in the Camp Tyson area at Paris has been declared surplus and is being offered to former landowners, from which the government purchased it. Disposal is through John A. Moore, assistant vice-president of the Federal Land Bank of Louisville, Ky., who is district supervisor of the sales of surplus farm and forest lands in the Fourth Farm Credit District, which includes Tennessee. After February 7, Joe Elliott, project manager, Camp Tyson, Paris, will furnish any information on the sales.

A total of 292.65 acres in the Naval Air Station area at Memphis, is being similarly offered for sale.

Chattanooga and Memphis Schedule First Postwar Events

The Memphis Cotton Carnival, first since 1941, will be held May 13-19 and will have as its theme the history of the "Volunteer State", commemorating the 150th anniversary of the State of Tennessee.

The first postwar national convention of the American Society of Mechanical Engineers will be held in Chattanooga, April 1-3.

* * *

New Advertising Brochure on Knoxville

"Unlocking the Power of the Universe" is a new advertising folder on Knoxville issued by the Knoxville News-Sentinel. Featured is the skyrocketing effect on Knoxville business indexes of the nearby Oak Ridge atomic project. TVA's influence on local industrial prosperity and Knoxville's tourist attractions are also described, with accompanying illustrations.

"For Tennessee Veterans"

"For Tennessee Veterans" is a new booklet, just issued by the Research Division of this Commission and the State Dept. of Veteran's Affairs, that lists briefly the kinds of assistance available to war veterans from each State and Federal agency or department. Miss Eleanor Keeble, Research Assistant, is the compiler. The booklet is free on request to this Commission or the State Department of Veteran's Affairs.

First Electrical Rock Wool Furnace

An electrically-heated rock wool furnace, reputedly the first of its kind in the U.S., was expected to begin operation at Tacoma, Wash., early this year.

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

The Forked Deer Soya Mills, Inc., Dyersburg, has been granted a State charter and plans are under way for construction of a solvent extraction plant, reportedly the first of its kind in the entire South. The new mill, to be completed by August in time to handle the local 1946 crop of soybeans, is planned to operate on a year-round basis, handling one million bushels of soybeans annually or 75 tons daily. Murray Weakley of Dyersburg is president of the new company, which is financed by citizens of Dyersburg, Halls, Newbern, and Obion.

Other new Dyersburg industries are the Tennessee Wood Products Company which has a plant under construction for manufacture of unfinished furniture; a new concrete block plant is soon to start operation; and S. Karpen & Brothers' new furniture plant, announced in last month's "Newsletter".

- - -

Tenneva Frozen Foods, Inc., Bristol, officially opened its modern food freezing - locker storage plant early in January, although the plant had been in operation for several weeks. Capacity of the plant is 768 lockers, and all kinds of meats, fruit, and vegetables can be processed.

- - -

Cleveland Container Corporation has acquired the former Caine Steel Co. plant at Memphis for manufacture of plastic articles and paper cans and other containers. Of a total reported $300,000 investment, $250,000 will be spent in remodeling and equipping the plant.

- - -

The "go ahead" signal for resumption of construction on the $25,400,000 Center Hill Dam on Caney Fork River, near Carthage, was given by the U. S. District Engineers office on January 2, following President Truman's signing of the deficiency appropriation bill that made the necessary funds available. Massman-Metcalf and Hamilton companies of Kansas City, Mo., are contractors on the job, which was shut down in 1943 on order of the WPB. The dam was 40% complete when work was suspended.

- - -

Murray Chair Co., Inc., Nashville, is building a new $20,000 plant that will permit expansion of employment from the present 55 workers to over 100. A State charter was recently issued permitting change of the firm from a partnership to a corporation. J. B. Murray is expected to be president of the new corporation.

- - -

The State Gazette Broadcasting Co., Inc., Dyersburg, has received approval by the Federal Communications Commission for a 250-watt radio station, to be located just outside the corporation limits. Early construction of the station is planned.

- - -

The State-constructed $30,000 cattle-breeding barn and laboratory facility between Franklin and Brentwood was presented at a formal ceremony, early in January, to the Maury-Williamson Artificial Insemination Association.

- - -

Contract for a $100,000 expansion of Gloria Rayon Mill at Johnson City has been awarded by Burlington Mills, Greensboro, N. C., of which the "Gloria" unit is a subsidiary.

- - -

At Clarksville, a manufacturing concern, as yet unidentified, is reported to have leased the plant facility formerly occupied by the Clarksville Manufacturing Co.

- - -

Expansion by existing Knoxville industries in 1946 will cost $3,600,000, according to a survey only half completed by the local Chamber of Commerce.

- - -

E. L. Bruce Co., Memphis, is constructing a $50,000 administration and assembly shop building.

- - -

The Smoky Mountains Railway, 30-mile line operated between Knoxville and Sevierville, may be scrapped in the near future, as reported plans are to place a proposal to sell the road before the Interstate Commerce Commission about February 1.

- - -

Ironall Factories, Inc., Cincinnati, O., have completed negotiations to locate a garment factory in Lawrenceburg, according to recent announcement by Mayor R. O. Downey. Construction is expected to start at once; 150 persons will be employed.

- - -

A river terminal oil dock, costing $113,000 is to be built at Memphis by the Pure Oil Company.

- - -

Tennessee Valley Broadcasting Co., Chattanooga, has been granted a permit by the Federal Communications Commission for a new radio station.

- - -

Contract for construction of the Tennessee Natural Gas Lines' new 15-mile feeder pipeline to bring natural gas to Nashville was awarded early in January to N. A. Saigh, nationally-known pipeline contractor, and H. S. Walters, well-known Morristown contractor. Saigh and Walters anticipated that start of the $600,000 project would be made about February 1st.

- - -

Brockton Heel Company, Nashville, has leased a 27,000 sq. ft. building in that city for manufacturing shoe heels. The building was formerly used by Tennessee Aircraft Co., and more recently by Spur Distributing Co.

- - -

Honeychile Frocks, Inc., newly organized company at Chattanooga, expected to begin production of its children's dresses about mid-January. Plans call for an annual volume of about $300,000, with nationwide distribution of the dresses through department stores and specialty shops. President of the new concern is James F. Ansle, Jr., former assistant general manager of the local Topps Chewing Gum Company's plant.

- - -

Reduction from $1.45 to $1.30 per ton in the freight rate of coal shipments over the Tennessee Central Railway from both Wilder and Monterey was upheld early in January by the Second Circuit Court, confirming a cut in the rate ordered on July 3, 1945 by the State Railroad & Public Utilities Commission.

- - -

The Mead Corporation, Kingsport, has announced construction award to Austin Engineering Co., Cleveland, for a $350,000 expansion of its present plant facilities. Included in the program is a two-story 37,700 sq. ft. addition to its main plant for use as shipping and inspection departments, new hospital, personnel office, and modern cafeteria. Construction, to start about March 15, is expected to be completed by August. Ultimately, the new facilities should permit increase of employment from the total of 825 to 1,000 workers.

- - -

Control of Appalachian Mills Company, Knoxville, was recently obtained by a group of business men in that city through purchase of all outstanding common stock and redemption of all preferred. The purchase was made to insure retention of the mill at Knoxville and its management by local people, according to a statement by W. A. Brownlee, president. Appalachian Mills is Knoxville's largest textile plant, normally employing 3,000 workers in the production of cotton underwear, sweaters, jackets, and similar articles.

- - -

Bids for construction of an addition to the General Shoe Corporation's local plant were being taken in January by the City of Tullahoma.

- - -

Farber Bros., Inc. Memphis, has been granted a State charter to manufacture auto seat covers and auto tops and to deal in auto paints and supplies. Initial capital is reported as $100,000.

Other companies also recently granted charters are Wil- Roy, Inc., for manufacture, design, etc., of all types of airplane equipment, baggage trucks, etc.; the Memphis Metal Mfg. Co., various metal products; Tiny Tot Tidiers, Inc., rental diaper service; Honey Belle Co., Inc., operation of bakeries; and Independent Tractor Co., Inc., manufacture and sale of all kinds of equipment and machinery.

- - -

Bryan Full Fashioned Hosiery Mills, Chattanooga, are now producing nylon hosiery for the first time in three years. Additional equipment is on order to permit expansion in production when nylon becomes available in greater quantities.

- - -

Kraft Foods, Inc., Memphis, has received a permit to construct a new $117,000 one-story brick and steel plant.

- - -

Tennessee Valley Manufacturing Co., Nashville, is a new corporation formed to take over the Aircraft Parts Manufacturing Co., which will cease production of aircraft parts. The new corporation is chartered to engage in the manufacture of machinery for use in preparing foods for quick freezing, poultry dressing equipment, and certain other kinds of packing house equipment.

- - -

On January 7, Ford Motor Company's Memphis assembly plant rolled the first new cars off its lines since 1942. Ultimate daily output of 75 cars is anticipated.

- - -

Jamison Bedding, Inc., Nashville, has announced plans for a 20,000-sq.ft. addition to their plant, costing $56,500, plus other expansions in equipment that will permit eventual tripling of their present output of springs and mattresses. Total cost of the expansion was not made public.

- - -

As the Newsletter goes to press, the RFC announces purchase - for more than $1,000,000 - by Rohm & Haas of their Knoxville plexiglas unit operated there during the war but which, early in December, suspended operations (see p.2).

- - -

The N.C. & St. L. Railway's board of directors have announced approval for an expenditure of $2,300,000 in reduction of curves and improvements of road-bed on the Memphis and Atlanta divisions. Streamlined trains will be added soon.

Lullaby Baby Service, Nashville, has been issued a State charter for laundry and diaper service.

* * *

TENNESSEE Industrial Planning NEWSLETTER

INDUSTRIAL DEVELOPMENT DIVISION
TENNESSEE STATE PLANNING COMMISSION
432 SIXTH AVENUE NORTH, NASHVILLE 3

Vol. 1, No. 11 Geo. I. Whitlatch, Editor March 1, 1946

WHY NOT A STATE MARKETING INSTITUTE?

By R. A. Merrill, Industrial Consultant
Graves Engineering Company, Nashville

(The following article, prepared at the suggestion of the editor, presents an idea for advancing the expansion of local industries, especially the smaller manufacturers. A future issue of the "Newsletter" will feature another plan for furthering the interests of the small industrialist. Comments and criticism of these articles are invited.)

Both Tennessee and the South as a whole have become most attractive to industrial organizations in recent years. In part, this is due to widespread publicity attending certain developments, of which perhaps the TVA and the atomic bomb project are the most spectacular, but it is the normal growth and other economic advances - in part stimulated by the TVA - that have definitely increased this region's industrial attractiveness.

Throughout this period of development, advertising campaigns instituted by cities, areas, states, railways and others have constantly stressed the superior advantages of the South as a location for industrial plants. But true as that may be, more than mere statements are necessary to accomplish the objective - industrial expansion for the region. For example, we cannot overlook the geographical fact that southern centers, on the whole, are much farther from the Nation's major markets in the centers of population than are the more northerly and easterly industrial centers. This fact, however, is not too important, provided there are compensating advantages.

Although the South has numerous "compensating advantages", the general opinion here has been that successful competition with other industrially minded regions required specific inducements. Many kinds of these so called "inducements" have been used over a period of years by numerous communities to obtain the establishment of local industrial plants. Probably the most common of these inducements has been the raising of local funds for the purchase of a plant site and construction thereon of buildings and other facilities, which are then turned over to some manufacturer for use on very generous terms - in some instances, amounting essentially to a gift. Where payments are required, these often are postponed for an initial 10-year period or longer. The net result of such subsidization is a heavy burden on the citizens of the community that, for many years, more than offsets the benefits obtained from the manufacturers payroll. This fact is seldom given adequate publicity and seems not to be appreciated fully by many persons who enter into such subsidization.

Even the most liberal subsidies have many, many times failed to attract the desired industries. There may be numerous reasons for such failures, but no community will have to thus rationalize its failures if it has a specific attraction to present to all desirable industrialists. That attraction is the answer to almost every industrialist's most pressing question - "What will be the outlets for my products; where will my sales be made; or how can my sales be increased?" Obviously, any community or group of communities able to assure a new manufacturer of constant sales

representation over a wide area, in all the major market centers of the Nation, will certainly be "selling" their location on a sound basis. Further, manufacturers will have such lessened interest in subsidies of any kind as to essentially eliminate them. Given adequate assurance of markets for his products, the average manufacturer would prefer to select his own location and so organize his operations as to have no "strings" attached to his venture.

The establishment, maintenance and development of markets for products of industrial concerns is of major importance to any area desiring to grow industrially. Only the largest corporations are able to advertise nationally and to cover fully the various markets of the Nation with their own sales staff. All others must be content with either limited coverage or with very spotty sales records where attempts are made to cover the entire Nation.

For small businesses, the answer is cooperation by a large number of them to the extent that adequate positive coverage may be had in all the major marketing areas of the Nation. This is not a new practice and has been tried successfully a number of times. Similarly, many state Chambers of Commerce contribute to such cooperation, in a limited way, through national magazine advertisements telling of the suitability of their states for further industrial development. This is good, and necessary, but it is doubted that such advertising results in much profit for the locally established small manufacturer.

A more positive approach to the question appears to be in order. The answer is relatively simple. All that is required is the formation of a substantial association by a sufficient number of communities and existing industries to permit establishment of on-the-spot representatives in the major marketing areas of the Nation to further their program. This program is simply one of finding, in each of these marketing areas, distributors for the products - both present and new - of industrial members of the association. This task will be facilitated by each representative's knowledge that there are representatives similarly engaged in all of the other major marketing areas of the country. Any prospective distributor, assured that a product will be marketed all over the entire Nation, undoubtedly will be interested in it, provided the product meets sales requirements on points of quality, price, and current demand.

Inasmuch as the key personnel in such a program will be the representatives in the marketing areas, the most ideal time to organize such an association would appear to be the present, while so many thousands of capable individuals are not yet firmly established in the peacetime businesses in which they propose to engage. Furthermore, there are many former residents of Tennessee who, for a variety of reasons, have found it desirable to live at some other point in the country. Many of these are war veterans, not yet established in any business, who would undoubtedly welcome an opportunity to represent their home areas. This program also would form an excellent interneship for those who later desire to enter business here in Tennessee but who are willing to spend two years or so at some assigned point in order to learn general business procedures.

In Tennessee, several areas should be able to support this kind of an association, with a high percentage of participation by those eligible. Nevertheless, it is believed that a <u>state-wide association</u> will be much more effective and will be more profitable, both to present manufacturers and to others who will be attracted to the State after such an association has been established. Such a state-wide association will permit the inclusion as members in one single organization all

present manufacturers, in any part of the state, that do not now have satisfactory sales coverage, as well as every Tennessee community desirous of securing one or more industries.

With substantial response to such a program, the cost per community or per company should be little more than nominal. Because the bulk of the funds will be spent for maintenance of the representatives' offices in the various marketing centers, membership assessments should be on a monthly basis.

The organization here outlined might well be designated as the "Tennessee State Industrialists' Marketing Institute", or perhaps the "Volunteer State Industrialists' Marketing Institute". But, regardless of the name adopted, the writer would like to urge that this program be fully considered by all small industries of the State and that early action be taken toward establishing the suggested organization.

* * *

Do You Know That -

Tennessee has a movie industry. Samuel P. Orleans & Associates, 211 West Cumberland Avenue, Knoxville, are producers of documentary and educational films for use by Tennessee industries. "Your Health Department in Action", a recent release sponsored by Knoxville industries, is receiving national distribution through prints circulated by the University of Tennessee Film Library. In the first three months of exhibition by the Knoxville Bureau of Health, this film - a sound movie - had 42 showings before civic clubs, schools, and church groups. A national version of the film has been requested for preview by 30 State Departments of Health.

Another highly successful "Orleans" film, released in December of last year, is "Today's News - Tomorrow's Men" produced for the Knoxville News-Sentinel. The film is designed to acquaint newsboys with all the steps related to publishing a city newspaper, to show the newsboy the correct manner of handling his route, and to sell the boy on the newspaper business. Prints of the film being circulated by the University Film Library are reported to be booked solid, with requests for bookings from coast to coast.

A full-color production on Tennessee's dairy industry, sponsored by the University Agricultural Extension Service, will be ready for release sometime this month. Production of a series of 16 mm. natural color, sound news pictorials is being planned for bi-monthly distribution by electric companies to promote the use of electricity.

Mr. Orleans was formerly photographer for the TVA and prior to that was, for 12 years, a news cameraman for Hearst Newsreel.

* * *

Lawrenceburg Subscribes Industrial Funds

A group of 35 leading business men of Lawrenceburg are reported to have subscribed a total of $37,500 toward a fund for the construction of a new factory building in that city. At the meeting held in mid-February in connection with this project, the estimated cost of the building is reported as being $60,000 to $75,000. The building is to be constructed on a cost plus basis with the manufacturing concern agreeing to the payment of an annual rental of 5% of the cost of the building and lot. The contract will provide a ten year lease with an option for renewal. An 8-acre site on the north side of the city was recently purchased as the plant site.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

During the past month, all inquiries to this Division have been either for information on existing vacant plant buildings or for direct assistance on potential locations in selected communities. Consequently, no inquiries of widespread interest are available for listing in this issue of the "Newsletter".

* * *

TVA TO HOLD "OPEN HOUSE" FOR MANUFACTURERS

Tennessee Valley Authority is holding "open house" at Knoxville between March 4 and 15, inclusive, for manufacturers and businessmen who are seeking new products to manufacture. Exhibits of TVA-developed household appliances and agricultural equipment, including a peanut harvester, peanut sheller, barn haydrier, seed scarifier, kitchen flour mill, and electric pump-sink cabinet, will be on view and demonstrated at the University of Tennessee - TVA Engineering Laboratory on the University Campus.

This Division will be glad to furnish any interested Tennessee businessmen with an illustrated booklet, "Opportunities to Manufacture New Types of Farm Equipment", which describes the various items to be exhibited during this "open house" program. Anyone expecting to attend this TVA "open house" is urged to immediately notify the TVA Department of Commerce, Knoxville, of the expected date of attendance, in order that hotel reservations may be assured.

* * *

Chattanoogan Invents Electric Furnace For Homes

A new type of electric residential furnace has been developed by H. D. Seaton, electrical appliance agent of Chattanooga. The working model of the furnace, developed in cooperation with the Electromode Corp., Mishawaka, Ind., is reported to resemble a "streamlined white kitchen cabinet" and to be thermostatically controlled to adjust for out-of-doors weather changes. Costs of operation are said to be about one cent per cubic foot of room space or around $180 total cost for heating a 9-room house in the Chattanooga area for an entire winter season, based on TVA electric rates.

Plans are being made to market the furnace in two sizes at costs of about $400 and $700 per unit.

* * *

SALES OPPORTUNITIES

Radio & Television Cabinets: Northern manufacturer wants to contract with reputable Tennessee wood-working concern for volume production of radio and television cabinets. Contract is sufficient to keep 500 persons steadily employed.

Electrical Coffee-maker: Tennessee inventor has obtained U. S. patents on a new type of coffee-maker or percolator and seeks backing by Southern capital to place it in production here in South. Royalty propositions from Tennessee or other Southern manufacturer of electrical appliances also will be considered.

* * *

S. H. A. SPONSORS INDUSTRIAL DEVELOPMENT PROGRAM

Tennessee's tourist business as one of the State's major opportunities for future industrial expansion keynoted the annual meeting of the Southern Highlands Association, held at Knoxville on February 6 and 7. Speakers during the meeting included Commissioner Paul S. Mathes, State Department of Conservation; Dr. Chas. H. White, Economist, School of Business Administration, and Dr. C. E. Brehm, Dean, College of Agriculture, University of Tennessee; Mr. Garth Cate, Travel Director, Scripps Howard Newspapers, New York City; and your editor.

Consensus of opinion of the various speakers, briefly stated, was that Tennessee has not fully awakened to the economic opportunities of its tourist trade. Tourist travel in the State is "big business". In 1941, prior to tire and gasoline rationing, nearly 8,000,000 tourists visited Tennessee, spending here a total of more than $104-million for food, hotel and tourist court accommodations, gasoline, oil, tires, and other items. This business, translated into terms of employment, has meant many jobs for Tennesseans in the trades and services catering to the tourists needs and to the farmers of the State in supplying food.

Tennessee's location and its many scenic attractions, several of the speakers pointed out, give this State natural advantages as a tourist center. The extensive lake system created here by the TVA dams has enhanced greatly these recreational attractions. In the next few years, Tennessee has the chance to increase enormously its tourist business, but up to now the towns and cities have failed largely in fully assessing the economic value of this business. To many communities, the possibilities for increased employment in trades and services necessary to serve an expanding tourist trade "offers one certain way of overcoming a postwar employment problem". Numerous smaller towns in the State, totally lacking in resources or other advantages to attract manufacturing industries, have overlooked completely the one "inexhaustible resource" they have the natural scenic beauty surrounding them. Too long, as one speaker aptly put it, communities seeking industrial expansion have "been counting smokestacks" as sources of employment, while ignoring the fact that 51% of all employment normally is in the trades and services.

Increased tourist travel in Tennessee will create many new job opportunities, in the trades and services, as well as in agriculture, but, speakers at the meeting agreed, the State still has much work to do if such increase in tourist business is to be won and held. There is, today, a serious lack of modern attractive hotels and tourist courts, up-to-date restaurants and cafeterias serving clean tasteful foods, sporting equipment stores, boat rental services and dock facilities along the TVA lakes, comfortable camp sites and cabins in the mountain areas, good secondary roads with adequate, directional markers, and numerous other facilities essential for the entertainment, comfort, enjoyment, and safety of the stranger traveling the State.

Here in Tennessee, and the South as a whole, the farmer also has failed to realize upon the opportunities afforded by the tourist, as have farmers in several northern states. Farms with lake frontages offer fine sites for privately operated tourist courts or resort facilities with boating, fishing, and hunting services. In certain northern areas, the farm home has been converted to attractive resort hotels, with the farmer obtaining double income from the serving of meals prepared largely of vegetables, fruits, chickens, eggs, and other foodstuffs grown on the farm itself.

In addition to the State's lack of many modern conveniences and services to meet the direct needs of the tourist, both the rural and urban areas received criticism at the meeting. Much yet remains to be done by the farmer in cleaning up fence rows, painting and repairing his home, barns, and other buildings, reducing the erosion of his fields,

and otherwise adding to the attractiveness of the countryside through which the tourist passes. In the cities and towns, it was noted, there is too commonly an utter lack of civic pride and civic leadership, resulting in deplorable traffic conditions, equally deplorable rutted and debris-littered streets, lack of clean attractive business districts, filthy smoke-filled atmospheres, inadequate street markers, and many other unattractive but correctable physical conditions.

To accomplish the ultimate objective of an enormously increased tourist business in Tennessee and to fully realize from it the maximum of new employment will require a wholehearted unity of purpose by individuals, cities, and towns throughout the State. Only by forgetting local and regional jealousies and rivalries and working with a singleness of purpose can the cities and towns of the State achieve the degree of industrial expansion essential to better living. In realization of this need for full cooperation, the Southern Highlands Association's executive committee voted at the Knoxville meeting to extend its activities to a statewide program designed to promote the general industrial development of Tennessee. As a part of this program, the Association is planning for the near future a series of sectional meetings throughout the State for acquainting all interested local groups with the interrelated problems of tourism, agriculture, manufacturing, civic improvement, similar activities as they affect the general economic and social welfare of Tennessee.

* * *

"WAKE UP, KENTUCKY"

"Wake Up, Kentucky" is a weekly series of dramatic presentations of facts on Kentucky broadcast over radio station WHAS at Louisville each Monday evening at 6:30. The program is re-broadcast by seven other Kentucky stations during other days of the week.

Sponsored by The Committee for Kentucky, a Statewide non-political, non-profit organization of civic, industrial, and educational leaders, the program is a stimulating, thought-provoking series of dramatizations of factual information about existing conditions in Kentucky, the bad and the good alike - the "unglossed truth". The programs, based on extensive research by The Committee for Kentucky experts, is designed to awaken Kentuckians to some of the problems that the State faces in education, health, agriculture, welfare, its constitution, housing, natural resources, labor, industry, and taxation. The Committee believes that "the truth is mighty and that it has a power to stimulate understanding and action to remedy the bad and to make the best use of the good".

As Marquis W. Childs, newspaper columnist, after a visit to Louisville wrote in his syndicated column: "The enthusiasm engendered by The Committee is pretty exciting. By every possible means, they are telling Kentuckians the facts of life".

Organized in January 1944, The Committee currently has 55 dues-paying member organizations throughout the State, with a total membership of over 350,000 citizens and a $40,000 three-year development program. Early in 1945, WHAS placed its facilities at the disposal of The Committee for the current radio series.

The Committee for Kentucky is to be congratulated on its efforts to advance the interests of our sister state. Similar statewide unity of purpose and action are called for in other Southern states to achieve the economic and social progress to which so much lip service is now being given and so little real effort is actually being extended.

* * *

INDUSTRIAL BUILDINGS AND PLANT SITES AVAILABLE

Industrial Buildings

Middle Tennessee

Nashville: One-story, steam-heated, concrete block building, 75'x250'x12' - concrete floors, metal windows and doors, built-up insulated roof, with office space, toilet facilities, plus basement 75'x175'x10', and warehouse 40'x100'x16'; also residence on property. Spur track from L. & N. R.R. to warehouse. For sale only.

Springfield: Brick building, 90'x240', with partial second story, 90'x100' - all clear working space, free of support columns. Wood sub-floor, with hardwood floor (owner will install concrete floor, if desired); heavy duty elevator; 30-ft. driveway entrance into building. In town, on railroad and main highway. Adjoining vacant property available for expansion. For lease at 25¢ per sq. ft. annually.

Springfield: Single story brick building, 15,000 sq. ft. Further details on request.

Algood: Two-story brick building, 7,200 sq. ft.; no elevator, stairs to each floor. Sprinkler system can be installed.

West Tennessee

Jackson: Three-story brick building, 60'x160'x12', with basement (total space, 38,000 sq. ft.); wooden floors, except basement has concrete floor. Building constructed for heavy loads and equipped with elevator. I. C. R.R. spur - 110 ft. long on one side, loading platforms on other. Available on long or short term lease.

Cordova (15 mi. E. of Memphis): Former shell-loading plant, on 261-acre site (221 acres fenced), with 165 buildings totaling 212,804 sq. ft. floor space. Buildings mainly wood frame, sheet metal walls, wood and concrete floors; larger buildings, excepting those for storage, are insulated and heated. Major buildings include two cafeterias, machine shop, several storage buildings (55-200 x 30-40 ft.), carpenter shop, fire station, garage, etc. Two production buildings of about 6,000 sq. ft. each, one of 7,100 sq. ft., and fireproof garage building of 10,400 sq. ft. R.R. siding facilities, serving various parts of plant, have total 1,000-car capacity; two steam plants, total of 470 H.P. capacity, for heating; electrical system served by Memphis Power, Light & Gas Co.; private water system served by two wells with total capacity of 390 gallons per minute; 10 storage tanks of 420,000 gal. total capacity. Plant served by N. C. & St. L. Ry. Available for lease or purchase.

East Tennessee

Chattanooga: Five one story closely grouped and joined buildings with total floor space of about 70,000 sq. ft., on tract of 8.87 acres surrounded by cyclone fence. Formerly used by enameling concern. Main building, brick, approximately 34,000 sq. ft. Other buildings, brick and metal, varying sizes. Entire plant sprinkler protected, with water tower; private 5 or 6-car railroad spur; loading docks; steam heating system, boiler of 150 lbs. capacity. Plant is on north side of river, within 5 minutes of heart of city, on paved road served by bus line. Available for immediate possession by purchase.

Plant Sites

West Tennessee

Memphis: Tract of 45 acres, immediately outside corporate limits of Northeast Memphis, on main line of L. & N. R.R. Owner will build for reputable company on long-term lease.

PRODUCTION LINE NEWS AND NOTES

Industrial Personnel Conference To Hold Meeting

The Tennessee Industrial Personnel Conference will hold its ninth annual meeting at the Andrew Johnson Hotel in Knoxville on April 4 and 5. The tentative program includes discussions on recent developments in collective bargaining, veterans employment, employee selection and training, and similar topics. Members and others planning to attend are urged to make hotel reservations at the earliest possible moment.

Humboldt and Lexington Prepare For Industry

The city of Humboldt in mid-February voted on the issuance of $120,000 in bonds for the purchase and development of industrial property. Such industrial facilities, according to news reports, will be leased for periods up to 20 years.

The Henderson County Quarterly Court in a recent special session at Lexington voted to give that city the county's half interest in the local gymnasium and fair grounds for industrial use. Negotiations are reported underway to locate a new industry at Lexington employing approximately 300 workers.

Aids To Small Business

A Small Business of Your Own, With Capital Investment from $100 to $2,000, by Harold S. Kahm, is available from the American Distributors Publishing Co., Farnsworth Bldg., Memphis, Tenn., at $1.00 per copy. The company offers to send free, on request, a six-page "job aptitude" test, along with a contents outline of the book.

Governmental Financial Aids to Small Business is another publication in the U. S. Department of Commerce's Economic (Small Business) Series (15¢ per copy) that reviews the sources of capital and credit facilities available to small business enterprises through RFC, the Federal Reserve System, and other government agencies. Other recently issued business guides, available on request, to the U. S. Department of Commerce, Regional Office, 603 Rhoades Bldg., Atlanta 3, Georgia, include:

Establishing a Hardware Store
Some Factors in Establishing a Beauty Shop
Some Factors in Establishing and Operating a Retail Shoe Store

The Farm Equipment Retailing Business is a handy guide for war veterans prepared by the National Retail Farm Equipment Association of St. Louis, Mo. Write Graham McDonald, Sec., Mid-South Farm Eq. Assn., 1624 Eastmoreland Ave., Memphis 4, Tenn.

Greene County Industrial Plans Completed

Greeneville, important tobacco and dairy center in Greene County of Upper East Tennessee, is making a realistic approach to solution of that county's problem of 5,000 returning veterans by formation of the Greene County Foundation, modeled after the well-known Louisville (Ky.) Industrial Foundation. The new Greene County organization has a revolving fund of $100,000 for use, along with RFC loans, in

financing plants for new industrial enterprises. The plan is to finance acceptable industries with leases on sites and buildings at 4% interest, 5% annual depreciation on cost and current taxes during a minimum 10 year lease. Clyde B. Austin, president of Austin Co., Inc., heads the Foundation, and T. D. Brabson, banker, is treasurer.

New Tennessee Scenic Booklet Issued

Tennessee in Words and Pictures is the title of the State Department of Conservation's new 32-page illustrated advertising booklet on the scenic, historic, and recreational features of Tennessee. Full color photos of "The Hermitage", rhododendron on Roan Mountain, one of the TVA lakes, and Gatlinburg form the cover of the publication. For your copy, address: Division of State Information, State Office Bldg., Nashville 3.

TVA To Sell Lake-Front Lands

The TVA lands along the margins of its lakes are being re-surveyed preparatory to offering for sale to private individual or companies various tracts of surplus properties suitable for development as camp sites or other recreational facilities, industrial sites, and for agricultural purposes. Write the Tennessee Valley Authority, Land Department, Knoxville for further details.

Community Industrial Development Outline

Outline For a Community Industrial Development Program is a 76-page publication released in February by the American Industrial Development Council. Mr. Arthur M. Field, formerly with the Memphis Chamber of Commerce and now chief engineer of the Charleston (S. C.) Development Board, is author of the book. Designed to assist civic leaders, industrial engineers, and others concerned with local industrial expansion programs, the outline gives data on organizational set-ups and operating procedures. It sells for $1.50 per copy.

Labor Legislation Report and Municipal Directory Available

The Development of Labor Legislation in Tennessee and the third edition of the Directory of Municipal Officials are new publications of the University of Tennessee's Bureau of Public Administration. Copies of either of the above publications can be obtained from Dr. Lee S. Greene, director of the Bureau, Knoxville.

University of Tennessee Starts Business Newsletter

Tennessee Business, a bi-monthly newsletter published by the University of Tennessee School of Business Administration, made its debut in January. Featured in this initial issue was an article on "Tennessee and South are Headed for Unprecedented Business Growth", by Col. E. W. Palmer, who is president of the world-famous Kingsport Press, Inc., and also a member of the Tennessee State Planning Commission.

Business men interested in receiving Tennessee Business should send in their names and addresses to James H. Strauss, Editor, School of Business Administration, University of Tennessee, Knoxville.

INDUSTRIAL CONTRACTIONS AND EXPANSIONS

The Young Men's Business Club, Paris, has announced purchase by the Bowling Green Rubber Company, Toledo, Ohio, of the local N.Y.A. building, owned by the club. The rubber company is reported planning to commence production, within the next 5 months, of molded rubber products including garden hose and windshield glass wipers. Some $34,000 will be spent for installation of equipment.

Monroe Manufacturing Corp., Memphis, has received a State charter to convert and fabricate raw materials into curtains.

Contracts for Belding Hemingway Company's new $1½-million thread-throwing mill at Morristown, as announced in the December Newsletter, have been let and grading of street and excavations for the plant are underway. Construction work is expected to start in the very near future, and new machinery for the mill is reported to have been ordered.

The Nolde & Horst Company's hosiery mill at McMinnville was recently purchased by J. H. Vogt of Reading, Pa., former president of the Nolde & Horst Company. Mr. Vogt is reported also to be starting a new plant in Reading to be known as Vogt Knitting Mills, Inc.

Nabors Manufacturing Company has been organized at Chattanooga by D. J. Nabors for the fabrication of cotton linters, cotton mill waste into materials for the furniture, mattress and automobile trade. Bleached cotton products will also be produced. The new mill, which will have a weekly output of between 100,000 and 125,000 lbs., will operate initially in temporary quarters until a new plant building is completed, probably in about six months. Initial employment will be about 20 workers. President of the company and principal owner of the new mill is Mr. D. J. Nabors, formerly associated with the Barnhardt Manufacturing Company of Charlotte, N. C.

Combustion Engineering Co., Chattanooga, has let contract for a new plant building.

Martin Machinery Co., Knoxville, plans to build a new $100,000 factory building.

Expansion by the Aluminum Company of America of its foil manufacturing facilities to more than double present foil production capacity has been announced. Included in the plans is installation of new foil production equipment in the company's Alcoa, Tenn., plant.

The Memphis unit of the Tobias Bag Co., St. Louis, has been purchased by the Louis G. Stein Bag Co., according to a recent news note in Southern Textile News. The "Tobias" plant, operated at Memphis since 1940, will have new machinery installed for making burlap and cotton bags.

Strip mining of coal was recently started near Brayton, in Bledsoe County, by the Tennessee-Pennsylvania Coal Company, a mining concern with Pennsylvania headquarters. Two large power shovels are reported in use on the property; haulage of the coal will be to College Station on the N. C. & St. L. railway in Sequatchie Valley. The company is said to have uncovered a sizeable vein of stripable coal and to have several thousand acres of strip land under lease.

J. B. Fawcett & Company is establishing at Columbia a new mill for the production of anklet sox. This new industry will be operated by Mr. J. B. Fawcett, formerly connected with the local Tennessee Knitting Mill.

Sweetwater Hosiery Mill, Sweetwater, has been purchased by a newly incorporated organization, the Monroe Hosiery Mill of Black Mountain, N. C.

Southern Garment Corp., Greeneville, has recently completed an addition to its plant and has resumed manufacture of women's apparel. During the war the company produced armoured flak suits for the Armed Services.

The Memphis Aircraft Division plant of General Motors Corporation's Fisher Body Division, operated at Memphis during the war for the manufacture of plane parts, is reported to be under consideration for purchase by manufacturing firms in Wisconsin and in New York. The negotiations are being carried on with the War Assets Corporation of RFC. Employment would be between 2,500 and 4,000 workers, if present negotiations are consummated.

Marshall & Bruce Co., well-known Nashville printers, will build a $100,000 addition to their plant.

The former Ideal Hosiery Mill at Maryville is to renew operations in the near future under the name of Gaby Hosiery Mill. Mr. Walter Gaby, an Army veteran of some 18 years' experience with the Ashe Hosiery Mill of Knoxville, will operate this new plant. From 200 to 300 workers will be employed initially.

General Motors Corp., Memphis, is reportedly planning construction of a new 45,000 sq. ft. sales distribution building, costing between $150,000 and $175,000. The building will be used as a partial assembly plant for GMC trucks which will be shipped to Memphis stripped of fenders and various other accessories. This is a new distribution method being started by General Motors. The new plant is expected to employ between 75 and 80 persons.

A rubber tire manufacturer and a furniture company, employing 800 and 200 persons, respectively, are reported negotiating for certain large buildings of the Milan Ordnance Works at Milan. Mr. Grover Keaton, secretary of the Milan Chamber of Commerce, was in Washington early in February to urge government officials for early action in declaring surplus the MOW units necessary to obtain these new industries.

Missouri Portland Cement Company has obtained a building permit from the City of Memphis for erection of concrete storage silos and a packing house costing a total of $154,000.

Sears, Roebuck & Co., Memphis, have received a city building permit for the construction of a $410,000 warehouse.

Kay's Ice Cream Co., Chattanooga, has awarded a $110,000 contract for brick and concrete additions to their local plant that will total 4,700 sq. ft.

The Davis Hosiery Mills have been granted a charter for operating a hosiery mill at Newport. Incorporators are James E. Corn, L. G. Davis, Jr., and Fred S. Turnbull.

The Century Boat Company of Manistee, Michigan, has leased the Chattanooga Sash & Millwork Company plant for manufacture of plywood boats designed for fishing, and "car-borne" boats for outboard motor operation. Production, which will begin March 1, ultimately will reach 1,000 boats per month, with employment of approximately 125 workers.

John A. Johnson Contracting Corp., Brooklyn, N. Y., which also operates a mill at Johnson City, Tenn., is reported by Engineering News-Record to be mass-producing pre-cut shop-assembled components of complete shells of single-family houses. A dozen or more models are available at prices ranging from $2,527 for a 4-room house to $6,136 for a six room job. Foundation work, erection of the shell, interior finishing, and installation of wiring and other fixtures are extra costs, and such work is left to local contractors. The company is reported by ENR as ready to produce these units at its Johnson City mill, if lumber supplies and a housing market are available in that area.

Contracts have recently been let at Nashville for a $12,000 expansion of the Happy Day Laundry and for Blazer Brothers' new $10,000 rug cleaning plant.

In Memphis, according to Southern Advertising & Publishing, 62 employees of Armour & Company recently had an opportunity to vote on a strike. "Only one of the 62 bothered to show up even to vote".

Price-Bass & Co., Nashville, have let a contract for a three-story warehouse costing $75,000.

McGinley Produce Co., Knoxville, has let a contract for a new $60,000 office and warehouse.

Clark Hardware Co., Nashville, is constructing a new $150,000 store building.

During the month of December 1945, Tennessee textile mills reported 489,296 active spindles out of a total 549,752. The active spindle hours during the month totaled 290,000,000 or an average of 380 hours per spindle - third highest average in the Nation and well above the national average of 325 hours.

TENNESSEE
Industrial Planning
NEWSLETTER

INDUSTRIAL DEVELOPMENT DIVISION
TENNESSEE STATE PLANNING COMMISSION
432 SIXTH AVENUE NORTH, NASHVILLE 3

Vol. 1, No. 12 Geo. I. Whitlatch, Editor April 1, 1946

INDUSTRIES GIVE TENNESSEE THE ONCE OVER

Harold V. Miller, Director
East Tennessee Office
State Planning Commission

Without stopping to consider the relative merits of home grown versus immigrant industries, let us consider the fact that industry from various parts of the nation is considering Tennessee as an area of great promise in which to locate and conduct profitable operations.

The State Planning Commission, through its Industrial Development Division in Nashville and its several regional offices, receives dozens of inquiries a month relating to locations for industries. Many of these may be promptly discounted as being fly by night operations, "running away" from something, or perhaps seeking a location in some "sucker" town that is shortsighted enough to grant a fat subsidy without examining the proposition too closely. Many others are firm prospects, companies seeking sites physically suited for plant construction of the type proposed, and in situations properly related to raw materials sources; transportation water, rail, or highway according to the particular needs of the proposed business; supplies of power, fuel, and labor; and present or develop able markets.

When responsible representatives of prospective industries visit Tennessee, they are looking for facts on which they may base important decisions.

Because the State Planning Commission is interested in the development of the entire region, it's advice in reply to industrial inquiries is based on several principles, rather than on the basis of favoritism toward any particular locality. First, the needs or requirements of the inquiring industrialist are determined. Then, an effort is made to put him in touch with communities or areas that need his type of industry, provided they are locations which will fit his requirements.

Generally speaking, if a new industry brings greater diversification and industrial balance to a community, the community is bettered, and the industry has a greater chance of success. For example, a small Tennessee town may be the scene of several reasonably successful hosiery mills and nothing else in the way of industry. Presumably this community has the labor, transportation, and other qualifications necessary for hosiery manufacturing. However, this community will probably offer little in the way of male employment, and too great dependence on female employment means low average family income and various severe sociological problems. It would further unbalance that community to locate another similar industry at that point, and the new industry would have stiff competition to meet in the way of obtaining a location, securing labor, and in kindred phases of its operations. In contrast, a male-employing industry brought to such a community would give employment opportunities to men who,

because their wives and daughters may already be employed in the hosiery mills, are anxious to find work so that they may remain in that community and contribute to the family finances. Such an industry would bring diversity to the community and thus tend to secure it against economic hardship in case of bad times in any one particular type of industry.

An effort is made, too, to guide industries into locations where the operations will raise local standards rather than lower them. A minimum-wage operation may be an asset to a small community where living costs are relatively low and the per-capita municipal finance expenditures are modest. That same industry might have a depressing effect on a larger community, both in forcing general wage levels downward and in slowing down retail trade and other business activities. The workers might be able to own or rent only very low price homes which would not yield sufficient tax revenues to care for education, policing, and other public services, and thus the presence of this body of workers would be a drag on the local municipal finances.

The success of an industry in any location is dependent to a considerable degree on whether or not responsible civic and business leaders look with favor on that particular industry. Clear statements of attitude and policy on the part of a community will greatly facilitate the guiding of wanted type of industry into any particular community.

Industry is looking toward Tennessee. Inquiries range from a GI with nothing more than an idea for a product and the prospects of a loan under the GI Bill of Rights to a corporation seeking the proper location for erection of a $30,000,000 plant which will employ thousands of people. It behooves every community to decide what it wants in the way of new industry, and to make its policies clear regarding them.

* * *

NEW FOUNDRY GOES TO SWEETWATER

Sweetwater, in mid March, was selected by Mr. H. A. Vestal of Athens, Tenn., as the location for a new foundry to manufacture stoves, ranges, and heaters. Construction of three buildings will be started immediately, and production will begin at the earliest possible date, depending on delivery of equipment now on order. Initial operations will give employment to around 180 men.

The new foundry will be located on the south side of Sweetwater, between the Lee Highway and Southern Railway tracks, on an 8 acre tract donated by the Sweetwater post of the American Legion.

Mr. Vestal and his sons, H. A., Jr., and James E., will be actively engaged in the management of the foundry. A third son, Hubert J., also will have an interest in the company but will remain in Athens as general manager of the local Van Raalte mill, formerly owned by Mr. Vestal, Sr.

The "Newsletter" wishes the best of success to Mr. Vestal and sons in their new venture. This investment of local capital in a new industrial enterprise is a splendid expression of faith in the future of Sweetwater and of Tennessee. And, knowing full well of his efforts, we wish to congratulate Mr. S. J. Randall, manager of the local Board of Public Utilities on his success in bringing this new home owned industry to Sweetwater. Further, the American Legion post deserves full credit for its highly commendatory civic action in donating the plant site.

* * *

EMPLOYMENT TRENDS IN TENNESSEE TO END OF JANUARY 1946

(Summarized from U.S.E.S. - State Department of Employment Security reports)

The employment trend in State best described as static. Among industry groups, fluctuation from November to January less than 0.1%. Estimated employment on January 15 totaled 985,000; in manufacturing, 236,017. At end of 1945, expansion of some 20,000 in manufacturing employment estimated for 1946, and clearing labor situation now tends to indicate some expansion before mid year. Construction employment, because of materials shortages, showed no marked gains in December and January. Several large construction programs planned and probably will not show much progress before May. On February 9, estimated total of 66,000 persons drawing unemployment compensation benefits or servicemen's allowances; this is 25% increase since January 1, wholly due to returning servicemen, and increase expected to continue during next few months because job opportunities not keeping pace with veterans' return.

The Situation By Areas

Shelby County: Total employment 1,641 less at end of January than in September 1945. Lay-offs from war industries at Memphis has again made trades and services main sources of employment. More than 1,000 workers forced into lay offs by strike-created materials shortages; the few steel strike effected plants now back at work. Construction employment currently 5,000 - an increase of nearly 1,000 since November - is not likely to expand before May because of material shortages. Use of surplus labor supply estimated at 9,400 (80% men - 65% veterans) is definite problem owing to exceedingly small demand, largely for unskilled workers in manufacturing. Of non-veteran group, about 50% unskilled and 35% semi-skilled.

Davidson County: Total employment in January estimated at 103,029, a decrease of slightly less than 1,000 since November. Over all employment situation is static, with no immediate relief in prospect. No new industries of any size slated for area and expansion of existing industries and plants being impeded by material shortages and other factors. Surplus of unemployed has increased very considerably, owing to sharp decrease in net demand, and is expected to increase even more in next few months. Estimated 8,000 unemployed actively seeking work; 5,000 are veterans. Current labor demand, about 1,000. Increasingly apparent that existing industry in area will not be adequate to absorb even a part of labor surplus.

Hamilton County: Total employment, estimated 71,983 in January; up about 585 since last November. About 40% of employment is in manufacturing; substantial gains in iron and steel employment have offset slight decreases in paper and chemicals. Anticipated employment expansion of about 1,800 within next two months will be largely in iron and steel industries. Total current labor supply, estimated at 7,300, has increased 25% since November and expected to increase. Of total, about one third is female; veterans, about 45%. Most employment openings are for unskilled labor for heavy industries, trainees and experienced textile workers.

Knox-Blount Counties: Total employment by the end of January was down to 83,320, off 1/5% from November. Manufacturing employment, at the first of February, stood at 28,754, off about 1%, due primarily to closure of the Rohm-Haas plant and to decrease in the iron and steel industries. Trade establishments, however, kept much of their holiday season employment gains. Estimated current labor supply of 8,067 (78% male) quantitatively exceeds demand by 3,200, the widest margin since CEW was begun in 1942. Qualitative factors, however, prevent current demands from being filled by present supply. Veterans, forming 43% of total supply, are commonly without work experience. Both they and displaced war workers, who form 49% of the total, are seeking jobs better than available. The textile industry, source of 36% of the demand, needs experienced workers, largely women.

SWEET POTATO DEHYDRATION AFFORDS NEW STOCK FEED POSSIBILITIES

Dehydrated sweet potatoes, rapidly being adopted in several Southern States as a substitute for corn in livestock feed, can now be produced on the farm in a small portable dehydrating unit perfected by the J. B. Beaird Company of Shreveport, La. These "Challenger" dehydrator units can, in a single operation, transform sweet potatoes taken directly from the ground into a dehydrated, ground feed at the rate of 733 pounds per hour. Power is derived either from electric current or farm tractor pulley, and the heating device is adaptable to butane or natural gas and diesel oil. According to the Louisiana Department of Commerce & Industry's "Newsletter" report, the "Challenger" unit is now in operation in five of the 14 Southern States.

Sweet potatoes, this report states, will yield up to 300 bushels per acre when properly cultivated, and their feed value is recognized as nearly equal to corn. Of the average 300-bushel yield, only about a third is marketable as table food. The remaining culls tend to rot soon after harvesting, and up to now, this has been a distinct handicap to their utilization as stock feed.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any of the industries listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

87. Women's Apparel: Manufacturer of women's apparel will purchase or lease building of approximately 20,000 sq. ft. in small or medium size town within 50 miles of one of the larger cities. Employment, 100 to 200, mostly women.

* * *

NOTES ON HOUSING SITUATION

New housing units, according to Construction Industry reports, currently are being started at the rate of only 20,000 per month throughout the entire country. The construction industry, however, is believed capable of handling 100,000 monthly, if materials were available.

This leads us to add that, realistically viewed, the expected housing "boom" may be over-ballyhooed. A recent survey made by Crossley, Inc., for Architectural Forum, showed that 37% of all U. S. families are interested in building or buying houses sometime in the future, but only 7.5% can really be classed as good prospects, after weeding out daydreamers and similar prospects doubtfully able to finance new homes. Only 1.5% were sure prospects, and if all of these decide to buy new houses, there will be 555,600 homes built, but past experience shows that ordinarily 60% to 75% of all prospects settle for older houses.

* * *

KINGSPORT MAKES READERS DIGEST

Kingsport, Tennessee's bustling industrial city in the northeast part of the State, again received national publicity for its famous city planning program through an article condensed in the March issue of Readers Digest. Written originally by Charles Stevenson, managing editor of the Washington News, for the National Municipal Review,

the article - entitled "A Town That Planned For Peace" - reviews the origin and history of this famous planned city and then shows how, when the war ended, Kingsport undertook the problem of not only supplying jobs to all its returning servicemen but to twice as many workers as the city had ever had in prewar days. The story is an excellent example of what can be accomplished by private enterprise, coupled with genuine community spirit and unity of action.

* * *

NEW INDUSTRY FOR HUNTINGDON

Mayor Gordon Wilder and a committee of Huntingdon, Tenn., business men in March, successfully completed negotiations with a well known garment manufacturer for location of a manufacturing plant in the town. The manufacturer, whose identity is not yet disclosed, was contacted through the Bentley System of Chicago, retained by Huntingdon to obtain a factory for the town.

Under the contract agreement, the town is financing a new 30,000 sq. ft. factory building and has agreed to construct a later addition of similar size. Some 300 persons will be employed initially. In a labor survey of the Huntingdon area for this new industry, over 3,000 persons were signed up as potential workers.

* * *

SALES AND PURCHASE OPPORTUNITIES

Oak Lumber: Box manufacturer in market for 10,000 bd. ft. good grade white or red oak lumber, 2" and 3" thicknesses.

Furniture: Manufacturers' representative, with 5 salesmen covering Tennessee and Kentucky, wants quality furniture lines of Tennessee manufacturers - complete coverage to buyers, on commission basis. Interested companies should address Rathburn Ray, P. O. Box 115, Athens, Tennessee.

Kitchen Appliances: Eastern firm now developing complete series of kitchen appliances - ranges, sinks, refrigerators, garbage disposal units, washing machines, and ironers - to be sold either individually or as packaged kitchen unit. All power units designed to operate on electricity, gas or oil. A West Coast plant will produce these units. Company wants a manufacturing plant somewhere east of Mississippi River both to produce entire line of units and to ship to two other plants for assembly.

Wood-Working Plant: Eastern interests want to purchase an operating wood-working plant of demonstrable value ranging from $500,000 to $1,500,000. Specifically required that mill be near source of timber supply.

Chemical, Food, and Other Plants: Responsible interests want to purchase for cash operating Tennessee plants, valued from $250,000 to over $1,000,000, that have established sales, including paint, chemical, and/or pharmaceutical plants, and food manufacturing plants. Also will purchase leading department stores that own real estate or have favorable lease.

Stoves, Heaters, and Furniture: Nationally known company operating over 30 department stores wants to make contacts with Tennessee manufacturers of stoves, heaters, and furniture for immediate shipments of merchandise and, also, for future purchasing arrangements.

Dish Cloths: Purchase of 15 to 50 gross of dish cloths desired for early shipment. Inquiry indicates need for knitted type of cloth.

* * *

INDUSTRIAL AND COMMERCIAL BUILDINGS

East Tennessee

Bristol: In downtown area available for immediate lease, 15,000 sq. ft. of floor space in top floor of 4-story fireproof steel-brick and concrete building; freight elevator service; 6" mill work floors capable of supporting heavy machinery; light on three sides. Building is 100 x 157 ft., built to rent by single floors, each of which suitable for an individual manufacturing unit. Needle industry now occupies first three floors. Prefer to lease fourth floor on 5- to 10-year basis; sprinkler protection and other requirements will be met.

Chattanooga: Modern steel, brick and concrete industrial plant, adaptable to numerous types of manufacture, totaling over 150,000 sq. ft. with 20-foot ceiling heights, available for purchase at $3.00 per sq. ft. Details furnished on request only to definitely interested parties.

Middle Tennessee

Columbia: Commercial building, 3-story, 70 x 42 ft., available for lease at $300 per month.

Tullahoma: Commercial space, 15,000 sq. ft., with residence quarters above.

Linden: Concrete block building, approximately 100 x 50 ft., all clear open space; concrete floors, metal swing-out type windows. One block south of main Memphis highway.

West Tennessee

Memphis: Industrial plant, consisting of three buildings totaling 32,520 sq. ft. of floor space - one building, 80 x 180 ft., steel construction, concrete floor, steel trussed roof, clear working space to 20 ft. height; one building, 60 x 256 ft., hollow cement block construction, concrete floor, wood trussed roof with clear working space to 16-ft. height, steel sash overhead doors; factory type lighting in each of buildings. Office building, 60 x 46 ft., hollow cement block construction, insulated, acoustical walls and ceiling - partitioned into general office (with built-in vault), 5 private offices, and lavatories. Also separate shower and toilet buildings for 800 white and colored workers. Equipped with light, gas, water, and sewage facilities.

Plant is in industrial section of city, 15 minutes from downtown area. Situated on 18-acre fenced tract; served by 10 car spur of Missouri Pacific Railroad. Buildings erected in 1942. Entire property available for purchase.

* * *

FERRO ENAMEL CORPORATION SELECTS NASHVILLE SITE

Announcement late last month that Ferro Enamel Corporation, Cleveland, Ohio, had selected a Nashville site for a new branch plant confirmed recent Wall Street Journal reports of this nationally known enamel manufacturer's planned Southward expansion.

The new $150,000 plant, according to the Nashville Chamber of Commerce announcement, will be built on a 5-acre tract in the Murfreesboro Road section immediately outside the city limits. Frit, used in porcelain enamels and paints used in enameling metals, will be produced at the new unit. Initially about 75 persons will be employed. Plans are said to have been completed and construction is expected to start at once.

Early last Fall, the Tennessee State Planning Commission's Industrial Development Division furnished the Ferro Enamel Corporation basic data on five Tennessee cities considered as locations in the company's initial investigations.

* * *

KIMBERLY-CLARK CORPORATION BUYS MEMPHIS PLANT

Kimberly-Clark Corporation, nationally known paper and cellulose products concern of Neenah, Wis., completed negotiations in mid-March for the purchase at Memphis of the Government-owned Fisher Aircraft plant. During the war, the 600,000 sq. ft. plant was used for the manufacture of B-25 bomber parts. The purchase price of $1,890,000 is reported confirmed by the War Assets Corporation of RFC, although final payments will be withheld until certain flood protection for the 88-acre plant site is completed by the Army Engineers.

A year will be required by Kimberly-Clark Corporation to convert the Memphis unit to the manufacture of creped wadding products, according to a Wall Street Journal report (3/15/46). Initial employment is expected to be about 700 persons, with eventual expansion to 1400.

Kimberly-Clark Corporation manufactures "Kleenex", "Kotex", and other sanitary specialties which are distributed through an affiliate, International Cellucotton Products Company. The latter company has been established in Memphis for a number of years.

* * *

BORG-WARNER NEGOTIATES FOR CHATTANOOGA PLANT

The Borg-Warner Corporation, Chicago manufacturer of a wide variety of mechanical equipment and parts, was reported by the Chattanooga Times in mid-March to be negotiating with RFC for the purchase of the large Air Products, Inc., properties in that city. The company, which operates some 30 divisions, is said to be planning expansion of its home appliances manufacture. If the present deal is completed, operations will begin in Chattanooga within 90 days after the Air Products plant is acquired. This would be Borg-Warner's southernmost operation.

* * *

CHARTERS AND BUILDING PERMITS SET RECORDS

The issuance of building permits in Davidson County, exclusive of Nashville, set an all-time record in February with 99 permits for homes costing an aggregate of $665,100.

In Chattanooga, building permits in February are reported to have been triple those issued in the same month of 1945.

The Secretary of State's office reports that the 164 charters issued in January exceeded the total issued in the same month any time in the past 11 years.

* * *

MCEWEN EXPANDS INDUSTRIALLY

The McEwen Manufacturing Co., mentioned here in January as planning a new factory building at McEwen, is reported to have started construction of the plant, which will cost $60,000. The structure, totaling 28,000 sq. ft. of floor space, will be of steel and concrete construction. The company, which is now manufacturing clothing at a temporary location in McEwen, will expand its employment from the present 75 workers to around 300, on completion of the new facility.

Construction by C. T. Lucas of a modern machine shop also has been started at McEwen, and the Mays Brothers are reported as preparing for erection of a planing mill in the near future.

* * *

WEST STATE CONSIDERED FOR $35-MILLION IN NEW INDUSTRIES

West Tennessee continues to occupy the "spotlight" position with respect to current industrial expansion and interest. In addition to the multi-million dollar purchase of the GM plant at Memphis by Kimberly-Clark and other new West Tennessee developments mentioned in this issue of the "Newsletter", field-surveys last month indicated at least 10 more industrial projects have that region under consideration. One of these projects, yet unannounced, appears definitely scheduled for location there; the other projects are still in various stages of investigation. Altogether the 10 projects represent a potential investment estimated at more than $35,000,000 and would give employment to 4,000 or more workers, of which probably 75% would be men. Significant of present decentralization trends, all of the projects have under consideration locations that are either in the smaller towns or wholly outside urban areas.

* * *

DO YOU KNOW THAT -

Tennessee has an above-average college enrollment of its youth. Dean Fred C. Smith of the University of Tennessee, in a recent compilation, shows that 82 out of every 10,000 Tennesseans are college students. This compares with a figure of 75 per 10,000 for the nation as a whole. Tennessee ranks 14th in this respect.

* * *

PRODUCTION LINE NEWS AND NOTES

Deadline Set For Sewage Permits

Municipalities and industrial plants have recently been notified by Dr. R. H. Hutchinson, State Health Commissioner and Chairman of the State Stream Pollution Control Board, that permits for continued dumpage of sewage or industrial waste in streams must be applied for by July 1st. Any plans for construction of new disposal works require application for a permit 30 days prior to discharge into a stream.

Tourist Advertising Pays Off

A single ad on Tennessee's tourists attractions in "Holiday", new Curtis Publishing Company travel magazine, has brought to the State Division of Information a total of more than 6,500 requests for the Division's new illustrated brochure mentioned here last month. Mailings on these requests have been limited to out-of-state inquiries.

Covington Organizes For Industry

The Business Men's Club of Covington, in mid-March, made a labor survey preparatory to negotiations with two different industries considering location of new plants in the town. Either company will need between 40,000 and 50,000 sq. ft. of plant space and will employ around 300 persons. Members of the State Planning Commission's Industrial Division conferred with the local club prior to initiation of the labor survey.

An advertising brochure on the industrial advantages of Covington has been prepared by the Business Men's Club and will soon be ready for distribution to industrial prospects.

* * *

University of North Carolina's Institute for Research and Social Science is publishing this year a series of 13 monographs analyzing the South's resources and economic development possibilities.

West Tennessee Firm Plans Quick Freeze Innovation

The Humboldt Canning Company is reported constructing a mobile quick-freeze unit that will follow the fruit belt from the early Louisiana strawberry crop progressively northward into the Humboldt strawberry area, the Paducah, Ky., strawberry area, the Michigan cherry area, and finally back into West Tennessee for the fall lime bean crop. The projected unit is reported by Houston Herndon, manager of the company, to be capable of processing and freezing 50,000 lbs. daily - equivalent to 2,000 crates of strawberries. The company also will cold-pack a part of the local strawberry crop.

Martin Seeks Lamp Manufacturing Concern

The Young Men's Business Club of Martin was reported, in early March, to be negotiating with a Chicago lamp concern for location in that town of a 50,000 sq. ft. manufacturing unit, employing 200 to 300 workers.

Members of the State Planning Commission recently have conferred with the mayor, members of the YMB Club, and other civic-minded citizens of Martin on their local planning program.

Standard Oil Company Features State Industry

"Tennessee's Tale of Industrial Triumph" is the title of an excellently illustrated feature article on the State published in the March issue of "Esso Oilways", Standard Oil Company trade magazine. Tennessee's extensive and varied industrial economy is briefly, but interestingly presented with swift glimpses given of many notable figures from John Sevier to Cordell Hull who have contributed to the triumphs of the Volunteer State. Mentioned are numerous of Tennessee's "famous-names" industries du Pont, Eastman, Aluminum Company of America, Bemis Bag, Borden Mills, Mead Corp., Monsanto Chemical, Victor Chemical, Armour, General Shoe, and others.

Bristol Plans Industrial Site Map

The Bristol Chamber of Commerce, through its site and industrial committees, is preparing a map of all potential industrial sites in that city. The map will be compiled in conformity with the city's zoning regulations.

Eugene Worrell, acting secretary of the Chamber of Commerce, reports that the map will make the site information readily available to industrialists who almost daily contact the local office on plant locations in the city.

Trousdale County Votes Industrial Funds

A $35,000 bond issue was voted unanimously in late February by the Trousdale County Court for use in constructing a factory building for a hosiery company, according to a Nashville Tennessean report. The court's action culminates efforts by the Hartsville Lions Club to obtain an industry for that town.

Levee Project Approved

The War Department is reported to have approved the Mississippi River Commission's report on the flood protection project covering the West Tennessee area between the head of Reelfoot Lake and a point near the mouth of old Middle Fork of the Forked Deer River, which includes improvements in Lake, Dyer and Lauderdale counties. The project will extend in Lauderdale to just north of Ashport, according to local reports.

Humboldt Plans Strawberry Festival

The Ninth Annual West Tennessee Strawberry Festival will be held at Humboldt, May 9-10. Parades of floats, a beauty revue, cattle and horse shows, and the "Queen's Ball" feature the program. Aubrey H. Williams is general executive chairman.

Veterans Employment Guide Available to Employers

The Veterans Employment Service of the U. S. Employment Service has released an Employers Guide for the Development of a Veterans Employment Program. The guide consists of a series of 12 pamphlets designed to assist all industry in formulating a practical workable veterans employment program. The guide will be furnished free on request to your local U.S.E.S. office.

University Sponsors Air Traffic Study

The University of Tennessee's Airport Development Laboratory is beginning an air traffic survey, under the direction of Dr. William Way, Jr., to determine the potential growth of such traffic within the next 10 years. The survey has been started at Chattanooga, and other studies will include the Tri-City area of Johnson City, Kingsport, and Bristol, Dyersburg, Jackson, and Columbia.

Gates Plans Tomato Market

Business men and farmers in the Gates, Tenn., area recently met with officials of the Illinois Central Railroad to discuss the possibilities of establishing a green wrap tomato market at that place.

State Bank Assets at Record Levels

State Superintendent of Banks H. B. Clarke reports that the resources of Tennessee's 223 state banks and 33 branches, at the close of business on December 31, totaled over 612 millions in assets, up more than $115,500,000 over the same date in 1944. Deposits jumped from $467,370,515 to over $580,000,000.

AID ON SMALL BUSINESS VENTURES

Young veterans interested in entering the advertising field may find helpful Mark O. Dea's Advertising As A Career, available at 50¢ per copy from Printers' Ink Publishing Co., Inc., 205 E. 42d St., New York City 17.

Univendor Vends Them All is a new booklet on the opportunities in the vending machine field, available from Stoner Manufacturing Corp., Aurora, Ill.

The necessary investment for various kinds of business is covered in Investment Per Job, available free from the U. S. Chamber of Commerce, Washington 6, D. C.

Hart, Schaffner & Marx, 36 S. Franklin St., Chicago, Ill., is distributing a booklet on Opportunity In The Men's Wear Business to aid ex-service men in establishing that type of business.

Going Into Business For Yourself, by O. Fred Rost (McGraw-Hill Book Co., New York City 18) starts from scratch in aiding in the selection of the business best suited to an individual's experience and guides him step by step through the problems of financing, legal aspects, choice of location, insurance, etc. The cost is $3.00 per copy.

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Ground was broken late in February at Linden for a new plant building to be occupied on completion by the Linden Apparel Corporation, which will manufacture children's playsuits. The plant building will be 140 x 250 ft. About 200 persons will be employed initially.

- - - - -

Permit for erection of an $18,000 ink factory in Nashville has been granted to C. E. Bowers.

- - - - -

Caswell-Runyan Division of International Detrola Corporation at its Smyrna, Tenn., lumber mill expected completion about April 1 of two new plant facilities for kiln drying of cedar lumber and for building of panels used in cedar chests. Some 30 new workers are expected to be added to the local payroll, according to a reported statement of Adolph H. Schenkel, general manager of the division.

- - - - -

Burks-Hollman Co., Memphis, has been granted a State charter to manufacture and distribute paint; initial capital, $50,000.

- - - - -

Dorothy Bedding Co., Memphis, has been granted a State charter to manufacture mattresses; initial capital, $1,000.

- - - - -

The Cumberland Amusement Company plans to build a new theater in West Sparta and to remodel the Oldham Theater in downtown Sparta, as soon as building materials are available. The new West Sparta picture house will have about 600-seat capacity; the Oldham Theater will be enlarged to seat about 1200 or double present capacity.

- - - - -

A new 1,000-locker cold storage and locker plant is planned for early construction at Greeneville.

- - - - -

The J. C. Larue Canning Company at Hohenwald is installing several carloads of new equipment to permit canning of turnip greens during the coming season. This is a new crop for the area; the planting goal this year is 200 acres, with 500 acres ultimately.

- - - - -

The United States Engineers are preparing for submission to Congress for federal aid a project to dam the "Tennessee Chute" of the Mississippi River above Memphis, to develop harbor facilities along the entire 8 miles of shoreline between the city and dam. Some 9,000 acres of industrial sites and greater water recreational facilities are other features envisioned by the project, the cost of which is estimated at $18,000,000.

- - - - -

The Brownsville Development Corporation on March 20 let contract to the Neese Construction Co., Memphis, for a 30,000 sq. ft. factory building, to cost $80,000. It will be a one-story structure of monolithic concrete construction. As announced in the January Newsletter, Wells-Lamont Corporation, Chicago glove manufacturer, will occupy the building. Total cost of the entire project is placed at $140,000, of which the Chicago concern is financing $60,000.

- - - - -

Specialty Fabricators, Inc. of Nashville, a newly established manufacturer of wood and metal products, anticipates reaching quantity production about April 1 on porcelain-top wood kitchen tables. Additional items on which production will start later include a folding type of poker table, tubular chrome steel and wooden dinette sets, and kitchen cabinets with porcelain-top work table. Sales are to be handled through wholesale jobbers, and the company advises that their output is not yet entirely committed (Prospective buyers, please form line to the right!)..

- - - - -

Southern Athletic Company, Knoxville, recently was granted a building permit to make a two-story steel frame concrete-block addition to its local plant; estimated cost, $50,000.

- - - - -

Tennessee Coal & Iron Company has been granted a building permit by the City of Memphis to erect a $250,000 warehouse.

- - - - -

Hermitage Feed Mills, Nashville, has been granted a permit to erect 16 additional grain and feed storage tanks. New handling and milling equipment will also be installed in the mills. Estimated cost of expansion is reported at $100,000.

- - - - -

Production of brick was started late in February at the new plant of the Sparta Brick & Tile Company, Sparta. R. D. Wilson, owner and manager of the plant, anticipates reaching a 12,000-brick daily output in the near future.

- - - - -

L. T. Lewis & Sons' brick plant at Nashville, closed during the war years, was reported last month to be planning early resumption of operations.

- - - -

Tennessee-Kentucky Broadcasting Company has been issued a State charter to operate a radio broadcasting station at Paris, Tenn. Incorporators are: W. P. Williams, W. B. Williams, and James C. Williams.

- - - -

Western Textile Products Company, Memphis, has let a $39,000 contract for a new one story plant and office building totaling 12,000 sq. ft. of floor space. The company manufactures cotton apparel fabrics.

- - - - -

Magnet Mills, Inc., Clinton, has announced plans for installing air-conditioning in the knitting department this Spring; new knitting machines will be added during the next few years.

- - - - -

Brookside Mills of Knoxville, one of the largest textile plants in Tennessee, was sold March 18 to unidentified interests at a reported price of about $3,000,000. The new owners, said by Southern Textile News to be a large midwest concern, expect to remodel the plant and expand operations to permit complete manufacture of cotton from bale to finished women's dresses, including weaving, dyeing, printing, cutting, and sewing. The mill now has 52,120 spindles and 998 looms. The new operations will be under the name of Brookside Mills, Inc.

- - - - -

The City of Adamsville is reported to have let a contract for a $60,000 factory building.

- - - - -

Carnation Milk Company's milk receiving station at Bell Buckle was razed by fire early in March. New machinery, stored in the station preparatory to remodeling, also was destroyed. Rebuilding of the station is expected as soon as more new equipment can be obtained.

E. L. Bruce Co. of Memphis -- world's largest hardwood flooring producer -- is reported by the Wall Street Journal to be expanding its sawmill division in order to decrease dependence on outside raw material sources. The new furniture division of the Memphis plant is said to be currently producing at a $100,000 monthly rate and will expand as lumber supplies ease. The feasibility of renewing operations in the prefabricated housing field, in which the company was active during the war, also is being studied.

A $100,000 quick-freeze plant, employing 100 persons, has been projected for location in Humboldt in the near future, to be financed by a Gibson, Tenn., firm, plus some local capital. The plant is planned for essentially continuous operation throughout the growing season and will freeze strawberries, lima beans, apples, and other crops as they mature.

A manufacturing plant, employing 150, is planned for early construction at Petersburg, according to announcement last month by Mayor R. Kenneth Morgan. The plant building will have 20,000 sq. ft. of floor space. The operating company has not been identified.

A $200,000 "community center", including furniture store, movie theater, and drug store, is being planned by Hodges Furniture Company of Chattanooga for development in a suburban area of that city.

A similar shopping center of five brick store buildings, including two groceries, drug store, and bakery, are being planned for a location in Memphis, to be built by James N. Harsh of that city.

Aerometals Corporation, Bristol, has received large orders for metal products, sufficient to keep the plant running at capacity for eight months. New financial interests have entered the business, according to local reports, and plans are being made to expand operations to include metal toys, household articles, stainless steel tanks, and other stainless steel and aluminum products. Carl A. Jones, president of the Johnson City Press-Chronicle, has joined Aerometals Corporation as vice-president.

The Standard Iron & Steel Works of Knoxville, in mid-March, began removal of rails from the 18.26 miles of N. C. & St. L. Railway trackage abandoned last December between Columbia and Lewisburg.

A sausage manufacturing plant is being built by E. T. Brundige on his farm west of Gardner, on Highway 22, in Weakley County. The plant, expected to be at full capacity operation by April 1, will have a daily output of 1,000 pounds of sacked sausage. Refrigeration capacity is for 25 hogs. Daily deliveries in the area will be made by truck.

The Knoxville Fertilizer Company is reported planning to erect a $400,000 plant at Bristol.

The Consumers Packing Co., Lancaster, Penna., has leased for a 5-year period the Okeena Canning Company's plant at Dyersburg, according to announcement made February 28 by Hugh Sawyer, executive secretary of the local Chamber of Commerce. Both canning and quick-freezing of lima beans, strawberries, spinach, and other crops will be done by the new operators, who are reported to have an established reputation as producers of quality processed foods.

- - - - -

Construction of a new factory unit has been started by "Lindseys", local furniture manufacturers of Lawrenceburg. The company, owned by Ed, Oscar, and W. H. Lindsey of that city, handled several large government contracts for office furniture during the war. Current expansion will include 11,000 sq. ft. of new plant space, plus drying kilns, storage warehouses, and other smaller structures. The new operations are expected to ultimately employ 150 men.

- - - - -

Chickasaw Wood Products Co., Inc., Memphis manufacturers of barrels, tables, boxes, and other wood items, is reported in the Wall Street Journal to have been acquired by National Distillers Products Corp., in conjunction with the Merchants' Distilling Corp., of Terre Haute, Ind. The business will be operated as the Chickasaw Wood Products Division of National Distillers Products Corporation.

- - - - -

Five new streamlined trains will soon be placed in operation on the L. & N. and N. C. & St. L. lines between Nashville and Memphis, St. Louis, Atlanta, New Orleans, and Cincinnati. Regular service of the new de luxe trains is scheduled for summer or early fall.

Request For Continuance Of "Newsletter"

With this issue, the Newsletter celebrates its first anniversary. In its first year, the Newsletter which currently has a circulation of around 1400, has obtained extremely gratifying results. Not only has its primary purpose as a medium of contact between this Division and the various Tennessee communities planning for industrial expansion been achieved but, also, the Newsletter has proved informative to industries both within and outside of Tennessee, as indicated by numerous commendatory letters received from various company officials.

It is desirable that our mailing list be kept up-to-date and contain only the names of those most interested in Industrial Tennessee. Consequently, we are now starting revision of our mailing list and ask that you fill out and return the following slip, if you wish to continue receiving the Newsletter.

- -

I wish to continue receiving your "Industrial Planning Newsletter" for another year

'Should Be a Warning'

Reporter Presents a Picture Of Memphis Under Crump

By Agnes E. Meyer

MEMPHIS, Tennessee, should be a warning to the whole country. The city is a perfect example of the ease with which Americans with a philosophy of efficiency and materialism can succumb to fascism and like it. The majority of the citizens of Memphis lick the boots of their notorious tyrant, Mr. E. H. Crump, not because they have to. They lick his boots because it pays.

Like all fascist rulers, Crump has the support and admiration of big business. "We do not approve of his methods but we are enthusiastic about his results," was the way one businessman put it. "Our city is the most efficient in the whole U. S. A. We have a nationally famous health department and safety program, good schools, sanitation, recreation facilities and fire department. With all these advantages we have low insurance and tax rates. So why worry how it is done?"

"But you are all a lot of scared rabbits. You don't dare call your souls your own. Not a white man in this city, however prominent, will let his name be quoted when he indulges in the mildest criticism of Mr. Crump," I exclaimed impatiently.

"Yes, we admit that," was the calm rejoinder. "But other cities who run their own show and boast of their democracy aren't getting as much for their money. If Crump wants to improve the health department, he ransacks the country to get the best man. His people are just no punks. We like 'em."

"But why are you all so fearful? What can happen to you if you speak up?" I asked.

"Oh, if a businessman rebels, he can get into trouble about his taxes, or he is made to understand that he'd better move to some other city. One clergyman who made some mild criticism found the next day that his church wasn't fireproof. If these methods don't work, there may be recourse to the police department, Mr. Crump's Gestapo. The newspaper reports of its lawlessness are bad enough. The cases of physical assault on respectable citizens

breathe—the lack of opportunity for democratic self-development through cooperative action—is more destructive to growth of mind and spirit than can be compensated for by the finest school facilities.

Shares Hitler's Delight In Art of Humiliation

Mr. Crump, for example, shares the morbid delight which Hitler took in a petty and sadistic humiliation of his most prominent adherents. He has the petty habit, when he wishes to demonstrate his political power to other people, of calling up the dignified Mayor of Memphis, Mr. Walter Chandler, and saying to him: "Walter, you can sing 'The Star-Spangled Banner,' can't you?" Whereupon Mayor Chandler is obliged to say "Yes." "Well, I have so and so in the office. I would like you to sing it for him." He then hands the telephone to whatever guest happens to be in the office and Mr. Chandler has to do his best to render our national anthem at Mr. Crump's command. Or, when he gets his other distinguished protege, Senator McKellar, into his office with a group of political minions, he will turn to the boys and say: "If McKellar doesn't deliver the goods, we'll send somebody else to Washington" and the honorable senatorial representative from Tennessee has to take it on the chin.

I had not gone about my usual investigations in Memphis for a day before I felt creeping over me a sensation I had experienced only once before—a feeling of the utter destruction of all individual aspiration which I felt in the Germany of Hitler in 1939. The resemblance of Memphis to Nazism goes far beyond mere feeling. The citizens here talk in exactly the same words that fell from the lips of the prostrate German people. They have acquired the same "holier than thou" attitude toward decadent democracy which characterized the minions of Hitlerism. Even the "little man" who excused his

every customer that went in or out, ostensibly for narcotics. The druggist was speedily run out of town.

"At present the great problem is our veterans. Some 12,000 out of 18,000 are back. They can get work digging ditches, but every attempt to open, say an electrical business, or to get skilled positions is thwarted. There are all kinds of opportunities for white veterans, none for the Negroes. There is not enough vocational training. At each of the two Negro high schools, there is room for a hundred students. But the same faculty that has already taught from 9 a. m. to 3 p. m., has to carry on from 3 p. m. until 9 p. m. About 100 more men are getting training on the job. The Veterans' Administration has too small a staff and can't do anything about the situation anyway. In addition, the veterans are streaming in from Mississippi and Arkansas because they have no outlets in their own States. Negro veterans with any skills are offered menial jobs or told to go North."

One brave Negro wanted to be quoted as saying: "The Negroes of Memphis to a man—and a woman—hate John J. Guinozzo, head of the Negro USES, because he has racial attitudes that unfit him for this post."

I know better after two days in Memphis than to offer this man up for sacrifice by naming him. But I looked up Mr. Guinozzo and found his efficiency is just as top-notch as that of most other Crump appointments. His placement of Negro workers was 1274 for March of whom 480 were veterans whereas the white USES, which is also well-run, had placed only 806 people. To be sure the jobs for Negroes were all in the lowest brackets.

THE significance of the Negro rebellion in Memphis is twofold. There just aren't many skilled jobs for the Negro in the South But in Memphis with all its efficiency, the Negro is more desperate than elsewhere because he is never allowed to par-

man put it. Our city is the most efficient in the whole U. S. A. We have a nationally famous health department and safety program, good schools, sanitation, recreation facilities and fire department. With all these advantages we have low insurance and tax rates. So why worry how it is done?"

"But you are all a lot of scared rabbits. You don't dare call your souls your own. Not a white man in this city, however prominent, will let his name be quoted when he indulges in the mildest criticism of Mr. Crump," I exclaimed impatiently.

"Yes, we admit that," was the calm rejoinder. "But other cities who run their own show and boast of their democracy aren't getting as much for their money. If Crump wants to improve the health department, he ransacks the country to get the best man. His people are just no punks. We like 'em."

"But why are you all so fearful? What can happen to you if you speak up?" I asked.

"Oh, if a businessman rebels, he can get into trouble about his taxes, or he is made to understand that he'd better move to some other city. One clergyman who made some mild criticism found the next day that his church wasn't fireproof. If these methods don't work, there may be recourse to the police department, Mr. Crump's Gestapo. The newspaper reports of its lawlessness are bad enough. The cases of physical assault on respectable citizens that never get into the press are still more numerous. The city is honeycombed with Crump's spies. They know everything that goes on. They are in every civic organization, the service clubs, the women's organizations, even the Bible classes." My informant concluded: "We are careful what we say publicly or privately because we never know who's around. Mr. Crump's first principle is divide and rule."

The only person in Memphis who fights back openly is Edward J. Meeman, editor of the Memphis Press-Scimitar. But he gets no support. Said he in a speech, "How often have they (the citizens) left an editor standing alone for a principle which privately they would agree was right—but not publicly. How many businessmen have punished the independent press not realizing that they were hurting their best friends who alone stood between them and an oppressive government."

THE WHOLE WORLD knows how Mr. Crump over 30-odd years has slowly maneuvered his way to power in this poll-tax State. No matter what the State majority may be against the machine, Shelby County, in which Memphis is situated, always votes last. Mr. Crump commands enough votes to counteract any unfortunate State trends. Ordinarily a local political situation of this sort would not interest me. We have other political machines that operate in the same way. But the subtle rule of Mr. Crump is more powerful and more pervasive than any of them. In Memphis, if you ask a question about the weather, you are apt to hear that the sun will shine tomorrow, if Crump is for it, but please don't quote me. I am horrified by Crump's political machine not for political reasons but because its corruption of human character is a perfect example of what happens to people when they bow down voluntarily or involuntarily to a fascist dictatorship.

"I'd be for Crump if only because my children can go to a good school," said one father who was giving me an argument about the advantages of subserviency to the machine. Such parents are selling their children's souls down the river. Any educational system reflects the moral values of the local community and the home. The lesson of tacit subjection to tyranny which the Memphis children absorb from the very air they

of calling up the dignified Mayor of Memphis, Mr. Walter Chandler, and saying to him: "Walter, you can sing 'The Star-Spangled Banner,' can't you?" Whereupon Mayor Chandler is obliged to say "Yes." "Well, I have so and so in the office. I would like you to sing it for him." He then hands the telephone to whatever guest happens to be in the office and Mr. Chandler has to do his best to render our national anthem at Mr. Crump's command. Or, when he gets his other distinguished protege, Senator McKellar, into his office with a group of political minions, he will turn to the boys and say: "If McKellar doesn't deliver the goods, we'll send somebody else to Washington" and the honorable senatorial representative from Tennessee has to take it on the chin.

I had not gone about my usual investigations in Memphis for a day before I felt creeping over me a sensation I had experienced only once before—a feeling of the utter destruction of all individual aspiration which I felt in the Germany of Hitler in 1939. The resemblance of Memphis to Nazism goes far beyond mere feeling. The citizens here talk in exactly the same words that fell from the lips of the prostrate German people. They have acquired the same "holier than thou" attitude toward decadent democracy which characterized the minions of Hitlerism. Even the "little man" who excused his acceptance of Hitler by saying that he couldn't do anything to stop it, is well represented in Memphis.

THE WAY in which this American fascism robs life of every vestige of dignity can best be illustrated by its impact on the groups that are its most helpless victims.

Very secretly I was invited to a meeting of some 25 Negro leaders, clergymen, teachers, veterans, college professors, businessmen and social workers. Despair, indignation, anger sizzled in these people, but sheer terror was the permeating, dominating note. For the Negro in Memphis is afraid not only for his economic and political existence. He has ample reason to fear for his personal safety. The Negro in Memphis plays the rôle of the Jew in Germany. The white man is forced into constant opposition to the black man by the old bugaboo that the Negro is a menace because he is fighting for "social equality."

"Crump is almost as efficient on our behalf as he is for the white man," said one Negro. "Our school buildings look good from the outside. There are several Negro housing projects. We even have swimming pools. But we live in a moral, social and political vacuum surrounded by an impenetrable wall. On one occasion a white clergyman, the Rev. S. E. Howie, chairman of the Inter-Racial Cooperation Committee, tried to intervene in a particularly ruthless case of oppression that was being investigated by the Federal Department of Justice. He received a letter from Chief of Police Joseph P. Doyle, which the grapevine told us was written by Crump himself. Of the Negro newspaper editors on the committee it said: 'They are not going to carry on as if they lived in Chicago, Pittsburgh and Philadelphia. For after all this is a white man's country. Lawlessness of this city is our problem day and night and I suggest you leave it to us.' That was the end of inter-racial cooperation. There is still an inter-racial committee of the Council of Churches, but it is all white."

"If the white clergy try to help us," said a Negro clergyman, "they are told firmly to keep out of politics.

"The case at issue in this letter was a Negro druggist who was trying to work openly for Willkie. Mr. Crump put policemen in front of his store who searched

hundred students. But the same faculty that has already taught from 9 a. m. to 3 p. m., has to carry on from 3 p. m. until 9 p. m. About 100 more men are getting training on the job. The Veterans' Administration has too small a staff and can't do anything about the situation anyway. In addition, the veterans are streaming in from Mississippi and Arkansas because they have no outlets in their own States. Negro veterans with any skills are offered menial jobs or told to go North."

One brave Negro wanted to be quoted as saying: "The Negroes of Memphis to a man—and a woman—hate John J. Guinozzo, head of the Negro USES, because he has racial attitudes that unfit him for this post."

I know better after two days in Memphis than to offer this man up for sacrifice by naming him. But I looked up Mr. Guinozzo and found his efficiency is just as top-notch as that of most other Crump appointments. His placement of Negro workers was 1274 for March of whom 480 were veterans whereas the white USES, which is also well-run, had placed only 806 people. To be sure the jobs for Negroes were all in the lowest brackets.

THE significance of the Negro rebellion in Memphis is twofold. There just aren't many skilled jobs for the Negro in the South But in Memphis with all its efficiency, the Negro is more desperate than elsewhere because he is never allowed to participate in public activities even on his own behalf. The Negroes center their hate on Mr. Guinozzo because like Mr. Crump he rules with an iron hand. He has been known to have Negroes tossed into the street for not removing their hats the moment they enter the door. In spite of his services to the unskilled, he is the symbol of the Negro's spiritual, moral and political isolation, his frustration and his utter defenselessness. They want a new head for the USES and a complete Negro staff of experienced workers. Yet such a staff would be up against the same problem—that the Crump machine is determined to "keep the Negro in his place."

I asked this Negro meeting whether there was any possibility of trouble between the Negro and the white population such as occurred in Columbia, Tenn., last February. "No, we are much too cowed to fight," they admitted dejectedly. "If the white man in this city is too afraid to open his mouth, what can we do? Besides a lot of our own people have been bought by Crump. Even some of our leading businessmen who have the ear of the machine, betray their own race. He has his spies among us as among the white people. For all we know there may be one in the room this very minute. We're licked and we know it."

The only glimmer of hope which the Negro has for democratic self-expression in Memphis is through the CIO. In that organization the Negro can take part in the management of his union. He is more satisfied than the educated Negro because he has a sense of participation not only in his own destiny but in the CIO opposition to the Crump machine.

There are other signs of coming freedom in this boss-ridden city. A group of young veterans has as its chief objective the dethronement of Mr. Crump. A number of well-to-do businessmen whom the war brought to Memphis also seem to resist the Fascist indoctrination. Mr. Crump, as is his custom, called up the wife of one of these newcomers late one election afternoon and reminded her that she had not gone to the polls. The woman dusted him off in firm language. She wanted to know what he meant by interfering with her private affairs. After 30 years of unchallenged despotism the 70-year-old boss must have felt like Hitler when the bomb went off at his feet.

MANAGEMENT SERVICE - SALES PROMOTION CORPORATIONS

By the Editor

Tennessee Associated Industries, Inc., outlined below, is an advisory management-sales promotion organization for the development and expansion of small industries in Tennessee. A full discussion of the idea will appear in the June issue of The Tennessee Planner, bi-monthly publication of this Commission. Those interested may obtain that issue of the "Planner" on request to the "Newsletter" editor.

Tennessee, like the remainder of the South, has experienced during the war period a considerable expansion in new small manufacturing plants. A number are war-born industries, now converted to civilian production. Some of these, as well as numerous longer-established small plants, are producing quality products, and their current sales are far above levels that may be reasonably expected in the future normal buyer's market. In fact, when production catches up with demand nationally, these small plants will be faced with the critical problem of either reducing production to balance with a relatively limited local market or attempting to compete over a wider market in order to maintain present production levels. Frankly analysed, numerous plants in this situation are making products that have no nationally established reputation and, consequently, will have difficulty in breaking into distant markets. For some, under normal conditions, inefficient operations will limit sales to nearby markets where the savings in distribution costs will be the chief competitive advantage. Only the fittest will survive!

The small business enterprise has always operated in the face of a high mortality rate, and, today, with future prospects deceptively bright, many small manufacturers are being lulled into a false sense of security. For nearly five years, the small manufacturer has been coasting. During the war, he sold all he could produce, with the Government as the major buyer. This required no real production or sales ability, and even today he cannot resist the expediency of cashing in on the easy lush markets of the present seller's market. Yet, many small manufacturers, especially those without prewar experience, may soon find themselves in a very precarious position because of their lack of knowledge of the techniques of production and marketing, essential to meet the mounting competition in a shrinking market.

Broadly speaking, lack of management and lack of capital are the basic reasons for the stagnation and ultimate failure of most small manufacturing plants. One is corollary to the other. Lack of management is simply lack of experience in some of the essential abilities for successful operation, yet it is obvious that, given sufficient funds, any business can hire the managerial talents necessary to insure its success.

In Tennessee, there is an apparent need for some specific action that will encourage the development and expansion of small industries and, also, afford investment outlets for the abundant financial resources of this region. Recent successes in the industrial field of cooperative efforts by related industries leads to the proposal of a similar plan for Tennessee industries. Basically the idea stems from the recognized fact that

small industries, although individually incapable of maintaining specialized management services equal to those of large corporations, can collectively support an organization that will give to each in a group of related industries the benefits of such services. Outstanding example of this type of organization is Dresser Industries, Inc., of Cleveland, Ohio, in which 13 individual companies have joined together in common ownership for the coordinated manufacture and marketing of a series of related products. Available to each company in the group, through the parent company, are the services of a staff of experts in manufacturing, engineering, accounting, marketing, labor and public relations, personnel selection, and other managerial and technical problems. Through this type of over-all planning and pooling of resources and managerial talent, plus diversification of products and markets, companies of the "Dresser" group have the benefits of a large corporation's financial strength and broader engineering and research facilities and, individually, have obtained greater productiveness and protection against seasonal and cyclical fluctuations.

Organization in Tennessee of a group of related small manufacturing concerns along the lines of "Dresser Industries" is believed feasible and susceptible of profitable development. Two methods of operations would be open to such organization, for which the name "Tennessee Associated Industries, Inc." is suggested. The first of these would be on the basis of a consultant management-sales service, supported mainly by annual retaining fees of the affiliated companies. Initially, a small group of business men and technically trained persons whose combined experiences are applicable to the varied problems of industrial administration, production, and marketing could start this kind of industrial management-engineering service. Included in the staff should be men experienced in plant lay-out, product design, production, and other engineering work; in personnel selection and training, public and labor relations, cost accounting, corporation law, taxation, and other administrative and financial fields; and in purchasing, advertising, distribution, and marketing. In addition, arrangements should be made with aggressive manufacturers agents throughout the country for comprehensive sales coverage of all major market areas.

Tennessee Associated Industries, Inc., for its part, would agree to extend to each of its affiliated companies a definite annual service, consisting of supervisory or technical assistance on all problems of management, plus nationwide promotion of each company's products through the organization's sales set-up and advertising program. In return, all affiliated companies would be required to manufacture in accordance with TAI standards of production and quality and to agree to payment of scaled commissions on all sales effected through the TAI organization.

The second plan under which Tennessee Associated Industries, Inc. could be operated is as a development corporation capable of supplying both financial backing and complete advisory management service, plus sales promotion, to a group of related, non-competitive industries. In such group, for example, might be manufacturing plants to produce a complete line of household furnishings, including furniture, electrical appliances, textile (rugs and draperies), and similar items.

In acquiring initial interest in two or three suitable manufacturing plants, Tennessee Associated Industries, Inc. could finance the investment through sale of the corporation's stock, either to members of the firm or through public offering. Neither outright purchase nor even controlling interest in any member company would be sought, but rather TAI would extend capital financing in exchange for preferred stock of the member company, plus a minority common stock interest. Operating management would remain with the member company, with TAI extending its services purely on an advisory basis. Only on failure by the member company to meet preferred dividend requirements would TAI participate in active management of the member company. Thus, the latter would retain in practical

(concluded on last page)

NEW IMPLEMENT PLANT FOR ATHENS

The latest addition to Athen's industries is **Taylor Implement Manufacturing Co.** which will produce various types of tractor-drawn farm implements. The company, locally owned, is constructing a new steel and concrete plant about a mile south of Athens on the Southern Railway. A temporary office and pattern shop opposite the building site currently is being used by the company.

J. H. Taylor of Athens, president of the new organization, is well known in the farm implement business, being the originator of the one-wheel direct-connected plow. His theories and designs also have been influential in bringing prominence to the disc implement industry. Other local businessmen associated in the company are Bacon Walthall, William Hairrell, and A. C. Owen, Jr., all of whom have had experience either in the steel business or in farm implement manufacture.

BANKING STUDY REVEALS SIGNIFICANT ECONOMIC DATA

In a report recently issued by Homer B. Clarke, State Superintendent of Banks, a county-by-county breakdown on the combined resources and liabilities of both State and National banks reveals numerous economically significant facts.

At the end of business on Dec. 31, 1945, Tennessee's 293 banks are shown as having total resources of $2,084,596,816, of which over one-half represents deposits by individuals, partnerships, and corporations.

The average per capita deposit for the State is $439.28, the figure including only deposits by individuals and business concerns. On the same basis, the State's two most populous counties, Shelby and Davidson, respectively showed per capita averages of $755.96 and $736.03. In those counties, with their metropolitan areas of Memphis and Nashville, such private monetary "wealth" is not especially surprising. But, it is revealing to learn that Trousdale County, ranking 91st in population, has a per capita "wealth" of $541.64 or 5th highest average in the entire State.

Van Buren County, with a per capita average of only $54.04, ranks 94th in value of deposits or lowest of the State's 95 counties. Union County does not have a single bank.

* * *

NEW LINGERIE PLANT FOR SOMERVILLE

Weil-Kalter Manufacturing Company of St. Louis, nationally known producer of "Artemis" brand lingerie, in early May completed negotiations for the location of a new plant at Somerville. Under the leadership of the local Lions Club, the town in December raised a fund of $40,000 and this will be applied toward construction of the new plant, with the company financing the remainder of the cost. Rentals on the plant will be sufficient to amortize the local investment over a 15-year lease period, according to the Fayette Falcon.

The plant building, on which construction will start as soon as possible, will be two-story, 112 x 148 feet, housing both cutting and sewing operations. Initial production will be women's slips, with later manufacture of other lines of similar apparel. Peak employment will be about 275 persons, mainly women.

Mayor I. P. Yancey and W. B. Wilkinson, local banker and president of the Lions Club, were the principal representatives of the community in negotiating the deal.

* * *

CPA APPROVES LARGE VOLUME OF INDUSTRIAL PROJECTS

As indicated in last month's Newsletter, the policy adopted by the Civilian Production Administration on new industrial construction is as generous as possible and is working out, thus far, with minimum interference to such construction in this State. To date,

most applications for new industrial plants or expansions have been approved by the CPA District Office at Memphis, which serves all of Tennessee and small areas of northern Georgia, Alabama, and Mississippi. The aggregate total value of authorized projects up to mid-May amounted to $20,144,605.26.

Mr. L. H. Dille, Manager of the District Office at Memphis, has indicated to the "Newsletter" editor that particular consideration will be given to applications for construction of new plants in areas affected by closure of war plants. Communities which have critical unemployment situations resulting directly from the closures of such plants, and particularly where ample housing facilities exist, will have good chances of approval for new industrial construction. In other areas, where new industrial facilities will add to the safety or general welfare of an entire community, especially where such projects will not divert considerable quantities of critically needed housing materials, also will receive generous consideration, if the lack of relief would create a community hardship.

It is recommended that any community considered for new industrial plant constructions contact the State Planning Commission offices for advice on the possibilities of plants being approved before plans for such projects are too far advanced.

EMPLOYMENT TRENDS - MARCH AND APRIL

The U. S. Employment Service, in cooperation with the Tennessee Department of Employment Security, in April began a new series of bi-monthly "Labor Market Letters" covering counties of the State, outside of the four metropolitan areas. The USES-TES "Area Employment Summaries" for the metropolitan areas, also released bi-monthly, have been revised to a non-technical, very readable form. Trends in employment indicated in the March "Summaries" and April "Letters" are given below. Businessmen interested in the labor situation should request regular mailing of these valuable reports from the USES-TES office, Nashville.

\- - -

State-wide Situation

Overall State trend in non-agricultural employment continues static. Excepting seasonal fluctuations, work stoppages by strikes and material shortages counter-balance gains in some industries, while returning veterans are increasing unemployment. Total non-agricultural employment on March 15 was 715,663, a gain of less than 600 in last two months - mainly in manufacturing employment. At end of March, 86,000 unemployed drawing State compensation or servicemen's allowances, an increase of 20,000 in two months. Veterans comprised 51,000 of total. As of April 12, orders for jobs unfilled in USES offices throughout State totaled 9,834, of which 50% in clerical and sales, unskilled, and entry occupations. Majority of worker applicants have semi-skilled or skilled classifications, owing to training in armed services or war plants.

Although jobs not matching skills is one reason for unemployment, chief factor is wage rate. Analysis of wage rates of all job openings by USES indicates that two-thirds of them pay less than 65¢ an hour and one-fourth less than 50¢. Majority of openings on 40-hour week jobs, but even on 45-hour basis, weekly pay is less than $30 for two-thirds of jobs. As veteran weekly unemployment allowance is $20 and most displaced war workers can qualify for $15 - with no income taxes or other deductions, workers are in no hurry to accept jobs.

Employment outlook for next four months very uncertain, due to strikes and material shortages. Projected employment increase above March, exclusive of construction gains, is estimated at 11,000. Of that increase, 9,400 is in manufacturing, mainly textiles, iron and steel, apparel, and electrical machinery. Projected increase expected to be

largely wishful thinking as material shortages and reluctance of workers to accept jobs at low wages and in unpleasant situations make realization of any substantial increase extremely unlikely.

Areas Summarized

Memphis-Shelby County area - Construction employment gains offset manufacturing losses, giving 1,000 net gain January to March. Projected 1,000 increase in manufacturing jobs by June doubtful of realization. Housing acute.

Hamilton County area - Static February and March. Anticipated 1,200 increase in manufacturing employment by mid-summer; large labor surplus, 22% women. Housing extremely serious.

Knox-Blount Counties area - Total employment above last July level but manufacturing employment 7% below. Gains mainly in trades and services, now 38% of total employment. Textile and aluminum employment rising; Rohm & Haas' return to operation will increase chemical job opportunities; CEW will add some in its atomic power laboratory expansion. Unemployment up 29% since January, but 25% of total are "job shopping" veterans. Clerical, brick masons, and experienced textile workers badly needed. Critical housing shortage limits outside recruitment of workers.

Davidson County area - Static; any large absorption of surplus in next two months unlikely. Housing critical.

A 3-page digest on the State employment situation covering the following areas will be furnished to "Newsletter" readers on request to the editor: West Tennessee - Dyersburg, Jackson, Milan, Huntingdon, Paris, Lenoir City, Selmer areas; Middle Tennessee - Cookeville, Livingston, McMinnville, Tullahoma, Winchester, Pulaski, Lewisburg, Gallatin, Murfreesboro, Dickson, Clarksville, Columbia, Shelbyville, Lebanon, Lawrenceburg, and Savannah areas; East Tennessee - Harriman-Rockwood, Lafollette, Loudon, Maryville, Oak Ridge, Cleveland-Athens areas.

DO YOU KNOW THAT -

Tennessee was at one time the Nation's leading producer of cocoons for use in the State's silk manufacture. This was in 1850, when cocoon output totaled 1,923 pounds. Prior to that, in 1842, the Tennessee legislature had passed an act authorizing incorporation of the Tennessee Manufacturing Silk Company & Agricultural School, with capital stock of $20,000, and the same legislature "offered a bounty of 10¢ a pound on cocoons and 50¢ a pound on reeled silk". As a result, a silk manufactory was set up in Nashville and, later, one was planned at Port Royal. By 1850, the silk fad had vanished (see in this issue "Tennessee Industry 150 Years Ago").

SALES AND MANUFACTURING OPPORTUNITIES

Lumber Mill: Hardwood flooring mill reported available for purchase. Located in small town on mainline railroad. Area heavily timbered.

Wood Products: Box manufacturing plant and furniture plant for sale. Both are well-located operating plants, with established reputations.

Wood Products: Completely equipped wood-working plant, all new equipment of latest design, has surplus capacity available for outside production on contract basis.

* * *

INDUSTRIAL BUILDINGS AND SITES AVAILABLE

Springfield: Manufacturing space of 80 x 80 feet available on first floor and basement (total 12,800 sq. ft.) of brick warehouse, 80 x 265 ft. Available space separated by 17-inch firewall from remainder of building. Main floor, 3-inch pine but owner will cover

with hardwood flooring, now on hand; basement, concrete floor. Ceiling heights, 11 ft. on first floor; 10 ft., basement. Four rows of supporting columns, 4 to a row, evenly spaced on first floor. Lighted presently by skylight but materials available for remodeling, to include side window lighting. Plant within one-half block of L. & N. R.R. Alley driveway at side.

Owners will rent at $250 per month, including any reasonable remodeling of front and interior.

Shellmound: Over 1000 acres along Tennessee River, sheltered by Cumberland Mountains from which is obtainable high-grade steam and coking coals and high-calcium limestone (96.92% $CaCO_3$). Coke available from Chattanooga - 30-mile R.R. haul; sulphuric acid, from Copperhill, Tenn. - about 100 mile haul. TVA power lines cross site, which is adjacent to mainline of N. C. & St. L. Railway and served by good secondary road connecting to U. S. Highway 41-64 only 4 miles to northeast. Spring water, 20,800 g.p.m., flows from nearby Nickajack Cave.

Site offers exceptional possibilities for large-scale chemical manufacture. Detailed report on area available.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any of the industries listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

128. Tool & Machine Builder: Eastern tool & machine builder, specializing in automatic rubber processing equipment, is considering Tennessee for a new plant location. Initially will employ 150 men, largely at skilled wages.

Desires town of about 5,000 population. Will require about 50,000 sq. ft. in one-story building, with truss-type roof and concrete floor; 25-ft. ceiling clearance over distance of 100 feet for operation of 5-ton crane. Maximum span width in craneway, 50 ft. R.R. siding essential; also proximity to foundry capable of casting large pieces. Good rail transportation necessary.

Will negotiate on rental lease, with purchase option, or amortization-plus interest basis.

129. Chemical Specialties: Associates of inquiry No. 128 are interested in establishing a small chemical specialties plant, employing 15 to 20 men, in same town in which the above-projected tool plant may be located.

TENNESSEE INDUSTRY 150 YEARS AGO

By Eleanor Keeble, Research Assistant

In this year of the Sesquicentennial celebration of Tennessee's statehood, it is interesting to look back on the earlier days of commercial enterprise and industrialization in the State. Probably the first commerce to be carried on in Tennessee was the fur trade between the English and French and the Indians. By 1755, the fur trade between Tennessee and the English colonies alone amounted to approximately a million dollars each year.

The early Tennessee communities were practically self-sufficing units where food and domestic manufacture of textiles met most of the needs of the people. Other necessities were obtained from itinerant merchants and caravans. These were succeeded, first, by trading posts and, later, by the general store, which stocked a curious assortment of goods - "padlocks, saddle-bags, screw augers, files, chisels, hammers, steel traps, brass clocks, ink stands, ribbons, blacksmith vices, Bibles, candlesticks, Watt's Psalms

and Hymns, several books upon Divinity, an assortment of stills, best rum, wine, brandy, and whiskey".

Milling of grain furnished the State with its first established industry - the earliest grist mill probably being one in Carter County, built in 1775. The most peculiar water-driven mill was that built in Davidson County around 1782, in which cows' horns were used as the buckets on the water wheel. Out of the milling industry grew one of the most amusing cases ever carried to the Supreme Court - Richard Kirby of White County sued John J. Lee, a miller, for grinding corn out of turn, for which the fine was three dollars.

One of the little known phases of Tennessee agricultural history is the silk culture craze. One abortive attempt was made in 1791 and another in the middle 1800's. In 1840, 1,217 pounds of cocoons were produced in the State, which then ranked 15th in the Nation in silk production. The fad hit its peak in 1843, when Governor "Lean" Jimmy Jones wore a suit of Tennessee-made silk to his second inaugural ceremony. By 1850, the silk "boom" had begun to fade, and cotton and wool were destined to lead the march of Tennessee textile industries. These date back to 1791 when John Hague of Manchester advertised in the Knoxville Gazette that his spinning mill on the Cumberland was "in order for carding, spinning and weaving".

In Tennessee documents occur interesting bits of legislation occasioned by the scarcity of salt. In the 1790's, special laws were enacted to assist persons "to bore for salt water". The General Assembly also permitted lotteries for financing the building of salt works, and in 1796 the first patent granted a Tennessean was for "a device for manufacturing salt".

As early as 1785, small East Tennessee forges and bloomeries were turning out bar iron, nails, and tools, and by 1795, an iron works had been established west of Nashville. Tennessee iron, by 1830, was much in demand for the manufacture of steam boilers and, in 1833, judges of the Franklin Institute of Philadelphia stated that Tennessee iron was fully comparable with the chain cable iron of England, then producing the world's finest iron.

The first newspaper in the State, the Knoxville Gazette, began operation at Rogersville in 1791. The first bank in the State was established at Nashville in 1807. The coal fields of Cumberland Mountains were first worked in 1814, near the present site of Rockwood. An insurance company was incorporated as early as 1826.

By 1850, Tennessee's ten leading industries were flour and meal, iron, lumber, leather, steam railroad and agricultural machinery, cotton and wool textiles, printing, coal, copper, and spirits. Tennessee was well on its way toward the well-rounded, stable economy that today makes this State one of the leaders of the South.

DATA ON HIGH ALUMINA CLAY OF WEST STATE RELEASED

The State Division of Geology report on High Alumina Clays of West Tennessee has been made available for public inspection at the Division's office in Nashville. The report, to be published in the near future, contains the results of prospecting for sedimentary kaolins in Carroll County and adjoining areas during 1941 by the Tennessee Valley Authority, with the cooperation of the State Division of Geology. Included in the report are detailed drilling logs, chemical analyses, and similar data.

These kaolins were investigated as a possible source of raw material suitable for use in TVA's "Walthall" process for extraction of alumina from clay. As a part of a series of wartime projects to assure this country of adequate sources of alumina, censorship

restrictions prevented release of information on these Carroll County investigations during the war period.

Authors of the report include Mr. H. S. Rankin, Dr. Benjamin Gildersleeve, and Mr. C. L. Bailey of the TVA and Dr. Geo. I. Whitlatch, formerly Associate Geologist of the State Division of Geology.

* * *

PLANS FOR NEW JACKSON PLANT REVEALED

The House of Novy, Inc., Chicago, has been identified as the manufacturer which will locate in Jackson, occupying the new $100,000 factory building now being built there by the Jackson Industrial Foundation (see December Newsletter). As announced in the Jackson Sun, the plant will produce five style lines of ladies sportswear each year, ten weeks to each line. The lines will include childrens skirts and slacks, slack suits, play suits, and junior miss dresses. Most of the lines will be woolens, with some rayon and high-quality cottons.

The plant, a 30,000 sq. ft. one-story brick structure of most modern design, is expected to be completed in September. Plans call for doubling the size when materials are available. Between 250 and 300 persons are to be employed in the new plant which, on completion, will be purchased by the House of Novy.

* * *

LOCAL SURVEYS INDICATE LABOR POTENTIALS

Results of local surveys to determine the number of workers willing to accept industrial employment have been received recently by this Division from Lexington and Halls in West Tennessee and Springfield in Middle Tennessee. In each instance, some form of actual registration by individuals was used.

In Lexington, available workers totaled 2428, almost evenly divided between males and females. Over 50% of the total were between the ages of 18 and 42 years. More than 100 persons above age 60 were registered.

Halls, a town of 1200, registered a total of 2079 potential workers within a radius of 10 miles. Approximately half of the registrants were men. Of the 1081 women registered, 590 were between the ages of 18 and 35 years. The survey was especially valuable in revealing that 68 experienced power sewing machine operators are available in or near the town.

Of a total of 789 unemployed registrants in Springfield, over 65% were women within 18-35 years age group. More than half of the 252 male registrants were under 18 years of age.

This Division is becoming more and more convinced that the smaller community's best asset in solicitation of new industry is detailed knowledge of its local labor supply. Other towns in the State that assemble such data are urged to file them with our Division, in order that they will be available to industries seeking our assistance in selection of new plant locations.

* * *

NEW WOOD PRODUCTS INDUSTRY FOR GREENEVILLE

The Greene County Foundation Fund, launched a few months ago at Greeneville, already is getting results. Through the Foundation, the Greeneville Wood Working Products Company has been signed up for operation in that city. The new industry, which is expected to start production about June 1 in temporary quarters in a local tobacco warehouse, initially will manufacture collapsible hogsheads and, later, egg crates and fruit baskets. Charles Green of Garden City, Long Island, N. Y., and associates will operate the new Greeneville industry. Mr. Green, according to the Greeneville Weekly-News Bulletin, has contracts to run the new plant at capacity for five years.

Another manufacturer who has been negotiating with the Foundation, on recommendation by this Division, is expected to soon announce location of another new plant in Greeneville.

* * *

PRODUCTION LINE NEWS AND NOTES

Obion Plans Industrial Development Association

Plans were being made in Obion, during early May, to organize an Obion Industrial Association, Inc., for the purpose of financing construction of a 25,000 sq. ft. addition to the local work shirt plant of Salant & Salant. A total of $55,000 is to be raised by sale of stock in the Association, according to reports. Rental of the new structure to Salant & Salant is expected to return the Association's investment over a period of years.

The present Obion plant of Salant & Salant now occupies about 10,000 sq. ft., and monthly payrolls are about $17,000. The new unit is expected to more than double the present payroll figure.

Johnson City C of C Reports Industrial Activities

The Johnson City Chamber of Commerce has issued an attractive report of its 27th Annual Meeting, held in the John Sevier Hotel on April 22.

The New Industries Committee, through Chairman Carl A. Jones, Jr., reported that a charter for a Johnson City Improvement Corporation has been prepared for use whenever the need for such organization arises. Two new industries established during the year were the O. B. Andrews Company and National Merchandise Manufacturing Co., paper box and apparel manufacturers respectively.

Manufacturers Directories Available

Newly revised directories of manufacturers for Memphis and Nashville were released in May. Requests for copies should be addressed to the Chambers of Commerce of those cities.

"Plastics Manufacturing Opportunities of Tennessee"

The March-April issue of Southern Plastics Magazine carried the first installment of a feature article on "Plastics Manufacturing Opportunities of Tennessee", authored by your editor. The concluding installment appears in the May issue. In the article are described, in non-technical manner, the various types of plastics adaptable to manufacture from Tennessee raw materials, with accompanying information on the State's present extensive plastics industry. A limited supply of reprints of this article will be available for free distribution, and Newsletter readers should write us at once to reserve copies.

Southern Plastics Magazine is a new trade publication recently established in Atlanta to serve the growing Southern plastics manufacturing and marketing interests. The magazine is well edited and illustrated and gives good coverage to news and developments on plastics within the South. Garland B. Porter is editor and publisher.

"Highlights In The History Of Tennessee"

In commemoration of the Tennessee Sesquicentennial being celebrated this month, the State Department of Conservation has issued a beautiful color folder in which is reproduced the majestic Dean Cornwell murals on Tennessee history that adorn the lobby of the State Office Building in Nashville. Accompanying the reproductions is a descriptive historical text on the discovery and development of Tennessee, as depicted by the murals, along with a key to identification of the mural figures.

Industrial Survey of Memphis Revised

A revision of the General Industrial Survey of Memphis has been completed by the Memphis Chamber of Commerce. The publication contains data on current wage rates, taxes, utility costs, and business statistics of value to expanding local concerns as well as to out-of-town prospects for locating in Memphis.

Hog Breeders Directory Released

A new edition of the Purebred Swine Breeders' Directory has been released by the University of Tennessee Agricultural Extension Service. Listed are the names and addresses of the State's active breeders, with the number of herd sows also listed for most breeders. Additional information includes addresses of secretaries of state associations, national record associations, methods of ear marking, record forms, etc.

Williamson County Jaycees Organized

Charter meeting of the Williamson County Junior Chamber of Commerce was held in Franklin on May 9. Presentation of the charter was made by Dr. J. W. Lawrence of Lebanon, state president of the organization. C. E. McGlocklin is president of the Williamson County Chamber; Tom Pinkerton is secretary.

Shelbyville Sponsors Manufacturers Exhibit

An exhibit of the products of Shelbyville manufacturers is on display in the windows of the local Tennessee Gas Company office. A total of 33 manufacturers have contributed to the display and practically every product made in the city is represented.

* * *

NON-WOVEN COTTON CLOTH PERFECTED AT CHATTANOOGA MILL

Henry H. Frede & Co., Chattanooga, has developed a process for producing cotton fabrics without the usual spinning or weaving operation.

The process, according to announcement in Southern Textile News, entails the use of plastics for locking the interlaced cotton fibers together. Six different types of plastics, some new, are used. Developed after two years research in cooperation with the University of Chattanooga Industrial Research Institute, the process is reported to give a diaper cloth at a cost equal to the cost of laundering ordinary diapers. Not only can diapers be manufactured by the process but also dental towels, surgical napkins, curtain materials, and similar products.

These unwoven cotton fabrics are one of the challenging new developments in the cotton products field and appear to offer a definite threat to paper manufacturers in the disposable towel, napkin, and handkerchief markets.

In addition to the above Tennessee development, at least two other manufacturers, Chicopee Manufacturing Corporation and Kendall Mills, are making similar unwoven cloth at their mills in Milltown, N. J., and Walpole, Mass., respectively. Kendall Mills fabric, known as "Webril", is made by combining long staple cotton fibers and cellulose acetate fibers, the latter acting as the binder. When these are passed under heated rollers, the cotton-plastic fiber sheet emerges as a cloth bound together by the plastic which was softened by the heat. Chicopee's product, called "Masslinn", is made differently, the cotton first being formed into sheets, then superimposed upon this is a plastic adhesive binder, applied in wavy lines at right angles to the direction of the cotton fibers.

* * *

EMPLOYMENT OPPORTUNITY

Industrial Economist: Available for employment in Chamber of Commerce or similar industrial development work, mature man currently employed by U. S. Government in executive position. Experienced in problems of small business, railroad transportation, and numerous other phases of industrial and territorial development; five years in public relations work for major railroad system; capable of economic research and writing of finished reports. Work has been mainly in Southern areas.

* * *

INDUSTRIAL EXPANSIONS & CONTRACTIONS

Southern Spinning Co., Nashville, is the new corporate name of the partnership formerly operating under the firm style of Ingram Spinning Mills. The incorporation was effective

April 1. There is no change in operations of the mills, which produce merino and special yarns.

- - - - -

The CPA district office at Memphis has recommended immediate approval by Washington for construction of International Harvester Company's $8½-million new plant at Memphis. Officials of the company estimate that nearly a year will be required for its construction and, when completed, over 3,000 persons will be employed.

- - - - -

The building materials supply at Martin has been expanded recently by the establishment of the Martin Concrete Products Company, producer of building blocks, and Vowell Bros. sawmill. The latter expects to later add a planing mill.

- - - - -

Monsanto Chemical Company in late April purchased the mineral rights to 40 acres of phosphate land in the Second District of Maury County.

- - - - -

Oakes Chair Co., Columbia, is planning to expand its operations about the first of 1947, by opening a furniture manufacturing unit in the local "Ironall Factories Company" building, recently purchased by the chair company. The type of furniture to be made or number of workers to be employed have not been determined.

- - - - -

Modernization and expansion of Crane Company's Chattanooga plant is expected to be completed by late summer, according to a Wall Street Journal report of remarks made by President John H. Collier at the annual stockholders meeting in late April. Production of housing plumbing should "considerably exceed prewar volume" upon completion of expansion at the Chattanooga unit.

- - - - -

The City Council of Paris has approved a six-months trial installation of parking meters; the City of Clinton recently completed a meter installation.

- - - - -

National Plastics, Inc., Knoxville proprietary molders specializing in the manufacture of plastic molded articles for use in textile machinery, is building an addition to its plant. The company has been producing certain patented items for a number of years and has a number of other new ones in process of development. Due to increasing demand for their products, National Plastics is having to expand its capacity to maintain the stock necessary to give its customers prompt service.

- - - - -

The Tullahoma & Manchester Coach Company has been granted a permit by the Tennessee Railroad & Public Utilities Commission for operation of municipal bus services within Manchester and Tullahoma and between those two points.

- - - - -

A new six-story apartment hotel of 150 hotel rooms and 40 apartments is being planned for construction in Knoxville. Reported estimate of cost, $500,000. The name "Melrose Manor" has been proposed for the new structure.

- - - - -

J. B. Ragland of C. B. Ragland Co., Nashville wholesale grocers, is reported to have purchased controlling interest in Wilson-Quick Co., long-established Nashville pharmaceutical and surgical supply house.

- - - - -

The Southern Crayon Company, long operated in Nashville as a partnership, is reported planning to move its plant to Lewisburg. A new building, now under construction by the Linton Pencil Company as a part of its expansion program at Lewisburg, will be leased to the crayon company. Products of the company include lumber, art, and wax school crayons and chalks.

Clifton J. and Keith E. Comey, who have previously operated the crayon company as a partnership, and Nat K. Rainey, an official of the Linton Pencil Co., are listed as incorporators of the Southern Crayon Company in articles of incorporation recently filed with the Secretary of State.

- - - - -

The A. and B. Dunbrik Company, Chattanooga, has been granted a State charter to manufacture concrete brick. Plant facilities for the new company's operations are under construction and production is expected to start by mid-June. Initial capacity will be 30,000 brick in a two-shift day. The brick, manufactured with patented equipment, are of regular clay brick size and can be produced in various colors. A 15-day curing period is required.

- - - - -

A new radio station, WBEJ, is expected to start operation at Elizabethton about June 1.

- - - - -

The Nashville Gas & Heating Company, by a recent Tennessee Supreme Court ruling, has been upheld in its right to distribute natural gas through the Nashville system. The ruling apparently clears the last legal obstacle toward bringing natural gas to the city through the Tennessee Natural Gas Lines' feeder line, now under construction from its take-off on the Tennessee Gas & Transmission Company's trunk line near Ashland City (Nov. & Feb. Newsletter). The new gas supply is expected to be available to the city system before the end of the summer, according to Wade Thompson, TNGL president.

- - - - -

Loomis Frozen Food Company, Sweetwater, has started construction of a 402-locker plant, including meat preparation space. Full operation of the plant is expected by Fall.

- - - - -

The Chickasaw Ordnance Works, Millington, was declared surplus by the War Assets Administration in late April. The plant, consisting of 226 buildings with a total of over 1-million sq. ft. of floor space and situated on a 5,531 acre tract, was operated during the war by the duPont interests in the production of smokeless powder.

- - - - -

The Virginia two percent gross receipts tax formerly imposed on Tennessee motor carriers operating interstate through and in that state has been waived, retroactive to January 1, 1946.

- - - - -

Two new chenille bedspread manufacturers recently located in Cleveland are: Dunham Crafts; employing 12 persons, and Price Chenille Products Co., employing 15 to 25 persons. The latter operates in a new plant building.

- - - - -

Lexington Manufacturing Company has been granted a State charter for the manufacture and sale of women's apparel. The plant will be in the former gymnasium building, now being remodeled for the company's use. Brassieres will be the initial product.

- - - - -

American Plating Works, Inc., Memphis, is a new locally owned concern equipped to do commercial plating of chrome, cadmium, copper, and nickel. Operations were begun in early April.

- - - - -

General Cigar Co., Inc., according to recent Wall Street Journal report, is seeking new plant sites, owing to high labor costs in the northern New Jersey area where three of the company's plants are located. Local Chambers of Commerce may be interested.

- - - - -

The Memphis harbor development project, known as the Tyler plan, which was mentioned here in March, received approval in April by the Chief of Army Engineers and has been sent to the Congressional Flood Control Committee for legislative action.

- - - - -

Purchase of the capital stock of the Chattanooga Gas Company by the Southern Natural Gas Company is listed among the latter company's refunding plans recently reported in the Wall Street Journal. Application for permission to acquire the Tennessee utility's stock has been pending before the SEC since last fall.

- - - - -

Texas Company, Memphis, has received a permit for construction of a $64,000 office building.

- - - - -

Nashville, during April, issued building permits for residences for 92 families, a figure six times that for the same month of 1945. Estimated value of this housing is over $327,000.

* * *

GOVERNMENT EXPANDING AID TO SMALL BUSINESSES

The U. S. Department of Commerce, under its new Office of Small Business established late in February, is setting up 50 new field offices throughout the country to advise small businessmen on their problems and to assist in reducing failures of small enterprises. Combining a considerable part of the functions and personnel of the Smaller War Plants Corporation and of the Division of Small Business, which were merged, the Office of Small Business program is intended to render aid to the small businessman similar to the aid county agents or extension services render to the farmer.

Another government aid to small business is the RFC "blanket participation plan" (see Newsletter for October) under which private banks can lend up to $350,000 on small enterprises, with RFC insuring 75% of the loan against loss. Eligible banks are reported to be signing up rapidly for this plan.

* * *

COSTS OF CONTROLLED CONDITIONING OF INDUSTRIAL PLANTS VARY WIDELY

Helpful information on the question of whether new plants should have "controlled conditions, including the careful control of light, air, temperature, humidity, etc., is given in a recently published study by the Austin Company, well-known construction engineers. According to data cited from this study in Factory, annual operating costs and fixed charges per square foot range from 93¢ to $1.30 in "controlled conditions" plants against 71¢ to $1.08 in conventional plants. Construction costs for conditioned plants range from 16% to 20% higher than for conventional plants. The maxima and minima of these costs are based on low and high concentrations of machinery and employees in typical plants, "high" being 2500 employees in 306,000 sq. ft. and "low", 25,000 in 1,585,000 sq. ft.

* * *

Crop dusting by airplane is being sponsored as a joint project by the University of Tennessee Agricultural Extension Service and Tennessee Bureau of Aeronautics to demonstrate the use of this technique in insect control.

* * *

effect all of the advantages of flexibility found in small companies but would benefit from the greater financial strength and expert technical assistance of the parent company. Because of stock interests, both TAI and stockholders of member companies would receive in the form of increased dividends any benefits from improved operations derived through the parent organization's services.

The advantages to be obtained by small industries from affiliation with an organization like Tennessee Associated Industries, Inc., are too numerous for review here, but they are more completely indicated in the Tennessee Planner article. As shown there, the TAI idea is not the result of abstract thinking but a combination of elements of successful operations by existing private organizations, both profit and non-profit. Either as a consultant management service or as a development corporation, Tennessee Associated Industries, Inc. offers a direct approach to the problem of assisting the development and expansion of small industries in this State and elsewhere in the South. The idea has sufficient profit-incentives to warrant further study and investigation of its possibilities in relation to the Tennessee situation.

THANKS, NEWSLETTER READERS!

Response to our request of the past two months that Newsletter readers renew their "subscriptions" has been overwhelming. Of a mailing list of about 1200, renewal slips totaling 603 have been received already and are still coming in each mail.

The many readers who have taken time to express their appreciation of the "Newsletter" by either letter or note directly on renewal slips gives your editor a much deeper sense of responsibility. We appreciate your comments and shall try to keep the Newsletter up to your expectations.

We had hoped to reproduce this month an exceptionally fine letter on the value of the "Newsletter", received from a prominent Tennessee manufacturer, but his permission to use the letter has not yet been obtained. Nevertheless, we have selected several excerpts from other letters and know you will excuse our vanity in reproducing them below:.

"Your Newsletter is splendid. As a result of reading it, I plan to visit you soon." - Minn. sales executive.

"A news service that cannot be valued to those that want to keep up with conditions in this State.... am willing, if you do accept fees for this service, to support such fine, dependable and informative service". - President, Tennessee corp.

"Your Newsletter.... will be.... helpful to people who are interested in locating industry in your State". - National retail chain-store executive.

"Well written and informative story of Tennessee.... enjoyed by myself and passed among others of our organization". - Executive, out-of-state television laboratories.

"Believe you are doing a great thing for Tennessee and for Industry as a whole". - Tennessee realtor.

"One of the finest ideas that has crossed our desk". - Tenn. C. of C.

"As for your 'Newsletter', it just can't be beat". - Tenn. C. of C.

WILL THEY "COME AND GET IT"?

By Geo. T. Trundle, Jr., President
The Trundle Engineering Co., Cleveland, O.

If, during a soap shortage, you had a self-serve counter loaded with soap, would they "come and get it"? Of course they would. They'd stand in line for blocks. But suppose the soap shortage was over. What then? It would have to be extra good soap, or priced extra low, to maintain a self-serve trade. The fact is, you'd probably have to start giving some service. You'd probably have to start doing some selling. You might have to start deliveries to customers' homes. You'd be back again in a competitive market. That's what a good many businessmen - both in retailing and manufacturing - don't yet seem to understand.

Some people close to the final consumer realize that "the war is over". When we see the first robins and the first pussy willows, we say, "Spring's coming". What are we seeing today? Here are a few things observed by our own office staff:

A laundry advertises that it will pick up and handle shoes for repair. A waitress asks, "Would you like more butter?" A garage advertises, "Cars washed for 50 cents". Grocery deliveries are getting better. Gasoline service station attendants are more careful about cleaning windshields.

These are signs of the coming season of extreme competition, just as surely as the robin and the pussy willow are signs of spring. They show up first in the retail service field, because that is where the actual contact with the buying public takes place. But there are plenty of retailers, plenty of people engaged in service industries, who don't yet see the handwriting on the wall. The time is coming when somebody is going to wake up too late.

Today is a period of confusion and frustration. Even though the war is ended, our nation's production facilities are moving at only "half-steam ahead". This won't last forever. When the throttle is turned to "full-steam", the present economy of scarcity may be transformed almost overnight into an economy of abundance and extreme competition. In preparation for that transformation, retailers and service businesses would do well to utilize today's "come and get it" war hang-over to develop and perfect the sales and service techniques which they may desperately need tomorrow.

Of course, it's tough for the manufacturer to realize that, competitively speaking, "Spring is just around the corner", because, in most cases, the manufacturer is still operating in a season of scarcity. He doesn't realize how swiftly, one of these days, the climate of scarcity is going to change to a climate of abundance.

Once we get a hot day in the middle of May, is there any further market for winter hats that season? Of course there isn't. And yet, men don't buy straw hats until June. It is the fact that they know June is just ahead that makes them stop buying winter hats in May.

That's what is going to happen, I think, throughout the whole merchandising field. The minute people know that a fair supply of things like automobiles, radios, refrigerators, vacuum cleaners and washing machines is "just around the corner",

they are going to stop scrambling to see who can be the first to buy. Instead, they are going to hold off. They are going to say, "Let's wait a little bit. We've waited a long time - we can wait a little longer. Let's see who's got the best product, at the best price". And once they have waited that little longer, events, in my opinion, will certainly prove the wisdom of that delay.

Once the ball starts rolling, I think we are going to have poured out on the market the most incredible supply of merchandise that this world has ever seen. Everything points to it. Practically all postwar plans are geared to production levels far above those of prewar. Hundreds of companies are going to attempt to break into established fields. What companies are going to succeed and what companies are going to fail in this competitive scramble? The answer will depend, of course, to a great extent, upon design, quality, price, etc. But that's not what I am discussing today.

Assuming that design, quality and price are about even - which will, on the whole, probably be the case - it is my guess that success will go to the company that has taken advantage of the current period to organize and perfect its distributing and servicing organization - and failure will be the lot of the company that assumes that because there is a shortage today, people will "come and get it" tomorrow.

Merchandise is sold by PEOPLE. People don't develop allegiance overnight. They don't acquire sudden loyalties in a day. They don't develop faith in a product, and enthusiasm for its performance, as the result of a single letter or telephone call. A distributing organization that is going to function properly has to be built just as carefully as a production organization. While the type of activity may be far different, the human equation remains the same. That is why every manufacturing concern looking forward to what I firmly believe will be a hectic competitive situation tomorrow, will do well to concentrate upon the painstaking building of a distributing and servicing organization today. Then, once materials start to flow, once the wheels of production start to turn - the sales end of the business will be ready to absorb and dispose of the growing quantities of production.

War does strange things. In manufacturing, war has proved that many things we believed, before, were impossible are now perfectly possible of attainment. But war has also developed to a high point the art of alibis. Why didn't we do the job? Well, we couldn't get materials; we couldn't get labor; we couldn't get priorities; we couldn't get transportation.

But one of these days, all of these alibis are going out the window. And the company that says it didn't see much object in building up its sales organization because it couldn't get materials, or labor, or transportation, may find itself suddenly swamped by the competition of companies who realized that in spite of all difficulties existing today, sales and distribution organizations had to be perfected on behalf of tomorrow.

(Reproduced by permission from "Trundle Talks, No. 86".)

* * *

DO YOU KNOW THAT -

The State of Tennessee revenues for the first 11 months of the 1945-46 fiscal year hit a total in excess of $61-million, an increase of more than $11-million over the same period of last year.

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any of the industries listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

Light-Leather Tannery: Established manufacturer, operating 8 plants and having D & B rating of AAI, wants to locate in community willing to finance 50,000 sq. ft. plant on rental lease or amortization basis. Will employ 100-150 persons (50% male), under a cooperative profit-sharing plan in which all workers and management will participate. Wage scale ranges to over $1.00 per hour.

Plant building to be single story, brick or concrete and steel, concrete floors, sprinkler protected, on site of 5 acres or more, served by 3-car rail siding, access to good highway facilities essential. Water requirements, minimum of 60,000 gal. daily - water must be uniform quality and low mineral content. Ample sewage facilities also prerequisite.

This company began Southern location survey last year, then found it necessary to suspend investigations because of equipment shortages.

This Division commonly fails to receive replies from inquiring concerns after initial information is furnished on potential locations. In other cases, we are afforded an opportunity to follow-up and to render additional assistance or to keep informed on developments. Below are reviewed a number of previous listings with brief notes on present status of inquirer's interest, insofar as known or indicated to us.

Inquiry No.	Issue	
87	April	- interest in State still being maintained.
103	May	- company still seeking location.
104	"	- location selected from among those recommended by this Division - probably closed deal.
113	"	- investigations suspended but expects to renew survey of Tennessee situation in 60 to 90 days.
119	"	- contacted several towns recommended by this Division; no decision on location reported yet.
120	"	- location selected in Missouri.
121	"	- company representative has surveyed several towns recommended by this Division; no decision on location yet.
124	"	- cancel.
128-129	June	- representatives expect to visit State in near future.

BUILDINGS AND CONGENIAL SURROUNDINGS AS ASSETS IN INDUSTRIALIZATION

Factory Management & Maintenance (McGraw-Hill Pub. Co., N. Y.) in April issued a special 156-page section devoted to the subject of "Industrial Plant Buildings". Numerous interesting and valuable observations are made in one of the articles on "Industry Now Has Wider Choice in Plant Location", written by Charles P. Wood of Lockwood Greene Engineers, Inc., New York. With the cordial permission of Factory's

editor, we quote several paragraphs of Mr. Wood's article that are significantly applicable to the problems of locating new industries in Tennessee:

> "Local financing of industrial buildings on reasonable terms of lease with option to buy has attracted industries to some places when other inducements have failed. The existence of vacant buildings available at reasonable cost is equally attractive to industries that can use their capital to better advantage than by investing it in buildings. Most of the vacant buildings at desirable locations have been taken up since the cost of building has increased so far beyond pre-war expectations.....
>
> "The importance of labor is recognized in all location studies, and much attention is devoted to questions of housing and provisions for education and amusement, which will insure a satisfied working population. Sometimes the same consideration should be given to keeping management contented.... Little is heard about the inducements offered to good managers, superintendents, and foremen to move to another part of the country, where neither they nor their families can find congenial surroundings. Still less is heard about how many times these men pack up and return to the places where they and their families want to live.
>
> "Some of the most desirable locations for economical manufacturing go begging, either because they lack local residents who have the ability and initiative to start an enterprise, or because they have not built up an atmosphere in which this type of individual finds congenial associations..... The automobile industry grew up in Detroit because of local resources in labor and management."

This special section of Factory also features current trends in plant design and construction with excellently illustrated descriptions of new industrial plants built by Carboloy Company in Detroit, Fisk Tire Division of U. S. Rubber Company, in Chicopee Falls, Mass., Naval Ordnance Plant, in Indianapolis, Reynolds Spring Company, in New Jersey, and other large installations. The Tennessee plant of Aluminum Company of America at Alcoa is pictured as an example of logical location of an industry requiring "plentiful.... low cost hydro-electric power, with economical transportation....."

NEW POTTERY STARTS OPERATIONS AT JONESBORO

Production was begun early in June at the new plant of Cherokee China Company, Jonesboro. Artwares and novelties, both plain white and decorated, are being made by the company, which is headed by G. F. Brandt, president. F. P. Brandt is vice-president and plant superintendent. Initial employment is 30 workers, but it is expected to soon increase this to 60 or more.

This new pottery represents an example of purely local industrial development. The site and plant building were financed by the Jonesboro Improvement Corporation, through stock subscriptions by local citizens. Construction was supervised by D. W. Armentrant, a citizen of Jonesboro who for many years was chief construction engineer for a Pittsburgh, Pa., firm. On completion of the plant, it was leased to Mr. Brandt who was general manager for 13 years of Southern Potteries, Inc., at nearby Erwin. Prior to that Mr. Brandt was connected with the Homer Laughlin China Co., Newell, W. Va.

SGT. YORK MAKES OIL STRIKE IN FENTRESS COUNTY

Sgt. Alvin C. York of World War I fame, in mid-June, brought in a producing oil well in new territory being prospected in the Upper Cumberland district. This discovery well, which had initial production of 13 barrels per hour, is in Pickett County, near the Fentress County line. Production was reached at a depth of 732 feet. York has a lease block of some 9,000 acres in those two counties and is drilling a second well some 400 feet from the first test.

The oil from the York well is a high gravity type, testing around 40° Baume. Interest in the new strike is high, and oil men from a number of other states are reported to be checking on the territory. The Upper Cumberland district has long been a producer of oil and is the major source of the State's annual production which normally amounts to 20,000 to 50,000 barrels.

* * *

MORE NEW INDUSTRIES FOR GREENEVILLE

Approval of plans for bringing a large furniture manufacturing plant to Greeneville was announced in early June by the Greene County Industrial Foundation. Name of the company and other details are not yet available.

The new Greeneville Wood Working Products Co., announced here last month, is reported proceeding satisfactorily with its plans and expects to start operation soon.

A third industry, with which this Division is working, has tentatively selected Greeneville for a new plant location and may be announced by mid-summer.

* * *

SALES AND MANUFACTURING OPPORTUNITIES

Electric Light Sockets: Company seeks source of supply.

Hardwood Flooring: Will purchase in quantity good-grade flooring.

Aluminum or Magnesium Products: Industrial engineer, specialist in light-metals products, wants to contact any experienced metal-working manufacturers interested in developing new products or woodworking industries which want to convert to manufacture of light-metal products.

Home Furnishings & Textiles: Manufacturer's representative with national coverage wants quality furniture lines, household goods, textiles - complete coverage to buyers either commission or distributorship basis; New York and California showrooms. Interested Tennessee manufacturers should address: Robert Metrick Co., Inc., 220 Fifth Ave., New York City 1.

- - - - -

The wide response received on last month's listing of a Tennessee woodworking plant with available surplus capacity indicated the effectiveness of the "Newsletter's" coverage. Several inquiries also were received on the hardwood mill listed for sale - incidentally, it is off the market now, having been leased. Inquiries are still coming on listings in the April and May issues. We even got a call on the Industrial Economist listed last month.

So, if you have any similar listings to make on your needs, let the Newsletter have them. It doesn't cost anything, and you might be surprised at the results.

* * *

TENNESSEE CENTRAL RAILROAD SOLD

Sale of the Tennessee Central Railway Company to Eastern interests was announced on June 20 by the railroad's board of directors. J. L. Armstrong & Co., Philadelphia investment banking firm, heads the group of capitalists which has acquired control of the road. Purchase price was not disclosed.

Hugh W. Stanley T. C. president since 1922, has been elevated to chairmanship of the board of directors, succeeding Paul M. Davis who resigned the post at the time of road's sale. C. E. Huntley, Philadelphia financier and authority on railroad statistics and finance, was elected to the presidency of the T. C.

The Tennessee Central Railway operates 288.8 miles of lines between Hopkinsville, Ky., and Harriman, Tenn., including several branch lines. The road derives the major part of its revenues from haulage of coal, serving both Tennessee and West Kentucky mines. The T. C. connects at Harriman with the Southern Railway to Knoxville.

* * *

INDUSTRIAL PLANTS AND SITES AVAILABLE

West Tennessee

Memphis: Newly completed, modern, fireproof building of 17,500 sq. ft., in business district, suitable for distributing or manufacturing industries; spur track and truck dock. Available on 10-year lease.

- - - - -

Three iron-clad, foundry-type buildings, concrete floors, 22-foot ceilings, totaling 60,000 sq. ft., plus 6500 sq. ft. modern office building; inter and intra building rail spurs; two miles from business district, inside corporate limits. For sale only.

- - - - -

Three-story building (reinforced concrete, brick walls), total 28,000 sq. ft., with office and sales room on first floor. Steam heat, first two floors; 1-ton elevator. In good condition. Available for lease in late Fall.

- - - - -

Brick factory building, 27,000 sq. ft., sprinklered, concrete floors, 16-ft. ceilings wired; access to rail trackage. In industrial area, one mile from business section. Condition of building good. Available for immediate possession, on lease basis.

- - - - -

Building, 6,000 sq. ft., with trackage on 2½-acre site. In industrial area, 3 miles from business section. For sale only.

- - - - -

Twenty-nine acre tract, connecting to railway, waterway, and highway; ample water, electric, natural gas, and sewerage facilities. Owner will build for suitable tenant. Industrial section, inside corporate limits, 5 miles from business section. Site offered for sale.

- - - - -

East Tennessee

Whitwell: One-story, modern brick mill, built for hosiery manufacture; workroom 60 x 120 ft. (7,200 sq. ft.) with small office, first-aid room, and engine room, 16 x 44 ft., plus basement; floor, hardwood - free of any supporting columns; ceiling height, 13 ft. Equipped with steam heat, sprinkler system, lighting, electric refrigeration for drinking water. Independent water supply from well, with electric pump and 25,000 gal stand tank. Six-room superintendent's residence. Mill site includes about 4 acres.

- - - - -

Athens: Concrete block building of 20,000 sq. ft. Owner will enlarge or remodel to suit tenant.

- - - - -

Special

Plant For Sale in City of 10,000 Population

Factory building of brick, steel and wood, one and two stories, totaling 20,550 sq. ft. Two-story section, 40 x 110 ft., with 12 ft. 10 in. ceilings and 8 steel I-beams down center of floor, plus full basement with 6 ft. 10 in. ceiling and dirt floor (can readily excavate to give 9 ft. ceiling height); second floor, 10 ft. 2 in. ceiling, 8 wood posts down center of floor; 8½ x 10½ ft. elevator operates in this section from basement up. Single story section, 49 x 150 ft., steel truss roof support giving unobstructed working space with 10 ft. 2 in. ceiling. All floors hardwood, steel window sash, sprinkler and heating systems serving entire building, which is in excellent condition. Access to plant from three streets.

Vacant ground on each side of plant for expansion. Two-story brick residence on property, with minor repairs, could be used by factory superintendent.

This property is not being placed on open market but can be purchased directly from owner. Available by January 1947.

* * *

PUTNAM COUNTY PROMOTES STRAWBERRY CROP EXPANSION

Putnam County is promoting the expansion of strawberry growing. At a recent meeting in the Thomas community, N. L. Bagwell of the Bagwell Preserving Co., Nashville, assured local growers of a market for all berries grown and proposed to build a packing shed at Baxter to serve as a shipping point. More than 30 farmers agreed to expand their berry production to 100 acres or more by next spring. Other communities represented at the meeting are also reported by the Putnam County Herald to have expressed interest in expanding their acreages.

* * *

MANAGEMENT CORPORATION IDEA GOES OVER

The management service-sales promotion idea for small businesses reviewed in last month's "Newsletter" has received a very cordial reception. Requests for the June issue of the "Tennessee Planner" carrying the full-length write-up of this idea, have come from a large number of sources, both within and without the State. At least three different groups of businessmen in the State are actively considering our plan; two of these groups, we learn, had already begun planning similar organizations prior to appearance of our article.

As one outstanding Tennessee business authority comments: "I have read with great interest your excellent article 'Management Service Corporations'..... and it is by far the best expression of the needs of the small businessman in the South I have ever seen...."

Copies of the June "Planner" are still available, and we shall be glad to send one on request to anyone interested in reading the details of our management service idea.

* * *

ADVISORY SERVICE OFFERED ON FEEDING INDUSTRIAL WORKERS

Food was a tool to production in wartime, therefore food is a tool to production in reconversion time. On-the-job feeding in industrial plants is fast becoming an established practice. Many industries are finding that an adequate feeding program makes a positive contribution by improving the health and morale of the workers, decreasing both absenteeism and accidents, thus increasing efficiency, production, and labor relations as well. Approximately 2½ million workers were obtaining meals on the job before the war, compared with 9 million today.

The U. S. Department of Agriculture provides, at no cost to management, a technical advisory service to assist in setting up an adequate feeding program, or if one is

now conducted, to render assistance in improving it. The services available to management include:

Facilities:	Layouts, plans, and equipment lists; assistance in installing new facilities or redesigning existing facilities.
Management:	Efficient operation; menu planning and food purchasing; job analysis and training of new personnel.
Acceptance by workers:	Food selection programs among workers for better health and efficiency and to popularize the food service.

Assistance has been rendered in this State to the following industries: Memphis - American Finishing Co., Chicago and Southern Airlines, Continental Can Co., Firestone Tire & Rubber Co., Fisher-Memphis Aircraft Division, Ford Motor Co., Pidgeon Thomas Iron Co., Q. O. Chemical Co., and Sefton Fibre Can Co. Nashville - Consolidated Vultee Aircraft Corp., and O'Bryan Bros. Bemis - Bemis Bag Co. Bristol - Hecht's Bakery. Cordova - National Fireworks, Inc. Knoxville - Rohm & Haas Co. Milan - Wolf Creek Ordnance Plant.

Various posters and related booklets, a monthly publication for food service operators which includes large quantity recipes, suggested menus, etc., and interesting nutrition briefs for house organs are available upon request. Address Mr. Carl Fry, State Director, Production & Marketing Adm., U. S. Dept. Agriculture, 152 Fourth Avenue N., Nashville 3, Tenn.

PRODUCTION LINE NEWS AND NOTES

Paris Inaugurates Publicity Program

Your editor, in mid-June, was honored by being the first to appear before the Paris Young Business Men's Club in its series of guest speakers on the future development of Paris and Henry County. Charles Neese, newly elected president of the club, outlined a program of advertising and publicity to be sponsored by the organization for the purpose of advancing the city and county as a recreation center and as a location for new industries. Among the natural assets expected to contribute much to development of the Paris area is the nearby new TVA lake, formed by Kentucky Dam.

Dr. J. C. Carlin Establishes Industrial Consultant Service

Dr. J. C. Carlin, formerly district manager for the Smaller War Plants Corporation at Nashville, has established the industrial consulting firm of J. C. Carlin & Associates. The new organization will specialize in chemical and pharmaceutical research, industrial engineering, production and marketing problems, and business advice. Offices are at 1603 Church St., Nashville.

"Business Magazine Of The South"

Southern States Industry & Business is a new "Business Magazine of the South" which made its debut with the May issue. Published monthly at Dalton, Ga., by the Carl Knoedler Publications, Inc., the initial issue features articles on southern research trends by Dr. W. A. Lazier, director of the Southern Research Institute, Birmingham, Ala.; on economic problems of the South by Thomas R. Preston, president of Hamilton National Bank, Chattanooga; on training for business leadership by Dr. W. H. Stead of Vanderbilt University; and on C.I.O. union policies in the South by Van A. Bittner, director of C.I.O's organising committee. J. L. Stover is editor. Subscription rate, $2.00 per year.

TVA Lands Placed On Sale

The first of surplus Norris reservoir lands were placed on sale in June by the TVA. Included in the sale were tracts suitable for small homes or farms, private clubs and cabins, and commercial recreation developments, as tourist courts and resort hotels. Information on such land sales can be obtained by writing to I. R. Wilson, TVA Land Division, Arnstein Building, Knoxville.

West State Fair Dates Set

The 35th West Tennessee District Fair will be held at Jackson between Sept. 9 and 14 inclusive, according to announcement by Abner Taylor, Fair secretary. The Fair was discontinued during the war.

T. T. & D. Association Holds Nashville & Memphis Meetings

The Tennessee Tourist & Development Association, formerly the Southern Highlands Association, during June held meetings at Nashville and Memphis for the purpose of advancing the Association's program for Statewide unity of action in bettering Tennessee's industrial, agricultural, and recreational resources and facilities. The recent meetings, held under the auspices of the Memphis and Nashville Chambers of Commerce, are part of a series planned to be held throughout the State to acquaint all interested local groups with the Associations objectives, outlined in our March "Newsletter".

Chattanooga C of C Initiates "Welcome Breakfasts"

The Chattanooga Chamber of Commerce, on June 4, held the first of a series of "Welcome Breakfasts" designed to welcome prominent newcomers to the city and to make them feel at home. Some 25 newcomers in executive positions who had come to Chattanooga since January 1 were invited to this first breakfast. Future breakfasts are to be held as the situation warrants it.

Jackson & Madison County Plan Development Program

The Greater Jackson & Madison County Association in June were mapping out a long-range program for furthering the agricultural and industrial expansion of that area. Among the proposals of the Association's directors is the launching soon of a widespread advertising campaign to publicize the area's advantages for business and industry.

Mr. Everett Rogers has recently been appointed executive secretary of the Association, succeeding Mr. J. R. MacEachron, who formerly held that post. Mr. Rogers was to attend the Chamber of Commerce School of the Southeastern Institute at Chapel Hill, N. C., between June 23-29.

U T Offers Course in Small Business Operation

The University of Tennessee's School of Business Administration has initiated a new course of study covering the problems of establishing and operating small businesses. The course, labeled "The Small Business Enterprise", will be under the direction of Dr. Ellwood O. Dille who planned the same type of course for the U. S. Department of Commerce which that agency is now urging all universities to offer as a part of their curriculum.

* * *

JOHNSON COUNTY CANNING FIRM ORGANIZES

The Johnson County Canning Company, Inc., currently being organized at Mountain City, expects to begin operations about October 1. The new plant, to employ about 30 workers, will pack mushrooms for eight months of the year, and beans during the remaining four months. J. C. Muse is president of the new company which is being capitalized at $50,000.

Several Johnson County persons who have been engaged in growing of mushrooms in the East are expected to return to the Mountain City area to engage in this crop, according

to the Kingsport Times. Mushrooms will add a new cash crop to the county's agricultural markets.

* * *

TECHNICAL ADVISORY SERVICES AND OTHER BUSINESS AIDS

The small manufacturer can obtain a wealth of technologic information from the Technical Advisory Service of the U. S. Department of Commerce. Each regional office of the U. S. D. C. has a technical consultant who will be glad to discuss personally the specific problems of small business. Write or visit your regional or district offices in Atlanta and Memphis, respectively.

- - - - -

Tennessee County Basic Data Sheets, bound into a volume covering all 95 counties of the State, are available now through the Farm Journal, Inc., Market Research Dept., Washington Square, Philadelphia 5, Penna. On each county sheet are presented some 80 business and economic facts, under the broad headings of: Physical (area, etc.), population, housing, manufacturing, agricultural, trade, and miscellaneous.

Originally prepared by the U. S. Bureau of Foreign and Domestic Commerce, Division of Small Business, these basic data sheets are being made available for distribution for every parish, county, and independent city in the United States, through the cooperation of the Farm Journal, Inc. The cost for the Tennessee or other State set is $1.00 per copy; a complete set covering all 48 states (3072 counties) costs $25.00.

- - - - -

Manufacturers, venture capital, and others seeking products for new lines of production may obtain profitable ideas from Public Domain, issued weekly by the Scientific Development Corporation, 616 W. 49th St., New York 19. According to trade notices, this new publication reviews each week "an average of 1000 patents due to expire within four weeks", patents that are now available for exploitation without royalties or other restrictions. All listed patents are indexed by industries and each is accompanied by drawings and typical claims. Subscription price is $45 annually; special ten-week trial, $10.

* * *

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Eastern Airlines has inaugurated a new daily direct service between New Orleans and Louisville, via Nashville.

- - - - -

The Middle Tennessee Broadcasting Co., Columbia, expects to have its new radio station on the air by this Fall. R. M. McKay, Jr., will be station manager.

- - - - -

The Tennessee Gas Company, Murfreesboro, in late May was granted permission by the State Railroad & Public Utilities Commission to reduce by 16% its gas rates in that city, and in Shelbyville, Columbia, and Maryville which also are served by this company. Authority to change the heating value of the gas to the standard 1300 B.t.u. also was granted.

- - - - -

Gartex Corporation, recently issued a State charter, is reported planning to build a new $400,000 textile mill in Knoxville. Threads, yarns, and fabrics will be manufactured, according to Southern Textile News.

- - - - -

The Willard Storage Battery Company is planning to locate a $600,000 plant at Memphis. Output will be 1200 units daily. About 100 persons will be employed.

- - - - -

United Hosiery Mills Corporation, Chattanooga, has moved its sales offices from the plant in East Chattanooga to the Chattanooga Bank Building. Other offices remain at the plant.

- - - - -

Knoxville Fertilizer Co., Bristol, is reported planning a new $400,000 plant.

- - - - -

The J. C. LaRue Canning Co., Hohenwald, is reported by the Nashville Banner to be enlarging its plant by the addition of eleven large retorts, new tomato and sweet potato lines, pea hullers, and several new "dry lines". The "dry line" capacity will be increased from 50,000 to 250,000 cans daily, making this one of the major canneries of the State and of the entire South.

Pennsylvania-Central Airlines in early June inaugurated service to Knoxville with four engine, 59 passenger Capitaliners, with daily fast flights to Birmingham, Pittsburgh, and New York. PCA, incidentally, expects to gradually merger their present name of PCA - The Capital Airline" into the more streamlined version of "Capital Airlines".

- - - - -

The Adams Warehouse Co., Greeneville, is expected to begin work about July 1 on their large new tobacco warehouse.

- - - - -

Suburban Bus Company, Inc., Nashville, has inaugurated regular daily service between that city and Portland, via Gallatin and Goodlettsville.

- - - - -

The Bristol Door & Lumber Co., founded in 1885, was sold on June 13 to Wm. F. Chatlas for a reported price of $575,000. The mill enploys 175. J. H. McCrary, manager of the Bristol company, resigned to become vice-president and general manager of Sells Lumber & Mfg. Co., at Johnson City.

- - - - -

Employees of Magnet Mills, Clinton, have started a 25-year club. Among the approximate 1000 workers, over 390 of them have been employed at the mills for 10 years or longer.

- - - -

Negotiations for purchase of "Line G" of the Wolf Creek Ordnance Plant at Milan by the U. S. Rubber Company are underway, according to a Washington dated news dispatch in the Nashville Banner of June 24.

- - - - -

The Norge Division of Borg-Warner, which recently acquired the "Air Products" plant at Chattanooga (see April Newsletter), has let to J. W. B. Lindsey & Company a contract for extensive remodeling and alteration of the property. Norge Division, which initially will make compressors, expects to start production by August 1. Future operations may be expanded to include complete assembly of heating and refrigerating units.

- - - - -

Ground for a new frozen food locker plant has been broken at Manchester but construction awaits the necessary priorities. J. L. Huffman and John Wiltshire are backing the venture.

- - - - -

Columbia Mill & Elevator Company in early June ceased operations for the first time since the mill was established in 1889 because of exhaustion of wheat supplies.

- - - -

Construction has begun at Clinton Engineer Works, Oak Ridge, on the $2,500,000 experimental plant designed to harness atomic power for industrial purposes. The plant, being built under contract by the Monsanto Chemical Company, is expected to be ready for operation by January 1, according to reported statements of War Department officials.

- - - - -

The Knoxville City Planning Commission has approved the proposed U. S. Navy Reserve Unit Training dock and base to be located along the north bank of Fort Loudon Lake in the downtown area. Final approval of the project is yet to be made in Washington.

- - - - -

Pearson Hardwood Flooring Co., Oneida, has leased its mill to the Tibbals Flooring Co., Columbus, O., which will dress lumber in transit and also produce prefabricated houses at Oneida.

- - - - -

"The Parisian", newspaper published in Paris for over 50 years, has been sold by John R. Rison, Jr., owner and publisher for 26 years, to James H. McKee of Gulfport, Miss. Mr. McKee, who is Southern sales manager for the Zenith Radio Corp., has placed his new paper under the management of Roger Thomas, recently of the West Point (Miss.) Daily Times Leader.

- - - - -

Rockwood Mills has donated several acres of land to the City of Rockwood for development of a city park. Funds for the park development are reported to have already been appropriated.

- - - - -

Fire, in early June, destroyed the mill of the Tennessee Handle Company, Cookeville. A. G. Maxwell, Sr., was owner of the mill, which employed around 100 workers.

- - - - -

The Q. O. Chemical Co. plant at Memphis, built during the war at a cost of $5 million for the production of furfural, is among 10 of the nation's wartime synthetic rubber production facilities that have been recommended for sale by the War Assets Administration.

- - - - -

Area A of the Holston Ordnance Works at Kingsport has been declared surplus by the War Assets Administration.

- - - - -

General Shoe Corp., Nashville, is shown in a recent Wall Street Journal report to have experienced a sharp increase in earnings and net profits up to April 30, end of the first half of its fiscal year. Per share common stock earnings of $2.04 in this first six months period exceeded those of the entire fiscal year 1944-45 by 33¢ per share. The company reports record-breaking demands for its shoes.

- - - - -

A modern 200-room hotel is reported being planned for early construction in Maryville. John A. Johnson, one of the principal construction contractors of the Oak Ridge atomic project and a major stockholder of the White Star Lines, is planning the hotel which will be well located to accommodate tourists to the nearby Smoky Mountain area.

- - - - -

Wayne Knitting Mills, Ft. Wayne, Ind., according to Moody's Industrials, has acquired the entire common stock of Humboldt Full-Fashioned Hosiery Mills, Inc., to which was recently granted a State charter for the manufacture of all kinds of hosiery. The charter authorized 10,000 shares of stock at $100 per share; initial capital $1,000. The plans for this new $750,000 Humboldt mill were described in the May Newsletter.

- - - - -

Southland Preserving Co., Chattanooga, was purchased in mid-June by Howard T. McPhail and associates from H. E. Collins and Frank C. Hamilton. Reported purchase price $250,000.

- - - - -

Bush Canning Co., pioneer Tennessee canning concern at Dandridge, recently made its first out-of-state expansion by purchase of the Blytheville (Ark.) Canning Co. The Dandridge plant of Bush Canning Company was established in 1907. Stokley Brothers, another pioneer canning concern, originally had an interest in the "Bush" plant, but this interest was acquired by the Bush family in 1916. A large "Bush" cannery also is operated at Clinton.

- - - - -

Quality Foods, Inc., Greeneville, has received a State charter for wholesale grocery operations, with initial capital of $250,000 and authorized capitalization of $1,000,000. C. B. Austin, Tom N. Austin, O. R. Lowry, C. H. Lyerly, and C. B. Burns are listed as incorporators.

- - - - -

Bond-Woolf & Co., Alcoa, has sold all its properties to Veach-May-Wilson, Inc., a newly organized company of which James R. May of Memphis - vice-president and treasurer of Hardwood Corp. of America - is a member. The sale includes the land, planing mill, flooring plant, and other property at Alcoa and timber holdings in North Carolina, Georgia, and Tennessee. The principal business of the Alcoa mill is railroad cross-ties. Purchase price was not revealed.

- - - - -

McMinnville Broadcasting Company has been issued a State charter for operation of a radio station. Incorporators are Sam J. and Ollie H. Albritton, and Joe B. Colbart.

- - - - -

Bryan University, Dayton, has received CPA approval for a $200,000 construction program that will permit completion of the school's administration building.

- - - - -

Knoxville Iron Works, according to the Knoxville Journal, is considering plans to manufacture nails. Between 6,000 and 10,000 kegs of nails monthly would be produced under the proposed operation. The Knoxville Iron Works is a subsidiary of a company that operates nail-producing units in Canada and Chicago and, in 1940, plans were made to set up a nail unit in Knoxville.

- - - - -

Nickajack Cave, well-known caverns at Shellmound - near Chattanooga, recently has been extensively improved and is being operated by Nickajack Lacaverns, Inc. Tours of the caverns are made in non-sinkable boats over the extensive underground lakes. The caverns are readily reached by car from U. S. Highway 41 between Chattanooga and Nashville.

- - - - -

The Tennessee Window Shade Co., Nashville, has been purchased by E. B. Berry. Location of the company has been moved to 908 Eighth Ave., South.

* * *

COL. PALMER TO HEAD COMMUNITY SERVICES COUNCIL

In its annual meeting, held in Nashville on June 20, the State Community Services Council elected as chairman Col. E. W. Palmer, president of the Kingsport Press. Col. Palmer, who also is a member of the State Planning Commission of which the Council is a division, succeeds Will R. Manier, Jr., who has been chairman since the organization's inception in 1942.

The Council is an outgrowth of the Tennessee War Services Council which, throughout the war, sponsored war drives and served as the key agency in civilian defense measures.

At the June meeting, the Council formulated its program for the coming year. Among the actions taken was a resolution to cooperate with the Tennessee Tourist & Development Association in its Statewide program of economic and social development (mentioned elsewhere in this issue of the Newsletter).

* * *

PLEASE: REPORT NEW INDUSTRIES AND PLANT SPACE

The "Newsletter" will appreciate cooperation from Tennessee towns and cities in making available to us information on all new local developments. If you have a new industry announced for the community - concrete block plant, creamery, textile mill, or what not - send us newspaper clipping on it or use form below. Similarly, we shall be grateful for cooperation in making known to us any vacant buildings that can be used for industrial purposes. Let us have the dope, so we can list them in the "Newsletter". That might bring you the industry you want.

Fill out and return to: Industrial Div., TSPC, 432-6th Ave., N., Nashville 3.

SHOE'S ON OTHER FOOT

If some one—some one man—told union members who they had to elect as officers of their union, there would be a quick rebellion. The some one—the one man—very promptly would be told where to go. The union members would insist upon electing their own union officers, without dictation from any individual.

But some one—some one man—has been telling the same union members and other citizens of Tennessee for years who they could and couldn't elect to public office in Tennessee and to Congress. That dictatorship has been permitted to exist for many years. Just how long it will be tolerated is up to the laboring people. This dictatorship will exist just so long as the people accept it.

Dictatorship was ended in Europe and Asia on the battle field. We can end it in Tennessee at the ballot box.

The same principle applies in both instances. During the war the side with the most men and best weapons won the war. In Tennessee the side with the most votes and the best political ammunition will win.

The best political ammunition is the need of the most people. The needs of the most people are not being served by our political dictatorship. The needs of those same most people will be served better if those people unite against selfish political dictatorship.

But the political bosses cannot be overthrown if the people who need better public servants don't qualify to vote and THEN VOTE FOR THE RIGHT CANDIDATES.

SENATOR STEWART AND OPA

Using his radio comment and the press, Senator (Me Too) Tom Stewart,

WHY YOU SHOULD VOTE!

The nation is in the throes of an unpredictable inflationary period—because many of you did not vote for the right kind of congressmen two years ago.

A great crisis confronted the nation when the OPA went out of existence June 30th. This crisis affects every wage earner—every man, woman and child in America, because, unless proper steps are taken by Congress immediately, it means that cost of living will skyrocket. Already in the brief time OPA price control has been out, prices have shot up, and are being increased in many cases, if not all cases, by those merchants who are advertising in the newspapers they will not raise prices.

President Truman courageously and rightfully vetoed the OPA bill sent to him by Congress. "To sign this bill would mean legalized inflation," the President said in his veto message. "Not to sign it may mean inflation also. But we shouldn't fool the people. If we are going to have inflation, let's have the courage to say so."

Apparently the Congress which is representing the American citizens lacks the courage of the President. It permitted the delaying tactics of Pappy O'Daniels, the Texas Democratic biscuit passer, and Republicans Taft and Wherry, more considerate of profits to business than a full dinner pail to the worker, to hold up any corrective legislation.

The country very quickly realized that without OPA prices would zoom. Prices of meats have shot up more than 100 per cent. Other food prices have also climbed the price ladder. The people have been aroused as they have never been aroused before.

The time to show the proper resentment is at the polls on August 1, when all the Tennessee Congressmen and one of the Tennessee senators who betrayed the working people in permitting death of OPA come up for renomination.

Instances like the disgraceful maneuvers which resulted in the present inflation (yes, we have it now) even though this inflation may be temporary and could be remedied with a quick OPA bill, should convince every citizen that he or she has a moral obligation to vote every election day—and vote for those office holders who are mindful of the needs of all the people, and not the servant of only a selfish few.

The OPA chicanery in Congress should convince all of us that big business is out to get control of Congress at this year's election. Labor's gains of the past 12 years hang in the balance. The vote of every citizen is important. To vote you must qualify. That means paying your poll tax and registering. An unqualified voter is as helpless as a life termer in Alcatraz.

Your bread and butter, your freedom, your future—are being decided by men elected to public office in Washington, in your community.

parrot for Senator McKellar in the Senate, is now brazenly and openly criticizing President Truman for vetoing the OPA Bill that he and Senator McKellar helped to skeletonize. Senator Stewart has long been a bitter critic of OPA while posing as a friend of little business and labor.

Senator Stewart boasted that he offered a resolution in the Senate a year ago that would have reduced OPA to the sorry level that it was when vetoed by President Truman. Senator Stewart has thereby recorded himself as favoring uncontrolled inflation and its dire consequences, long before now. However, he admits that rents are getting out of hand and believes that rent controls should be reinstated. Does he think that meat at $1.00 per pound, butter at 80c per pound, etc., is a situation to be considered well under control?

The Senator says that the people are about evenly divided on the question of whether or not an effective OPA should be reinstated. We hazard the guess that in 1948 when he comes before the people again for reelection, his calculations will undergo drastic revisions.

LEST WE FORGET

Following adjournment of the 74th Tennessee General Assembly, the legislative representatives of seven major Tennessee labor organizations issued a joint legislative report, this in April, 1945.

On page four of this report, the seven legislative representatives had this to say about Jim Nance McCord:

"An examination of Governor McCord's record as a Congressman in Washington, and then a comparison of his Congressional record with the sorry spectacle revealed by his record in the State Capitol, forces us to the opinion that the gentleman from Lewisburg sought and now holds the office of Governor merely to enjoy the flattery of the title. We suggest that labor is under no conceivable obligation to give Jim Nance McCord any political or moral support in the future."

Among others, one of the seven representatives whose signature appears on this report is Robert Mitchell of the Order of Railway Conductors, now supporting McCord for reelection. Insiders credit this flip-flop to McCord's

You may not have helped to elect those congressmen to kick the OPA around, but you will be responsible for the continuation of those men in office if you don't qualify and vote on August 1.

Members of organized labor have a solemn responsibility—for their own welfare and the welfare of their countrymen—to be citizens, active citizens, voting citizens. Members of organized labor who fail to do his or her duty on election day ignores his greatest heritage. Voting is an obligation no less binding morally than the obligation to shoulder arms against a foe invading the homeland. What right has one to criticize weak public officials and bad laws if he never votes?

Do not fail your country and your fellowmen!

Pay your poll tax and register while there is still time—before July 12.

Vote in the coming primary—August 1.

Elect friends of the people to office.

WHY NOT A CONGRESS TO GET ON THE JOB?

A Congress wanting workers to "stay on the job" must themselves **get on the job.** This being a campaign year, Representatives and Senators up for reelection are now wanting to adjourn. They want to come home to carry on their personal political campaigns. They want to tell their constituents what a great battle they have waged against "Communism". But they have not been fighting Communism; instead, through bad action and inaction, they have been perpetuating the economic injustices which breed Communism and threaten our American way of life.

The American People should tell these Congressmen to get off the job and stay off—they should replace them with men and/or women who are willing to stay on the job until it is done. The American people should elect men and women to Congress who are willing to put the people's interest first—who would stay on the job until—

1. They have recreated a strong OPA capable of restraining inflation.
2. Pass the Murray-Wagner-Dingell Bill to provide for better distribution of medical care—a bill which will extend the lives of 10 million Americans.
3. Until they pass a long-range housing program to provide homes for the millions of homeless Americans at prices working people can afford to pay.
4. Pass the bill to abolish the poll tax, giving 10 million citizens in seven states a free vote—a right to choose the public servants who make and administer the laws under which they and their children must live.
5. Until they pass without riders or crippling provisions a bill to raise the minimum wage to 65c—legislation that would benefit 10 million workers in America.
6. Pass all legislation necessary to insure adequate housing, medical care, and educational facilities for 13 million veterans.

When the American People elect a Congress that will do these things there will be no worries about labor staying on the job—the causes for strikes and labor unrest will have gone a long way toward elimination.

NARROW SQUEAK FOR LABOR

Organized labor had a narrow escape in June when Congress passed the vicious Case bill, designed by its sponsors to hamstring the worker.

It took a presidential veto to stop the mad rush of the anti-labor element in Congress. But has it been stopped?

There are other anti-labor bills pending in Congress. One of them,

Labor Commissioner, W. E. Jacobs, Sr., long time ORC member and political opportunist.

Jacobs dutifully goes about the state singing McCord's praises, in spite of the fact that the Tennessee Department of Labor has been practically annihilated under McCord's administration.

A DEMAGOGUE!

Theodore Bilbo, who has been called the worst demagogue in the United States Senate, has been re-elected in Mississippi over three opponents, principally because Mississippi is a poll tax state, and more citizens remained away from the polls than voted.

Bilbo received less than 100,000 votes to win the Democratic nomination without going to a runoff, and Democratic nomination is equivalent to election.

Mississippi has a population in excess of 2,000,000. Bilbo therefore was elected by less than 5 per cent of the citizenry.

That usually happens in a poll tax state.

Until the poll tax is removed in Mississippi, Tennessee and other southern states, we will have senators and congressmen who are elected by small minorities of the citizens.

But to get rid of the poll tax, we have to pay the poll tax to elect those officials who will help eliminate this objectionable voting tax.

LOOK UNDER THE SKIN OF UNION-BAITERS

JOSEPHUS DANIELS—Secretary of the Navy under President Wilson during World War I, and in later years under Roosevelt was Ambassador to Mexico. In later years he has touched elbows with the high and mighty, but he has never lost touch with the plain folks.

Just a short time ago in one of his leading editorials in the "News and Observer" of Raleigh, N. C., a daily newspaper of generous circulation, he had this to say:

"If you look under the skin of those who, while professing to love labor, are most blatant in denouncing all union leaders, you will find they are hostile to the right of workers to organize and bargain collectively.

" 'THEY ARE GOOD TO LABOR,' 'THEY HELP LABOR,' WITH A 'GOD ALMIGHTY' complex, while doing all in their power against labor organization, no matter by which organization.

"That is at the bottom of the denunciations of President Truman and the hate of Franklin Roosevelt. Neither of these Presidents was controlled by labor.

the Hobbs measure, has been passed, and despite the united protests of all organized labor, has been signed by the President. It is now a law.

Enactment of the Hobbs bill may be a forerunner of other bills designed to slow up progress of labor. All organized labor should watch Congress very closely, and start barrages of letters of protest to your congressmen whenever an anti-labor bill is up for consideration.

An indication of how the reactionaries are working in Congress is shown in the successful sneak attack on the Wagner Act recently in the House.

By a vote of 202 to 134 a rider was attached to the National Labor Relations Board appropriation prohibiting the Board from using funds for any cases involving over a million food processing workers who are entitled under the law to protection of the Wagner Act.

This "rider" would remove from agricultural labor the protection guaranteed to other workers by the Wagner Act.

POLITICAL RECOMMENDATIONS OF JOINT LABOR LEGISLATIVE COMMITTEE

The State Legislative Board of the Brotherhood of Locomotive Firemen and Enginemen has unanimously endorsed Col. Gordon Browning.

"Col. Browning's record as Governor in 1937-38, while far from perfect, at least showed substantial accomplishments, and, as a citizen, he has shown himself to be a man who believes in doing a job and does it.

"Certainly the same cannot be said for Governor McCord, whose policy of do-nothing subservience to one man is enough to cause all Tennessee citizens who hope for progress to scratch his name on the ballot August 1st. There will be no progress in Tennessee—only progressive reaction and continued disintegration of popular government—as long as people like Jim McCord occupy the Governor's chair.

"We like good solid men who have the courage to fight for what they believe is right. Gordon Browning has proved himself to be such a man. He served Tennessee and fought for the interests of the people as a public official. He served our country in both world wars, and even now is serving the cause of democracy in the American Army of Occupation in Europe.

"Labor owes Browning nothing for any special favors during his one term as Governor, because he certainly gave labor no special consideration. But labor seeks no special consideration. The Brotherhood of Locomotive Firemen and Enginemen asks only for justice under democratic government.

"We believe Gordon Browning is a man of honesty, fairness, integrity, unselfishness and ability. Therefore, we have endorsed his candidacy for Governor and urgently recommend that all members of the Brotherhood, their families and friends use their influence in behalf of Col. Browning's candidacy."

Likewise, the Teamster's State Council of Truck Drivers, A. F. of L., and the Brotherhood of Railroad Trainmen have endorsed the candidacy of Col. Browning for Governor and the candidacy of E. W. (Ned) Carmack for the U. S. Senate.

AN EDITORIAL

(The Nashville Tennessean)

The endorsement of Lt.-Col. Gordon Browning for Governor by the Brotherhood of Locomotive Firemen and Enginemen of Tennessee is not without a special significance. Senator McKellar of the Crump Coalition, has claimed the support of the national office of this

"Those who fight against the right of labor to organize and bargain collectively are engaged in a losing battle. It has come in all enlightened industries and it is coming in all industries—enlightened or unenlightened.

"The sooner management recognizes this truth and accepts it and joins with labor in just collective bargaining the better it will be for all concerned."

WOMEN NEED UNIONS JUST AS MUCH AS MEN

Labor Department Leaflet Stresses Benefits of Membership In Workers' Organizations

Women have just as great a stake as men in strong unions. The point was driven home by the Women's Bureau of the Department of Labor in a recent leaflet for distribution to feminine workers.

Membership of women in unions has increased by leaps and bounds, the Bureau said. It urged women to participate actively in union affairs for their own welfare and that of all workers.

"Among the benefits which women have derived through unions," the Bureau added, "are better jobs with higher wages, equal pay for the job, shorter hours, vacations with pay and other benefits." It's to the interest of organized workers to keep this work going for the benefit of future protection of all.

A WARNING THAT MAY YET HOLD GOOD

Something to Remember

President Dan Tobin of the Teamsters International Union, who is also head of the labor division of the Democratic Party, recently uttered some fine words of wisdom:

"President Truman should say in unequivocal language to those reactionary, labor - hating Democrats: 'What are you trying to do, wreck the Democratic Party, throw it out of office for the next 12 or 20 years, as happened after the first World War?'"

Tobin warned the Democrats may lose control of Congress next year and Truman defeated in 1948 because of "labor-hating Democrats." Obviously he was referring to southern Democrats whose hatred of labor has caused them to team up with reactionary Republicans to beat various progressive legislative measures in Congress.

Remember! It happened after the first World War. The Republicans came back, and the Democrats were restored to majority status in Congress and the White House only because of labor's vote. Labor will not keep on supporting any party or administration which permits the workers to be knifed in the back.

Brotherhood. The decision of the Tennessee group shows not only a salutary independence, but, on the ground, superior judgment.

The Brotherhood gives its reasons for siding with Browning against McCord, also of the Crump coalition.

We like good solid men who have the courage to fight for what they believe is right. . . Labor owes Browning nothing in return for any special favors during his term as Governor, because he certainly gave labor no special consideration. The Brotherhood of Locomotive Firemen and Enginemen asks only for justice—under democratic government.

This is a clean statement in the best tradition of labor statesmanship. Any citizen, still in single possession of his own vote, could subscribe to it with fervor.

A TIMELY SUGGESTION TO ALL VETS

The Veterans for Browning Committee, of Huntington, Carroll County, has entered a formal protest with Frank Hobbs, chairman of the State Democratic Executive Committee, on his "effort to have the coalition candidates' names placed first on the ballot."

In a registered letter signed by Edwin Williams, chairman, and H. B. Scarbourough, vice-chairman, of the Committee, the veterans warned Hobbs that they intended to see that Tennessee election laws are enforced in Carroll County.

"This is to offer protest of the Veterans of Carroll County, home of Lt.-Col. Gordon Browning, on your effort to have the law violated by placing coalition candidates' names first on the ballot" . . . the letter continued: "This is to inform you that his friends in Carroll County are going to see that the Tennessee election laws are enforced in Carroll County".

"We are calling on the Veterans from Carter County, too, and including Shelby County, to rise up in their might and demand that the Veterans on our ticket—Col. Browning and E. W. (Ned) Carmack —get what's coming to them". . . The law specifically states that the names of candidates "shall be put on the ballot in alphabetical order". . . "As it happens, Browning's name will come before McCord's and that of Carmack before McKellar" . . .

"We insist that you so instruct election officials over the state, and if you refuse to do so, it is time for all Veterans to get ready to fight again."

Amen! The thousands of members of organized labor in Tennessee who are veterans should take heed from their comrades in Huntington.

To vote in the primary, poll tax must be paid up to and inclusive of the day of election.

OPPORTUNITIES IN CONCESSIONIZED DEPARTMENT STORES

By the Editors of Forbes Magazine of Business
(Reproduced by special permission)

If you were a veteran with only a few hundred dollars to invest in a small business, would you be glad of an opportunity to obtain a counter of your own in a department store on a concession basis? You would not have to face the major problem of attracting people into the store, for they'd already be there. Your capital could be devoted largely to the purchase of a stock of suitable merchandise.

There have been large department stores composed almost entirely of departments owned by independent concessionaires, notably Goldblatt's, in Chicago. Today, most department stores own and operate all departments themselves, although in some instances departments are rented out on a concession plan. This is especially true of book departments. But although available concessions in existing stores are rare, there is a definite opportunity today for new department stores organized entirely on the concession system.

The parking problem in shopping areas, where virtually all big department stores are located, is the crux of this situation. The great success of drive-in stores of all kinds, at the edge of a city, in easy reach of big populations, indicates the solution. The drive-in shopping centers are now, for the most part, limited to the types of businesses usually found in neighborhood shopping centers - food stores, drug stores, dry cleaning stores, barber shops, theaters, ice cream stores, restaurants, bowling alleys, etc. To do its major shopping, the public must still take advantage of the department store. A fairly large store, located in a typical, thriving drive-in business area, could do a substantial business.

A concession-system department store may be started by any enterprising business man, his investment consisting chiefly of a suitable building, with a large parking lot, and a fund for initial advertising. Each concessionaire may be required to supply his own counter, shelving and equipment, of a standard design - to create an over-all harmony of decoration. Each concessionaire will pay rent for the space he occupies, and this will constitute the chief if not exclusive revenue of the store owner.

Let's consider a concrete example. Here is a one-story building, the size of a large garage, perhaps 80' x 150', or a total of 12,000 square feet of floor space, 70% of which may be utilized for retail concessions, the balance being needed for aisle space and other purposes. The rental space is 8,400 square feet. How much space does a small department require? If it consists of a display counter, and some shelves behind the counter, 100 square feet is ordinarily sufficient. This allows for a 10-foot counter and shelves of equal length. On this basis, there would be room in the store for some 80-odd concessions. At $25 a month rent, 80 departments would bring the store owner a gross of $2,000 a month.

The average department, in terms of merchandise, would of necessity be broken down. Take housewares, for example: One department would not offer all the goods normally sold in this section, but would specialize in certain items. One concessionaire would handle nothing but cooking pots; another, chinaware; a third, miscellaneous utensils; and so on. Various concession opportunities would include candy, soft drinks, women's hats, dresses, house aprons, blankets, towels, table linen, stationery, greeting cards, toys,

radios, gloves, fountain pens, lamps, and every other item normally to be found in a large store. Those concessionaires requiring more than 100 square feet would simply pay prorata for additional space needed. But the minimum spaces should be available to veterans with minimum capital.

Advertising can be paid for on a co-operative basis. The owner of the store can organize a co-operative credit system, for charge accounts, each concessionaire responsible for his own accounts, but having the benefit of a main credit department to send bills and receive payments.

The prospective originator of such a concessionized department store should line up his concessionaires before actually erecting the building. The method, here, would be to obtain an option for a suitable piece of land, plus an architect's sketch of the proposed building, and a floor plan. Local advertising could secure the veterans who would want to participate in the venture, and who would rent space immediately, signing a lease and paying a deposit to bind the bargain. The advertisement would, of course, describe the project and list the concessions available. Not until 70% or more of the concession space had been contracted for would it be necessary to go ahead with the project, exercising the option and beginning the building. The concession contract would, of course, specify the design of the counter and shelving, and clearly outline the responsibilities and obligations of each party. Each concessionaire, for example, might be required to agree to contribute not less than $5 a month for advertising.

The store's basement would necessarily be divided into individual stock rooms, the concessionaire being required to supply his own shelving and lock. The building should afford at least one elevator, or manual hoist, to facilitate moving heavy merchandise from floor to basement. A rear delivery entrance for receiving merchandise should be included.

The concessions need not necessarily be made available only to veterans, but a store with all departments owned by veterans would be likely to have the public's enthusiastic co-operation from the start.

The advantage of this system to the veteran with very limited capital should be obvious, for his overhead expenses would be minimized, his opportunity to make good increased. A store with as many as 80 departments, not unlike a municipal market, is a natural attraction to shoppers. Add the novelty of the idea, the solution of the motorist's shopping problem, the unavoidable publicity, and you have the means of attracting large numbers of people.

It should be understood, however, that this is essentially a project for a man who has had the experience necessary for the successful operation of a retail store. Anyone who lacks such experience himself would be well advised to employ a competent manager, or to go into business with someone with the required background. Capital, moreover, should be as ample as possible. Entering the business with too small an investment may doom it to failure from the start.

Care should also be exercised in the granting of concessions; a veteran or anyone else who wants to go into retailing, on however small a scale, is likely to succeed only if he has had experience, and knows where to buy his merchandise at the best prices, what to buy and when to buy, in addition to many other factors of experience involved. A man totally lacking in such knowledge will probably come to grief.

There are thousands of veterans who have behind them a good deal of experience in retailing, but who lack sufficient capital to start entire stores of their own. The concession plan can provide them with opportunities within their scope.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of the industry listed below, or of any listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

136. Slide Fasteners: Manufacturer desires 20,000 sq. ft. brick or concrete building, with land available for expansion. Single story preferred. Rail spur advantageous but not essential. Initial employment 50, 70% female.

* * *

NASHVILLE GETS NATURAL GAS AND RATE CUT

Tennessee Natural Gas Lines Inc., in June completed its new feeder line into Nashville and, on the 28th, natural gas was introduced into the municipal system for the first time in the city s history. Currently, a mixture of artificial and natural gases is being fed into the city mains, but complete change over to natural gas is expected by early Fall.

Reduction by approximately 25% of the Nashville Gas & Heating Company s rate schedule has been approved by the Tennessee Railroad & Public Utilities Commission, effective on the first billing date after introduction of natural gas into the city system. Reduction affects industrial and commercial rates, as well as residential rates.

Wade Thompson, president of Tennessee Natural Gas Lines, Inc., reports that his company's engineers are now surveying prospective routes for extension of natural gas lines to serve other Middle Tennessee areas and the East Tennessee region between Knoxville and Chattanooga. Applications for these extensions are expected to be filed soon with State and Federal utility authorities.

SALES AND PURCHASE OPPORTUNITIES

Manufacturers Representatives: World wide sales representation offered to Tennessee manufacturers, both large and small, on textiles, hosiery, foods, chemicals, hardware, pottery, jewelry, electrical products, toys, leather and rubber goods, and numerous other products. Contact the Diamond Sales & Engineering Company, 500 Rowlands Bldg. Columbus 15, Ohio.

Hosiery Loopers: Supplies of both white and colored hosiery looper clips for rug manufacture are sought by midwestern concern offering steady sale outlet.

Handicrafts: Cooperative organization of small handicraft shops in Cumberland Mountain area of Tennessee wants to make sales arrangement on gifts, toys and novelties through wholesale outlets, with drop shipments directly to customer and invoice to wholesaler on shipment. Can supply various styles of book racks, corner shelves, pipe racks, ink wells, desk name plates, wall plaques, recipe boxes, and similar items made of cedar, walnut, and other native woods.

Coal Mine: The Government owned coal mine near New River, Tenn., operated during the war by the Brimstone Coal Corp., is being offered for sale or lease through the War Assets Administration. The mine has an annual capacity of about 300,000 tons. Included in the sale is some 1400 acres of coal lands with estimated reserves of 24 million tons. Address inquiries on details or offers of proposals to W. A. A., Industrial Div. of Real Property, Room 4050, RR. Retirement Bldg., Washington 25, D. C.

Electrical Appliances: Distributor of electrical appliances seeks several outstanding jobbers for electric iron retailing around $10.00.

* * *

DUPONT RENEWS INTEREST IN CHATTANOOGA PLANT

Renewal of interest by E. I. duPont de Nemours & Co., in the construction at Chattanooga of a proposed $25-million nylon plant was indicated in July by the placement with Ingalls Iron Works, Birmingham, of an order for 300 tons of structural steel. A tentative order for 2300 tons of additional steel also was given, subject to cancellation. The proposed plant, according to a company official as reported in Moody's Industrials, is "just an idea", dependent on availability of construction materials and numerous other factors; no final decision has been made by the executive committee and no construction plans have been drawn.

The duPont company, early in 1944, purchased a 600 acre site near Chattanooga for the proposed plant.

* * *

INDUSTRIAL PLANTS AND SITES AVAILABLE

For Sale East Tennessee

Two brick and stone buildings convertible into industrial building totaling 50,000 sq. ft., on 5 acre site. Less than mile from railroad, with existing spur grade to site (ties and rails removed). Adjoining 8,000-acre tract for sale separately, including 2 large homes, 9 small houses, 10 room hotel, 100,000 gal. concrete reservoir, 40-million gallon lake, warehouse and commissary buildings, 10 wells, 65,000 cords pulpwood, coal and building stone. TVA power line on property.

* * *

TENNESSEE VALLEY MARKET STUDY TO BE RELEASED

Release of a marketing study on 12 communities in the Tennessee Valley region is anticipated by mid August. Prepared as a cooperative project by the State planning agencies of Tennessee, North Carolina and Georgia and the Tennessee Valley Authority, Commerce Department, the study presents data on population, housing, income, retail sales, and auto ownership for Memphis, Nashville, Chattanooga, Knoxville in Tennessee, and 8 other cities of Kentucky, Georgia, Alabama, and North Carolina. The data are tabulated by zones of 50, 100, 150, and 300 mile radii of each community, with accompanying maps.

Probable charge for this study will not exceed 50¢, and the "Newsletter" will accept tentative orders now, with payment on delivery.

* * *

DAYTON EXPERIENCING INDUSTRIAL EXPANSION

Purchase last year by Wesley Gardner of Nashville of large holdings of the old Dayton Coal & Iron Company properties near Dayton is resulting in a definite "boom" for that area.

A brick building on the property was remodeled and leased for hosiery manufacture, giving employment to some 75 persons. A sawmill has been established for sawing of timber from Mr. Gardner's holdings on Cumberland Mountain, and a planing mill is under erection to supply lumber for construction of new homes in the Dayton area. A crusher plant also has been established to process slag from old furnace dumps for use as concrete aggregate, part of which will supply the needs of a new concrete block plant planned by Mr. Gardner for early operation at Dayton. The opening of a quarry and rock-crushing plant and of a washing and screening plant to recover coke from old coke-oven dumps are among other new developments being planned.

* * *

EMPLOYMENT TRENDS IN TENNESSEE TO JUNE 1ST

(Summarized from June issues of U.S.E.S. and T.D.E.S. "Labor Market Letters")

Employment trends in the State are summarized here for only a few selected areas, outside of the major cities; much data on basic conditions have necessarily been omitted. In other areas listed below, conditions have not changed materially since our last summary in May issue in short, those areas mainly continued to have moderate to large labor surpluses employment remained essentially static during April and May, and prospects for new industries with increased job opportunities were either nil or not definitely assured, up to early June Such areas include: East Tennessee - Bristol, Johnson City, Lafollette, Newport and Rogersville; Middle Tennessee - Clarksville, Shelbyville, Dickson, Gallatin, Lawrenceburg, Lebanon, Murfreesboro, Pulaski, Savannah, Livingston, Sparta, Tullahoma, and Winchester; West Tennessee - Paris and Union City.

For copies of "Labor Market Letters", write Tennessee Department of Employment Security, Nashville or your local U.S.E.S. office.

Middle Tennessee

Lewisburg area: Current labor surplus, with slight increase since V-J Day. Local stove plant has tripled space and expected to begin production July 15, reaching new peak employment early next year; will need to import key workers but most jobs will be filled by local workers trained by company under G. I. program. One of pencil plants also expanding.

Columbia area: Slight employment increase in last two months but overall unemployment increased. Total of less than 1,000 new jobs during next four months. In Maury County, some seasonal expansion in food processing and expansion of apparel plant but job opportunities negligible. Shoe plant construction at Centerville progressing, despite material delays. Expansion of shoe plant at Hohenwald, Lewis County, nearly complete; 100 extra workers needed in next four months.

Winchester area: Current unemployment high but many are displaced war workers drawn from local farms who are unwilling to accept present local wages. Projected new garment plant for Winchester delayed by building restrictions; company operating in two existing buildings probably will increase employment in next four months.

Cookeville area: Eleven establishments contacted showed increase of 150, mainly for Center Hill Dam construction. Practically no labor demand in Jackson County. Cookeville steadily developing commercially; some prospects for industrial expansion; construction underway on 300 houses and three TPI dormitories. Area as a whole, unemployment continues at high level.

East Tennessee

Elizabethton area: Large labor surplus, despite two large rayon plants at Elizabethton, Carter County; employment essentially static and not expected to increase next two months, except in construction. Early resumption of work on TVA Watauga and Holston dams will afford immediately 300 jobs; eventually 1300 or more.

Greeneville area: Currently, surplus of 4,000 veterans of which 3,000 wish to return to farms. Two or three projected new industries may soon take up part of surplus.

Morristown area: Employment almost stable during past two months except for seasonal increases in food processing with peaks between June and August; also some increase in mining, due to return of strikers. Little change expected for next two months, except in seasonal plants. Construction on new industrial plants being curtailed by material shortages. Expect all labor needs to be met from local surplus.

Athens area: Increasing surplus; projected demands for next two months little changed. In Meigs County, void of industries, situation critical. Farm implement factory under

construction at Athens McMinn County; number employees and starting date not known. Foundry for Etowah rumored company to lease old L. & N. RR. shops.

Cleveland area: Industrialized area in which employment gradually increased during and since war and expected to continue. Expansion demand, estimated at 1200, is in manufacturing and is diversified; due to several old establishments and some new ones expanding. Known supply from U.S.E.S. claim record file is 1614, representing probably 75% of total.

Loudon area: Slight upward trend in employment, mainly in iron and steel and textiles, offsetting certain non-manufacturing losses Present employment level considered normal. New industries, including lumber food processing, and iron and steel, are in construction stage; will create demand estimated at about 255 male workers. Construction also expected to increase demand sharply, when materials available. Unemployment increasing slightly, but unskilled workers in demand.

Maryville area: Employment trend continues upward in this highly industrialized area but unemployment increasing. Increases forecast in aluminum industry at Alcoa; in textile industry, if new equipment becomes available. No difficulty in meeting expected seasonal increases in food processing but shortage of experienced textile operators. Qualitative factors are preventing absorption of available labor surplus.

Rockwood area: Total employment up about 4% to end of May, with numerically largest increase being in manufacturing By August, 12% increase anticipated in manufacturing employment; trade, 5%. Unemployment still excessive; known foreseeable demand will absorb only small fraction of total.

Harriman area: Unemployment continues excessive, although return of coal mine strikers indicates probable slight upward trend in next few months. However, outlook gloomy for full absorption of surplus, largely veterans and displaced CEW workers.

West Tennessee

Dyersburg area: Essentially no change past two months, except for seasonal increase in food processing industries. Considerable labor surplus but large part already absorbed into agricultural activities; much of remainder can and will be so utilized, unless drawn away by industrial employment.

Jackson area: Large labor surplus, mainly male, continues. Surplus will remain acute because current limited industrial expansion is in plants using mainly female labor. Little expansion by old plants but several new plants scattered over area should increase jobs by 1,000 in next few months. The new Brownsville glove plant, has begun limited operations, as has small ladies sportswear plant in Jackson. Garment plants projected for Somerville and Lexington not yet in operation.

Milan area: As noted elsewhere in this issue, new U. S. Rubber Company operations at Milan will eventually employ several hundred workers. This, with apparel and other textile plants planned for Huntingdon, Trezevant, and Humboldt, should absorb over 1,000 workers.

Selmer area: As noted here in May, construction underway on new industrial plants at Selmer, Bolivar, and Adamsville, giving potential demand for several hundred but, currently, there is a labor surplus.

* * *

TVA ISSUES RIVER TRANSPORTATION STUDY

A study on River Shipment of Iron and Steel Articles From and To Points in the Southeast, Via the Tennessee River was issued in June by the TVA Commerce Department, River Transportation Division. Because of the navigation improvements on Tennessee River through the TVA developments, the report seeks to demonstrate the economy of

water transportation for movements of iron and steel products in and out of the Southeast. Analyses and comparisons of rail-barge transportation costs are made with those of alternative transportation methods between actual shipping points and existing markets, the findings being illustrated by 9 charts and maps and 11 tables.

Salient findings of the report are that: (1) manufactured iron and steel articles made at mid-west and eastern centers on the Inland Waterway system can move to points in the Southeast, via Tennessee River, at transportation savings averaging $2.45 per ton and (2) pig iron, cast iron pipe and scrap iron can move from Tennessee River ports to points on the Illinois Mississippi, and Ohio rivers at savings up to $3.21, $4.68, and $2.18 per ton, and averaging $1.53, $1.37 and $1.32 per ton respectively.

The report was prepared by W. J. Sheehan and J. F. Boyd of the TVA River Transportation Division.

PRODUCTION LINE NEWS AND NOTES

Walking Horse Show Planned For Shelbyville

The Tennessee Walking Horse National Celebration's Eighth Annual Show will be held at Shelbyville, Sept. 4-7, inclusive. The Shelbyville Lion's Club is sponsoring publication of the Official Souvenir Program.

Manchester Organizes Industrial Corporation

The business men of Manchester, at a meeting in late June, organized the Manchester Industrial Corporation, electing as temporary officers Mr. Henry Short as president and Mr. Geo. Pope as secretary. As indicated here in our May issue, the corporation will obtain, through a public stock offering, a $100,000 fund for providing sites and other facilities for new industries desiring to locate in Manchester. Pledges of about $30,000 had been received by mid-July, according to the Manchester Times.

Cookeville Initiates Move For New Industry

Cookeville in early July was reported negotiating with a garment manufacturer for location of a plant in that city. The company, said to be a sports apparel concern operating several units in Tennessee, will require a plant of about 13,000 sq. ft. and would expect to employ between 75 and 100 workers.

At a meeting of local business men, more than half of the $25,000 required for construction of the plant was subscribed and a temporary organization, headed by Benton Terry, was set up to administer the building fund. It has been suggested that a permanent organization be formed under the name of Cookeville Industrial Development Association.

Nationwide Motor Vehicle Standards Proposed

A schedule of standards for maximum dimensions, weights, and speeds of motor trucks and busses has been proposed by the American Association of State Highway Officials, with recommendation for nationwide adoption. Among maxima suggested are: width, 96 inches; height, 16 feet; overall length, single truck, 35 feet - single bus, 40 feet; any combination of vehicles (not over 2 units), 60-foot length; truck speed, 45 m.p.h.; load per axle, 18,000 lbs. Details of the proposal were published in Engineering News Record for May, 1946, and a pamphlet on the subject can be obtained from the Association offices, 1220 National Press Bldg., Washington 4, D. C.

TVA Annual Report Available

The Tennessee Valley Authority has issued its annual report, covering the fiscal year of 1945, under the title of Unified Valley Development.

U. S. Dept. Commerce Opens Chattanooga Office

The newly established Chattanooga district office of the U. S. Department of Commerce will serve Middle and East Tennessee, rendering assistance to small business through marketing analyses, technical advices, and similar services. Al B. Clarke of Chattanooga is manager of the new office, at 924 James Bldg.

"Economics of the Cotton Textile Industry"

A comprehensive 207-page study of all phases of the cotton textile industry was issued under the above title by the National Industrial Conference Board (New York) for presentation before the recent annual meeting of the American Cotton Manufacturers Association. The study, prepared by Dr. Jules Bachman of New York University and M. R. Gainsbrugh, Chief Economist of the Conference Board, is the first of a series of industry base books to be published by the NICB. The second, on the petroleum industry, is nearing completion.

"deadline" Makes Debut

deadline is a new monthly publication of the National Council of Industrial Editors. As stated editorially in the initial May issue, deadline seeks to provide a service for gathering from every available source any and all information of value to house publication editors and to distribute the net results to every known house publication editor in the United States and Canada. The first issue, 36 pages, carries articles on Council affairs, news of local industrial editors associations, and feature stories on the role of house publications in industrial management problems.

Dairy Industry Featured in New Color Film

Scheduled for release late last month was a full color, sound movie on "Dairying in Tennessee", which traces the State's development of this important agricultural industry. Starting with the "old red cow" brought in by pioneer families, the film presents historical scenes illustrating the early efforts in marketing, butterfat testing, keeping of herd records, and similar events through to the State's present-day $87-million dairy industry. The growth of dairy processing plants, herd management, and scientific breeding are also featured in the film. Stressed throughout the film is the importance of a sound, practical farm management plan to successful dairying.

The film, which runs about 20 minutes, was produced under the direction of the Extension Service of the University of Tennessee College of Agriculture, in cooperation with the U. S. Dept. of Agriculture. Shooting was done by Sam P. Orleans & Associates of Knoxville. Distribution will be through the U. T. film library.

* * *

DO YOU KNOW THAT -

The Tennessee wing of the Civil Air Patrol, Nashville, is now equipped to take aerial photographs of industrial plant locations and other industrial views. Large-scale photos of proposed industrial plant sites can be furnished for detail engineering studies of large projects. Existing industries are finding aerial photos to be of value in studying plant lay-outs for improved operating efficiency.

For further information on the CAP photo service, contact Paul W. Turner, 401 Chamber of Commerce Bldg., Nashville 3.

* * *

BUSINESS SERVICES, PUBLICATIONS AND OTHER AIDS

The Nashville office of RFC has issued a booklet on "RFC Aids To Small Business". Three principal services offered by RFC to small Tennessee businesses are: consultant or advisory assistance on engineering and construction, purchase and installation of equipment, cost accounting, and similar technical problems; acting as small businesses' representative in the purchase of government surplus property; and lending to business enterprises, either through local banking facilities or directly in the event banking credit is not available. During March, April, and May, 1946, the RFC Nashville office reported a total of 86 loans to small business, aggregating $4,840,000. Copies may be obtained from Lee Davis, Acting State Manager in the RFC s Nashville office

To assist communities, states, and regions in making factual analysis of their industrial advantages, the Office of Small Business of the U S. Department of Commerce has issued a guide to definite procedures in determining an area s characteristics in relation to 14 basic factors of industrial plant location. The bulletin, entitled Basic Industrial Location Factors, was prepared by Frederic W. Olmstead, Area Development Division.

Arrangement of the bulletin is such as to prevent "yes" and "no" replies to the series of questions, and this should tend to encourage local groups to make factual examination of their area s situation. As is pointed out, "Most industries will finally locate where the economic factors are most favorable.... If (an) area s presentation of its advantages is factual, concise, and clearly expressed, the area will find that interested industry will give it more favorable consideration than would be shown toward other localities which have not demonstrated their merit by a similarly prepared evaluation of their advantages"

The bulletin contains a comprehensive listing of industries, which is keyed to a quick reference chart of the basic factors influencing the location of each type of industry. Copies are available from the Office of Small Business, Area Development Div., U. S. Dept. Commerce, Washington 25 D C.

Communities which desire new industries but are unable to locally finance construction of plant facilities may be interested in the following plan offered by an out of State corporation, designated here as the "X Corporation":

The plant site selected by the interested party will be purchased by the "X Corporation" at the former's specified price. Corporation then will engage the services of a leading firm of architects and engineers to handle design and construction of required plant facilities and will pay entire construction cost on basis approved by interested party. All such services will be conditioned on execution, by interested party, of a net lease of approximately 25 years period, with option to tenant for an additional 25-year renewal, at a net rental averaging less than 6% per annum on total land and construction costs over the first 25-year period. The rental, during the original term of lease, can be scaled either upward or downward.

A similar plan is offered by "X Corporation" on already constructed industrial facilities, with funds available for loan on such properties at rates as low as 3% per annum over periods up to 25 years. Interested parties should contact "Newsletter" Editor for further information.

A second edition of the OPA Handbook of Basic Economic Data, issued in May, contains about 900 series of data classified under the following groupings: Prices - retail, wholesale and farm; Labor Force, Total Employment, and Unemployment; Industrial Activity; Agricultural Activity; Business Activity; National Product and Income; Federal Fiscal Activity; and Social Security Activity.

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Mastercraft Products, Inc., Detroit manufacturer of plastic bathroom accessories, has selected Johnson City for location of a branch plant, expected to begin operations by the end of July. As announced by the local Chamber of Commerce, initial operations will be in a part of the Deakins-Moore Company building. The company is reported planning eventual transfer of all its Michigan production to Johnson City, with expansion into other lines of plastic products. Approximately 15 persons are to be employed at the start of operations

- - -

Volunteer Hosiery Mills, Inc., Nashville, has been granted a State charter to engage in the manufacture and dyeing of hosiery, knit goods, and other textiles. Authorized capitalization is $250,000.

- - - - -

Eastern Airlines has inaugurated two new daily flights: north from Nashville to Louisville and south from Nashville to Atlanta. Flights leave Nashville at 8:55 a.m. (DST) and 1:30 a.m., respectively.

- - -

Dr. Pepper Bottling Co., Nashville, has been granted a city permit for erection of a new $65,000 bottling plant.

- - - - -

Publix Shirt Corporation is the new name recently adopted by S. Liebovitz & Sons, Inc., New York shirt manufacturers. The corporation operates a large unit at Knoxville.

- - - - -

The Empire Pencil Co., Shelbyville, and its subsidiary unit - Empire Graphite Co., were purchased early in July by Henry Hassenfield of Providence, R. I., who also operates the Hassenfield Pencil Co., Pawtucket, R. I. The Empire Pencil Company's plant was established at Shelbyville in 1934 by Col. Frank Beck. Later, in 1937, the three local pencil companies established the graphite plant which was subsequently purchased by Col. Beck. The amount involved in the recent sale was not disclosed.

- - - - -

Non-scheduled air transport service has been started at Knoxville by Tom Kesterson, formerly chief pilot for the TVA. A twin-engine Douglas DC-3, with 3-ton cargo or 27-passenger capacity, is being used. Major flights have included round trips to Louisville for the Kentucky Derby and to Indianapolis for the Speedway races, full passenger loads being carried each trip.

- - - - -

The "Katch-N-Karry" roach trap manufactured by Glassman Mfg. Co., Jackson, is designed to provide fishermen with live bait and to furnish a means of carrying them, all in a single unit. In addition, the trap can be used as a seat. Price is reasonable; dealers should contact company direct.

- - - - -

P & S Chair Co., Madison, which started operations on May 1 in a new $27,000 plant, currently is employing 32 workers. A. D. Perry is president; Fred Huff, plant manager.

- - - - -

Wellwood Development Corp., Chattanooga, is reported planning to build 115 new homes in that city, at an estimated cost of $1,200,000.

- - - - -

Southern Athletic Co., Knoxville, is reported by Southern Textile News to be starting erection of a modern, air-conditioned, 3-story plant of 50,000 sq. ft. The new plant will enable the company to increase its output of boys' suits from the current 2,000 per week to 7,000 and to increase employment to 600, according to Herman D. Wynn, president. Completion of the new plant is expected in 105 working days; the old plant will be torn down.

- - - -

Franchise for a telephone service in the Daisy and Soddy communities has been granted by the State R.R. & P. U. Commission to H. W. Vaughn and associates. Rate schedule for the 300 subscribers also was approved

- - -

Local bus service which started a few weeks ago in Shelbyville is proving so successful as to warrant addition of two new busses to expand its service in the city.

- - - -

Sale of the first post-war consignment of Japanese raw silk to U. S. manufacturers is reported to have included purchases by the Se-Ling Hosiery Mills, Inc., Nashville, and the Miller-Smith Hosiery Mills of Chattanooga. A total of 5,130 bales, valued at $6,700,000, was sold through an RFC subsidiary.

- - - - -

Plans for the large new textile mill at Humboldt (See July "Newsletter") have been prepared by Lockwood-Green Engineers, Inc., New York City, according to Southern Textile News. Estimated cost, including equipment, is reported at $2,000,000.

- - - -

The City of Murfreesboro has approved a contract with the Duncan Meter Company for a six-month trial installation of about 350 parking meters. Cost of the meters is reported at $75 each, plus shipping and installation charges.

- - - - -

Kingsport and both Bristol, Tenn., and Bristol, Va., in late June, returned to their normal Eastern Standard time, after only a few weeks trial of daylight savings time.

- - - - -

Bomar Field, new municipal airport of Shelbyville, was unofficially opened in late June, although the formal opening may be delayed until Fall. Two 2150-foot runways are completed and a third, 1700 feet long, is under construction. Robert E. Bomar is manager of the new airport.

- - - - -

C. D. Harper, President of the Homebuilders Supply Co. of Hartsville and Cornelius S. Creeden of Hartsville & Hollywood, Calif., have purchased Burritt College, 98 yr. old institution at Spencer, to be opened Sept. 16 as Burritt Preparatory School for Boys. Dr. James Monroe Smith, former president of Louisiana State University, will head the faculty.

- - - - -

Tennessee Knitting Mills, Columbia, celebrated its 15th anniversary in July by announcing plans for a 2200 sq. ft. expansion of its present plant. Air-conditioning of the plant, installation of a cafeteria, and other modernization of the plant also are planned. The new addition will be built as soon as Government regulations will permit, according to J. S. Gordon, Brookline, Mass., president of the company who visited the plant during its anniversary celebration.

* * *

FOREST PROJECT SET UP FOR CHATTANOOGA AREA

A forest management project embracing a 17,000-acre tract in the Horseshoe section of Walden's Ridge, near Chattanooga, has been set up by Carter Patten, Chattanooga business man. With the cooperation and advice of both the TVA and State Forestry divisions, the tract will be used to demonstrate the value of intelligent management of forest areas in restoring land to profitable timber production. The area selected for the project has been essentially denuded of merchantable timber and, in addition, has been repeatedly burned over. Within the 30-year period set up for this demonstration project, it is anticipated that harvesting of timber can be started within 10 years and that in 20 years the tract will be on a profitable self-sustaining basis.

Among other plans of Mr. Patten for the tract are the development of a dude ranch and, possibly, a game management project. Mr. E. H. Parsons, Jr., is manager of the timber tract.

PLEASE! REPORT NEW INDUSTRIES AND PLANT SPACE

The "Newsletter" will appreciate cooperation from Tennessee towns and cities in making available to us information on all new local developments. If you have a new industry announced for the community - concrete block plant, creamery, textile mill, or what not - send us newspaper clipping on it or use form below. Similarly, we shall be grateful for cooperation in making known to us any vacant buildings that can be used for industrial purposes. Let us have the dope, so we can list them in the "Newsletter". That might bring you the industry you want.

Fill out and return to: Industrial Div., TSPC, 432 6th Ave., N., Nashville 3.

Vol. 2, No. 6 Geo. I. Whitlatch, Editor October 1, 1946

CURRENT INDUSTRIAL EXPANSION EXCEEDING 1945 RATE

By the Editor

Industrial expansion in Tennessee currently is well ahead of the substantial growth experienced in 1945. During the first 8 months of 1946, according to this Division's records, approximately $64,000,000 has been spent or committed for investment in a total of 205 new industrial plants and existing industrial facilities. Expansion in jobs through these new developments is estimated at 19,500 workers. Of the 205 total projects, 142 are new industries. Similar estimates made at the end of 1945 indicated a total of only $50-million investment in some 227 projects for the entire year, with new employment estimated at 15,000. At the present rate, Tennessee's industrial growth in 1946 could possibly approach $100-million, although this is improbable because of increased CPA limitations on non-housing construction during the past few months, plus general scarcity of construction materials.

The total of 205 new industrial plants and expansions on which the present estimates are based admittedly is incomplete, because records have been kept mainly of new developments exceeding at least $25,000 investment. Consequently, several hundred small new industries involving investments of a few thousand dollars, as concrete block plants and sawmills, possibly are omitted from the present data. Our figures are believed to be conservative, because projects merely in the planning stage have been excluded. A large percentage of the total 205 projects represents either new industries already established or under construction; on the remainder, some form of specific committment has been announced. This is indicated by the fact that less than 20% of the investment costs and less than a third of the employment figures represent our own estimates.

Excluded from the present estimate of Tennessee industrial expansion is some $7-million worth of war-built Government-owned facilities which have been purchased this year for operation by private interests. Of the nine plants purchased thus far, we estimate that approximately 3,000 jobs have been retained for Tennessee workers in the Knoxville, Chattanooga, Memphis, Milan, and Rockwood areas in which the plants are located.

The two most significant facts revealed by analysis of current industrial expansion in the State are (1) the continuing trend toward decentralization and (2) the wide variety of new industries being established here. The decentralization trend is indicated by the fact that, of the 142 new industries located here in the first 8 months of this year, only 51 of them went to the four metropolitan areas of the State. The remaining 91 industries were scattered throughout the State in a total of 60 towns and cities, most of which have populations under 5,000.

Of the 51 new industries locating in the State's four major cities, 23 were in Memphis which leads the State in new industries. Chattanooga, by virtue of the recently announced $20-million duPont nylon plant for that city, leads in total investments for new industries. Nashville leads in expansions of existing industries, with a total of 11, and is in second place for new industries with a total of 13.

Dyersburg and Morristown, each with 5 new industries, appear to have top-ranking industrial expansion among the cities of their population class. Of the small cities, Sweetwater is in a class to itself with 6 new industries, all of which are either in

operation or currently under construction. Other cities and towns with two or more new industries and/or expansions include: Bristol, Johnson City, Tullahoma, Columbia, Greeneville, Maryville, McEwen, Humboldt, Lewisburg, Dayton, Athens, Cleveland, Centerville, and Union City. Outstanding of the location in small cities and towns of new industries exceeding $1-million investment are the International Shoe Company's tannery at Bolivar and Wayne Knitting Mills hosiery mill at Humboldt. A third multi-million-dollar plant, included in our estimates, probably will be announced in the near future for early construction near another small city in the State.

Regionally viewed, current industrial expansions are very well balanced with respect to the three grand divisions of the State. Of the 142 new industries, 53 are in East Tennessee; 43 in Middle Tennessee; and 46 in West Tennessee. Of the 63 expansions, 24 are in East Tennessee; 26 in Middle Tennessee; and 12 in West Tennessee.

The new industries established or locating in Tennessee this year will manufacture or produce some 46 different items. Hosiery and other wearing apparel are best represented among the newcomers, there being 17 new garment plants and 10 new hosiery mills. Other categories and number of new industries of each are as follows: gloves (2); furniture (10); chemicals (2); paper boxes, cans, etc. (3); enamel products (2), boats (2); frozen foods (5); concrete block and other building materials (6); agricultural equipment (3); machinery and other metal products (3); dairy products (7); stoves, auto parts, and other foundry products (3); stone, coal, and other mineral products (5); shoes (3); chenille products (3); plastics and their products (3); meats (2); textiles and other cotton products (4); rugs and mats (2); and one each of airplane equipment, paint, ink, office machines, brooms, venetian blinds, bakery products, hats, industrial gases, fertilizer, auto batteries, pottery, vegetable oils, and food products. In addition, our records show 3 bottling plants, 4 laundry and diaper services, 11 storage warehouses, silos, etc., a new natural gas pipeline, and nine radio stations.

This Division is proud of Tennessee's current industrial progress and is glad that its staff has been able to extend some service to at least 10% of the total new industries located in the State during the past 8 months.

* * *

ADDITIONAL NEWSPAPER EXCHANGES ACKNOWLEDGED

Since last month, we have had the pleasure of receiving issues of five additional State newspapers -

Johnson County News (Mt. City)
Pulaski Citizen
Tri-City Reporter (Dyer)
Tennessee Valley Appeal (Adamsville)
Carthage Courier

Thanks to you editors for your kindness in placing the Commission on your mailing list.

"BAY-BEE SHOE" PLANT TO OPEN IN SHARON

Bay-Bee Shoe Company of Union City is expanding its operations with a new factory to be established at Sharon. The Sharon Young Men's Business Club in late August completed arrangements to furnish the company factory facilities through remodeling of a local building, formerly used as a hardware store.

The new unit will be ready for operation within 30 days after completion of remodeling and at least 100 persons could be employed, according to the Weakley County Press report.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any industry listed below, or of any listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

144. Electronic Devices: Small Eastern manufacturer contemplates moving to South. Prefers small town with 6,000-8,000 sq. ft. building available for lease or purchase. Good schools and suitable homes for six engineers essential. Will employ 40-50 skilled male workers. Preliminary inquiry.

145. Ladies' Gloves: Nationally known manufacturer desires clean, well-lighted building of 3,500 sq. ft. for early occupancy. Prefers small town with available supply of unemployed trained power sewing machine operators. Preliminary inquiry.

* * *

DO YOU KNOW THAT -

Tennessee's output of mineral products in 1943 exceeded $65-million, according to latest U. S. Bureau of Mines data. In that year, the State ranked 25th nationally in value of mineral output, and 6th among the Southern states, being exceeded only by those having larger petroleum and/or coal developments.

Tennessee, in 1943, led the Nation in the production of primary aluminum and pyrites. In value of outputs of barite and phosphate, the State ranked 2d; in output of quartz silica, 3d place; and in outputs of sulphuric acid and ferro alloys, 4th place.

In the period of 1911-1943, Tennessee produced a grand total of more than $1-billion worth of mineral products.

* * *

ULTRA MODERN MOTEL PLANNED FOR ROCKWOOD

"Pine Crest Motel" is the name of a 12-unit, ultra-modern tourist motel being planned for early construction near Rockwood, immediately south of the junction of U. S. Highways 27 and 70. Designed by Barber & McMurray, well-known Knoxville architects, the motel will be of Crab Orchard sandstone exterior and finished on the interior in knotty pine, with "Armstrong" mastic tile floors, according to the Rockwood Times. All units will have individual tile baths and electric-space heating.

Mr. Richard Behrens, a Detroit industrial engineer who maintains a summer home near Rockwood, will be the builder of these new tourist facilities. Foreseeing the need for such development to cater to Tennessee's ever-increasing tourist trade, the Behrens purchased the motel site in 1943. Planned to cater to the higher-class of tourist traveler, the proposed motel is expected to provide year-round accommodations for visitors to the nearby TVA lakes, Cumberland Mountains, and other scenic recreational attractions. In commenting on his location at Rockwood, Mr. Behrens is reported as saying that "we have found Southern hospitality all that is claimed for it, and since actually living here, we feel Rockwood is an ideal place in which to locate".

* * *

GREENEVILLE OBTAINS ELASTIC PRODUCTS CONCERN

The Geo. C. Moore Co., Westerly, R. I., manufacturer of elastic webbing, has completed negotiations with the Greene County Foundation for location in Greeneville of a new branch plant. Construction will begin soon on the plant building which initially will contain 35,000 sq. ft. and, later, possibly be expanded to 60,000 sq. ft. About 400 workers are expected to be employed eventually.

* * *

COMMUNITY INDUSTRIAL PLANNING OUTLINED IN NEW REPORT

"There is some product that you do not now make in your town that can be produced there better than in any other place in the world." This point of view is the keynote of a forthcoming new report on U. S. REGIONAL INDUSTRY, latest in the series by Graham W. Parker and O. R. Strackbein, New York engineers and economists. A feature of the report is the case it makes for independent business men of a community to start or support a campaign of planned industrial development in their area.

Suggesting that a definite program be sponsored, either by the Chamber of Commerce or other civic group (in one town, simply a group of three: a banker, a preacher, and a veteran), the report stresses the following points:

1. An independent and objective appraisal of the community's competitive advantages from the industrial viewpoint. "This is best done by outside experts, uninfluenced by local history, and it puts all the facts on the table, absolutely honestly and without prejudice. Avoid the ostrich attitude".

2. Careful study of the written report based on the survey results. "This report, short and to the point, should include: a digest of facts on the community's labor, transportation, power costs, and similar economic data; selection from these facts of elements giving community chief competitive advantages over other towns and regions; and, finally, recommendations as to new industries that should be established and suggested procedures for such developments".

3. Action on recommendations made in survey report. "Decide just what should be done and fix responsibility on individuals for each part of the recommended program. There must be the will to do. Each man must take up one idea, prospect, or situation and give it all his efforts until that one job is put over. Then start out on the next. Don't scatter your efforts".

4. Setting of definite goals. "Borrow an idea from successful sales management and set a definite 'sales quota' - a goal in measurable figures (total new plant value or total payroll or number of employees) to be achieved by the campaign. Also, set a time schedule for each step, with regular follow-up meetings (once a month isn't enough) until the goal is reached".

With this approach, one small midwestern town is reported to have recently lined up three new plants, all from outside sources. In a western state, a single county has brought in 29 new plants in the last two years; of these, six are branch plants of national manufacturers and most of the remainder are local enterprises producing items not previously made in the region. At least two towns in different states have made good use of local clay resources for establishing potteries. One of the towns engaged a well known industrial designer to create a special and distinctive line of pottery that uses the local clays to fullest advantage, thus giving the community a fine new plant with a product of exceptional merchandising value. This is one of a number of examples cited by Messrs. Parker and Strackbein, showing how a wide-awake community can make good use of certain changes in modern design and technical factors. Numerous other examples bring out the comparative advantages as between branch plants and locally-financed and operated establishments.

"PUNCH LUNCH" IDEA TRIED AT MEMPHIS

Memphis interests, according to Business Week, are testing out a new device - similar to the selectors on jukeboxes - through which restaurant patrons can order their meals by simply punching a series of buttons numbered to correspond with items on the menu. The selected items are thus registered directly in the kitchen, dispensing with the need for waiters to wait for patrons' orders. The new device is being tried in a local restaurant, and plans are said to be underway to manufacture it when materials become available.

O. & W. RAILROAD SOLD TO VIRGINIA INTERESTS

The Oneida & Western Railroad, 38-mile long shortline operating between Oneida and Jamestown, Tenn., was purchased in mid-September by the Jewell Ridge Coal Company of Tazewell, Va. Crown-Healey Co., Chicago, from whom the road was purchased, has announced that an application for abandonment of the line now pending before the I.C.C. would be withdrawn (see Sept. Newsletter). The new owners of the O. & W. RR. have extensive coal mining operations in Virginia and are reported planning to investigate the possibilities of limited mining operations in the O. & W. RR. territory.

Sale of the O. & W. Railroad is the second transfer of railroad properties in the State this year, the Tennessee Central Railroad having been sold to Eastern interests in June (see July Newsletter).

* * *

SALES & PURCHASE OPPORTUNITIES

Lumber, Coal, Material & Supply Business: For sale as a going business, this property consisting of large tract of land and all physical assets of present company, located in the heart of a metropolitan area. Ample railroad trackage. Property is adaptable to development for purposes of wholesale distribution or light manufacturing, in addition to the main business. Details on request.

Mining Properties: A Tennessee operator has the following mining properties for sale or lease in North Carolina:

Scrap mica - 40 acres; 15 acres proved by borings, shafts, tunnels, and open cuts. More than 1,000 tons of high-grade scrap has been mined by open cuts. During operations, which were discontinued in 1941 due to death of partner, mine produced 1 ton of finished product per hour. Held under long-term lease and will sub-lease, sell, or take active part in operation.

Feldspar - 9 to 15-year leases held on three developed mines which, with little work, are capable of producing 20 to 50 tons daily of first quality spar.

Inspections by mining engineers or geologists for any interested parties are invited.

Manufacturers' Representative: Manufacturers' Agents, Inc., 2400 - 16th St., N. W., Washington, D. C., offers all the facilities of a Government sales department to Tennessee manufacturers of any type of product procured by the government for direct consumption or resale. Dwight Webb, Jr., for many years a resident of Nashville, Tenn., is executive vice-president and general manager of Manufacturers' Agents, Inc. Interested manufacturers should contact Mr. Webb directly.

Tire Sealing Compound: Several East and Middle Tennessee counties are open for dealers to handle sales of a semi-plastic puncture-sealing compound for use in automobile and truck tires. For further information, write C. D. Friss & Co., 800 Exchange Bldg., Nashville 3.

* * *

OIL - GAS CHART RELEASED

Oil and gas potentialities of the "Knox" strata in Tennessee are indicated in the Tennessee Division of Geology's Oil and Gas Investigation Preliminary Chart No. 4, released late in August.

Prepared in cooperation with the U. S. Geological Survey, the chart describes the subsurface and structure of the pre-Trenton Ordovician and Upper Cambrian rocks of Central Tennessee. In northeastern Central Tennessee, significant shows of oil have

been encountered in these rocks, and further exploration of their petroleum possibilities should be definitely aided by the present chart.

Ray Bentall and Jack B. Collins are compilers of the chart, which consists of two 56 x 36-inch sheets. The structure and stratigraphy of the area are described, with accompanying maps, graphic logs, and pertinent data of drill tests. Copies of the chart can be obtained from the Tennessee Division of Geology, G-5 State Office Bldg., Nashville, at 50¢ each.

* * *

CONSULTANT INDUSTRIAL ENGINEERING SERVICES

Southern manufacturers in need of technical assistance on product design, modern packaging, color engineering, and similar problems can obtain consultant services on these from H. M. Lupton, 307 E. 8th St., Chattanooga, Tenn. Mr. Lupton is an Industrial Designer of 25 years experience in industry and a member of a number of professional organizations with the highest ethical standards.

- - - - -

A complete consultant service on product creation, development, styling, plant engineering, and packaging is offered industry by Barnes & Reinecke, Industrial Designers and Engineers, of Chicago. Employing a staff of 181 specialists, this company is prepared to create or develop new products to fit manufacturing and sales needs, carrying the work from drafting board through all necessary engineering stages to plant layout and construction, and, where essential, the building of special production machinery. Other services include technical aid on material and production controls, job evaluation, and similar operating problems. Among Barnes & Reinecke's 1155 industrial clients are listed most of America's major corporations. Main offices of the company are at 230 E. Ohio St., Chicago; the Tennessee territory is served by Mr. J. E. Rush, 489 Arcade Bldg., St. Louis 1, Mo.

- - - - -

Danielson Associates, Inc., is a new consulting and management engineering firm established at Memphis on August 1 by Brig. Gen. W. A. Danielson, U. S. A. Retired. General Danielson is widely known as an engineer and, until his recent retirement, was commanding officer of the Memphis Supply Depot. The firm's offices are in the Exchange Building.

* * *

BASEBALL MANUFACTURER ADDS TO TULLAHOMA OPERATIONS

Lannom Manufacturing Company of Grinnell, Iowa, has announced plans to move to Tullahoma its plant for the manufacture of wool baseball yarn. A unit of the company now operating at Shelbyville in the production of knit linings for baseball gloves will be consolidated with the new Tullahoma plant. At present the company operates a baseball unit at Tullahoma, and finished glove units at Lynchburg, Tenn., Grinnell, Iowa, and Gloversville, N. Y.

The new Tullahoma plant is expected to give employment to over 50 persons and should create a new market for Tennessee wool-growers. The Grinnell, Iowa, unit is reported to have purchased 150,000 lbs. of wool in the first 6 months of this year.

* * *

OIL - GAS EXPLORATION UNDERWAY IN WHITE COUNTY

A land-leasing program is underway in White County by Ohio interests, preparatory to drill exploration of that area for oil and gas, according to the Sparta Expositor. C. L. Williams and O. E. Nichols, geologists, of Lakewood, Ohio, are reported as sponsors of the investigations, with W. F. Mitchell of Sparta associated as leasing agent. By mid-September, leasing was said to be progressing satisfactorily and drilling of tests anticipated within 60 days.

* * *

EMPLOYMENT TRENDS IN STATE UP TO AUGUST

General Situation

Employment in Tennessee followed the national upward trend during June and July. Manufacturing employment reached 240,700, highest level since September, 1945. Industries showing the greatest increases are food, lumber, and finished lumber products. Manufacturing employment is expected to increase 10,000 during next four months, with 75% of anticipated increase in apparel, textiles, leather, iron and steel. Unemployment increased almost 4,000 from May to July but peak is thought to have been reached.

Memphis Area: Total employment up slightly since May 1946, with increases mainly in lumber, finished lumber products, textiles and apparel. Majority of employment gain since September 1945 has been in construction and trade; manufacturing employment almost static since then. Future trend expected to be slightly upward, but no significant demand by any one industry anticipated. About half of total current openings are for unskilled labor. Peak of labor surplus near; possible decrease in next 60 days.

West Tennessee (outside of Memphis Area): Large labor surpluses continue; the several new plants locating in region will employ mainly women while most of unemployed are men. Material shortages are delaying construction or start of operations of several of the new plants, including tannery at Bolivar, shoe plant in McNairy County, and rubber products plant at Paris. Milan and Dyersburg areas, although each has had some 800-900 increases in employment over past few months, will experience planned industrial and end-of-season lay-offs totaling about 2500 workers by November. New small garment plant at Troy will not dent labor surplus in Union City area, where prospects for industrial employment are poor; similar situation exists in Paris area. Entire region needs more male-employing industries.

Nashville Residual Area: Surpluses continue at most points, and prospects for substantial increases in new job opportunities appear poor for Columbia, Dickson, Lebanon, Murfreesboro, Pulaski, and Shelbyville areas. Clarksville area has made some small but consistent gains in food, apparel, and construction industries. Gallatin expects some expansion by local tobacco company and two planned textile plants. Dickson recently has gotten a small furniture plant, but this is insufficient to offset increasing surpluses. New garment plant under construction at Lawrenceburg, but area needs more male-employing industries. Lewisburg is progressing well as local plants get new additions into operation, but there is an artificial labor shortage due to war workers' reluctance to accept available jobs. New shoe and button plants under construction at Savannah.

Knoxville Residual Area: Although large labor surpluses still exist, employment over area generally has been on uptrend over past 60 days. Total of 43,405 in non-agricultural work. Harriman area has increased employment 5% in past two months, mainly in textiles, machinery manufacture, and coal mining. Uptrend in LaFollette area, and material increase expected by October; coal mining is employing 48% of 4800 workers in area; job opportunities limited to mining, sawmilling, logging, and construction. Loudon area has failed to maintain uptrend indicated in June, owing to slowdown in textile and metal industries employment; unemployed, mainly men, outnumber job opportunities 4 to 1. Maryville area continues uptrend, and no downtrend anticipated before October 1; unemployment has decreased since May. Rockwood area, since May, has had increases in practically every industry; construction, lumber, and textiles best job opportunities.

Johnson City Area: Employment between May and July remained static over much of area, and demand to October is forecast as "light". In Bristol and Elizabethton areas, TVA construction, expansions of Elizabethton chemical plants, and new Monroe Calculating Machine Company plant at Bristol should ultimately increase employment, although not materially before October. Johnson City, with little expansion, has labor surplus, low demand, and much quality maladjustment between supply and demand. In Kingsport area, increase of about 340 between May and July with similar increase forecast in next four months, mainly for women; active demand for 650 workers in textiles, construction, clerical, and rough

labor; material shortages impeding expansion work of local industries. Peak agricultural employment in Greeneville area but slight temporary decline industrially, due to slowdown in tobacco processing; next few months' demand, mainly for women, will total 650 for seasonal work. Current seasonal peak employment at Newport in food industries will decline to end of year. Essentially static situations at Morristown and Newport; materials shortages at former city are delaying new industrial expansions.

* * *

EXTENSION OF NATURAL GAS SERVICE PLANNED

Tennessee Natural Gas Lines, Inc., signed a contract in mid-September with the Tennessee Gas & Transmission Company to obtain from the latter's trunkline across the State "all the natural gas needed" for supplying a proposed new network of lines to serve 22 counties of southeastern Tennessee. The new line would tap T G & T's main in Perry County, extend eastward through Wayne, Lawrence, Giles, Lincoln, Franklin, Marion, Hamilton, Bradley, McMinn, Loudon, and Blount counties, and terminate in Knox County. More than 30 cities and towns, including Chattanooga and Knoxville, would be served by the proposed new line.

The project must receive approval of the Federal Power Commission before construction of the new line can begin, and T N G L is now engaged in making the necessary surveys preparatory to filing its application before the Commission.

Southern Natural Gas Company, Birmingham, is reported in news accounts to be planning extensions of its lines to serve the Chattanooga area, and Wade Thompson, T. N. G. L. president, has declared that such loss of the Chattanooga market would render his company's project economically infeasible and would cause cancellation of their present plans.

* * *

TENNESSEE SCHOOLS RECEIVE INDUSTRY SUPPORT IN RESEARCH

Only 11 fellowships or other grants for industrial-supported research out of a total of 1800 are listed for Tennessee educational institutions in a nationwide survey covering 302 industrial companies published in Chemical & Engineering News for September 10. The State schools listed are Vanderbilt University and University of Tennessee, with 5 grants each, and University of Chattanooga, with one grant. These 11 grants represent the support of four industrial organizations, only two of which have manufacturing operations here.

Of equal interest in this listing of research activities is the fact that 17 companies which have production units in Tennessee are supporting university research. Of this total, only one company of the four contributing to research in the State's schools is strictly a Tennessee corporation, and half of its annual research fund of $19,500 is distributed to out-of-State institutions.

The citing here of these data is not intended as a reflection on Tennessee schools, because the South as a whole makes a poor showing in this distribution of research funds by American industry. We hope, however, that the significance of the above figures will be obvious to the Tennessee industrialist, the Tennessee educator, and to Tennesseans in general. All of us should more fully appreciate the relationship between research by industry and support of technical training in educational institutions in respect to their combined effect on the future progress of the State. Research alone, it is true, no more assures the success of an industry than do fine research laboratories guarantee distinguished academic achievements, yet it is singularly true that most progressive industries and the leading American universities are distinctly research-minded. To those that have the welfare of Tennessee at heart, there can be no mistaking the interdependence of industry and education in maintaining the State's future economic and social progress.

* * *

PRODUCTION LINE NEWS AND NOTES

TVA Opens New Forestry Office

The TVA Department of Forestry has opened a permanent district office in Bristol. Upper East Tennessee counties are included in the district. The office, in charge of Paul H. Lane, is in the Tenn.-Va. Electric System Building.

"Things Of Science"

Things of Science is a novel and valuable kind of "Book-of-the-Month" project being sponsored by Science Service, a non-profit organization for the popularization of science. Under the "Things Of Science" plan, subscribers each month receive a small blue box which contains small samples of newly developed materials used in industry. These may be a series of pieces of crude natural and synthetic rubbers with other samples of finished products or, again, a series of various crude and finished oil products. Each series is accompanied by an exhibit card and descriptive text. Subscription price is $4 per year.

RFC Subsidiary To Purchase Vets Loans

Veterans' home loans which are guaranteed by the Veterans Administration now have an established market through the RFC Mortgage Company. Such loans will be purchased only from the original lenders at par, plus accrued interest.

Dept. Of Commerce Issues New Business Publication

The Office of Small Business, U. S. Department of Commerce, in June released "One Hundred Questions To Be Considered In Establishing A Small Manufacturing Business". Copies may be obtained from Department of Commerce, 924 James Building, Chattanooga, or from other of Department's Field Offices.

Dairy Film Continues To Evoke Comment

Sam P. Orleans Associates reports that their new color film on "Dairying In Tennessee", made for the U. T. Agricultural Extension Service (mentioned here last month), is creating a very fine impression wherever it is shown. Orders for prints of the film include such well-known organizations as "Kraft Cheese", "Pet Milk", "Illinois Central", and "International Harvester".

ROTC Air Course To Be Established At UT

Pilot training and airport management are to be included in the University of Tennessee curriculum, in accordance with recent selection of the State University by the Army Air Forces as one of 20 schools in the United States to conduct this kind of ROTC training. Instruction will be under Army personnel and faculty of the UT Airport Development Laboratory.

New Edition Of Kingsport Book Released

Kingsport, Tennessee - The Planned Industrial City is now available in a revised edition which incorporates this famous Upper East Tennessee city's wartime activities and progress. Issued first in 1937 by the Kingsport Rotary Club, the new edition retains its original purpose of concisely telling the story of the origin and growth of this unique industrial community and is much enhanced by a greater use of pictures to illustrate the city's planning methods and developments. In the preface to the new edition, Robert St. John - internationally known writer and radio commentator - is quoted as saying in a radio series on Kingsport that "it is the most ideal combination of industry and home" he had ever seen anywhere.

The new book is a product of the Kingsport Press. Copies can be obtained at $2.00 from the Kingsport Rotary Club.

Tennessee Leads South In Bank Deposits

During 1945, Tennessee moved into 18th place among the states in total bank deposits and held the topmost position in reference to the Southern states. Tennessee's bank deposits, on Dec. 31, 1945, totaled $1,956,719,000.

State Capitol History Issued

A history of the Tennessee State Capitol building and grounds has been made available by the Tennessee Petroleum Industries Committee and may be obtained free by all school children, tourists, and other visitors to Governor McCord's office.

New Electric Heating Units Being Tested In State

"Marvair" heat pump, the latest innovation in space heating equipment, is being given tests in the Chattanooga and Nashville areas. Based on the heat-exchange principles of refrigeration, the pump in winter will heat a home and cool it in the summer. A typical refrigerating unit, operating on electricity, is used; pipes from the pump extend a few hundred feet into a well in the ground to obtain the advantages of the uniformity of earth temperatures. This area's low-cost electric power is especially attractive for the marketing and use of this new type of heating equipment.

River Transportation Featured By New TVA Booklet

Cheaper Transportation via the Tennessee River is a brochure recently issued by the TVA Commerce Department which concisely describes the TVA program of improvements on the Tennessee River, the growth of river traffic, and estimates of its future, and other aspects of river transportation service. Pointing out the possibilities of savings through low-cost river transportation in reaching new and wider markets, the report indicates how the present Tennessee waterways make practical the shipment over long distances of nearly any kind or size freight. The economy of river transport is illustrated by the fact that a single towboat can push a flotilla of loaded barges with a total capacity equal to 15 to 20 railroad train loads. Another asset in river transportation cited is that shipments "move on schedule and arrive at their destination". The brochure is attractively illustrated with numerous full-page photographs and contains a number of informative charts and tables.

* * *

EXPORT-IMPORT OFFICE TO BE ESTABLISHED AT MEMPHIS

An export-import office is being established in Memphis by Mr. Frank M. MacFall to serve the mid-South manufacturers in obtaining and maintaining foreign markets for their products and in importing goods to this country. Activities of the office initially will be limited to Latin American trade but, eventually, operations are expected to be extended to world-wide importing and exporting.

Mr. MacFall states that, during the war, he was in Cuba with the foreign agricultural division of the U. S. Government and there obtained several valuable connections in the foreign trade fields as well as knowledge of Latin American needs and conditions. His pre-war experience includes 13 years in domestic sales engineering.

The decision of Mr. MacFall to locate in Memphis was prompted "by the rapid industrial expansion in this area and by the growing interest of Southern businessmen in Latin America trade relations".

Address inquiries to P. O. Box 913, Memphis.

* * *

NOVEL USE DEVELOPED FOR CRAB ORCHARD STONE

A new use for the famed Crab Orchard sandstone, quarried near Crossville, has been developed by a local concern. Using a patented high-strength cement, thin slabs of the stone are cemented as a veneer on the face of concrete blocks, giving a building material attractive for exterior finishing of homes and other structures. The thin slabs of stone used are those for which the Crab Orchard Stone Company, operators of the sandstone quarries 6 miles east of Crossville, have little sales demand.

Those interested in the new stone-veneer block business are F. T. and H. J. Self and N. D. and Van Walker, all of Crossville. Their plant is at Otter Creek Junction on the Tennessee Central railroad, 7 miles east of Crossville.

* * *

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Sweetwater's new milk pasteurizing plant began operation in early September. The plant, containing 2160 sq. ft. of floor space, is built of sheet aluminum. Capacity is 150 gallons per day. Owners are Robert Kilpatrick of Newport and Steven and Robert Dickey of Sweetwater.

- - - - -

Clay Products Corp., Memphis, has been issued a State charter to "manufacture and sell brick, tile, pottery, etc. Incorporators are John W. Montedonico, John W. Loch, and Chas. H. Davis.

- - - - -

Wood Products Co., Newport, has leased its plant building to Tennessee Valley Furniture, Inc., which will manufacture hat racks and office chair cushions. The latter company will initially employ about 50 persons and begin operations shortly after the first of next year when the Wood Products Company expects to vacate its present plant for a new building now under construction in Newport.

- - - - -

Hotel Montgomery, Clarksville, formerly owned by Zeb Brevard, was sold for $75,000 in late August to Mr. E. A. Trovillion of Paris. Trovillion, owner of 3 hotels in Paris and one in Metropolis, Ill., plans to redecorate the "Montgomery" and to install private baths with each guest room.

- - - - -

The Acme White Lead & Color Works has chosen Nashville as headquarters for a new district to include Tenn., Ala., Ga., Miss., Ark., and Fla. Office of W. S. Schener, manager, of Cincinnati, Ohio, is at 1154 Broadway.

- - - - -

Winthrop Chemical Co., Inc., well-known pharmaceutical manufacturer, has opened a new branch office in Memphis. Chas. J. Loverde is manager of the office.

- - - - -

Wayne Knitting Mills has awarded the construction contract for its new $1,000,000 plant at Humboldt to the Daniel Construction Co., Birmingham, Ala.

- - - - -

Electric-Aire, Inc., is a newly organized Chattanooga manufacturer of electric furnaces. Operations began July 1, with an initial employment of 7 workers.

- - - - -

No bids were received by the War Assets Administration for purchase of the unfinished Goodyear Tennessee Company plant at Nashville. Deadline for bid proposals on the 65-acre tract and buildings, appraised at near $400,000, was September 3.

- - - - -

Trailway Bus Depot, Cookeville, a subsidiary of Consolidated Bus Lines, Inc., has purchased a $39,000 site on Sixth Avenue in Nashville for erection of a large bus terminal.

- - - - -

Wells-Lamont Co., Chicago work glove manufacturer now constructing a new plant at Brownsville, currently is employing 70 workers and producing over 1,000 dozen gloves weekly at their temporary training quarters in that city. Recent addition of equipment is expected to permit an increase of some 40 workers and, on completion of their new plant early next year, an eventual total of some 300 persons will be employed.

- - - - -

An $887,000 heavy repair and maintenance shop will be built at Chattanooga by the Southern Railway System, according to Engineering News-Record.

- - - - -

Waverly Garment Co., Waverly, is constructing a 24,000 sq. ft. addition to their local factory building. Completion of this expansion is expected about January 1 and will permit the employment of 150 additional workers, bringing the total to over 500. The plant makes work pants and shirts. H. E. Bronson is manager.

- - - - -

Ruffin Amusement Co., operators of the Capitol Theater at Martin, are reported planning early construction of a larger modern movie house in that city.

- - - - -

Knoxville Gas Co., subsidiary of Cities Service Power & Light Co., has been granted SEC permission for dissolution and final distribution of its remaining assets to its parent company. Knoxville Gas Company manufactured and distributed gas in that city until July 30, 1945 when the major portion of its assets were sold to the City of Knoxville for a base price of $450,000.

- - - - -

U. S. Rubber Company has let a $200,000 contract for construction at Memphis of a 45,000 sq. ft. warehouse.

- - - - -

The Virginia Woodworking Co., Bristol - one of the largest furniture parts manufacturers in that area - was razed by fire in mid-September, with the loss estimated at $150,000.

- - - - -

General Shoe Corporation, Nashville, has established a wholesale-retail mailing branch in the suburban city of Madison. The branch will prepare and mail to dealers all sample shoes for display purposes.

- - - - -

Plans for a modern laundry at Sparta have been completed by two local naval veterans, J. B. Hunter and J. R. Cooper. Equipment is on order, but definite location of the plant has not yet been decided.

- - - - -

M & S Bus Line, recently granted a franchise for operation between Murfreesboro and Smithville, started service on August 26. Other communities served along the line's route include Lascassas, Milton, Auburntown, Liberty, and Dowelltown.

- - - - -

Chattanooga will have direct one-plane air service to Lexington, Ky., and Cincinnati, Ohio, if the recommendation of the Civil Aeronautics Board's examiner is accepted. A recent examiner's report in the Southeastern States Air Service Case recommended that Chattanooga be placed on Delta Air Line's Chicago-Cincinnati-Miami route. Chattanooga is the only one of Tennessee's "big four" cities now without one-plane service to Cincinnati.

Knoxville now has non-stop air service to Chicago as a result of new Delta Air Line schedules. Four-engine DC-4 Skymasters make the Knoxville-Chicago hop in 2 hours, 35 minutes.

- - - - -

U. S. Rubber Company, recent purchaser of "Line G" of the Wolf Creek Ordnance Works at Milan (see Sept. Newsletter), is reported by the Milan Exchange to be making good progress in renovation of the line, preparatory to start of sports footwear manufacture.

- - - - -

Davis-Weil Manufacturing Co., Memphis, has been issued a State charter to manufacture and sell disinfectants, insecticides, soaps, etc. Incorporators are Ernest P. Weil, Wm. H. D. Foncs, and Max J. Borod.

- - - - -

Iceland Gardens, Inc., Dayton, has been granted CPA approval for construction of a frozen-food locker plant, costing an estimated $60,000. The plant, totaling 8,900 sq. ft., will be of concrete construction and have a capacity of 560 rental lockers. Construction is expected to be completed about January 1. Jack Frazier is president of the new organization.

- - - - -

Jakes Foundry Co., well-known Nashville concern, suffered a $40,000 fire in early September, causing several weeks shut-down of the foundry section. Utility of the manufacturing rooms, in which are produced industrial trucks, was not impaired.

- - - - -

Etowah Foundry Service, Etowah, has completed a new addition to its foundry.

- - - - -

General Shoe Corp., Nashville, has announced that its foreign operations division - General Shoe Intercontinental Co. - has purchased a controlling interest in one of the largest shoe manufacturing companies in Peru, La Febrica Nacional de Calzado "El Triunfo" of Lima. This South American firm has a daily production of about 1500 pairs of women's, men's, and children's shoes, permitting "General Shoe" to considerably expand its Pan-American markets. The new joint operations are expected to begin about October 1.

- - - - -

Tafel Electric & Supply Co., Nashville, has begun construction of a two-story modern office and sales building, costing $40,000. Westinghouse Electric Corporation is expected to maintain its local offices in the new building, as the "Tafel" firm is Westinghouse's oldest independent jobber in this area. "Tafel" also operates branches in Chattanooga and Louisville, Ky.

* * *

NEWSWEEK "PLUGS" TENNESSEE CITIES

Industrial developments in Tennessee were "spotlighted" by Newsweek in its September 16 issue in an article on "South: Real Reconstruction". Citing the adverse effects of the War Between the States (called "Civil War" by Newsweek editors) on Southern industrialization, the article states that if that event did "set the South back half a century, the second world war pushed it a long way ahead toward catching up". Industrial progress in the South, the article shows, was well started before World War II, when, by 1940, "Southern industry had increased sevenfold while that of the rest of the country quadrupled".

Reviewing the present situation, the article points out that there has been none of the postwar collapse feared by many Southerners but, rather, a definite labor shortage and continuance of incomes at near wartime levels.

The establishment of new industries, expansions through conversion of war-built industrial facilities, growth of retail trade, and other of the current economic changes in the South are well presented for 12 "typical" Southern cities. Of this total, four are the major cities of Tennessee - Knoxville, Nashville, Chattanooga, and Memphis. Other cities include Atlanta, Birmingham, New Orleans, and Louisville.

PRESS-TIME FLASH

"AMERICAN ENKA" PROPOSES $20-MILLION PLANT FOR EAST STATE

Radio announcement was made in late September of American Enka Corporation's proposed new $20-million rayon plant to be built in Hamblen County, near Morristown. According to the report, Senators McKellar and Stewart are assisting the company in presenting application to CPA for approval of the new plant construction.

Assistance on the preliminary investigations of this project was given by the State Planning Commission.

PLEASE! REPORT NEW INDUSTRIES AND PLANT SPACE

The "Newsletter" will appreciate cooperation from Tennessee towns and cities in making available to us information on all new local developments. If you have a new industry announced for the community - concrete block plant, creamery, textile mill, or what not - send us newspaper clipping on it or use form below. Similarly, we shall be grateful for cooperation in making known to us any vacant buildings that can be used for industrial purposes. Let us have the dope, so we can list them in the "Newsletter". That might bring you the industry you want.

Fill out and return to: Industrial Div., TSPC, 432 6th Ave., N., Nashville 3.

"GIMME" IS A FALSE GOD

By
Eugene Whitmore
Editor, American Business
(Reproduced by special permission)

Will we be known as the generation which set back business morality an entire century?

A hundred years ago it was smart to cheat the customer. That was the age of short weight, dilution, substitution, overcharges, and misrepresentation.

Then we took over the "he profits most who serves best" idea. That idea was the greatest contribution America made to the world of business.

Now, what are we doing? We buy and sell through dummies to evade price regulations. We sell third-rate raw materials, but bill them as choice, select, or prime. Black markets thrive in many industries.

We tell our workers to hurry up; never mind being careful. Rush out the goods, and to hell with quality!

"Yep, we have cars to deliver right now. But don't ask us to take a check. Bring cash." You give at least $300 more than the list price and think you have been lucky.

With one hand we hold our pen to register at a hotel, and in the other hand is a side payment to the clerk. All America seems to have become obsessed with the idea that nothing is on the level any more, and that you need an inside track to complete any deal.

Men hold out greedy hands today, who would have used those hands to strike a man who offered side payments a few years back.

The great American policy today seems to be "get it while the getting is good". Only a short time back business policies were based on improving our reputation, on building for the future, on serving best to profit most.

America, which first gave voice to "the customer is always right". America, where the one-price system first supplanted haggling, and cheating, and over-charging, is in an orgy of greed, graft, and "gimme".

Are we going to descend to the business morals of Orientals? Will Asiatic business principles conquer America?

Or will we wake up; remember the valiant young men whose blood is still seeping into the good earth of a thousand battlefields the world over?

Will we look deep into our own hearts and ask ourselves, "Is this off-color deal worth its cost in self-respect? Is this sale of run-of-the-mill stuff at choice prices worth its damage to our reputation, and to our employees respect for us?

"Is this dummy sale to outwit OPA worth the poison it will put into the hearts and minds of our sons and daughters?"

For every month that we continue our present psychopathic orge to gouge out a little more from each deal, it may require a year to repair the damage, if it ever can be

repaired. Scar tissue doesn't heal. Stains left by blood money will not wash away.

Once more we ask, "Are we going down into history as the generation that set back business morality a century?"

BRISTOL FIRM PLANS RECORD OUTPUT

Universal Moulded Products Co., Bristol, is planning an expansion that will make this company the nation's top manufacturer of floor-model radio cabinets. With its present 280,000 sq. ft. of floor space, "Universal" is now making for the radio division of Bendix Aircraft Corporation 15,000 cabinets monthly or about 10% of the current national total. The planned addition of 54,000 sq. ft. of working space will permit expansion of employment from the current 1,468 workers to about 1800. Payrolls last year, according to the Bristol Herald Courier totaled $3,000,000. "Universal" also is one of the nation's foremost developers of fiberglass use in large-surface-area applications, as for boats, gas and oil pipes, and aircraft. The company is owned by the Pew family of Pennsylvania which controls the "Sun Oil" and "Sun Shipbuilding & Drydock" companies.

MORE THANKS TO STATE EDITORS

New additions to our State newspaper exchange during October included the following:

Chattanooga Times
The Parisian (Paris)

To the editors of each of these papers go our sincerest appreciation for their courtesy in placing this Commission on their mailing lists.

* * *

CORRECTION ON UNIVERSITY RESEARCH DATA

In our October issue, the item on "Tennessee Schools Receive Industry Support In Research" credited the University of Chattanooga with only one industrial-supported research grants, based on the data of a National Research Council survey.

Dr. Raymond B. Seymour, Director of the University of Chattanooga Industrial Research Institute (see Newsletter, Oct., 1945), has called attention to the fact that their Institute currently has 32 projects under investigations sponsored by industry or associations, a record believed to be unequalled by any other institution of higher learning in the South. Further, of the Institute's 32 projects, 15 are supported by Chattanooga firms - an indication of the progressive trend of Tennessee industries in realizing the value of research.

Dr. Seymour bears out his assertion of Tennessee's growing research-consciousness with the statement that, at the Chicago annual meeting of the American Chemical Society, Tennessee with its 107 delegates led the Southern states in attendance. The U. of C. Industrial Research Institute itself actually sent more delegates than many of the states, according to Dr. Seymour.

* * *

APOLOGY ON LABOR SUMMARY WRITE-UP

In the last "Newsletter", our item "Employment Trends in State Up to August" inadvertently failed to credit the U. S. Employment Service - Tenn. Dept. of Employment Security Labor Market Letters and Area Employment Summaries as sources of our write-up. This omission is regretted, because the editor has no intention of detracting in any fashion from the excellent service being rendered by the above agencies in their Letters and Summaries. Our readers who desire complete information on employment trends in any part of the State should request from their local U.S.E.S. office regular mailing of these bi-monthly USES-TES reports.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any industry listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

130. Foundry: Newly organized corporation plans chain of modern foundries to manufacture farm equipment and related products. Seeks for lease or purchase an existing foundry of 20,000 sq. ft. (100 x 200 ft.) or more, 18-24 ft. ceiling, on spur track with ample storage space. Projected operations will employ several hundred.

Prefer community with ample unskilled labor supply and housing for 3 to 4 families of executive personnel.

Will especially consider any proposition to build and lease required plant on 5-year option to purchase. Would like to place $150,000 equipment loan with local banks in community selected for plant.

148. Cigars: Nationally known cigar manufacturer wants to locate two new production units in Tennessee, preferably in western part of State. Employment of several hundred in each plant; excellent wage rate for trained workers.

Plant space of approximately 25,000 and 50,000 sq. ft. required; can use multi-story buildings but must be of brick or similar tight construction to permit use of air-conditioning; ceiling heights must exceed 10 feet. RR. siding desirable.

Any town having vacant plant approximating above specifications, please advise this Division immediately.

* * *

CPA APPROVES $20-MILLION "AMERICAN ENKA" UNIT

American Enka Corporation's new $20-million rayon yarn plant to be built at Lowland, 7 miles southeast of Morristown - preliminarily announced in last month's "Newsletter" - was approved for construction by the Civilian Production Administration in Washington on October 2. The CPA approval was for $7,430,000 representing only the estimated cost of constructing the buildings. The remainder of the projected $20-million covers costs of land, equipment, and similar items.

Present plans of the company call for eventual doubling in size of this Lowland plant. In this first unit will be built 12 buildings, covering a total area of 20 acres but spread out over the 150-acre plant site. Between 1,500 and 2,000 persons will be employed in this first unit, with a weekly payroll of about $75,000. On completion of the second unit, employment is expected to be double the above figures.

In a brief ceremony on Oct. 21, American Enka officials broke ground on the Lowland project to initiate the grading of the plant site. Actual construction is expected to begin about January 1.

The H. K. Ferguson Co., Cleveland, O., are contractors and engineers on the project.

"American Enka" officials anticipate that operations can be started in the new plant by November of 1947. The unit will produce approximately 22-million pounds of rayon yarn annually, of which the greater part will be for use in tire manufacture.

* * *

GILES COUNTY LEASED FOR OIL/GAS PROSPECTING

Representatives of a Texas company are reported by the Pulaski Citizen to have taken oil/gas leases on some 50,000 acres in the Richland Creek and Campbellsville areas of Giles County. J. W. Holsey is named as the party in charge of the leasing crew which, in the past two months, has registered a total of 475 leases in the local Court House. Geophysical testing of the leased areas reportedly is planned for early next year, with subsequent test drilling in the event of favorable results from this geophysical work. The leasing organization is not identified but is believed to be one of the major petroleum companies.

* * *

CHARCOAL BURNING IN PORTABLE KILNS

Charcoal is a commodity that is in especially short supply since war's end, when numerous wood distillation plants shut down. This situation, according to competent authorities, will continue until new sources of supply are developed.

The four major outlets for charcoal in the Northeast are: (1) the Connecticut Valley shade-tobacco industry, using about 7500 tons annually - commonly in briquette form; (2) the domestic market - bagged and sold through grocery stores largely to foreign-born population for cooking; (3) industrial uses - chiefly in metal-working and market appears to be increasing; and (4) activated carbon as a refining and purifying agent, as in water treatment to remove tastes and odors.

Revival of the charcoal industry in Connecticut was sponsored a few years ago by the State Department of Forestry in order to provide an outlet for surplus low-grade wood. As a result of that agency's work, a satisfactory portable-type of charcoal kiln was developed by use of cinder-concrete blocks. On a total investment of less than $1,000 for a battery of 4 of these portable kilns, the profit has been estimated at $200 per year. It is assumed that a competent manager could supervise a total of eight batteries which, on the total investment of $6,400, would yield a profit of $1,600 or a 25% return.

The present scarcity of charcoal affords an opportunity for returned service men to get into the charcoal-burning business at relatively low capital investment, with a fair return. In many parts of Tennessee, lumbering operations are producing slabs and other wood wastes that could be converted into charcoal. Both hardwoods and softwoods can be successfully coaled.

Anyone interested in the possibilities of charcoal production should consult the following publications, on which the above summary has been based: "Charcoal Production" by Edgar L. Heermance, Chemurgic Digest, May 31, 1946, pp. 188-190 (National Farm Chemurgic Council, Columbus, O.), and A Charcoal Kiln Made of Cinder-Concrete Blocks, by A. Richard Olson and Henry W. Hicock, Conn. Agric. Exp. Sta. Bull. 494 (Feb. 1946).

* * *

BRISTOL TO ADVERTISE HUGE INDUSTRIAL WATER RESOURCE

A 4½-million gallon daily surplus of water beyond present local needs is being publicized by the City of Bristol, Tenn., as one of its chief resources and advantages for large industrial developments in that area. With 1,000,000 gallons of unfiltered water available daily from a local spring and a 3,500,000 gallon surplus from the city filtering plant on Holston River, Bristol officials believe that "the city is in a strong position to attract one or more industries.... and will exploit this opportunity to the fullest.... by placing advertisements in Eastern magazines circulating among industrial leaders", according to the Bristol Herald Courier.

* * *

OIL TEST SCHEDULED FOR DEKALB COUNTY

Drilling of an oil/gas well in DeKalb County, near the White County Line, was scheduled to begin in mid-October on the 400-acre F. F. Burton tract, about 1½ miles east of Center Hill Dam. This test is being based on the results of investigations made in the DeKalb-White counties during the past month and a half by C. L. Williams and O. E. Nichols, geologists of Lakewood, Ohio.

Poston & Howard of Richman, Tenn., are drilling contractors. The test will be drilled to a depth of about 1,000 feet, according to the Sparta Expositor.

* * *

INDUSTRIAL PLANTS AND SITES AVAILABLE

PLANTS

Middle Tennessee: Town of 400. One-story brick building, 120 x 180 ft. (21,600 sq. ft.) originally built for automobile accessory manufacture and, later, used for broom manufacture. Area can supply several hundred workers. Good heating system and deep well water supply; served by team track of L. & N. R.R.

Town of 1300: Concrete block building, 100 x 135 ft. (13,500 sq. ft.), with 12 ft. ceiling, concrete floor, and gas heating system; not sprinklered. Access by truck. Will rent or sell. Space available for 135 x 50 ft. addition.

East Tennessee: City of 3,500 population. Three-story brick building, total of 7,581 sq. ft. floor space, exclusive of full basement; ceiling height, 12 ft.; originally built as flour mill and has very strong wood floors. Later converted to hosiery mill, with dye room especially equipped; boiler room built separately from main building. Not sprinklered but has fire escapes; completely piped for drinking and process water; toilet facilities in conformity with State codes; locates on R.R. siding. Available for lease or purchase.

City of 7,000: One-story concrete block building, 100 x 100 ft., 15-ft. ceilings, wood floors; heated by stoves; no sprinkler protection; on R.R. Available for rent.

SITE

West Tennessee: Private development group in progressive city offers to suitable industry free 15-acre plant site, immediately outside city limits alongside N. C. & St. L. R.R. Street will be paved and guttered to property; natural gas, water, and sewer lines now within short distance of site and will be extended. Quick possession promised. Only the highest-type industry, preferably employing male labor, will be considered.

* * *

MEMPHIS FIRM PRODUCES FLUSH MOLDING PLASTIC

Norrell, Inc., newly organized Memphis plastics manufacturers, are producing an ethylcellulose based flush molding plastic which is proving very popular for toy, novelty, and advertising display manufacture because of the simplicity and inexpensive methods required. This plastic, marketed under the trade name of "Norcell", was developed by the Kemp Plastic Company of Memphis, now merged with Norrell, Inc.

"Norcell", according to a write-up in the August issue of Southern Plastics readily melts to a free-flowing liquid which can be molded in simple open molds without application of pressure. Molds may be made of rubber, plastic, or aluminum eliminating the need for expensively machined steel molds commonly used for most other plastic fabrication. Dip molding also is practicable and is being used by Norrell, Inc., in the production of plastic whistles for the Cracker Jack Company. An output of 6,000 whistles an hour can be obtained.

Norrell, Inc., will welcome inquiries on "Norcell".

* * *

SWEETWATER CONTINUES INDUSTRIAL PROGRESS

Sweetwater, which in less than a year has obtained six new industries, last month announced its seventh industrial addition - the Gloversville Knitting Company of Gloversville, N. Y. This company has obtained space in Sweetwater for pilot-plant manufacture of knitted gloves, with initial employment of 50 workers. Operations are expected to start about December 1. It is believed locally that the company will eventually construct a plant at Sweetwater for full-scale operations.

* * *

NEW QUICK-FREEZE IDEA SUCCESSFUL IN WEST STATE AREA

A mobile quick-freeze and storage unit, contained in two railway refrigerator freight cars, has been in successful operation on lima beans at the Ridgely Canning Company plant during the late weeks of this summer, according to the Lake County Banner. Originated and designed by Graves and John Craddock of the Ridgely canning concern, with cooperation by the TVA and the Illinois Central Railroad, this mobile unit will go south to Louisiana next spring for the opening of the strawberry season and move north during the season processing various vegetable and fruit crops en-route. One of the cars of the unit is equipped with the refrigeration coils and other equipment for processing and the other car is used for storage of the frozen product. Power is obtained from a motor truck-trailer combination on which are mounted transformers and other electrical equipment.

The Craddocks' new plant, Realfoods, Inc., under construction at Tiptonville will contain five permanent quick-freezing units, each with a daily capacity for 50,000 pounds of lima beans - equivalent to the capacity of their mobile unit. This Tiptonville plant is expected to be completed in time to process the lima bean crop of that area and to handle the Fall spinach crop. The Craddocks are reported as hoping to have 2,500 acres of lima beans and 1,000 acres of spinach grown in that West Tennessee area next year to supply their Tiptonville freezing plant and the Ridgely canning plant which is being expanded. The frozen lima bean output has been sold to Texas frozen food distributors.

(Editors Note: A representative of one of the nation's largest frozen food producers is reported to have stated that the westernmost part of West Tennessee is one of the best lima bean growing areas in the United States and warrants greater development of that crop. Asparagus is considered another highly favorable crop for that area, according to this same authority.)

* * *

MANUFACTURING OPPORTUNITY

Radio Cabinets: Eastern manufacturer wants to place contracts with wood-working plants for short production runs of good quality console type radio cabinets, according to specifications to be furnished by company.

* * *

CPA APPROVES CHATTANOOGA NYLON PLANT

CPA approval has been granted for construction at Chattanooga of duPont's $20-million nylon yarn plant, (see Sept. Newsletter) and, according to the Chattanooga Times, ground is expected to be broken on the site about November 1. G. E. Bubb, field project manager, and four other key men of the duPont construction division have been in Chattanooga since mid-October preparing to start the work. The main plant building, as reported, will be 748 x 324 ft. of concrete, steel, and masonry; it will be largely one-story, except for a 3-story section near one end. This main structure will house the polymer, spinning, and other manufacturing operations, plus the general offices. Completion of construction and installation of equipment is estimated at 18 months.

* * *

DO YOU KNOW THAT:

Tennessee, in the period from 1940 to 1945, increased by more than 28% the number of cattle and calves in the State. The amount of whole milk sold in this 5-year period increased 66.8%. Since 1910, the sales of whole milk have increased 1,489%.

* * *

EMPLOYMENT OPPORTUNITIES

Sales-Purchase Executive: Mature man experienced in industrial selling and purchasing seeks position with Tennessee manufacturer or jobbing concern; will consider Chamber of Commerce positions. Has had 20 years experience in selling mill supplies, heavy hardware, and other iron and steel products; 9 years as purchasing agent for large steel foundry, large construction company, and assistant manager of an ordnance plant during war; two years as executive secretary for real estate board in Southern city.

Personnel Executive: Man of 36 experienced in personnel work. Six and half years in major chemical operation in Tennessee. Personnel instruction in aircraft manufacture at Memphis, 2½ years. Personnel director, Memphis State vocational school: recruiting and training of about 10,000 workers for draftsmen, electricians, welders, Signal Corps radio operators, blueprint operators, and similar industrial jobs, requiring supervision of 150 instructors, contacts with all operating industries in Memphis area, and recruitment of labor throughout West Tennessee; also arranged inter-plant programs for foremen and supervisors. In charge of aircraft assembly jobs, 2½ years in Birmingham area. Desires industrial personnel employment; free to travel but prefers Tennessee territory. Special knowledge of West Tennessee labor.

Dealer Franchises: Great Lakes Steel Corporation, producers of the war-famous "Quonset" steel huts, have a limited number of exclusive dealer franchises available for Tennessee territories. "Quonset" all-steel buildings are now available in units of 20- and 40-foot widths that can be extended to any length by 12-foot and 20-foot extensions, respectively. Multiple unit construction also is possible. These "Quonset" units are finding use as warehouses, construction project offices and bunkhouses, farm storage buildings and stock barns, tourist cabins, summer lodges, industrial manufacturing space, and other commercial, agricultural, and industrial structures. Tennessee dealerships will be allocated on the basis of potential markets in various areas of the State. Interested parties should contact "Newsletter" editor.

* * *

MINING RESUMED ON FAMOUS AETNA COAL SEAM

Aetna Mining Co., Inc., Chattanooga, currently is producing 650 tons of coal daily from strip-mining operations at the famous old "Aetna" properties on top of Raccoon Mountain near Whiteside. Two operating lessees, the V. P. Serodino Co., Inc., and J. W. Hendricks, are doing the strip mining at two points on the 10,000-acre holdings under lease to the Aetna Mining Co., through which the sales are handled. At the Serodino pit, five shovels are reported by the Chattanooga Times to be engaged in stripping and mining the coal seam which, at that point, is 39 to 40 inches thick, with an average 17-foot overburden of shale and soil. The coal is trucked to a railroad loading platform at Whiteside.

The Aetna Mining Company is said to be planning construction at Whiteside of a modern plant for preparing stoker coal for domestic use. Production will then be

stepped up to 1,000 tons daily.

The "Aetna" coal was mined on Raccoon Mountain for many years by the old Aetna company, using underground methods. The excellent quality of the coal was widely recognized, and shipments were made to many markets in this country, particularly to the blacksmithing trade, and to various export markets.

PRODUCTION LINE NEWS AND NOTES

Institute of Nuclear Research Started at Oak Ridge

The Oak Ridge Institute of Nuclear Studies in mid-October received a State charter of incorporation and plans to establish a research agency for cooperating with the Manhattan District in "arranging education, research and development programs at Clinton Engineer Works" and with the universities and colleges in the Southeast in sponsoring similar programs designed to further atomic energy research and technology. The Institute is being chartered by a group of Southeastern educators and scientists, including Dr. W. G. Pollard of the University of Tennessee and Dr. Francis G. Slack of Vanderbilt University. Obtainment of the charter is said to be a step preparatory to signing a contract with the Manhattan District for use of certain facilities at Clinton Engineer Works for atomic research by the Institute.

Mid-State Cities Hear Industrial Planning Talks

Talks on the problems of promoting industrial development in Tennessee communities were given by your editor before the Murfreesboro City Council and Planning Commission on the evening of September 25, and before the annual dinner of the Manchester Chamber of Commerce on September 30. At the latter meeting, Chas. Crangle of the Commission's Division of State Planning, also talked on the advantages of local community planning.

University of Chattanooga Receives Naval Research Contract

The Research Institute of the University of Chattanooga has been selected by the U. S. Navy for a program of fundamental research on plastics. This is one of the first peacetime military contracts to be awarded a Southern university.

New Magazines To Feature The South

Pace, a weekly magazine providing a "comprehensive chronicle of events in the Southern states", is being planned for initial publication in early 1947 by Southern Associates, Inc., a new Atlanta publishing firm.

Dixie Digest is a new pocket-size magazine that made its debut with the October issue. Published by Dixie Digest, Inc., New York City, the magazine features a variety of both original and digested articles on Southern people, places, customs, sports, and other popular subjects. In the first issue are included articles on Georgia's Governor Arnall, West Virginia's resources by Governor Meadows, Nashville's "Joe" Frazier of Kaiser-Frazier fame, Arkansas' Bob Burns, and radio's "Senator Claghorn".

State Competition Increases In Industrial Field

Mississippi, according to Wall Street Journal report, has announced plans for establishing an "office of information" in New York City to place that State's advantages before Eastern industries and other businesses seeking Southern locations.

Louisiana votes this month on three amendments to her constitution to adopt a public subsidy plan patterned after the Mississippi "Balance Agriculture With Industry"

program. Under the BAWI plan, use of public funds is legally authorized for purchase of plant sites and building of factories to be rented to new industries which must pass a rigorous investigation by a State board. Five-year tax exemptions also are provided under the proposed Louisiana plan.

East State Zinc Deposits Mapped

The State Division of Geology has issued a large-scale map on the geology and structure of the Mascot-Jefferson City zinc mining district. The map, on a scale of 2 inches to 1 mile, shows the various geologic formations in color, on a topographic base of 20-foot contour interval. Eighteen structure sections, a columnar section, and list of zinc mines in the district also are shown. Josiah Bridge, geologist of the U. S. Geological Survey, is author. Copies of the map can be obtained from the Division of Geology, Room G-5 State Office Bldg., Nashville, at $1.00 per copy.

Milan Compliments U. S. Rubber Company

The Milan Exchange, in its October issue, published a special "U. S. Rubber Company Section" devoted to a review of the history of that company and career sketches of various company officials engaged in setting up the new U. S. Rubber Company sports footwear unit in the recently purchased "Line G" in the Milan Ordnance Works property (see Sept. Newsletter).

Cement Association Opens New State Office

Mr. John L. Feagin, formerly connected with the War Department and Consolidated Edison, Inc., of New York, has been appointed by the Portland Cement Association as District Engineer in charge of their newly established Memphis office. He will have charge of Association activities in Arkansas and Tennessee, with headquarters in the Falls Bldg., 22 N. Front St., Memphis 3. Mr. Feagin joined the staff of the Association in 1937.

Dunlap Sets Up Industrial Development Company

The Dunlap Building & Real Estate Company has been organized at Dunlap by local interests for the purpose of constructing plant facilities for new industries locating in that East Tennessee community. President of the new organization is F. S. Barker of the Sequatchie County Bank.

RFC Branch Offices To Close

Branch offices of RFC located in Chattanooga, Memphis, and Knoxville will be closed by Nov. 15. This action is necessitated by the Congressional limitation on appropriations for the fiscal year 1947. All functions of the branch offices will be absorbed by the Nashville office.

* * *

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Gager Lime Co., Sherwood, has been acquired through stock purchased by a new corporation formed by three officials of that company - J. M. Gager, Jr., sales manager; W. J. Mills, president; and F. M. Ferguson, vice-president. The new corporation has an authorized capital of $50,000. Plant personnel, totaling about 125 workers, will not be changed, according to a reported statement of Mr. Gager, grandson of the founder of the firm. Monthly production of the plant is about 5,000 tons of lime and 12,000 tons of crushed limestone.

- - - - -

Pure Oil Co., Memphis, is planning to erect a $113,000 terminal oil dock on the Mississippi River.

- - - - -

Gaither Chemical Works, Nashville producer of mineral wool, has been purchased by the Tennessee Products Corporation of Nashville for a reported price of $32,579. Equipment of the plant, valued at $42,421 also was purchased, making a total transaction of $75,000. Mineral-wool manufacture is being continued at the plant by TPC, the change in management being effected on October 1.

- - - - -

Southern Cotton Oil Co., Memphis, has received a city building permit and has taken bids for a new $298,000 shortening manufacturing plant.

- - - - -

Bolton Furniture Co., Inc., Arlington, was established in a new plant building in that town, on September 3. Operations, scheduled to start as soon as OPA sets prices on the firm's products, will employ 4 workers. Specialty of the company will be the manufacture of a youth chair. D. R. Pierce is president.

- - - - -

Arkansas Fuel Oil Company plans to build a bulk storage terminal at Knoxville between the L. & N. R.R. and Middlebrook Pike.

- - - - -

Monsanto Chemical Company's elemental phosphorus unit at Columbia last month won top honors for the 5th time in 9 years in the company's annual competition for maintenance of facilities. This "Good Housekeeping" award is judged on working conditions, safety practices, and general housekeeping.

- - - - -

International Harvester Co., Memphis, plans construction of a 221,000 sq. ft. warehouse and parts building.

- - - - -

Southern States Iron Roofing Co., Savannah, Ga., is erecting a new plant at Nashville.

- - - - -

A new 45,000 sq. ft. brick office and warehouse for the U. S. Rubber Co., is being built at Memphis by the Union Realty Company; estimated cost $200,000.

- - - - -

The Sumner County Cooperative Creamery, operated at Gallatin since 1919, plans a $50,000 expansion to permit handling of whole milk, in addition to present creamery operations. The new equipment is now on order, and the expansion is expected to be completed by early Spring, with doubling of employment.

- - - - -

Abrams Packing Company, Memphis, has a $300,000 building expansion program underway.

- - - - -

Martin Mfg. Co., Inc., has renewed for another 2-year period its subleasing contract with Salant & Salant, Inc., of New York for the latter's plant building at Martin. The plant was initially subleased to the Martin Mfg. Co. in November, 1944.

- - - - -

Winter Garden Co., Knoxville, frozen foods processors are planning a $35,000 addition to their plant.

- - - - -

Bryan Hosiery Mill, Chattanooga, has sold its Alton Park plant, including real estate, and equipment, to the Mar Mode Hosiery Mill of New York City.

- - - - -

Plasti-Line, Inc., Knoxville plastic fabricators and authorized dealers for Plexiglas, recently expanded their operations by moving into a new specially designed factory building. Starting two years ago as a puzzle manufacturer, "Plasti-Line" has expanded production to include such home and commercial items as table, pin-up, and boudoir lamps, tables, and bathroom fixtures. Industrial and custom fabrications include helmets, motorcycle and motorboat windshields, and specially designed machinery parts for visual control. The company ships its products throughout the country and to Canada and Cuba. Mr. Harry W. Brooks is president of Plasti-Line, Inc.

- - - - -

Tennessee Products Corp., Nashville, is building a $25,000 research and pilot-plant unit at its Chattanooga operations.

- - - - -

Completion by early next February is expected for the new 170-mile power transmission line of 154,000-volt capacity being constructed by the TVA from its Kentucky Dam at Gilbertsville, Ky., to Memphis. This new line and other improvements being made by TVA will give the Memphis distribution system a dependable 160,000-kilowatt power supply. Total cost of these TVA improvements is reported to be $4,500,000.

- - - - -

Contract has been awarded by the Coca Cola Bottling Co., at Lexington for a new $100,000 bottling plant. S & W Construction Co., Memphis, was successful bidder on the job.

- - - - -

A new type of oil burner, using low-grade oil, has been developed by the Samuel Stamping & Enameling Co., Chattanooga. This new burner is expected to revolutionize small home and water heating.

- - - - -

A new modern $25,000 theater, "The Dixie", has been completed at Byrdstown. Seating capacity is about 500.

- - - - -

Southern Natural Gas Co., Birmingham, Ala., has asked the Federal Power Commission for permission to increase the capacity of its system by 50-million cubic feet daily, according to the Wall Street Journal. Among the company's plans are cited proposed extension of its system to serve Chattanooga.

- - - - -

WAPO Broadcasting Co., Chattanooga, has received Federal Communications Commission approval for the construction of a 37,200-watt commercial FM station, to be located on Fairmount Road near State Highway 8.

- - - - -

Star-Union Company, which is now operating a garment plant at Manchester, is reported by the Rutherford Chronicle as interested in the possibility of Murfreesboro providing 20,000 to 40,000 sq. ft. of plant space for another operating unit. The company would expect to sign a 10- to 15-year lease for any plant constructed in that city and would agree to employ one person for each 100 feet of floor space.

- - - - -

Bumper Guard Mfg. Co., Memphis, is a new concern manufacturing a bumper that affords protection for the entire front of a truck or car. Featured in Business Week (July 20 issue), the guard is said to have been developed by Dick Bailey and his brother, owners of a local truck delivery service, and so successful was the new device that orders for similar guards came rolling in from other truck owners, necessitating the establishment of manufacturing facilities. Installed in a newly built plant, the company began operations on September 23, with 8 employees.

- - - - -

Rohm & Haas, Knoxville, manufacturers of Plexiglas, have been granted CPA authorization for remodeling of their local plant.

- - - - -

Previously announced plans of Chicago and Southern Airlines to move their executive offices from Memphis to Chicago have been abandoned, due to housing difficulties.

- - - - -

"Airshipped" (air freight) service will be inaugurated by Eastern Air Lines on November 15 between Nashville and other domestic and foreign ports of the lines' system. Tariffs apply between individual airports. "Pick ups" and "delivery" ground services are expected to be made available in the near future.

- - - - -

DuPont plans to begin an extensive modernization program at its Old Hickory, Tenn., rayon-cellophane plant within the next few months.

- - - - -

Kingsport Press is a regular user of Capitol Airlines (PCA) Airfreight, making sizeable daily shipments of books and other printed matter from New York City to the Kingsport plant.

- - - - -

Carlin-Howell Corp., Nashville, has begun production of crushed limestone at its White County plant near Doyle. The fully equipped modern crushing plant has a 250-ton daily capacity for producing concrete and road aggregate, "aglime", and chemical-grade stone. A 600-ft. spur from the N. C. & St. L. Railway permits direct loading for rail shipments, and trucks are used for local deliveries. Ten to 12 workers are being employed in these initial operations which began Sept. 1. The quarry property from which this high-grade limestone is being produced is estimated to contain a 100-million ton reserve.

J. C. Carlin is president and E. W. Howell, secretary-treasurer of the company, which is a successor to the Burgess Lime & Stone Co. Offices are at 1603 Church St., Nashville.

- - - - -

Ferro Enamel Corp., Cleveland, O., has awarded contract for its new 20,000-sq. ft. manufacturing unit at Nashville; estimated cost $115,000.

- - - - -

Brookside Mills, Knoxville, is reported in the Tennessee edition of CIO News as planning an expansion and conversion program that will give a complete operation from raw cotton to finished woven dresses and increase employment from current 1290 workers to about 3500, according to a Knoxville News Sentinel story.

- - - - -

The City of Memphis is planning a series of three subterranean parking lots in the downtown area. The parking spaces, excavated to 3-story depth, would accommodate a minimum of 3,000 cars.

- - - - -

A new furniture factory employing approximately 50 persons is in operation by J. L. Carver of Athens.

An additional new business in Athens is the Dockery Butane Service with four initial employees.

- - - - -

Burkart-Schier Chemical Co., Chattanooga, has completed a new research and development laboratory, built in conjunction with the company's established service and plant control laboratories. The new unit includes offices, library, and stock room. Completed with the laboratory was a large one-story chemical storage warehouse.

- - - - -

Willard Storage Battery Company has let contract for its new $600,000 plant at Memphis.

- - - - -

The Newport Textile Company, operated by B. G. Brumby of Murphy, N. C., has begun production of fatigue shirts and other U. S. Army service apparel at Newport in the plant space formerly occupied by the local B. C. Hosiery Mills. The latter company has moved to new quarters in the recently completed J H C Super Market building. The Newport Textile Company will start with about 20 workers but expects to operate three shifts, using some 50 workers, as soon as sufficient workers can be trained.

- - - - -

National Battery Co., Memphis, has awarded contract for its new battery plant, estimated to cost $300,000.

- - - - -

Lobelville, Perry County town of 475 population, is now enjoying the benefits of natural gas, provided by the Lobelville Gas Company which has completed a two-inch service line through the town. The gas is tapped from the Tennessee Gas & Transmission Company's trunkline which passes through Lobelville.

- - - - -

Tennessee textile plant expansions listed recently in Southern Textile News as being planned or underway include:

Cumberland Gap Woolen Mills, Harriman - woolen blankets - $15,000 for new equipment.

Moers Mills, Inc., Nashville - hosiery - $30,000 for new building.

Williamson Hosiery Mills, Englewood and Athens - $300,000 in new equipment.

- - - - -

The City of Linden has let contract for a new $105,000 garment factory building to be built by Cowan Lumber, Planing & Material Co., Dickson.

- - - - -

The Town of Huntingdon has received low bid from the L & M Construction Co., for the new plant to be built there for Publix Shirt Co.

- - - - -

Allis-Chalmers Mfg. Co., is planning a $400,000 plant at Memphis for the manufacture of industrial and agricultural machinery. The Shelby County Board of Adjustment recently approved re-zoning the southeast corner of Dunne and Airways Avenues to permit this proposed construction.

- - - - -

WCOE, Inc., is the State charter name of Nashville's newest radio station, expected to start operations before year's end.

- - - - -

Monsanto Chemical Company, Columbia, is opening a new phosphate mining operation at Dark's Mill, about 5 miles north of Columbia. A total of 14 men currently are employed at this mine, which is expected to supply about half of the phosphate matrix requirements of the Columbia plant. The ore will move to the plant over the L. & N. Railroad, a loading tipple having been built for this purpose at the Dark's Mill location.

- - - - -

McMinnville Broadcasting Company's 250-watt radio station has received FCC approval, and equipment is expected to be available within 60 days, although actual erection will depend on completion of the Cumberland Amusement Company's building, now under construction, in which the station will be housed.

- - - - -

Eastern Air Lines in early October inaugurated a DC-4, 56-passenger "Silverliner" service between Nashville, Chicago, and Florida ports, supplementing present DC-3 schedules and bringing Nashville within 5 hours of Miami.

- - - - -

Its-A-Dilly is a newly organized Memphis firm which plans to manufacture extracts and to operate non-alcoholic beverage bottling plants. Robert E. Dilatuch is president.

- - - - -

The Monroe Calculating Machine Company has received CPA approval for construction of its $1,000,000 new manufacturing unit at Bristol, Tenn.-Va. (see Sept. Newsletter), and work is expected to start soon. The 100,000 sq. ft. plant building will house all facilities for conversion of raw materials to completed machines and will employ about 750, mostly skilled workers.

- - - - -

Sweetwater Valley News, one of the State's outstanding weekly newspapers, has been sold by its owner, John W. Riley, to F. S. Lloyd of Bastrop, La., business manager of the Morehouse (La.) Enterprise. The News has been the winner of numerous publishing awards in its field.

- - - - -

Memphis Knitting Mills has been granted a building permit for construction of a new $6,000 mill in that city.

- - - - -

The Deegan Co., Nashville, has been granted a State incorporation charter for engaging in business as manufacturers agents and jobbers. Incorporators were Lucy E., John R., and James J. Deegan.

- - - - -

Delta Air Lines, on November 1, will inaugurate the first scheduled non-stop flights between Chicago and Miami on a 6-hour schedule. Also to be added on that date is another DC-3 flight from Chicago to Savannah, Ga., via Cincinnati, Lexington, Knoxville, and Atlanta, giving a total of 8 daily flights to the South from that city.

SOUTH CAROLINA MANUFACTURING EMPLOYMENT DECLINES DURING SEPTEMBER

For the first time since October 1945 manufacturing employment in South Carolina has declined. According to the latest employment estimates released today, manufacturing employment in South Carolina decreased by 1,100 workers between mid-August and mid-September with the level on September 15, 1946 at 182,800 workers. The current level represents a slight decline from the post-war peak of 183,900 reached on August 15, 1946. Thus, the September level is still well above the level during the latter part of the war and, except for the August peak, is the highest level attained since March 1944. The decline in the current 30-day period occurred in industries manufacturing durable goods. This group dropped more than 1,600 workers between August 15 and September 15, while the industries manufacturing "consumer" goods added 500 workers.

The largest employment reduction between mid-August and mid-September occurred in the lumber industry which had a net loss of 1,200 workers. A "slowing" of operations at sawmills and logging camps was responsible for the drop. The other major "heavy" goods industries also dropped employees in this period with the furniture industry and the miscellaneous durable group each releasing over 200 workers.

The food processing industry also contributed to the employment decline during this period with a reduction of 300 workers. The greater part of the drop was due to normal seasonal factors, with the exception of the decrease in meat packing plants which was due in part to price uncertainties prior to the lifting of price controls.

Partially offsetting these declines were increases in the textile and chemical industries which had new hirings of 500 and 400 workers respectively. The employment rise in textiles was concentrated in cotton textile mills while the rise in chemicals was divided about equally between those plants manufacturing fertilizers and those processing cottonseed oil.

The table below summarizes employment changes in manufacturing industries in South Carolina for September 1946, August 1946 and September 1945.

ESTIMATED NUMBER OF EMPLOYEES IN MANUFACTURING INDUSTRIES IN SOUTH CAROLINA 1/

Industry Groups	Sept. 1946	Aug. 1946	Sept. 1945	Net Change From Aug.'46 To Sept.'46	Percent Change From Aug.'46 To Sept.'46	Percent Change From Sept.'45 To Sept.'46
	(In thousands of employees)					
ALL MANUFACTURING	182.8	183.9	165.4	- 1.1	- .6	+ 10.5
Durable Goods	32.0	33.6	28.0	- 1.6	-4.8	+ 14.3
Nondurable Goods	150.8	150.3	137.4	+ .5	+ .3	+ 9.8
Durable Goods						
Lumber & Timber Basic Prods.	21.0	22.2	17.2	- 1.2	-5.4	+ 22.1
Logging Camps & Sawmills	17.9	19.1	14.8	- 1.2	-6.3	+ 20.9
Furniture & Finished Lmbr.Prods.	5.8	6.0	5.1	- .2	-3.3	+ 13.7
Stone, Clay & Glass Prods.	2.5	2.5	2.1	--	--	+19.0

"MODERN INDUSTRY LOOKS AHEAD"

(Abstracted and reproduced from October issue of Modern Industry, by permission of the editors)

Fresh gains are being made in production, in employment, and in national income;

Retail sales continue to show record increases over last year;

It is still difficult to buy and relatively easy to sell;

Yet businessmen in many fields are beginning to worry.

As security prices have nose-dived in successive waves of selling, businessmen have started to take a second look at things, to ask pointed questions.

Is the postwar boom to be nipped before it gets fairly started?

Does the stock-market drop herald an early and severe recession in business?

Should my company lower its selling hopes, cut its buying, tighten up inventories for stormy weather ahead?***

While the sharp drop in security prices cannot be ignored as a clue to coming business activity, there are reasons for discounting some of its severity.

First, there are technical conditions not present in previous market slumps. Restricted short-selling made for a thin market and resulted in a sharper-than-usual break.

Secondly, many investors have enjoyed a substantial rise in value of their holdings over the past two years and are content to take their profit and watch for a time.

Thirdly, the investor is buying or selling on the basis of profit outlook rather than business activity. The probability of another round of wage demands, plus increasing buyer resistance to prices, plus continuing production delays certainly weighs heavily against profit margins for next year.***

MI editors, after weighing many opinions and piles of statistical evidence, take the view that there will be a drop-off in business next year; but that it will not be of severe depression proportions.

Many companies will be hard hit, but the over-all impact on business activity will not be drastic or prolonged.

What's needed, and what we seem to be headed for, is a shake-out in prices as shortages are made up and artificial controls and the black marketers vanish, plus

a readjustment of wage costs - most likely to be realized through increased productivity.

Both of these adjustments - price and wage-costs - are needed to bring values down to a point where buyers can and will spend, and costs go down so producers can make a profit.***

Mindful of the risks of making specific forecasts, MI editors suggest the following as a rough time-table of business conditions during the next 12 to 18 months.

These rule-of-thumb forecasts rest on two assumptions which must be taken in any prediction of the future. First, no world war; second, no labor conflict of much greater proportions than we have already had during the coming corrective period. These are the political or semi-political influences which cannot be predicted or measured, which can only be admitted and weighed as possibilities.

Business activity will continue at high levels through 1946 and into the spring of 1947. Profits on the average will be sizeable, but will be progressively squeezed.

Labor will make another attempt to obtain a general wage increase this winter, but demands will be tempered by the growing realization that a shake-out is inevitable. Increases demanded will run closer to 8 or 10% rather than the much-discussed 15 to 20%.

Price weaknesses will be noticeable by April, 1947, particularly in farm prices, and will become more general by late summer.

Business volume will turn down in the summer. Producers of soft goods for the most part will be first to find themselves in a strong buyer's market; some hard-goods producers will be hit as well - notably radios.

Temporary suspension of some expansion and re-equipment plans will cut the market for industrial equipment.

The drop in business activity will not be as sharp as the recent drop in security prices or the coming drop in commodities. Basic demands for autos, machinery, steel, building materials will cushion the slump when it comes.

Unemployment will rise during the fall, reach its peak early in 1948.

Business will get squared away again in the spring of 1948, head towards four or five years of exceptionally good volume, with considerably more attractive margins of profit.

Labor productivity will show a sharp recovery by 1948; partly as a result of growing unemployment, but even more as a result of a smoother flow of materials, more experience on the job, the addition of better methods, the installation of new machines and equipment for production.

* * *

NEW INDUSTRY SELECTS ETOWAH LOCATION

The Jolly Manufacturing Co., makers of children's garments, will locate a new operating unit in Etowah as soon as local interests can complete a new plant building. Mr. John Adams, owner of the garment concern, has signed a lease for the new 5,000 sq. ft. concrete block building, expected to be completed about January 1. Manufacturing will start immediately on completion of the building, and some 50 to 60 persons will be employed.

This new industry was obtained for Etowah through the efforts of the local Lions Club and of Dick Ownbey who owns the plant site and is financing the plant construction in cooperation with other businessmen of Etowah.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any industry listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

152. Light Manufacturing & Assembly: Well-known manufacturer, rated over $1-million in assets, seeks minimum of 10,000 sq. ft. floor space, available immediately, for manufacture and assembly of light metal products. Will employ 300-500, 95% women. Prefers small town location.

This prospect would consider space in multi-story commercial building. Any town having vacant retail store buildings or similar structures, please contact us at once as this inquiry requires action at the earliest possible moment. Towns having 10,000 sq. ft. or more space listed with this Division have already been recommended.

* * *

NEED FOR INDUSTRIAL SPACE IN STATE BECOMES URGENT

As forecast in our September lead editorial, "Let's Get Ready For A Buyer's Market", numerous large industrial projects are only now reaching the site-location stage of investigations. This Division, in the past month, has been in touch with three projects, each involving 100,000 to 300,000 sq. ft. of floor space, that will employ between 500 and 1,000 workers. In addition, we know of or are in contact with a dozen other well-known manufacturers of leather goods, metal products, electrical appliances and equipment, rayon, textiles, building materials, and ceramics. Some of these companies are ready to go now and need up to 300,000 sq. ft. of plant space which, unfortunately, is not available. Tennessee probably will lose several of these major industrial projects because of this lack of industrial facilities.

Tennessee never has been highly industrialized and, in the present heavy development of new industries in the State, nearly all suitable factory space has been absorbed. Unless communities make definite plans now to provide plant facilities for new industries, many towns and cities will stand to lose excellent opportunities in the next year or so. Numerous forward-looking communities already have set up private industrial development corporations and have succeeded in obtaining new industries. Many more towns and cities could do this to real advantage.

Next month, the Newsletter will carry a detailed summary on industrial development corporations. In the October issue of the 6th District (Atlanta) Federal Reserve Bank's Monthly Review is an excellent report on "The Spread of Development Corporations", with special reference to those that have been established in Tennessee and Georgia. We can furnish a copy of this article on a limited number of requests.

* * *

SALES OPPORTUNITIES

Sales Representative: Manufacturer of smoking pipes and related smokers' articles seeks sales representatives for their products in Tennessee.

Export-Import Trade: The Southern States Export-Import Co., 140 Peachtree St., Atlanta, Ga., offers to Tennessee manufacturers a complete service for marketing their products to overseas markets and for importing any needed raw materials. The company is prepared to: develop overseas markets through personal representation, direct mail, radio, newspaper and magazine advertising; absorb all credit risks; obtain U. S. Government export permits and when required, Civilian Production Administration priorities; and, prepare all shipping documents, pack or package for export, handle customs clearances, provide warehousing at port cities, and obtain space aboard conference ships.

President of the company is Alton R. Sanders. Branch offices are in New Orleans, Miami, and Norfolk.

* * *

INDUSTRIAL GROWTH IN THE SOUTH

By Weldon A. Stein

Editor's Note: In the 8th District (St. Louis) Federal Reserve Bank's Monthly Review for November is published, under the above title, Mr. Stein's very able discussion of the South's industrial progress. In evidence of Tennessee's vigorous industrial growth, Mr. Stein cites the State's gain of 142 new industries during the first 8 months of the current year (see October Newsletter). Much of Mr. Stein's article is devoted to review of the industrial development programs being carried on in Tennessee, Mississippi, and Arkansas, the three Southern states represented in the 8th Federal Reserve District. In this review, the Tennessee State Planning Commission's program is excellently summarized. Below are reproduced by permission selected parts of Mr. Stein's article that concern the Tennessee program.

- - -

In the southern states that lie wholly or in part within the Eighth District substantial progress has been made in recent years toward increasing the importance of industrial production relative to agricultural output. An examination of the experience of Tennessee, Mississippi and Arkansas is important, not only because it offers a means of appraising the trend in the remainder of the South, but also because it affords an opportunity to evaluate the operation of more or less contrasting state approaches to the problem of encouraging the development of industry in the South.***

During the war period these three states and the South as a whole benefitted considerably from the location of war production plants in the area and from an expansion of existing plants. A number of major war plants were located in Tennessee. In the Eighth District portion of the state were the ordnance plants at Milan and Millington, and aircraft and chemical plants at Memphis. In addition, thousands of workers were required for the expanded operations of the automobile and tire industries in Memphis as well as in other industries in western Tennessee where facilities were devoted primarily to war production. In the Eighth District portion of Mississippi the Gulf Ordnance Plant was an important war production enterprise. In Arkansas the war economy was boosted considerably as a result of the location of ordnance plants in the state and the tremendous increase in bauxite mining and processing.***

.... Only in Tennessee was the gain in manufacturing income relatively more important than that of agricultural income or military payments.***

The industrial development program in Tennessee is only part of a much wider-range plan for the over-all development of the state. The general program is founded on three basic assumptions. The first is that Tennessee's development will be only as great as the total development of its regions, counties, cities and communities. The second premise, which closely parallels the first, is that in the long run, best results are achieved when work at the state level is directed primarily toward assisting developmental groups at the community level and not used as a substitute for lower-level activity. Finally, Tennessee assumes that "knowledge of the state's resources, both potential and developed, is essential to progressive, sound planning for Tennessee's future economic growth and social progress".

With these assumptions as the basis for the proposed state development program, Tennessee enacted legislation in 1935, creating a State Planning Commission. At a time when the word "planning" was anathema in many parts of the country, Tennessee forthrightly accepted it as the keystone of its development program. The Commission was charged with "making a general state plan for the physical development of the state, with promoting public interest in and understanding of the problems of state planning, with cooperating with the TVA and other agencies to bring about a coordination of their plans, with creating regional planning commissions, and with furnishing assistance to regional and municipal planning commissions".

In addition to creating the State Planning Commission, legislation enacted at that time also authorized municipalities and cities to set up local planning commissions. In

1939 and 1941, amendments to the basic legislation extended the planning authority to counties and, under certain circumstances, to unincorporated communities.

The work of the Industrial Development Division of the State Planning Commission is coordinated with the over-all program for the development of the state, and in that respect the Tennessee plan varies considerably from the usual program of industrial development commissions in other areas. While Tennessee recognizes the necessity of increased industrial output as a means of raising the state's economic status, efforts are being made to avoid haphazard industrial growth.

The Industrial Development Division's program is designed to encourage the growth of industries directly related to the natural resources of the state. As noted, it assumes that the best type of industrial development can occur only when there is a complete knowledge of the advantages and resources that Tennessee has to offer, and when industries are selected on the basis of long-term growth possibilities which hold forth the greatest opportunities for the over-all development of Tennessee. The function of the Division is to assist local communities to develop their own areas and in carrying out that function, the Division often is able to aid in the physical development of a community by indicating the relationship between adequate recreational facilities, zoning requirements, etc., and a community's desirability as a potential site for the location of a new industry.

In order to assist local communities in their industrial programs the Division encourages each locality to prepare an inventory of its industrial advantages. A detailed questionnaire is completed by the local group, describing the resources, population, labor supply, transportation facilities, water supply, government, banking and commercial facilities and many other aspects of the particular community which are of importance to the management of companies contemplating construction of new plant facilities. On the basis of information included in these inventories, the Division is able to direct inquiring manufacturers to one or a group of Tennessee communities whose resources and other advantages coincide with the requirements of the prospective manufacturer. Similarly, the information reported by the communities is used as the basis for guidance by the Division in directing the activities of a community toward the type of industry best suited to the resources of the particular locality.

* * *

DO YOU KNOW THAT:

The Great Smoky Mountains National Park, during the 1946 season, topped all other national parks in the total number of visitors. The Great Smokies drew a total of 1,147,377; the attendance at Yellowstone National Park was second, totaling 814,907 visitors. The gateway to the Great Smoky Mountains National Park is through Knoxville and Gatlinburg in Tennessee.

* * *

TENNESSEE PAPER MILLS PLAN LARGE EXPANSION

The Tennessee Paper Mills, Chattanooga, received in late October CPA approval for construction of a $172,472 addition to its local plant. This addition will be built to house new paper-making equipment for expanding the company's output of paper board used in the manufacture of gypsum wallboard. An estimated two years will be required for the manufacture and installation of the new equipment, according to the Chattanooga Times.

Established in 1918, Tennessee Paper Mills produce paperboard for the manufacture of cartons, shipping cases, and gypsum board. The expansion now underway will double the company's output. In furtherance of these expansion plans, the company recently applied to the Secretary of State for a charter amendment to permit increase of capitalization from $600,000 to $1,500,000. If this capital increase is permitted, about $500,000 in new stock eventually will be issued in connection with the present expansion program, according to the Times' report.

* * *

EMPLOYMENT TRENDS IN STATE THROUGH SEPTEMBER

(Summarized from U.S.E.S. and Tenn. Dept. Employment Security Labor Market Letters and Area Employment Summaries)

General Situation

Employment in Tennessee is currently estimated at an all-time high, despite a 44,000 decrease in manufacturing employment between V-E Day and December 1945. Chief recent gains have been in trade, service, and utilities industries. Manufacturing employment, in spite of the moderate increase of about 17,000 since the first of the year, is now 76,000 above the April 1940 level and only 25,000 below V-E Day level. Unemployment has decreased 15% since July peak. In evidence of the State's progress, covered employment in Tennessee during March (latest comprehensive data available) showed a 35.5% increase over pre-war figures which is at a rate exceeding that of any Southern state and those of the eight most highly industrialized states of the country.

Memphis Area: Total employment estimated at 174,625, an increase of approximately 1,700 from July and 4,600 from V-E Day. Gains primarily in construction, utilities, trade and finance, insurance, and real estate. Manufacturing showed an increase of 750 from July to September. In the same period, total unemployment decreased. Total labor supply, 85% male, is predominantly unskilled and inexperienced. Known demand for next two months is about 1,200, with 1,000 of this in manufacturing.

Chattanooga & Residual Area: Total employment in Hamilton County rose to 77,300 in September, with iron-steel and construction industries showing largest gains. Labor surplus estimated at 5,000; 82% male and 50% semi-skilled; half of total demand is for unskilled. Athens and McMinnville areas: labor surpluses with industrial expansion limited due to material shortages. Cleveland area: slight employment decrease; 45% of anticipated expansion is in iron-steel industry, with 23% of current demand for unskilled workers in mining. Cookeville area: static situation; surplus of 2,100 greatly exceeds demand; little expansion planned. Livingston: lumber and logging employment shows seasonal increase; demand, met principally by women, is for unskilled and semi-skilled. Sparta: little change in past two months, except for oil and gas surveys in White County. Tullahoma: shutdown of chenille plant and partial shutdown of glove plant due to lack of materials; completion of additions to shoe and sporting goods plants will afford new job openings. Winchester: textile company expansion retarded by sewing machine shortage; employment static, labor surplus is 50% women.

Nashville Residual Area: Employment gain slight, with major increase in manufacturing. Unemployment decreased from 7,000 to 5,000. Shortages of millmen, printing pressmen, tool and die makers. Centerville: employment expansion expected on completion of plans in shoe and phosphate plants. Gallatin: two new textile plants and tobacco and creamery companies expanding. Murfreesboro: new soap and syrup plant, hosiery, and shirt plants to employ 40, 150, 150 respectively. Savannah and Waynesboro: rise in employment at completion of leather products plants. Clarksville: large male labor surplus; opportunities mainly for female apparel workers. Columbia: remains static, with no new industries or employment expansion anticipated due to material and building shortages. Dickson and Lawrenceburg: need male-employing industry to absorb growing surpluses; material shortages have caused drops in apparel manufacture in both towns. Lebanon: slight employment gain; 25% of labor surplus, predominantly male, without work experience. Lewisburg: labor scarce; new pencil plant to open in January. Pulaski: small expansion but leather, work clothes, and phosphate industries having 30% lay-offs due to material shortages; labor surplus 80% male. Springfield: tobacco and dehydration activities will increase employment during late December through March.

Knoxville Residual Area: In Knox-Blount counties, unemployment decreased from 10,800 in July to 8,700 in September. Total non-agricultural employment increased from 85,337 to 86,990. Manufacturing employment increased in spite of lay offs due to shortage of

materials. Employment expected to continue upward trend. Unemployed outnumber demand 4 to 1. Harriman: upward trend in employment continues; unemployment has decreased 12% since August. Lafollette area: slight overall increase in non-agricultural employment due to increase in mining, apparel manufacture and trade; additional increases forecast in next two months. Sweetwater: new glove plant mainly will employ females; employment shows little change; unemployment increased substantially in past 60 days. Maryville area: decrease in unemployment and a 2% increase in total non-agricultural employment in last two months; female employment has decreased 15% and women now comprise 28% of total unemployed. Rockwood: 3% net gain in employment due to increases in lumber, textiles, and quarrying; labor supply still exceeds demand although unemployment has decreased; need male-labor industries.

* * *

INDUSTRIAL PLANTS AVAILABLE

Middle Tennessee: City of 7500. Manufacturing space of 80 x 80 ft., available on first floor and basement (total 12,800 sq. ft.) of brick warehouse, 80 x 265 ft. Available space separated by 17-inch firewall from remainder of building. Main floor, 3-inch pine but owner will cover with hardwood flooring, now on hand; basement, concrete floor. Ceiling heights, 11 ft. on first floor; 10-ft. basement. Four rows of supporting columns, 4 to a row, evenly spaced on first floor. Lighted presently by skylight but materials available for remodeling, to include side window lighting. Plant within one-half block of L. & N. R.R. Alley driveway at side.

East Tennessee: City of 4,000. Incomplete building, 150 x 150 ft., of which finished basement offers 22,500 sq. ft. of space suitable for temporary industrial operations as concrete first floor forms adequate roof. Basement ceiling height, 10 ft.; concrete floor. Outside exit to ground level.

"HEYDEN CHEMICAL" STARTS NEW MEMPHIS UNIT

Heyden Chemical Corporation's recently acquired Memphis unit was placed in production on November 16. A brief switch-throwing ceremony, attended by Heyden Chemical's executive vice-president Dr. R. W. Harris, marked this initial operation of the large wartime chemical plant. Built for the Government by Southern Acid & Sulphur Co., for the manufacture of phenol and caustic soda, the plant never got into production during the war. In September of this year, Heyden Chemical Corporation purchased the plant from the War Assets Administration for $1,060,000.

Rock salt, shipped into Memphis by river from Gulf Coast areas, is used as the major raw material. Through electrolytic processes, the plant can produce chlorine, hydrogen, caustic soda, chlorbenzenes, and phenol. Present production will be limited to the first three chemicals, with later output of chlorbenzenes and phenol. Some 60 persons are employed in these initial operations.

A $500,000 expansion program has been planned for this Memphis unit but Heyden officials have not indicated when this work will begin.

(The October issue of Southern Plastics & Chemicals, Atlanta trade publication, carried a story on Heyden Chemical Corporation's new Memphis unit)

* * *

ATHENS OBTAINS RUG MANUFACTURER

Wollner-Clist, Inc., New York City rug manufacturer, in late October purchased property at Athens and, after remodeling the buildings, expects to start operations by January 1. Various kinds of woven and knitted rugs will be made and about 60 persons employed initially. Future expansions, with attendant increases in employment, are planned.

* * *

HONOR LIST PUBLISHED NEXT MONTH

The January Newsletter will carry our annual Honor List of cities and towns achieving major industrial expansions during 1946. All communities that have obtained new industries during the current year or have been selected as the site of new industrial developments will be eligible for this list.

Be sure your community is properly represented in this list. Send to the Newsletter editor, before December 20, the company names of all new industries locating in your community during 1946. Please indicate type of manufacture, starting date, and approximate employment for each of the new industrial projects. Let us have the names of any industry, regardless of size. Use the regular "new industry" form at the end of this Newsletter, if you prefer. And remember, the deadline is December 20.

* * *

OIL/GAS EXPLORATIONS CONTINUE TO EXPAND IN STATE

Drilling of a 5,000 ft. oil test has been started on a 34,000-acre tract of land leased between Hohenwald and Centerville, according to Nashville newspaper reports. This initial well location is near Aetna. Charles E. Walters, Texas oil man, announced the project.

The Salem Oil & Gas Co., Inc., of Cookeville, in mid-November received a State charter for the exploration and development of oil/gas prospects in that part of Middle Tennessee. Incorporators are reported to include both Cookeville and Nashville interests.

PRODUCTION LINE NEWS AND NOTES

Memphis C of C Host to Industrial Group

The Memphis Chamber of Commerce was host on November 18 and 19 to a group of industrial development representatives from most of the major Southern cities. The meetings were informal round-table discussions of the problems and methods of chambers of commerce in promoting their local industrial expansion. Frank K. Shaw, industrial engineer of the Atlanta C of C, and Marvin Hurley, assistant manager of the Houston C of C, were leaders of the discussions which were definitely of value in establishing closer relationships among the group in attendance. The success of this Memphis meeting led to definite plans for holding similar meetings annually, with Birmingham being selected as the host city for 1947.

Among cities represented at this Memphis meeting were: Houston, Dallas, Ft. Worth, Atlanta, Birmingham, Montgomery, New Orleans, Shreveport, Beaumont, Jacksonville, Oklahoma City, Nashville, Chattanooga, and Little Rock. Your editor was a guest during a part of the meeting.

"Rental Housing for Veterans"

"Rental Housing for Veterans" is the title of a new booklet issued by the Federal Housing Administration as a guide to planning, financing, and constructing housing projects designed for rental to veterans. Copies of the booklet are available at the Nashville FHA offices.

New U. S. Commerce Dept. Office at Nashville

The U. S. Department of Commerce has established a new district office at Nashville, located temporarily in the Stahlman Bldg. Later, the office will be moved to the Federal Bldg.

Mr. Gordon Turner, local minister, has been appointed manager of this new district office which is to serve businessmen, especially small businessmen, in the Middle Tennessee area.

New Softwood Market Reports Now Available

George Land, Memphis publisher of the weekly Hardwood Market Report, has announced publication - beginning December 1 - of similar weekly reports covering the softwood markets of the eastern half of the United States. Annual subscription rate for the new Softwood Markets is $30, with lesser rates for subsidiary subscriptions.

Those familiar with the dependable service rendered by Mr. Land in his hardwood reports over the past three years will welcome this new service. Initially, Softwood Markets will cover primarily Southern pine (both long leaf and short leaf) and Appalachian softwoods. The reports will carry such information as to permit readers "to readily determine relative values anywhere in the United States and will cover not only all standard softwood items but specials as well".

Address: Softwood Markets, P. O. Box 116, Crosstown Station, Memphis 4, Tenn.

Nashville Chamber of Commerce Names New Industrial Director

The Nashville Chamber of Commerce has announced the appointment of Jack Ballentine as industrial director. Mr. Ballentine, a native of Nashville, has been a purchasing agent and expediter with the General Shoe Corporation for the past 3 years and prior to that, was assistant field manager in the Motor Transport Division of the Nashville Office of Defense Transportation.

Dept. of Commerce Issues More Industrial Booklets

The U. S. Department of Commerce recently has issued two new booklets on: Establishing and Operating a Small Woodworking Shop; and Establishing and Operating a Trucking Business. These may be obtained at U. S. D. C. field offices in Chattanooga and Nashville at 15¢ and 20¢ per copy, respectively.

Ducktown Back in Raht's Time

A long neglected and colorful chapter of Tennessee history is finally recorded in this book recently published by the University of North Carolina Press. This excellent regional study of the famous Ducktown Copper Basin in southeast Tennessee covers the period from removal of the Cherokee Indians in 1836 to the fateful closing of the mines in 1878.

The outstanding figure in this first period of Ducktown's mining activity was Capt. Julius Eckhardt Raht who came to Ducktown in 1854 and by the Civil War had obtained superintendency of almost all the Tennessee copper kingdom. With Raht's retirement in 1878, the early era of Ducktown's mining activity was closed. Written by R. E. Barclay, official of the Tennessee Copper Co., the book's wealth of historical detail is capably and skillfully presented. It is to be hoped that Mr. Barclay will put his intimate knowledge of the industry to the task of writing up the current phase of the Ducktown Basin history, dating from the coming of the railroad in 1890 and including the smelting operations that caused the extensive deforestation and unique erosion of the district.

* * *

ECONOMIC AND VACANT PLANT DATA NOW AVAILABLE ON STATE COMMUNITIES

This Division is now in a position to furnish, in quantity, multilith copies of its Community Economic Data Sheets for the following towns: Brownsville, Carthage, Clarksville, Cleveland, Clinton, Covington, Crossville, Fayetteville, Gallatin, Greenback, Greeneville, Halls, Humboldt, Huntingdon, Jefferson City, Lancing, Lebanon, Lenoir City, Lewisburg, McKenzie, Manchester, Milan, Morristown, Paris, Rockwood, Shelbyville, Springfield, Sunbright, Sweetwater, and Wartburg. If your town's industrial committee has not received its free supply, please advise editor of Newsletter. Twenty-five copies are furnished gratis; larger quantities at cost.

Our newest publication, Summary of Economic Data on Tennessee Communities, is available and will be sent on request. This gives, by appropriate coding, such economic

data as population, railroads, truck lines, water supply, unions, labor supply, and vacant plant space, for a total of 90-odd towns that are listed with this Division as being interested in advancing their local industrial economy.

Our listings of vacant industrial buildings available for purchase or lease in 27 towns and cities of the State has been revised up to Oct. 15. A total of over 1,000,000 sq. ft. of floor space is listed. Copies of this new edition will be furnished gratis on request.

* * *

"BROWN SHOE" TO BUILD SECOND PLANT AT DYER

Brown Shoe Co., St. Louis, announced plans in late November for location at Dyer of a new sole fitting unit. The company has been operating a shoe manufacturing unit at Dyer since 1941.

Plans for this newest unit call for construction of a steel and brick structure of 12,000 sq. ft. floor space, to start as soon as CPA approval is granted. About 50 workers will be employed initially.

* * *

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Southern Gold Cheese Co., McKenzie, has completed negotiations with the Industrial Committee of that city's Chamber of Commerce for construction of a modern milk processing plant. The new unit, supplementing the company's present plant facilities, will permit daily processing of 50,000 lbs. of whole milk into butter, ice cream mix, cheese, and other dairy products. Milk routes will be established throughout Carroll County and parts of adjoining counties. The new plant, expected to be in operation by March 1, is being constructed by local capital on a 10-year amortization basis.

- - - - -

Commonwealth Airlines is seeking CAB approval of projected air service to seven Tennessee cities: Knoxville, Clarksville, Columbia, Jackson, Nashville, Memphis, and Dyersburg.

- - - - -

A steel cabinet manufacturer conferred in mid-November with the Fayetteville Chamber of Commerce and city officials on locating a new plant in that city, provided a 50,000 sq. ft. one-story building can be furnished on a 15-year amortization basis. As reported in the Chattanooga Times, the plant would employ 125 to 150 persons - about 10% women. The prospect, who operates a plant near Chicago, was presented to the local group through Mr. J. A. Senter, general development agent of the N. C. & St. L. Railway.

- - - - -

7-Up Bottling Co., Jasper, has received a State charter and operations are expected to begin as soon as equipment can be installed in a building leased in that city. Henry C. Grover, Chattanooga, will be the owner and operator.

- - - - -

The Cranwell-Lee Hosiery Mill at Pikeville is enlarging its main factory by 700 sq. ft. and is completing a new warehouse.

- - - - -

The City of Winchester has contracted for a trial installation of 175 to 200 parking meters by the Miller Meter Co.

- - - - -

Associated Dairies, Inc., 2232 E. 23d St., Chattanooga, has received a State charter of incorporation to operate a dairy and pasteurizing plant.

- - - - -

Tennessee Valley Forest Managers, Inc., Athens, is a newly incorporated organization authorized under its State charter to make timber estimates and appraisals, forest growth and management plans, operate sawmills, and sell lumber products. W. Morris Morgan, Wm. C. McMaster, and W. D. Hitch are listed in the Chattanooga Times report as incorporators.

- - - - -

Brick manufactured from gravel by a recently discovered process are being made at a Puryear plant on the Albert Bazzell farm on the outskirts of that town, according to a Nashville Banner news item. V. E. Madray and W. T. Kicheloe of Detroit are associates in the new venture.

- - - - -

After a lapse of two years, Paris is re-establishing itself as a tobacco marketing center. Quarters have been leased in the city for use as a sales floor in the purchase of the 1946 crop of dark-fired tobacco in Henry and Weakley counties. The tobacco trading in Paris lapsed with the destruction by fire, two years ago, of the Ezell Tobacco Barn.

- - - - -

The Sparta Laundry began operations during November in its new modern plant in that city. Owners are J. R. Cooper and J. B. Hunter.

- - - - -

The Tennessee Oil Co., Dyersburg, has been purchased by the Lion Oil Company of El Dorado, Ark., according to a mid-November announcement in the Wall Street Journal. Five bulk plants, Mississippi River terminal facilities at Heloise, 22 service stations, and a number of accounts were included in the sale. The Tennessee Oil Company has been a prominent independent marketing concern serving 10 counties for the past 20 years.

- - - - -

Murfreesboro's new radio station expects to go on the air by Dec. 1. Call letters are WGNS, subject to FCC approval. The station is affiliated with the Mutual Broadcasting System. Wm. Pepper is chief announcer and station manager.

- - - - -

Abrams Bros. Packing Co., Memphis, expects to complete by next June or July an expansion program that will make it one of the country's most modern meat packing plants and probably the South's largest independent meat plant. Completed last year was a two-story 50 x 150-ft. modern rendering department, and recently completed were new refrigerator and beef boning-pork cutting rooms, and an offal cooler. A 100 x 50-ft. beef cooler, with capacity for 500 cattle, is now being started at the company's plant.

- - - - -

Dayton Lumber Corp., Dayton, has received a State charter to operate lumber mills, deal in lumber products, and to construct and operate housing facilities and stores for employees of its plants. Incorporators are listed as Glenn W. Woodlee, Robt. M. Parham, and J. Wesley Gardner.

- - - - -

Holston Ordnance Works, Kingsport, expects to begin in Dec. output of ammonium nitrate solution under the War Department's OWMR-directed program of producing fertilizer-grade ammonium nitrate for shipment to Germany and Japan. The Milan Ordnance Works in West Tennessee is one of several government plants where the solution is grained, conditioned, and bagged.

- - - - -

National Battery Company's new 50,000 sq. ft. factory building at Memphis, costing $350,000, was reported in mid-November as being 50% completed.

- - - - -

The Bay-bee Shoe Co., Union City, expected to have their new unit at Sharon (see October Newsletter, page 2) in operation before December 1, according to the Weakley County Press.

- - - - -

Present production of the Nashville Division of Consolidated Vultee Aircraft Corporation currently is reported to include city transit busses, frozen food cabinets, and gas and electric ranges. About 400 food cabinets and ranges are being produced daily with a labor force of 1600 workers. Outputs in 1947 are expected to increase to 100 44-passenger busses monthly and ranges and cabinets at rates of one every minute or so. Some $2-million is said to have been spent in reconversion of the plant.

- - - - -

General Tire and Rubber Company has moved its Memphis branch operations into a new 20,000 sq. ft. building at 656 Huron Street.

- - - - -

Seiler Bros., Inc., Sweetwater, have started operation of their new concrete block plant, which has a daily capacity of 5,000 blocks. Estimated investment in the plant is nearly $40,000.

- - - - -

Construction in Shelbyville of a new 1,000-seat theater is planned for the site of the old Princess Theater. Building will start as quickly as materials become available.

- - - - -

Tennessee Natural Gas Lines, Inc., of Nashville, filed before the Federal Power Commission on November 6 a petition for permission to intervene in the hearings on Southern Natural Gas Company's proposed extension of its lines to serve the Chattanooga market (see November Newsletter).

- - - - -

Gloversville Knitting Company placed their new Sweetwater unit (see November Newsletter) in operation on October 28, when training of the first group of employees was started.

- - - - -

The Tennessee Veneer Co., Inc., Memphis, expects to begin production about January 1 at its new plant at 337 E. Mallory Ave. About 25 persons are expected to be employed by this newly organized veneer manufacturer. M. H. Speltz is president.

- - - - -

A site of about 20 acres at Martin is reported to have been purchased recently for the construction of a garment plant.

- - - - -

The Nursery Furniture Manufacturers, Inc., Murfreesboro, has received its State charter of incorporation. The company, until recently, has limited its production to doll cribs and similar nursery furniture, owing to shortage of materials. Manufacture of regular size baby cribs, however, was started last month. John H. and Rosalind James and A. E. and Lucille B. Lanier were named as incorporators.

- - - - -

Parks Air Transport, Inc., has received the CAB examiners' recommendation for establishment of an airline service over a route between St. Louis and Memphis, via the West Tennessee cities of Union City, Dyersburg, and Jackson. Other points in southern Illinois and Missouri would be served by this line, if approved.

- - - - -

The new Dover Theater, with 350-seat capacity, was opened early in November. J. T. Scurlock and LeRoy Cherry, local veterans, launched the new modernly equipped theater.

- - - - -

Kraft Foods Company, Memphis, according to The Daily News, will expend $128,000 on the erection of new distributing quarters in that city.

- - - - -

The Tennessee L-P Gas & Heating Co., Hohenwald, has received a State charter of incorporation for the operation of a liquefied petroleum gas business. Initially, the company plans to serve a territory including Lewis, Hickman, Wayne, Perry, and Lawrence counties in the sale and distribution of butane and propane gases and appliances for use of such gases. W. G. Darden is president of the new company.

- - - - -

Dixie Tank & Bridge Co., Memphis, is expanding its plant facilities at a reported cost of $225,000.

- - - - -

American Construction Materials, Inc., Nashville, received a State charter in late October to operate a ready-mixed concrete plant and to manufacture concrete brick, blocks, and similar materials. The new organization, incorporated by W. H. Parrish, Jr., Littell Rust, and B. T. Wright, has taken a lease and option on the Ready-Mixed Concrete & Supply Co. plant on South First St., Nashville.

- - - - -

J. I. Case Company has acquired a Memphis site for the erection of a 100,000 sq. ft. building to house its distribution branch for farm equipment.

- - - - -

R. C. Owen Co., Inc., Gallatin manufacturer of chewing and smoking tobaccos, is making a $250,000 plant expansion. When completed, the plant will cover 12 acres and have a storage space for 4,500 hogsheads of leaf tobacco. A new re-drying unit, ready for for this year's crop, has a daily capacity of 200,000 lbs.

- - - - -

Contract for a new telephone substation at Memphis has been let by Southern Bell Telephone & Telegraph Co.; estimated cost $260,000.

- - - - -

Plans for a $400,000 expansion and re-modeling of the Times Printing Co.-News Free Press Co. publishing plant at Chattanooga are under consideration; total planned investment in the program is estimated at $750,000 including new equipment.

- - - - -

Frozen food locker plants at Celina and Lafayette were purchased late in October by Mr. Fred Gregory of Lafayette. The sales prices were not revealed.

- - - - -

Ground breaking for the new $2,500,000 plant of the Humboldt Full-Fashioned Hosiery Mill, Inc. (see May Newsletter), was initiated on November 20, with some 200 company and civic officials participating in the ceremony. The plant, to be operated by

Wayne Knitting Mills of Ft. Wayne, Ind., will include a $1-million investment in buildings and $2½-million in equipment. Operation is expected to begin June, 1947, with eventual employment of 800 persons - 60% men. Materials for the Humboldt unit will be supplied by Wayne Knitting's Athens, Ga., plant.

- - - - -

White Swan Laundry, Memphis, is planning the rebuilding of its plant at an estimated cost of $100,000.

- - - - -

Plans for manufacture of metal awnings at Gallatin have been completed by J. C. Harvey and L. A. Green of that city. A plant of 10,000 sq. ft. is to be constructed on property purchased recently. Initial manufacture is expected to employ 10 to 12 workers, with eventual increase to 40 or 50.

- - - - -

Wilson & Co., Murfreesboro, has been granted CPA approval for construction of a $103,503 cheese plant in that city. The new unit, to be located immediately adjacent to the company's creamery, will be a two-story concrete structure and will include office space. Increased employment is estimated at about 25 workers.

- - - - -

The Borden Company has received CPA approval for construction of a $39,000 milk processing plant at Carthage and for a similar plant at Gainesboro costing $49,750.

- - - - -

Lookout Oil & Refining Co., Chattanooga, plans a $49,000 storage warehouse for which CPA construction approval has been granted. Other reported plans for alterations of the company's plant indicate a total expenditure of $75,000.

- - - - -

Lewis Supply Mfg. Co., Memphis, has received CPA approval for re-constructing a building recently purchased from Jones & Laughlin Steel Co. Sawmill equipment is to be manufactured at the new location. Estimated cost of the entire project, including the building, is $35,000.

- - - - -

Pet Milk Co., Trenton, has been granted CPA approval for a $14,000 milk-receiving station in that city.

- - - - -

Salant & Salant, Inc., New York shirt manufacturers who operate several West Tennessee plants, have leased additional manufacturing space in a building at Troy. The Troy Manufacturing Co., which has been operating in the building just leased, plans to begin immediate construction of a new factory building in that city.

INDUSTRIAL DEVELOPMENT CORPORATIONS IN TENNESSEE

By Robert Cassell, Asst. Industrial Economist

(Editor's Note- In last month's Newsletter brief mention was made of "The Spread of Development Corporations" by C. H. Donovan, published in the October Monthly Review of the Sixth (Atlanta) Federal Reserve District. Mr. Donovan's essay outlines the general structure of Development Corporations in Georgia and Tennessee. The following article covers the Tennessee situation in more complete detail.)

Keeping pace with the current trend among Southern communities of giving active assistance in the location of new industries, 15 Tennessee towns and cities in a population range of 400 to 25,000 have formally organized Industrial Development Corporations. Once popular during the Twenties, such corporations are once again coming into favor as an outlet for local investment capital and as a method of stimulating local industrial expansion.

Loss of population, mechanization of farming, shifting of cotton acreages to other crops, and resistance of veterans and former war workers to low income jobs are among the economic factors forcing many of the State's communities to the decision that "something must be done". For most of these towns, particularly the smaller ones, the solution seems to be a new factory which can absorb the labor surplus, utilize other natural resources of the area, and provide added "cash" to the community through payrolls. In many areas, increased industrialization is essential to offset and balance the present preponderantly agricultural economy.

Moreover, the South, which has long suffered a shortage in risk capital, is now in the money. Tennessee banks, for example, lead the South in total deposits and are in 18th place in the Nation. Industrialization here was also given much impetus by the defense-war program. Many new factories were erected and local labor learned new industrial skills. Nearly all communities in Tennessee participated in these industrial advances and, consequently, have become industrial-minded. Industrial payrolls have assumed a new importance.

Industrial Development Corporations offer a number of advantages over other forms of financing that a community can use to provide new factory facilities. First, because such corporations are private organizations, they can obtain loans from banks, insurance companies, and other financial sources to supplement their initial capital. Secondly, such corporations are not handicapped in investment of their funds, whereas use of public funds as inducements to industry is apt to encounter obstacles due to legal prohibitions. Thirdly, Industrial Development Corporations usually are composed of local businessmen who are able to examine closely the financial soundness and responsibility of prospects, as well as their policies and record. The corporation, by such thorough investigation and realization of the financial risks involved, is apt to avoid the unsound, gift-seeking type of firm with which several Tennessee communities have had most unfortunate, and costly, dealings. On the other hand, the responsible industrialist commonly regards these corporations as a positive expression of community receptiveness to and interest in the newcomer industry. In fact, several industrial prospects have indicated to this Division that an expression

of favorable community interest toward their proposed operations is a major locational factor. Thus, the corporation's activity contributes to the State's sound industrial development by attracting stable and progressive industries that are based upon community needs and local resources.

The table below summarizes those corporations on which this Division has any information; listings are alphabetical by name of the town with its 1940 population, showing the corporation name, one official and the amount of funds paid in or pledged. Several of these Development Corporations have met with substantial success in obtaining sound new industries for their localities. In most instances, part or all of their funds have already been committed. Others of the corporations either have not completed negotiations with their prospects or have not begun any negotiations.

ACTIVE INDUSTRIAL DEVELOPMENT CORPORATIONS

Town (1940 Population)	Name	Official	Funds Pledged
Alamo (1,137)	Alamo Development Corporation		$40,000
Bolivar (1,314)	Bolivar Development Corporation	R. P. Shackleford, Pres.	30,000
Brownsville (4,012)	Brownsville Development Corporation	Clifford Dinwiddie, Pres.	80,000
Covington (3,513)	Covington Development Corporation	Otto Cherry, Pres.	46,000
Decaturville (433)	Peoples Industrial Development Corporation	A. F. Adair, Pres.	75,000
Dunlap (721)	Dunlap Building and Real Estate Company	F. S. Barker, Pres.	100,000
Greeneville (6,784)	Greene County Foundation	Clyde B. Austin, Pres.	200,000 (103,000 paid in)
Jackson (24,332)	The Jackson Foundation	J. Everett Rogers, Exec. Secy.	100,000 (65,000 paid in)
Lake City (1,520)	Lake City Development Corporation	C. J. Watts	75,000
Lebanon (5,950)	Lebanon Development Corporation	A. A. Adams, Jr.	No definite amount stated
Lexington (2,526)	Lexington Industrial Improvement Association, Inc.	Guy B. Amis	No definite amount stated
McMinnville (4,649)	McMinnville Development Corporation	George M. Smith	25,000
Murfreesboro (9,495)	Murfreesboro Industrial Development Corporation	W. R. Clark, Sr.	25,000
Somerville (1,570)	Somerville Building Corporation	W. B. Wilkinson, Pres.	40,000
Winchester (2,760)	Franklin County Development Corporation	C. O. Prince, Secy.	76,500

Organization of an Industrial Development Corporation usually is effected by a group of community leaders which then proceeds to collect pledges from local people, thus assuring the corporation of its capital base. If and when the corporation successfully

(Concluded on last page)

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of the industries listed below, or of any listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

153. Women's Apparel: Location for large plant to manufacture quality tailored dresses sought by manufacturer with multi-million dollar annual sales. Plant would employ between 1500 and 3000 persons. Initial inquiry does not state required plant space but estimated at minimum of 150,000 sq. ft.

Communities with large female labor surplus and desirous of this type industry, please advise on any space available or local plans for accommodation of industry of such size.

157. Confidential Inquiry: Manufacturer of widely used commercial product seeks 50,000 to 75,000 sq. ft. of floor space, preferably on one floor - column spacing unimportant. Will employ between 300 and 450 workers, 75% female, skilled and semi-skilled. Any location considered must have housing for minimum of 25 executives and other plant personnel.

More complete information will be furnished on inquiry from interested communities.

158. Electrical Appliances: Dun & Bradstreet-rated manufacturer of electrical appliances needs, for earliest possible occupancy, steel and concrete factory building of 30,000 - 40,000 sq. ft., with concrete floors capable of withstanding power press installations. Year-round employment of minimum of 100 workers, mostly males. Best of truck and railroad shipping facilities required in location selected.

Company also specifies that community selected must have cordial interest in their plant, afford ample labor supply, and assure "good living conditions for the executives".

159. Automobile Parts: Manufacturer, rated over $1-million capital, wants 7,000 to 20,000 sq. ft. floor space for production of metal products. Employ 60 to 100 persons.

Specifies location "west of Tennessee River or between the Tennessee and Cumberland rivers" and must have best possible rail and highway transportation.

* * *

FURNITURE INDUSTRY LOCALLY DEVELOPED AT MOSCOW

The Ashford Furniture Manufacturing Company, a new locally developed factory at Moscow, is helping Fayette County balance its agricultural economy with industry. Starting in a building used during the war for manufacture of ammunition boxes, the company, is making kitchen cabinets on a rapidly increasing scale and has been forced to make several additions to provide necessary production space. The latest addition, according to the Fayette Falcon, is a 2400-foot wing that will bring total working space to 10,700 sq. ft.

Currently employing 18 workers on its modern assembly line, the plant is producing 55 cabinets daily and is expected to soon increase the output to 75 per day. Between 6,000 and 7,000 board feet of lumber, mainly from small mills in the county, is consumed weekly by the plant. Harold F. Ashford and J. R. Norton are owners.

* * *

INDUSTRIAL HONOR ROLL FOR 1946

(Editors Note: In our October issue, Tennessee's industrial gains in the first 8 months of 1946 were estimated on the basis of this Division's records. Below is a similar summary for the full 12-months period. The data admittedly are incomplete and include mainly projects involving investments over $25,000 each.)

During 1946, more than 350 new industrial projects - new industries or expansions of existing industries - were completed, in progress, or definitely planned in 99 cities and towns widely scattered over the State. Of the total 350 projects listed by this Division, 241 are new industries in 77 different communities. The combined known or calculable investment in the 350 projects exceeds $110,000,000, of which over 90% is in new industries. Job expansion through these new developments is estimated at 32,000 workers. Listed below are the Tennessee towns and cities included in our Industrial Honor Roll for 1946. Numbers immediately following town names are new industries; in parentheses, number of expansions.

Towns under 1,000			Towns of 1000-2500			Cities of 2500-5000

NEW COAL MINE OPENS NEAR MONTEREY

A new coal mining operation about 8 miles east of Monterey was started in mid-November by a new company headed by Morris S. Kemmer, of near Wilkes-Barre, Pa. Working on a 6,000-acre tract leased from G. E. Harrison, the company's new mine is reported by the Crossville Chronicle to be producing 100 tons daily and expects to increase this to 300 tons per day by early this year, with ultimate daily output of 700 tons. Prospecting is said to have proved a 5 ft., 5 in. coal seam over 200 acres. Mining currently is by slope entry of 280 ft. length. A loading tipple is reported under construction.

* * *

INDUSTRIAL BUILDINGS AND SITES AVAILABLE

Site

East Tennessee: City of 32,000. For sale, 70-acre industrial site, with four excellently constructed warehouse buildings (totaling 45,000 sq. ft. of floor space), served by railroad spur; major highway adjoins site. Location is 3 miles from city limits. Industry employing 2,000 persons operated on this site during war.

Buildings

West Tennessee: Jackson. For lease about January 1, two buildings, 40 x 20 ft. and 60 x 20 ft. with office space in third building (27 x 50) - total, 3350 sq. ft. On lot 113 x 120 ft.; near G. M. & O. R.R. Suitable for small manufacturer or temporary training quarters for larger operations.

East Tennessee: Town of 4,000. Two-story brick, 135 x 60 ft. (total, 16,200). Upper story, wood floor of fairly heavy construction; ceiling height, 14 ft.; level at front with street. Lower story, concrete floor; 10 ft. ceiling; level with alley on rear and has truck-drive-in entrance. Water and sewer connections; hot air heat; three toilets; not sprinklered. Adjacent vacant lots for expansion or storage.

City of 5600: Two-story frame, factory type building, 60 x 120 ft. (total, 14,400 sq. ft.) No railroad siding. For sale or lease.

* * *

SPECIAL - Complete Sewing Operation

Chenille bedspread and rug plant, equipped with 20 power sewing machines, for sale, or owner will convert and expand for manufacture of garments on contract basis for any responsible firm; also will work as manager of branch plant.

Plant is in 2-story brick store building 25 x 80 ft. (total 4,000 sq. ft.), stove heated, unsprinkled. Presently employing 25 trained workers but sufficient space to expand operation to 100 or more machines.

Labor survey of area last October showed 1508 females available for employment, of which about 900 in 18- to 30-yr. age groups. Over 200 of this total have had industrial experience.

Plant is in progressive East Tenn. town of 3500 population. This is believed to be an excellent opportunity for some garment manufacturer who wants to save expense of training labor, provided early action is taken before present employees obtain other employment. This Division will be glad to furnish additional details on request.

* * *

PRIVATE FINANCING OFFERED ON INDUSTRIAL FACILITIES

In our August Newsletter were given the terms on which a private investment source would finance industrial plant facilities for responsible companies. We believed then. that numerous Tennessee communities might use such information in negotiating with prospects, particularly where community financing was not available for providing needed facilities. In that belief we were correct, as proved by the local interest shown in our Newsletter item.

Consequently, we are glad to reproduce below part of a letter received from David B. Gadlow, corporate realty financier, of 110 Sutter Street, San Francisco, 4, Calif., in respect to similar financing of industrial facilities by his organization. For companies with a strong financial rating, Mr. Gadlow states that his firm would be interested in financing through purchase, the total cost of the site and the projected buildings, along the following lines:

> "A lease may be had for a term of 20-30 years with an option, or a series of options, to renew. On a 30-year lease, the rental would be equal to about 5.73% net on the total investment.... A net lease is one under which the lessee pays all expenses including taxes, insurance, repairs, maintenance, and any and all alterations or improvements.
>
> "At the end of the initial lease term, the lessee would be given an option, or a series of options, to renew for terms aggregating 25-50 years or longer, at a rental equal to about 2% of the said investment.
>
> "The above rates are merely tentative depending upon our acquaintenance with all of the factors including the financial standing of the proposed lessee."

Mr. Gadlow will be glad to present a definite financing plan to any interested parties that can submit a <u>specific proposal</u>.

* * *

DO YOU KNOW THAT:

Tennessee-Kentucky clay mines, in 1945, furnished 93% of the total national output of ball clays, according to recent U. S. Bureau of Mines data. Of the total 1945 output of 174,524 tons, Tennessee mines accounted for 47%. Over 90% of the output went to the pottery trades. Total sales for 1945 amounted to $1,589,875.

* * *

CLARKSVILLE FIRM TO MAKE BOOTS AT $3,500 PER PAIR

Boots to sell at $3,500 per pair will be made by the Acme Boot Mfg. Co., Inc., of Clarksville, Tenn. Naturally, these are no ordinary boots. They will be made from the hide of the world's champion steer, T. O. Pride, which recently was sold for $44,375 at the American Royal Livestock and Horse Show in Kansas City. The Acme Boot Mfg. Co., of which Sidney Cohn is president, purchased the hide for $4,100, highest price ever paid in the United States for a single hide. Incidentally, sirloin steaks from this prize steer cost $1250 each.

The Albert Trostel & Sons Tannery in Milwaukee is now doing the tanning job and when the hide is finished, it will be flown by airplane to Nashville airport and from there will be transported to the Clarksville plant in an armored car, with special armed guard escort. The hide is insured for $25,000.

Mr. Cohn writes the "Newsletter" that his company will make six pairs of boots from the hide. These boots, after being displayed in practically every large city in the country during 1947, will be sold. Sales for two pairs of the boots, according to Mr. Cohn, have already been consummated.

* * *

BUSINESS AND MANUFACTURING OPPORTUNITIES

Bakery - Laundry: Growing progressive city of 3,000 wants small laundry and small bakery to serve local needs. Additional larger market area can be developed in this territory because of major industrial activity. No current competition in either of these businesses as city now depends on outside bakery and laundry services. Can place interested parties in contact with local bank president who will be glad to advise on either of these possibilities.

Sheet Metal-Heating: War veterans or others experienced in sheet metal and heating work will receive exceptional local cooperation in establishing this type of business in a city of 2200. Competition limited to one firm which is unable to properly take care of existing large volume of work in this territory.

Foundry Work: Large modernly equipped iron-steel foundry and precision tooling company will consider long-term contracts for manufacture of suitable products. Cannot undertake any work for near-future delivery and interested only in production of quality items for thoroughly responsible manufacturers.

Inflated Shoe Soles: Inventor seeks contacts with capital or established manufacturers willing to investigate production possibilities of patented air-inflated rubber shoe sole, designed to relieve pressure and strain on feet of workers who are required to stand over long periods. Royalty basis will be considered for exclusive manufacturing rights.

Metal Cabinets: Manufacturer wanted for production of enameled metal kitchen sink base cabinet. Will require organization equipped to cut, stamp, and punch the sheet metal, assemble, apply baked enamel finish, equip with hardware, and pack for shipment. Company will furnish complete production drawings and in position to contract for several thousand cabinets per month.

* * *

EMPLOYMENT OPPORTUNITIES

Aviation Consultant: Available for advisory planning on aviation problems being done by either commercial or governmental organizations. Has been engaged for several years as field consultant in laying out of air routes, air traffic surveys, and preparation of exhibits for new route applications before C.A.B. Recently in temporary charge of aviation activities for U. S. Bureau of Commerce and, during that period, authored government publication on possibilities in aviation business.

Oil/Gas - Mechanical Engineer: Available for either consultant or permanent employment, mature man with specialized experience in development and management of natural gas properties, including city distribution systems. Wartime employment as government technician on WPB.

On consultant basis, engineering surveys will be made of markets and distribution - pipeline costs of natural gas systems for local communities.

Chemical Engineer: Available for employment in Tennessee chemical or related industries. Five years experience in production, development, and research with large chemical manufacturer in New York State.

* * *

QUALITY FURNITURE MANUFACTURE BEGUN AT ALPINE

Modernly designed cherry and walnut dining room sets are being manufactured at Alpine in the Alpine Furniture Shop, a new industry in that Cumberland Mountain area. Backed by the Presbyterian Board of National Missions, the Shop started operations in late October, using initially only 3 workers. The Mission's plan is to train local labor in this industry and to expand its employment to 25 or more workers. Lumber for the shop will be milled from the Mission's local 2,000-acre forest reserve.

The furniture produced by the Shop is a quality hand-made product designed for sale only to the higher class markets. Mr. Paul D. Olmstead is employed as manager of the Alpine shop.

* * *

CONSTRUCTION IN STATE SETS GOOD PACE

A total of $160,000,000 worth of commercial and industrial construction in the Southeastern states was approved by the Civilian Production Administration up to October 10, 1946, according to official CPA figures. In a similar period, $375,000,000 worth of residential construction was approved in this region. The two largest industrial projects approved in the Southeast during that period were in Tennessee - the $2,000,000 granted on duPont's $20-million nylon yarn plant at Chattanooga and the $7,430,000 granted on American Enka's $20-million rayon tire yarn plant at Lowland, near Morristown.

In the first 11 months of 1946, according to Manufacturers Record data, industrial construction contract awards in Tennessee amounted to over $55-million, a total exceeded only by Texas.

Housing construction in the State also is maintaining a good pace, despite material shortages, restrictions, and other obstacles. Notable gains in new housing construction have been made at Memphis, where, in the first 8 months of 1946, a total of 2,900 family dwellings - houses and apartments - were being built, according to recent data of the U. S. Bureau of Labor Statistics, Atlanta office. About 1850 of these units were expected to be completed by November 30, reports the Memphis Daily News.

At Chattanooga, Osborne Bldg. Corp. was reported in December to be planning to build 80 brick homes in the Brainerd Hills section at an estimated cost of $500,000. Some $350,000 worth of new residences reportedly is to be built at Knoxville in the McMillan subdivision by Howard E. Rogers, local builder. At Alcoa, The Aluminum Company of America lately awarded contract for 50 four-room homes, estimated to cost $225,000.

* * *

STATE MANUFACTURING EMPLOYMENT DECLINES

Tennessee manufacturing employment decreased 1,600 workers between mid-August and mid-September for the first time since February, according to the U. S. Bureau of Labor Statistics. Current employment level is still 9,900 above that of a year ago. The decline occurred in the non-durable goods manufacturing group, with the food industries showing the greatest loss of 3,700. Lumber, apparel, miscellaneous durable goods, and printing-publishing industries experienced minor decreases. Partially offsetting these declines were gains in the iron-steel, textile, machinery (except electrical), and furniture-finished lumber products industries.

* * *

PRODUCTION LINE NEWS AND NOTES

Lake City Forms Development Group

The Lake City Development Corporation, in late November, received a State charter of incorporation authorizing that organization "to develop industrially" and to buy, sell, and lease factory sites and buildings. Listed as incorporators were Robert D. Lindsay, Phil Mason, W. J. Copeland, J. E. Boston, C. J. Watts, Edd Duncan, and R. D. Alley.

According to information submitted to this Division by the Lake City group, that community has $75,000 in funds for aiding in the location of new industries. A large surplus of women labor exists in that area, and the Lake City corporation will seek female-employing industries. With Lake City Homes, Inc., planning construction of 55 new homes, any new industries obtained for Lake City are practically assured of adequate housing for their key employees.

Tennessee Valley Power Use Exceeds War Peak

In a recent address before the Knoxville Technical Society, W. K. McPherson, TVA Industrial Economics chief reported that more electric power is now being consumed industrially in the Tennessee Valley region than during the wartime peak. The Valley's postwar industry, according to Mr. McPherson, actually is developing more rapidly than that of the Nation as a whole.

New Booklets Released by U. S. Dept. of Commerce

Newly released business guide booklets of the U. S. Dept. of Commerce include the following titles: Establishing and Operating a Stationery & Office Supply Store (10¢); Establishing and Operating An Automatic Merchandising Business (15¢); Manufacturing Brick & Tile to Serve Your Community (15¢).

Copies of any of the above may be obtained at the stated cost from the Nashville or Chattanooga district offices of the U.S.D.C.

Committee of the South Organized

An organization meeting of the Committee of the South was held at Birmingham in late November, with former Governor J. Melville Broughton of North Carolina elected as chairman. The Committee, being organized under the auspices of the National Planning Association, will devote its efforts to the advancement of the South's resources. Among reported objectives are studies to indicate ways and means to increase industrial expansion through support and promotion of industrial scientific research; finance new industrial enterprises; develop rural industries based on agricultural resources; and expand vocational business administration and technical training. The membership rolls of the Committee will be open to Southern leaders in the fields of agriculture, labor, industry, education, and government. About 50 prominent Southerners already have become members of the Committee.

Low Cost Factory Buildings Designed

The H. K. Ferguson Co., Cleveland, has announced development of a modern, steel frame, fire-resistant building which can be built at a cost of $3 per square foot on today's market. The design of the building, based on the use of standardized components throughout the entire structure, is directed primarily toward a goal of low first cost without sacrificing any desirable features required for low-cost maintenance or satisfactory production layouts.

Notables Visit Industries of State

The Athens Plow Company in late November was host to a distinguished foreign visitor, Nagindas Patel, chief engineer of one of India's largest engineering firms - the Pashabai-Patel Co., Calcutta. Accompanied by R. N. Stone, export sales manager of the Allis-Chalmers Company of America, Mr. Patel came to Athens to obtain data on modern design and production methods applicable to setting up similar farm implement industries in India. The Athens Plow Company was selected for study as the best model operation of its kind on recommendation of the Allis-Chalmers Company, according to the Athens Post-Athenian.

Memphis, on November 20, was host to a group of 22 representatives of Chicago industrial interests which was touring the Mississippi Valley region. The visitors, members of the Chicago Association of Commerce, were given a comprehensive tour of the residential and industrial sections of the city under the guidance of the Memphis Chamber of Commerce.

Southern Resources Monographs Near Publication

The Southern Association of Science & Industry expects to publish soon its 13-monograph series covering an inventory of Southern resources. Titles include such subjects as soil, climate, and water resources; minerals and mining; forestry resources; recreational resources; government's role in resource management; and a directory of research agencies. Headquarters of S.A.S.I. are Hotel Murphy, Richmond 19, Va.

"Labor In The South"

The October issue of the U. S. Bureau of Labor Statistics' Monthly Labor Review, the second in a series of specialized numbers of that publication, contains seven articles on various aspects of "Labor in the South", covering labor supply, income of workers, regional wage differentials, State labor legislation, development of trade-unionism, and cooperatives.

Between 1880 and 1939, the report states, employment of wage earners in manufacturing industries increased in the South from 8% to 17.2% of the national total employment in such industries. Further, between 1929 and 1939, while the absolute level of factory employment declined sharply for the country as a whole, the southern region actually showed a small increase. Manufacturing employment in the South increased sharply during the war, and a future B.L.S. study will cover that phase of the South's development. An interesting fact noted in the report is that as early as 1879 trade unionism had begun its spread into the South. Tennessee, for example, was the scene of coal strikes at Whiteside in 1888.

* * *

ELECTRIC HEATING SYSTEMS UNDER TEST AT CHATTANOOGA

The first of five "Marvair" electric heat pumps (see October Newsletter) that are to be installed in Chattanooga was placed in operation during last November. According to the Chattanooga Times, this new-type heating unit operated successfully in the six-room brick home of C. B. Osborne, Electric Power Board sales manager, in which it was installed. Estimated annual cost of operation for both heating in winter and cooling in summer is expected to be less than $50, at the prevailing low TVA rates in that city. W. R. McPherson, technician of the Muncie (Ind.) Gear Works, manufacturers of the equipment, supervised the installation.

Another type of electric heating also has been successfully tested at Chattanooga in a 10-room house on Lookout Mountain. Using an electric furnace system designed by the Electromode Corp., Rochester, N. Y., these tests showed that the desired room temperatures in this home were maintained with only 3 to 4 degrees differential from floor to ceiling, against as much as 20-degree differences in homes with conventional heating systems. Thus, the cause of most home drafts is eliminated. Basis of the furnace system is six patented electric heating elements similar to those used in submarine heaters. These are operated by a sensitive control system, developed by Minneapolis-Honeywell Regulator Corporation, that is said to regulate the heat in conformity with very small variations in outside temperatures.

* * *

USEFUL CIVILIAN CONVERSIONS MADE OF WAR SURPLUSES

Originality by war veteran members of Stone-Nicholson Manufacturing Co., Inc., Nashville, has resulted in conversion of surplus parts of army barracks stove pipes into hard-to-get R.F.D. mail boxes. Turned over to the War Assets Administration by the U. S. Engineers at Camp Forrest, a 16-ton pile of these 20-gague galvanized iron "smoke-jacks" was purchased by the company from the WAA for conversion into the mail boxes.

Among other surplus items, the Nashville WAA regional office holds 12,000,000 of a country-wide surplus of nearly 27,000,000 army boot and shoe eyelets, all too large for civilian shoes. Until recently, their disposal was giving the WAA a headache, but now the entire supply has been ordered by a Detroit firm for use in attaching automobile upholstery to its hardboard backing.

These are only two of many valuable conversions of war surplus materials to useful civilian purposes in which the WAA's product research men have assisted. Allan F. Boyce is chief of the WAA Product Research Branch in the Nashville regional office.

* * *

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

A $180,000 75-room hotel, including 6 to 8 efficiency apartments, has been proposed by the Columbia Home Building Co., and local aid in financing the structure is under consideration by Columbia's C. of C.

- - - - -

The Mascot Stove Co., Chattanooga, has awarded a $250,000 contract for the construction of a 68,000 sq. ft. 1-story brick-steel-concrete addition that will more than double the plant's present capacity. "Mascot Stove" one of the country's largest manufacturers of coal-wood cooking and heating stoves, will have one of the most modern plants in the South when the new building is completed. One unit, now well underway, will be ready about May 1 and the entire new plant, about the end of this year. The new set-up will provide for straight-line production and will be the first semi-mechanized stove foundry in the city, according to the Chattanooga Times.

- - - - -

Gulf Refining Company will build an $80,000 service station at Nashville on Harding Road.

- - - - -

Fischer Lime & Cement Co., Memphis, has purchased a 12-acre site for which a central ready-mixed concrete plant is planned. Estimated cost, $55,000.

- - - - -

Columbian Iron Works, Chattanooga, has awarded a $275,000 contract for construction at their No. 1 plant of a brick-concrete-steel foundry. Ford, Bacon, Davis Construction Corp., N. Y., received the award, and CPA approval has been given.

- - - - -

Abraham Bros. Packing Co., Memphis, has awarded a $300,000 construction contract on their plant expansion program. (The editor apologizes for the typographical error in spelling of this company's name in item in Dec. issue)

- - - - -

WHAL radio station at Shelbyville was officially opened and went on the air in the latter part of last month. Gene Growa of Chattanooga is manager of this new 240-watt station which is affiliated with the Mutual Network.

- - - - -

Avalon Ice Cream Co., Dickson, has been newly formed by Avalon Dairies after the latter's purchase of Freezer-Fresh Co.

- - - - -

Kimberly Clark Corp., which purchased the Memphis war-built plant of the Fisher Aircraft Division in March of last year (see April Newsletter), has completed alterations and expects to begin operations in the first quarter of this year when equipment on order has been received and installed.

- - - - -

The Quaker Oats Co., Chicago, which on Nov. 1 obtained possession from the WAA of the Memphis war-built Q O Chemical Company plant, will continue to operate on substantially the same scale to supply the furfural requirements of the government rubber program. Built and operated during the war by the Quaker Oats Company for the government, this Memphis plant is the largest furfural-producing unit in the world. It was purchased through the WAA last year at a cost of $1,362,000.

Although the Memphis production in the immediate future will go entirely to the government rubber plants, the company is reported in Chemical & Engineering News as having a "far-reaching market development program which, if successful, will ultimately utilize the entire capacity of the Memphis plant and thus provide

increased employment as well as greater consumption for corn-cobs, cottonseed hulls, rice hulls, and other agricultural waste materials...."

- - - - -

Pet Milk Company, Martin, has been granted CPA approval for construction of an addition to the local milk receiving station that will double its present capacity.

- - - - -

Business men and city officials of Halls and Dyersburg recently conferred with WAA on purchasing the Halls Army Air Field for an industrial plant site.

- - - - -

The first bag of fertilizer produced at the Milan Ordnance Work by the Silas Mason Company, operating under a new government contract, came off the line early in November. Operating on a 24-hour, 7-day per week schedule, the plant is expected to produce about 4500 tons daily. Approximately 100 persons are employed.

- - - - -

The 7-Up Bottling Co., Union City, was purchased in early December by J. D. Mason, Jackson, from the Dr. Pepper Bottling Company of Dyersburg.

- - - - -

The Bradley Co., Memphis manufacturer of iron porch and lawn furniture, has moved into new quarters at 1534 Texas Street.

- - - - -

WKRM, "The Voice of Middle Tennessee", Columbia's new radio station started broadcasting late in November.

- - - - -

The Athens Bed Co., Inc., Athens, has received a State charter of incorporation. Established a few months ago by Joseph T. Frye, Jr., and Jones C. Beene - both veterans, the plant manufactures modernly designed wooden beds and related products.

- - - - -

Southern Bell Telephone Company has been given a 20-year franchise by Tracy City for operation of the telephone system there.

- - - - -

The Act-O-Lane Gas Service Co., Inc., has been organized at Chattanooga to extend distribution service on liquefied petroleum gas (propane) beyond the limits of the municipal artificial gas system. Service will be given to domestic, commercial, and industrial consumers for heating, cooking, water heating, and refrigeration. Construction cost of storage tanks and facilities for warehousing of appliances is estimated at $45,000. Mertland M. Hedges is president of the new concern; R. T. Lambert, vice-president and general manager.

- - - - -

Phoenix Oil Mill, a new $200,000 cottonseed and soybean processing plant at Ridgely, went into production late in the year. The plant employs about 30 persons and has a daily processing capacity of approximately 80 tons of beans or seed.

- - - - -

F. P. Gracey & Brother, Inc., Clarksville, has announced plans for a new $250,000 warehouse.

- - - - -

The new Lawrenceburg plant of Ironall Factories Co., work clothes manufacturers, is expected to start operation about the first of this month. Some 200 workers will be employed; registration of over 400 prospective employees had been completed by early December, according to the Lawrenceburg Democrat-Union.

- - - - -

Davis-Rosenblum Corporation, a new $1-million merchandising firm formed of a merger of 21 retail stores specializing in ladies' and children's ready-to-wear clothing, has selected Nashville for its headquarters. The Davis Stores, operating in Alabama and Tennessee, and the Rosenblum Stores, operating in Louisiana and Mississippi, are included in the new chain, according to the Nashville Banner. Stores in Tennessee that the new firm will operate are at Columbia, Murfreesboro, Clarksville, Tullahoma, Shelbyville, Jackson, Dyersburg, Cleveland, and Nashville. President of the new corporation is Mose Rosenblum of Nashville; Morris Davis, Nashville, and James Rosenblum, Gulfport, Miss., have been named vice-presidents; and Leo Rosenblum, Pascagoula, La., treasurer.

- - - - -

The East Tennessee Pack House, Morristown tobacco storage and packing plant, was destroyed by fire early in December. The Reynolds, American, Liggett & Meyer, and Austin (Greeneville, Tenn.) tobacco companies suffered large losses in tobacco stored in the plant.

- - - - -

Kingsboro Silk Mills, Chattanooga, has awarded contract for a new factory building at Lafayette; estimated cost, $55,000.

- - - - -

Southern Railway has awarded a million-dollar contract for construction of its new diesel locomotive shop at Chattanooga. Brice Bldg. Co., Birmingham, received the award.

- - - - -

Zero Products, Inc., Chattanooga, has announced plans for a new $70,000 food processing and storage plant, to adjoin the company's present plant in that city.

- - - - -

Langston Bag Co., a newly formed Memphis firm, is reported in Southern Textile News to be equipping a factory and office at 1221 Empire St., in that city. The company, which will deal in used cotton and burlap bags, expects their plant to be in operation about the first of this month. C. E. Williams, Sr., of C. E. Williams & Sons, Nashville, is president of this new Memphis firm; F. B. Langston is vice-president and general manager.

- - - - -

Rockwood Amusements, Inc., and Mid-State Theaters, Inc., in late December, purchased a vacant tract of land in mid-town Cookeville as a site for a modern theater of 1200-seat capacity and an adjoining shopping center, with a large parking area. Cost of the tract, as reported in the Nashville Banner, was $54,000.

- - - - -

Cherokee Broadcasting Co., Morristown, has received an FCC permit to construct a 250-watt, 1450 KC radio station in that city. Construction will start in the near future, according to the Morristown Sun.

* * *

negotiates with a firm, collection of the pledges is completed. In general, the contract with the new industry is so drawn as to provide for eventual liquidation of the obligation. The corporation's funds are used for purchase of a site and/or erection of a factory building; under most contracts, the costs of these are to be amortized over a 10 to 20 year period. A small percentage of interest may be included as a part of the annual payments, although this is waived by some Development Corporations which consider loss of such interest as small enough cost for the new industry obtained.

Several towns and cities not listed in the accompanying table have made some preliminary plans for the organization of Industrial Development Corporations. These include Athens, Cookeville, Erin, Lenoir City, Manchester, Paris, and Springfield. Two additional cities, Columbia and Union City, in the past have used development corporations to further their industrial growth.

A number of other Tennessee communities, either presently or recently, have indicated a willingness to give or have given financial assistance to new industries by donation of sites and/or construction of factory buildings, usually on a rental or amortization basis. These include: Bruceton, Camden, Collierville, Dresden, Dyer, Dyersburg, Fayetteville, Franklin, Greenback, Halls, Hartsville, Humboldt, Huntingdon, Lawrenceburg, Lexington, Linden, McEwen, McKenzie, Millington, Morristown, Mt. Pleasant, Obion, Sparta, Sweetwater, Trenton, Trezevant, Union City, Waverly, and Waynesboro.

* * *

STATE IS CHOICE SPOT FOR MAJOR INDUSTRIES

A recent Business Week spot-check of six major industrial concerns, each manufacturing different products, indicates that American industry in its postwar expansion is deliberately continuing decentralization. Although numerous new industrial areas in the South and West have been opened, the survey shows that "older" sections of the country still maintain their position as areas of heaviest industrial concentration.

Tennessee, surpassed only by Texas, continues to be a leader in Southern industrial expansion. Of the six industries surveyed by Business Week, Tennessee new plant locations were those selected by duPont at Chattanooga and by U. S. Rubber at Milan.

The survey showed that the smaller cities and towns carried a three to one preference in selection of sites by these major industries; other controlling locational factors were existing labor supply, proximity to new and growing markets, good transportation, and nearness of raw materials, power, or fuel.

UNION FARMER

VOTE!

"Better roads and better markets" will be the battle cry of the Farmers Union at the State legislature next Spring. Let your representatives know who put them in office by getting out a big farmer vote.

Volume 1 — Nashville, Tennessee, August, 1946 — Number 1

Tennessee Farmers Union Committee Calls For Progressive Legislation To Meet Needs of South

A. C. Lange, Homer Crabtree Elected President, Secretary

Maintaining that the South more than any other section of the country needed "progressive and liberal legislation on health, education, employment and preservation of national resource," the Tennessee organizing committee of the National Farmers Union met late in May for their first state-wide organizational meeting in Hotel Tulane, Nashville.

Mr. A. C. Lange, president of Carroll County's five-local powerful Farmers Union, was elected unanimously by other committeemen as president of the committee, and by virtue of the election, became head of the Farmers Union in Tennessee. Enthusiastic support of the new president was evidenced by the hearty endorsement he received from other committeemen from various parts of the state.

PRESIDENT LANGE

Lange became interested in the Farmers Union when he first heard last fall that farmers elsewhere were setting up small locals affiliated with the national organization only, and without any county basis. The enterprising and hard working new Union head immediately dropped important work about his West Tennessee farm to sound out a few of his neighbors and called a meeting in the Huntingdon courthouse last December. He invited the

R.R. Union Head Thanks Farmers

Pres. Whitney Appreciates Tennessee Union Support

NASHVILLE, July. — A message of thanks and appreciation to the Farmers Union for the Union's "encouraging expression of support" during the May railroad strike was received here from A. F. Whitney, national president of the American Brotherhood of Railroad Trainmen.

The message of support to the brotherhood came from a Farmer-Labor unity conference held at Highlander Folk school, Monteagle, Tennessee, May 25-26. During the two day conference and barbecue at the folk school atop the Cumberland Mountain, Farmer Union representatives and Labor Union leaders from several southern states took occasion to condemn the railroad companies for their refusal to bargain with the railroad workers.

Myles Horton, director of organization for the Tennessee Farmers Union, told press representatives that farmers in Tennessee were

CHATTANOOGA TRI-STATE FARMERS ACQUIRE CENTRAL AVENUE SITE FOR RETAIL, WHOLESALE MARKET

Labor Unions Aid In Purchase of Stock For Market Selling Direct To Consumers

Chattanooga, July.—After months of prolonged negotiation with the War Department, word was received late this month from the Army Engineers office that leasing of government lands in Chattanooga to the Tri-State Farmers Union cooperative marketing association had been approved by the quartermaster general in Washington.

Final details as to length and terms of the lease had not been received when The Union Farmer went to the press.

The land in question, described by Farmers Union leaders as ideal for a cooperative retail and wholesale market, is a level-drained three acre tract of land on Central Avenue, in the downtown area, bordered by railroad sidings on one side and a well-traveled highway on the other. It has been lying idle for the past several years.

The Tri-State Farmers Market cooperative was organized this year to handle at first only locally produced fruits and vegetables grown by Farmers Union members in the Chattanooga area. Taken into membership have been many dirt farmers from northern Georgia and Alabama as well as Southeastern Tennessee.

Tennessee Farmers Union Committee Calls For Progressive Legislation To Meet Needs of South

A. C. Lange, Homer Crabtree Elected President, Secretary

Maintaining that the South more than any other section of the country needed "progressive and liberal legislation on health, education, employment and preservation of national resource," the Tennessee organizing committee of the National Farmers Union met late in May for their first state-wide organizational meeting in Hotel Tulane, Nashville.

Mr. A. C. Lange, president of Carroll County's five-local powerful Farmers Union, was elected unanimously by other committeemen as president of the committee, and by virtue of the election, became head of the Farmers Union in Tennessee. Enthusiastic support of the new president was evidenced by the hearty endorsement he received from other committeemen from various parts of the state.

PRESIDENT LANGE

Lange became interested in the Farmers Union when he first heard last fall that farmers elsewhere were setting up small locals affiliated with the national organization only, and without any county basis. The enterprising and hard working new Union head immediately dropped important work about his West Tennessee farm to sound out a few of his neighbors and called a meeting in the Huntingdon courthouse last December. He invited the state representative to speak before a large Saturday afternoon crowd of Carroll County farmers, and immediately began a sign-up campaign to build a county wide organization. Mr. Lange's organization became the first to receive a county charter from the national office.

The state organizing committee, immediately after electing Lange as chairman and Homer Crabtree as secretary-treasurer, set about the work of making an over-all state policy and program for Tennessee's small family-type farmers.

URGES COOPERATIVES

Calling first for a "progressive and liberal national legislation on health, education, employment and preservation of natural resource," in line with the National Farmers Union program, the committee further advocated the "furtherance and extension of farmer-owned and controlled cooperative enterprises" throughout the state as part of a general program of economic reform.

Attracting the attention of statewide newspaper wire service, the committee was quoted in the daily press as condemning present marketing conditions, saying in a resolution that "the present chaotic marketing conditions prevent a ra-

James G. Patton, National Farmers Union president, congratulated the Tennessee organizing committee on their decision to establish a statewide paper for distribution to Farmers Union members in a personal letter to Secretary Homer Crabtree. The Union Farmer is pleased to print in its first edition the following message from the national president:

"Mr. Homer Crabtree, Secretary
Tennessee Organizing Committee
National Farmers Union
Decherd, Tennessee

"Dear Mr. Crabtree:

"It was with the feeling of the deepest gratification that I learned that the Tennessee Organizing Committee has decided to embark upon the publication of a newspaper for its members.

"I know from our own experience in the National Farmers Union that such an organ is almost a necessity for a peoples' organization in this day and time. All of us know only too well that we cannot expect our views to be adequately reflected in the daily press or through other channels of mass communication. This is not only because newspapers and radio stations ordinarily require huge investments and so are inclined almost automatically to favor the views of other individuals and institutions of wealth, but also because in such a swiftly-moving time as ours particular interests are likely to be lost in the press of great world events. Few things can do more to help build an organization than a live, well-edited newspaper that can keep all members in touch with each other, inform them of the views of the organization on issues as they arise and give them a channel through which to present their views.

"Let me add again a word of admiration for the splendid work your committee is doing and of greetings to every member of the Farmers Union in Tennessee.

Sincerely yours,
James G. Patton, *President*,
National Farmers Union."

CHATTANOOGA TRI-STATE FARMERS ACQUIRE CENTRAL AVENUE SITE FOR RETAIL, WHOLESALE MARKET

Labor Unions Aid In Purchase of Stock For Market Selling Direct To Consumers

Chattanooga, July.—After months of prolonged negotiation with the War Department, word was received late this month from the Army Engineers office that leasing of government lands in Chattanooga to the Tri-State Farmers Union cooperative marketing association had been approved by the quartermaster general in Washington.

Final details as to length and terms of the lease had not been received when The Union Farmer went to the press.

The land in question, described by Farmers Union leaders as ideal for a cooperative retail and wholesale market, is a level-drained three acre tract of land on Central Avenue, in the downtown area, bordered by railroad sidings on one side and a well-traveled highway on the other. It has been lying idle for the past several years.

The Tri-State Farmers Market cooperative was organized this year to handle at first only locally produced fruits and vegetables grown by Farmers Union members in the Chattanooga area. Taken into membership have been many dirt farmers from northern Georgia and Alabama as well as Southeastern Tennessee.

PRESIDENT CRAWLEY

D. A. Crawley, prominent Sale northeastern Hamilton County, Creek farmer and dairyman in (Tennessee) became president of the board of directors of the cooperative market at its organizational meeting in March. H. D. Aslinger, also of Sale Creek, and Raymond Price of Soddy, treasurer of the tri-state Farmers Union, became vice-president and secretary-treasurer.

Members who incorporated the organization to sell stock and shares to other farm producers selling on the Chattanooga market were, in addition to the officers are: G. B. Baggett, of Ringgold, Ga.; A. A. Varner, Soddy; J. A. McKinney, Sale Creek; Harry Elsea, Sale Creek; L. R. Dorn, Sale Creek; Harry Fuller, Sale Creek; J. A. Davis, Ooltewah and Glen W. Shipley, Sale Creek.

$25,000 Stock

The cooperative was incorporated under the agricultural marketing cooperative laws of Tennessee, and received its charter from the State several months ago. Incorporation papers permitted capitalization at $25,000, with $10,000 in common shares carrying a vote in the organization and sold to farm producers in the Union only, and $15,000 of preferred stock. This nonvoting stock the Cooperative sold primarily to labor unions, both CIO

THE TENNESSEE FARMERS UNION STANDS FOR:

1. **Family type owner-operator farm as the desirable farming unit for American Agriculture.**
2. **Co-operatives for purchasing and marketing of the things which the farmer must buy and sell.**
3. **Government loans to farmers for all purposes at a low rate of interest.**
4. **Support prices for farm products.**
5. **Subsidies to producer but not to the middle man.**
6. **Crop insurance.**
7. **Federal aid to schools.**
8. **Public health services that will insure medical care for all rural families.**

For further information regarding the Farmers Union in Tennessee, write any of the following officers of the Organizing Committee:

A. C. Lange, President, Carroll County Farmers Union and President of the State Committee, Huntingdon, Tenn.

Homer Crabtree, Secretary-Treasurer, State Committee. Decherd, Tenn.

Myles Horton, Director of Organization, Tennessee State Committee, Monteagle, Tenn.

(See membership application blank on page 6.)

Young Senatorial Candidate Claims TVA Endangered

Also Urges Government Buy Farm Surpluses

"I think of no way I could better serve Tennessee farmers than by saving TVA for them in its present form of operation under its present honest and able management, with its large, efficient, non-political working force unimpaired," Edward W. (Ned) Carmack, candidate for senate, stated to Tennessee farmers from his campaign headquarters recently.

The young, aggressive son a former Tennessee stateman declared he has for years advocated in his small hometown newspaper and in public speeches "Government buying and storing farm surpluses, rather than curtailing farm production, and issuing government bonds against their insured values, if necessary in purchase of them."

NEED FOR FOOD

Declaring that at all times there is somewhere in on earth great multitudes of people needing food or clothes, the young and vigorous candidate opposing aging Senator Kenneth McKellar attacked the false proposition that there is any permanent food surplus. "I saw no reason—remembering history—for supposing that because, for a while, we were having years of plenty that we should never have again years of lack. But it was feared that just the knowledge of stored surpluses of grain and raw materials would depress tne markets . . . If we had that stored stuff now millions who are starving would be kept alive. The years of lack are coming to us as they came to Pharoah's Egypt. Why should we be short-rationed in a land of potential plenty? Why should two million returned veterans still be idle?"

Develops Plan

"After considerable research, I developed a plan to market and pay-as-you-go for the tremendous

Carroll County Union Charters Five Locals

Plans County-Wide Cooperative System For Marketing and Processing of Food Products

Plans for building a large county-wide cooperative organized to engage in several enterprises, and embracing expanded marketing facilities, purchasing of farm supplies, and processing food products, including livestock, were announced last month by Carroll County Farmers Union president, A. C. Lange, of Huntingdon.

Lange, who also became state president of the Tennessee Organizing Committee at a meeting in Nashville in May (see story, page 1) announced the formation of his fifth Carroll County local. Carroll County was the first to receive a charter from the National offices of the Farmers Union.

At the county convention several months ago, A. N. Rust, from Cannon, was elected vice-president, and Howard Flowers, county secretary-treasurer.

Each one of the five locals sends a delegate to county conventions for each 10 local members. The county organization acts as a clearing house and policy-making board for all five local unions, and makes possible unified action on the part of each cooperative enterprise or undertaking throughout the county.

Cannon Local

Officers of the Cannon local include: Mr. Rust, president; A. B. Smith, vice-president; Fred Vick,

(Continued on Page 2.)

Greene County Farmers Organize Dairy Co-op

Union Obtains Collective Checking Rights From Pet

GREENEVILLE, July — Short weight and bad testing by the Pet Milk company in Greene County, where it has a practical monopoly over all milk buying, it is the reason for a strong Farmers Union county-wide organization there, J. J. King, Jr., enterprising young secretary-treasurer of the Eastern Tennessee Dairy Cooperative Association, revealed this month when explaining the basis for the Farmers Union in his area.

The Dairy cooperative, headed by H. N. Hatley, owner of progressive Sunnycrest Farms and president of the association, received its charter from Sec'y. of State Joe Carr last November and immediately begin selling memberships to dairymen throughout the county. Policy of the Pet Milk company to refuse a producers' representative to see milk tested and weighed resulted in a fast-growing association, and recent developments arising out of increasing dissatisfaction with the private milk company resulted in the Union cooperative gaining permission to have its own representative present during sales to the company.

But the gains for the Union were not made easily. An outright attempt through misrepresentation in the daily press by opponents of the Union to link the Cooperative with the CIO were made during the first few months of organization, and resulted in a bitter controversy in the press over the Farmers

CIO, AFL UNIONS AID FARMERS MART

CHATTANOOGA.—Demonstrating their belief in the fact that laborer and farmer must get together, a large number of CIO and AFL unions in Chattanooga recently bought substantial shares in the Farmers Union cooperative market on Central Avenue.

The Cooperative market, owned and controlled by common stock held held only by farmers in the TRI-State Farmers Union, also issued preferred non-voting stock, and found its best customers among strong labor unions. The industrial workers have tired of the constant high prices they have paid for fresh fruit and produce inspite of the fact that farmers received barely enough to make a living from their products.

The UNION FARMER proudly prints the names of those labor unions which bought stock to help the farmers erect their own building for selling directly to the public:

Do you want to call a meeting of farmers in your neighborhood to discuss the program of the Farmers Union? Leaflets announcing the meeting, and other helpful material, are available by writing Box 3, Monteagle. No charge.

CARROLL CO. FARMERS COMPLETE CO-OP PLANS

'Organize!'—Lange To Henderson Farmers

LXINGTON, Tenn., Sept. 21—Calling on his fellow farmers to "organize before they are swept under," A. C. Lange, president of the Tennessee Farmers Union organizing committee, spoke before about fifty Henderson County farmers here in the Lexington Courthouse.

The occasion was the Union's first organizational meeting in this county, and began as a prelude to an all-out organizing drive to establish another West Tennessee County Union.

In a dramatic and vociferous defense of the Christian principles of brotherhood through cooperatives and organization, Lange defended the interests of organized labor, and spoke out against the reactionary elements of "selfishness" and "greed" in such organizations as the National Association of Manufacturers and other "big money interests."

The State president pointed to Oscar Johnson, owner of thousands of acres of cotton plantation land

(Continued on Page 4.)

3rd Party With WALLACE—Price

SODDY, Tenn.—Calling on Henry Wallace, former secretary of Agriculture and Commerce, to rally around him the enlightened forces of "working people, farmers, small business men and people of good will," Raymond Price, Farmers Union leader in Eastern Tennessee, this week wrote and open letter to Wallace for printing in The UNION FARMER.

The letter follows:

"Dear Secretary Wallace:

The time has come for some of us small family farmers to speak out in the defense of an old friend, the best friend, the small farmer ever had.

CHATTANOOGA - HAMILTON COUNTY TEACHERS UNION (AFL)
CARPENTERS AND JOINERS LOCAL NO. 74, (AFL)
BAKERS AND CONFECTIONARY WORKERS LOCAL NO. 25 (AFL)
LAUNDRY WORKERS INDUSTRIAL UNION (CIO)
PLASTERERS UNION (AFL)

Not only through purchase of stock, but also through purchasing of fresh fruits and vegetables at the market have labor union members aided farmers in the Chattanooga area. And a great deal of praise for the farmers for opening a market has come from union meetings, labor officials say. One delegate to the CIO industrial union council reported that a total savings of $1.06 was made through purchase of only six items of produce on one shopping trip.

Market May Stay Open

CHATTANOOGA—The Chattanooga Tri-State Farmers Union market will stay open all year, R. G. Price, Secretary-treasurer of the Board of Directors, announced, providing sufficient farm produce can be obtained to afford a profitable enterprise.

In the event that enough farm produce in the winter are not available, however, the market will close temporarily for a few months, and open full next Spring.

Decherd Unable To Find Space

DECHERD. — The N. C. & St. Louis railroad company told Franklin County farmers last month that new re-arrangement of tracks in Decherd made it impossible to let any railroad property go in the immediate future.

Franklin County farmers had been negotiating with the railroad for a piece of well-located property in Decherd on which to place a small Farmers Union warehouse for shipping and receiving member produce.

Oscar Garner is president of the local Farmers Union here, and is working diligently toward locating some space for a warehouse.

(Continued on Page 4.)

RAISING THE LOW SPOTS

INCOME EACH YEAR in the South, per person, is lower than anywhere else in the nation; and Southern small farmers comprise the biggest portion of the population. It's up to the small family farmers to preserve what they have, and add to it, by organizing together to buy and sell cooperatively and make loud their voice in the halls of the lawmakers. Through organization only can Southern farmers increase their own standard of living, and the standards of living of every Southerner.

Horton Hears Pepper, Wallace In New York

Farmers Union Director Reports On "Anti-U. S. Imperialism" Rally

MONTEAGLE, Tenn.—Myles Horton, director of organization for the Tennessee Farmers Union organizing committee, last month heard Secretary of Commerce Harry A. Wallace make his famous speech against the Byrnes policy of "get tough with Russia". Also speaking at the Madison Square Garden rally was Senator Claude Pepper, Florida progressive who has been most outspoken recently against the growth of monopolies in American industry and agriculture. The following report on Secretary Wallace's speech was made for **THE UNION FARMER** by Mr. Horton as a special report to Tennessee Farmers Union members:

Mr. Wallace said:

(Continued on Page 2.)

Sen. Pepper Warns Of Monopoly Threat

MONTEAGLE, Tenn.—Senator Claude Pepper called for a special session of Congress to deal with monopolies and correct our "blundering foreign policy" at a democratic rally in New York. Speaking with Henry Wallace, the Florida Senator said:

"I would call a special session of Congress to meet the challenge which monopoly has thrown in our face. The drop in stock market prices is a foretaste of the depression which the stock manipulators see around the corner. If we do not take these steps to meet the crisis which is perhaps six or nine months

Huntingdon Merch[illegible] Want Their Cut From Sale of Tub[illegible]on Foils 'Em!

Wives Get Washtub Despite Opposition

HUNTINGDON.—A wandering trucker, whose wares were treasured galvanized washtubs in a quantity not seen for many a year around here, drove his truck into Huntingdon one Saturday last month, parked conveniently, and started doing a thriving business.

Then began a tub parade. Merchants looked out their doors and couldn't believe their eyes. What merchant was lucky enough to get washtubs in this day? Farmers, farmers' wives, farmers' sons and farmers' daughters were walking past the regular stores, laden with one tub, two tubs, whatever they could carry.

A little buzzing in each others' ears, and the merchants soon spied the culprit—the man with the tubs was not a merchant. He was a trucker. Arrest him for not having a license!

In a few minutes, with still a truckload of tubs waiting anxious customers, the trucker was hauled off to the jail house, booked for not having a city license or a county license or whatever else you have to have to do business in this little town.

FARMERS UNION TO RESCUE

Meantime, A. C. Lange, president of the Tennessee Farmers Union, was busy down at the mill right in town where Carroll County farmers are establishing their own cooperative grist and feed mill.

He heard about the trucker, and

Dairy Co-op Halts Haulers' Increase

Greene County Committee Finds Hike Unjustified

GREENEVILLE.—The Pet Milk Company here, a virtual monopoly in milk processing in this part of Tennessee, suffered another rebuff from the local Farmers Union dairy cooperative when it was unsuccessful in attempting to raise the prices of hauling milk from 30 to 35 cents a hundredweight.

Although it has campaigned for more than two months to increase the price at the cost of the farmer producer, the Pet Company had still not succeeded in its endeavors to get another nickel out of the Farmer when the UNION FARMER went to press.

FACT-FINDING COMMITTEE

An eight-man committee composed of members of the board of directors of the East Tennessee Dairy Cooperative Association (Farmers Union), reported to the annual meeting of the Board of Directors September 29th, and revealed that committee members saw no reason why hauling costs should be increased.

The committee reached the decision that farmers expenses had

Farm Bureau Tussles With Farmers Union In Henderson County

LEXINGTON.—The Henderson County Farm Bureau, controlled by well-to-do farmers around Lexington, and headed by Duncan Roberts, decided to do everything in its power to stop the organizing drive of the Farmers Union in this county last month.

The Farmers Union held its first pre-organizational meeting in Lexington courthouse September 21, and began an organizing drive here immediately thereafter. The early phase of the drive ended October 12 with a meeting at 11 o'clock in the courthouse. About forty dirt farmers and a few leading Farm Bureaucrats showed up to hear Tom Ludwig, field representative for the Farmers Union, discuss the aims and program of the Farmers Union.

Immediately after an hour-long speech by Ludwig, Duncan Roberts, for fourteen years president of the Farm Bureau here, gave a vociferous defense of the Farm Bureau and attacked the stand taken by the Farmers Union on the question of organized labor.

Alabama Farmers To Hear Market Explained

CHATTANOOGA.—R. G. Price, secretary-treasurer of the Farmers Union cooperative market here, urged Alabama farmers atop Sand Mountain to utilize more fully the marketing possibilities of the co-op.

Speaking before a Farmers Union local recently in Mt. Olive School house, near Flat Rock, Price asked if local farmers were interested in making greater gains through the Chattanooga market by selling and buying through their own organization. Assured that members in this growing area about thirty miles from Chattanooga were very interested, but at present rather ignorant of the

Huntingdon Merch[illegible] From Sale of Tub[illegible]

Wives Get Washtub Despite Opposition

HUNTINGDON.—A wandering trucker, whose wares were treasured galvanized washtubs in a quantity not seen for many a year around here, drove his truck into Huntingdon one Saturday last month, parked conveniently, and started doing a thriving business.

Then began a tub parade. Merchants looked out their doors and couldn't believe their eyes. What merchant was lucky enough to get washtubs in this day? Farmers, farmers' wives, farmers' sons and farmers' daughters were walking past the regular stores, laden with one tub, two tubs, whatever they could carry.

A little buzzing in each others' ears, and the merchants soon spied the culprit—the man with the tubs was not a merchant. He was a trucker. Arrest him for not having a license!

In a few minutes, with still a truckload of tubs waiting anxious customers, the trucker was hauled off to the jail house, booked for not having a city license or a county license or whatever else you have to have to do business in this little town.

FARMERS UNION TO RESCUE

Meantime, A. C. Lange, president of the Tennessee Farmers Union, was busy down at the mill right in town where Carroll County farmers are establishing their own cooperative grist and feed mill.

He heard about the trucker, and he knew every farmer in the county practically wanted a tub or two. Yet the merchants would deprive the farmers of a needed product unless they got their cut on it.

It didn't take but two minutes to collar the trucker and offer to let him sell his wares right on the premises of the cooperative mill, half a block from the courthouse square.

Previously contemplating that they might need a retailer's license in just such a situation, Lange had procured all the necessary papers to do retailing some time back. There wasn't anything the merchants could do.

The trucker stayed right in Huntingdon, parked on the premises of the Farmers Union property, and sold every tub wanted that Saturday.

It all goes to show you can handle the farmers individually, Mr. Merchant, but it's a trifle harder when he's organized and in the same business you are.

Mr. Lange's organization did not handle the tubs for profit, but simply provided a service for all farmers in the community.

Hatley, King Re-elected

GREENEVILE.—H. N. Hatley and J. J. King, Jr. were re-elected president and secretary-treasurer of the East Tennessee Dairy Cooperative Association (Farmers Union) here at the co-ops annual meeting.

Both Hatley and King were original members of the incorporating board, and have seen the cooperative through its many struggles with the Pet Milk Company, monopoly buyer of milk in Greene County.

Rev. A. R. Gourley replaced Earl Hawkins on the Board of Directors, and T. G. Haney was re-appointed district representative of the dairy association, as well as Farmers Union representative for East Tennessee. Haney was formerly county judge of Greene County.

Secretary King, recently elected without opposition to the county court, reports large new memberships in the cooperative as a result of increasing strength of the organization.

[illegible]Want Their Cut [illegible]ion Foils 'Em!

National Magazine Praises Smathers' Accomplishments

Two Tennessee Farmers Union leaders, Rev. Eugene Smathers, columnist for the UNION FARMER, and Myles Horton, Union director of organization, came in for notice in a national magazine last month.

In an article entitled "Thar's God in them Thar Hills," and claiming that several Southern Mountain projects in applied Christianity are reaching hitherto undeveloped human resources, the MESSENGER, published by the Evangelical and Reformed Church, devoted considerable space to Rev. Smathers' community work though his church in Big Lick, Tennessee, and to Highlander Folk School, of which Myles Horton is a co-founder.

"In 1934," the magazine, which has a national circulation, says, "farm folks (in Big Lick) were telling their new preacher, Eugene Smathers, 'You know, to tell the truth we can't afford church.' Smathers investigated and found out that the fifty families in the Big Lick community had an average cash income of only $50 a year. Smathers organized study clubs in the homes. Result: The men began to feel that they could do something about their economic conditions; they learned to mix and use fertilizers; they formed a cooperative association. As reported in the PROGRESSIVE FARMER, someone said to Mr. Smathers one day, 'You all know a lot of things that we don't know. And we know some things you don't know. It's the mixin' that learn us both. That mixin' has been going on at Big Lick for fourteen years."

The magazine reviews how the pastor and three lay members, acting as trustees, purchased a large tract of land, and since 1940, twenty-two young couples have been helped to acquire homesteads of their own. Eleven have already paid for their farms in full. Eleven others are paying interest at three per cent and making annual payments.

"The visitor to Big Lick today will see by the side of the improv-

Farm Bureau Tussles With Farmers Union In Henderson County

LEXINGTON.—The Henderson County Farm Bureau, controlled by well-to-do farmers around Lexington, and headed by Duncan Roberts, decided to do everything in its power to stop the organizing drive of the Farmers Union in this county last month.

The Farmers Union held its first pre-organizational meeting in Lexington courthouse September 21, and began an organizing drive here immediately thereafter. The early phase of the drive ended October 12 with a meeting at 11 o'clock in the courthouse. About forty dirt farmers and a few leading Farm Bureaucrats showed up to hear Tom Ludwig, field representative for the Farmers Union, discuss the aims and program of the Farmers Union.

Immediately after an hour-long speech by Ludwig, Duncan Roberts, for fourteen years president of the Farm Bureau here, gave a vociferous defense of the Farm Bureau and attacked the stand taken by the Farmers Union on the question of organized labor.

What started the fireworks, amounting to a public debate between the Union and the Bureau, was a statement by Ludwig that there were considerable differences between the Farm Bureau and the Farmers Union, although the Union recognized much of the local progress made by the Bureau in establishment of small retail farmers' supply store in downtown Lexington.

Ludwig outlined the stand taken by Farm Bureau President Edward O'Neil against the Wagner-Murray-Dingell health bill, the federal aid to education bill and the Farm Bureau support of the Case labor bill, which would have imprisoned labor union leaders during strikes.

FARM BUREAU WOULD HANG JOHN L. LEWIS

Obtaining the floor to answer for the Farm Bureau, Duncan Roberts extolled the program of the Farm Bureau in getting the Soil Conservation act passed, the AAA program and other national legislation, and called organized labor the natural enemy of the farmer. Mr. Roberts expressed himself as desirous of seeing John L. Lewis hanged as a war criminal.

Ludwig pointed out that Mr. Roberts had no doubt benefitted greatly from the Soil Conservation act, by acquiring considerable fertilizer through it for his own farm, but every small farmer in Tennessee knows that what is needed is greater and more fertilizer, more legislation, better legislation representing the farmers, rather than simply pointing out what has been accomplished in the past.

He further indicated that organized labor is here to stay, and that "farmers will find their greatest allies in the ranks of organized labor when the farmers form their own Union and go to bat for themselves."

MONOPOLY IS REAL ENEMY

"Our real enemy," Ludwig said, "is the big business interests and monopolists controlling the market in farm implements, clothing, feed, fertilizer, and everything else farmers buy. Money, Wall Street and the big financiers are still the same old enemies of the farmer, and it is only through a strong and militant organization of small family-farmers, sharecroppers and tenants, working hand in hand with

(Continued on Page 3.)

Greene County Committee Finds Hike Unjustified

GREENEVILLE.—The Pet Milk Company here, a virtual monopoly in milk processing in this part of Tennessee, suffered another rebuff from the local Farmers Union dairy cooperative when it was unsuccessful in attempting to raise the prices of hauling milk from 30 to 35 cents a hundredweight.

Although it has campaigned for more than two months to increase the price at the cost of the farmer producer, the Pet Company had still not succeeded in its endeavors to get another nickel out of the Farmer when the UNION FARMER went to press.

FACT-FINDING COMMITTEE

An eight-man committee composed of members of the board of directors of the East Tennessee Dairy Cooperative Association (Farmers Union), reported to the annual meeting of the Board of Directors September 29th, and revealed that committee members saw no reason why hauling costs should be increased.

The committee reached the decision that farmers expenses had risen considerably more than haulers. Feed costs were cited as evidence of farmers' increase in costs.

The committee recommended that the Farmers Union oppose any haulers' increases, and, since the Pet Company knew of the increasing membership of the dairy cooperative, no action has been taken yet.

F. M. Harrison, Route 10, Greeneville, was chairman of the fact-finding committee. Final decision reached was that farmers were deserving more of an increase than haulers, and that unless new facts were presented, no evidence showed why haulers should receive more than 30 cents a hundred.

COMPANY FEARS UNION SRENGTH

Members of the Farmers Union felt that the decision by the fact-finding committee against a cost increase would probably deter the company considerably from making any further moves in that direction.

The company finds itself between both the Farmers Union on one side, and the organized workers inside the plant who have a CIO contract with the company. A recent test of strength of the two Unions working together occurred when workers in the plant pointed out that milk spoilage was occurring because of lack of facilities to handle it. Previous to the workers' information about cause of spoilage, the company had been blaming spoilage on the farmers, and returning milk to them unpaid for. This practice soon stopped, and increased facilities were constructed.

Plan Co-op Supermarkets

PANTIAC, Mich.—(FP)—Pontiac, Lansing and other Michigan cities where the CIO is strong are raising money to establish cooperative supermarkets. In Pontiac the sum needed is $30,000 and a similar amount is aimed at in Lansing. The projects are open to AFL and other organizations and their members as well as to individual citizens.

The plans have the support of national cooperative organizations.

Alabama Farmers To Hear Market Explained

CHATTANOOGA.—R. G. Price, secretary-treasurer of the Farmers Union cooperative market here, urged Alabama farmers atop Sand Mountain to utilize more fully the marketing possibilities of the co-op.

Speaking before a Farmers Union local recently in Mt. Olive School house, near Flat Rock, Price asked if local farmers were interested in making greater gains through the Chattanooga market by selling and buying through their own organization. Assured that members in this growing area about thirty miles from Chattanooga were very interested, but at present rather ignorant of the market and its possibilities, the young Farmers Union leader helped local leaders map out plans for a mass meeting at Mt. Olive school house for Saturday night, November 16, at 6:30. All dirt farmers in the Sand Mounain area are invited. H. H. Carroll, now acting as president of the Mt. Olive local, and Felix Wade, prominent farm leader in that area, accepted responsibility for getting a large gathering out to the meeting.

The market at present is managed by Sidney Lewis, young Hixson, Tennessee, farmer, who has been working at the market since shortly after its opening in August.

Motion Picture

Do you want to show a motion picture on co-ops or other material of interest to farmer friends who are interested in the Farmers Union? A sound motion picture projector is available for your meeting by writing Box 3, Monteagle, Tenn.

PEOPLE, small people like farmers and working men, all over the country today look at the new Congress just elected, and wonder about the future. Small farmers cannot help but remember not too long ago when long lines of unemployed city workers stood hours on end in bread lines waiting for a dole. The discouraging prospects of the same thing happening again as pictured in the actual photograph taken during the last depression (New York City breadline) force attention of small farmers to organization. "No matter which party is in power, we are compelled to organize to be represented in the Halls of Congress," say Farmers Union officials who met in Nashville.

Farmers Union Will Demand Program For Small Farmers

State Committee Meets In Nashville To Prepare For State Legislature

NASHVILLE—The Tennessee State Farmers Union organizing Committee, headed by A. C. Lange and Homer Crabtree, met here all day Monday, November 25, to map plans and program for the legislative stand of the Farmers Union before the next state legislature meeting in January.

Maintaining that first of all on a progressive farm program is the demand by small farmers that the Nation's Congress avert a severe economic depression, the committee unanimously passed a resolution calling for a national program of public aid to education, health and increased Federal conservation programs.

Calling attention to the fact that a recent turn in political events has resulted in Republican party domination of the national Congress, the Farmers Union committee ppointed out that "No matter which party is in control, it still means that small farmers must organize to make themselves heard in the Halls of Congress."

Present at the committee meeting were, in addition to [illegible]

Chattanooga Market Closed

CHATTANOOGA—The Farmers Union market, where fresh fruits and vegetables and other local farm products were sold cooperatively by members of the Tri-State Cooperative Association, was closed down for the winter last month, R. G. Price, Secretary of the cooperative, announced.

We feel we have gained much of our objective," Price said in announcing the closing of the market for the winter. "We could have remained open, but the market would [illegible]

Present at the committee meeting were, in addition to President Lange and Secretary Crabtree, **R. G. Price, Committeeman for Southeast Tennessee; J. C. Moody,** Carroll County legislative secretary; **Leon Haddock** and **Fred Foster,** Carroll County Farmers Union members, and **Myles Horton,** director of organization for the Tennessee Farmers Union. Also present was Tom Ludwig, field representative and editor of The UNION FARMER. The committee met in the Maxwell House.

(Continued on Page 4.)

Chattanooga Market Closed

CHATTANOOGA—The Farmers Union market, where fresh fruits and vegetables and other local farm products were sold cooperatively by members of the Tri-State Cooperative Association, was closed down for the winter last month, R. G. Price, Secretary of the cooperative, announced.

We feel we have gained much of our objective," Price said in announcing the closing of the market for the winter. "We could have remained open, but the market would have had to handle considerable trucked-in produce from other areas, whereas we are interested in handling only locally produced farm goods. We were able however to bring prices down on fresh fruits and vegetables to the consumer, and at the same time we aided the farmer by increasing the volume of farm produce consumed by the townspeople.

"When there are cheaper prices to the consumer, the city worker eats more tomatoes, potatoes and other farm produce; consequently the demand for our produce was greater, with the result that by cutting out middlemen, even the smallest market endeavor in cooperative distribution aided both working people in the town and on the farm."

The Chattanooga retail cooperative market was built this summer by farmers belonging to the Tri-state Farmers Union, and financed by stock-raising among farmer producers and several AFL and CIO labor unions, who contributed generously toward establishment of the market. During the first week of operations, retail prices on tomatoes to consumers dropped from 12 to 20 cents a pound down to 5 and 6 cents a pound, yet tomatoes on the wholesale market increased in price.

At present no definite plans have been made for exact opening date of the market next year, Price said.

Parkers Crossroads Local Growing

The one local organized recently in Henderson county, at Parkers Crossroads, continued to grow as a result of two meetings recently in the grammar school, Union officials announced.

A crowded schoolroom of local farmers heard A. C. Lange, state president of the Union, describe the purposes and program of the Farmers Union at the last meeting, Nov. 8, and immediately decided that another meeting, in a larger building was needed.

Next meeting night has been set for **Thursday night, 7 o'clock, Dec. 5, in the Wildersville school.** A. F. Adams, elected acting president of the newly organized local, will preside. H. O. Adams is acting secretary.

Members belonging to the Parkers crossroads locals are: **A. F. Adams, H. O. Adams, Jessie Todd, O. B. Rush, W. G. Flake, T. C. Davis, Elmer V. Wood, Lester Todd, W. T. Roberts, R. H. White, J. W. Wooley, Ormie E. Small, G. W. O'Guinn, C. F. Lee, P. P. Pearson, James Lewis, M. C. Carnal, R. P. Hollowell, A. E. Derryberry, Sam Laws and Joseph Murphy.**

Williams Is Alabama Head

Farmers Union leaders in Tennessee last month hailed the election of Aubrey Williams, former close friend of Franklin Roosevelt, to the Alabama Farmers Union presidency.

Williams is no new-comer to the Farmers Union, having variously been director of organization for the National Farmers Union, advisor to Farmers Union officials, and a consistent and long-time advocate of Union organization of the South.

Williams is presently publisher of THE SOUTHERN FARMER, progressive monthly farm publication with offices in Montgomery. He accepted that post shortly after reactionary, private power blocs in the Senate turned down his nomination by President Roosevelt to the post of chairman of the Rural Electrification Administration.

At the time of the debate over Mr. Williams confirmation of appointment, his name became a national topic of conversation. He was accused variously of being communistic, radical and impractical. Fighting for the preservation of the small family-farmer against those who would plow under a third of the small farmers in America is no new role for Williams, even though this is the first time he has held a position as state head of the Farmers Union.

'COMMON MAN'

The new Alabama officer has a life-long record of achievement. At fifteen he was supporting a family of brothers and sisters, selling newspapers on a street corner. Deprived of the least amount of formal education, he did not learn to read and write until his fifteenth year, when a social-minded minister offered to finance his education. He later became a university teacher of Latin and Greek, but afterwards became interested in the lot of the common man, from which he had sprung, and went into social welfare activities.

Through this chosen occupation, he became acquainted with Harry Hopkins, adviser to the late president, and subsequently he rose to head of the National Youth Authority and other Federal New Deal positions of trust and responsibility.

Wildersville Meeting

A mass meeting of Henderson County farmers in the vicinity of Wildersville and Crossroads is scheduled for Thursday, December 5 at 7 o'clock in the evening in Wildersville school, A. F. Adams, temporary president of the Parkers Crossroads local, announced.

Interest in the Farmers Union has continued to grow in that section of the county as increasing numbers of family farmers and tenants join with the organization. The meeting at the Wildersville school was called by members meeting November 8 at Parkers' Crossroads, where A. C. Lange, State Farmers Union president, spoke in behalf of the organization.

All Henderson County farmers are invited to attend, and will hear state representatives of the Union explain objectives of the Union in Henderson County, in the state legislature and on the national level.

Lexington Unionist Speaks

LEXINGTON—Small farmers' interest in organized labor was demonstrated recently in two Farmers Union meetings at Parkers Crossroads when farm audiences listened attentively to Tom White, long-time Lexington resident and state legislative secretary of the Brotherhood of Railroad Trainmen, powerful independent rail labor union.

Brother White addressed a crowded Parkers Crossroads school house audience at the November 8th meeting, and told farmers that organized labor was quite interested in the organization of small farmers, and was behind the program of the Farmers Union for a better life for the common people. White said that organized labor was supporting and fighting for a better program of education,

(Continued on Page 2.)

Greene County Farmers Union Leader Opposes Sales Tax

J. J. King Favors Higher Salaries For Teachers

'Place the Burden Where the Money Is' —Not On Farmers

GREENEVILLE — Teachers in this section of Eastern Tennessee have recently approached Farmers Union members and officers to support the educators in their demands for higher pay, and every Farmer Union man has listened to the story of the need for better pay with a sympathetic ear.

J. J. King, Jr., secretary-treasurer of the Eastern Tennessee Dairy Cooperative Association and leader of the powerful Farmers Union in this section, has been especially interested in the plight of the country school teachers.

The state-wide clamor for better pay for teachers, however, began to strike a few sour notes last month when politicians joined the bandwagon to increase teachers' pay, and at the same time started advocating a retail sales tax of 2 per cent on every consumers' dollar.

SUPPORTS TEACHERS

In a strong statement upholding the justified demands of the teachers, and yet equally strong against saddling the consuming public with a retail sales tax, King set the record straight on how he and other Farmers Union members feel about the whole issue:

"It is a definite fact that the economy of any country, state or nation is greatly affected by the educational standards which operate in any five year period, and it is the honest desire of the Greene County Farmers Union to correct the present conditions of debts and education of the county, state and nation," King said. "We feel that to correct the situation we must first have more good teachers and, mind you, teaching the right things.

"Unless there are drastic changes in our institutions of education which will prepare our present day youth to cope with the political and economic conditions of their time, the counties, states and nation will again receive the burden of debt which we may be able to overcome.

"To achieve the above, we must first support the program of the Eastern Tennessee Educational Association," King continued, in endorsing the association's drive for

Middlemen Still Kicking Up Storm In Huntingdon

Now It's Over Union Cream Station

HUNTINGDON.—One way or another, the merchants and the middlemen still hate to see the Farmers Union here provide services to its members. The latest case involves private business enterprises getting the State Department of Agriculture to revoke the creamery license of Mr. W. F. Butler, who bought cream from Carroll County farmers trading at the local Farmers Union Mill and Feed company.

One of the first operations of the mill here was to set up a cream station, after farmers throughout the county had complained of unfair weights and tests on the part of private buyers. Butler operated the test station on the Union premises, and satisfaction on the part of sellers attracted wide attention until things began to pop.

Before any one around here could say Jack Robinson, V. L. Fuqua, state dairy commissioner, revoked the license of Mr. Butler, but not of the Farmers Union. The story is best told through the correspondence between Commissioner Fuqua and Mr. A. C. Lange, State Farmers Union president. The UNION FARMER herewith presents two full letters exchanged between them:

Mr. V. L. Fuqua,

self did not expect otherwise.

Now, in the light of presenting facts, I am wondering why small discrepencies should be limelighted regarding a station with such a small patronage as the one in question, in favor of some that have been in operation for years. I personally have patronized cream stations in Huntingdon for the past 12 years and never have received the results of a sediment test. Upon inquiry I have found that I am in position to furnish you with at least one-hundred affidavits that such tests are unknown to the respective signers.

Mr. Butler has nothing to gain by being dishonest and for this reason I feel that he should be reprimanded and given another chance. Laxity is not advisable, but fairness is essential.

Yours truly,
A. C. LANGE, Pres.
Carroll County Farmers Union

It turns out, as revealed by Mr. Lange, that the charges against Mr. Butler were for over-reading on tests! In other words, he was giving in some instances the farmer the break, when it came to tests and weights. He was testing in favor of the farmer instead of against him, as proved by the inspectors who checked the station.

Furthermore, another charge was that no sediment tests were being run. Yet, it was commonly known that it was not a practice of any of the local cream stations to run a sediment test. At least

Large Attendance Expected At Farmers Union School

Bakewell Colored Farmers Will Hear Union Described

CHATTANOOGA.— The second meeting for Bakewell colored farmers near here to discuss the program and plans of the Farmers Union will be held in the school house, February 13 (Thursday) at 7 p. m., R. G. Price, Secretary-Treasurer of the Tri-State Co-op, announced last week.

Bakewell is near Soddy, Tennessee, in Hamilton County, and is known as one of the most successful Negro farm communities in the state. Several farmers have expressed interest in setting up a local Farmers Union in the school, but at a previous meeting in December, severe weather prevented large attendance.

Dr. P. A. Stephens, prominent Negro doctor, author of the book, DEMOCRACY AND LASTING PEACE, and president of the large Chattanooga chapter of the National Association for Advancement of the Colored People, has been invited by Price to address the meeting along with other Farmers Union officials.

In an interview with Professor Leonard Robinson, principal of the Bakewell school, it was learned that several of the farmers plan

Aubrey Williams, Other Prominent Southerners To Teach In Monteagle

MONTEAGLE—An outstanding list of instructors are awaiting Farmers Union students at the Farmers Union school here this month. The class will be conducted during the week February 16 to 21 at Highlander Folk school, atop Cumberland Mountain.

Field reports from Union officials throughout the state are enthusiastic in the number expected to attend from locals and from members-at-large throughout Tennessee. Expenses for board and room and tuition while at the school are being borne by the State Farmers Union, as announced last month in the UNION FARMER.

More than a score of Union members in Carroll, Henry and Henderson counties alone have indicated a desire to attend, and reservations for a number of others in other parts of the state have already been made. Franklin, Grundy, Greene, Hamilton and one Alabama county bordering Tennessee have already sent in tentative names of students.

Topping the list of well-known leaders who will lecture, conduct discussions or otherwise participate in the one week school, is **AUBREY WILLIAMS**, publisher of the SOUTHERN FARMER, and former close personal advisor to

Security Administration. Dr. Mitchell is known to Southern farmers through his extensive work with rural populations through both governmental and private agencies.

"Rural Health — KENNETH POHLMAN, assistant health administrator, Farm Home Administration (formerly Farm Security Administration).

"Religion and the Farmer"— REV. EUGENE SMATHERS, author of the UNION FARMER column, **Religion and the Countyside**, and well-known for his community and agricultural work in Big Lick, Tennessee. Rev. Smathers is a member of the state board, Tennessee Territorial Farmers Union.

"Know Your Farmers Union,"— STANLEY VOGT, assistant to the director of education, National Farmers Union.

"Tennessee Cooperative Law" will be taught by **TOM LUDWIG**, state field representative; **MRS. ZYLPHIA HORTON** will conduct singing, and discuss **"Your Local**

To exact usury, every one of his brother. And I set a great assembly against them.—Nehemiah, 5:7.

UNION FARMER

part of the money and of the corn, the wine and the oil, that ye exact of them."

Middlemen Still Kicking Up Storm In Huntingdon

Now It's Over Union Cream Station

HUNTINGDON.—One way or another, the merchants and the middlemen still hate to see the Farmers Union here provide services to its members. The latest case involves private business enterprises getting the State Department of Agriculture to revoke the creamery license of Mr. W. F. Butler, who bought cream from Carroll County farmers trading at the local Farmers Union Mill and Feed company.

One of the first operations of the mill here was to set up a cream station, after farmers throughout the county had complained of unfair weights and tests on the part of private buyers. Butler operated the test station on the Union premises, and satisfaction on the part of sellers attracted wide attention until things began to pop.

Before any one around here could say Jack Robinson, V. L. Fuqua, state dairy commissioner, revoked the license of Mr. Butler, but not of the Farmers Union. The story is best told through the correspondence between Commissioner Fuqua and Mr. A. C. Lange. State Farmers Union president. The UNION FARMER herewith presents two full letters exchanged between them:

Mr. V. L. Fuqua
State Dairy Commissioner
Nashville, Tenn.

Dear Commissioner:

Your letter to Mr. W. F. Butler has been referred to me, inasmuch as the station license has been issued in my name.

It is not intended to shield Mr. Butler in any way whatsoever, but I feel that you, as the authoritative person, should be in possession of all the facts.

Your letter mentioned a visit by your inspectors on October 9 of which I was not aware, but on November 2 Mr. King and Mr. Pearson contacted me with the information that Mr. Butler had not complied with the regulations of your department and stressed the point that there had been no sediment tests taken and that the percentage had been overread in some instances.

To make myself clear and to obtain fairness for all concerned, I beg to be allowed to outline the facts in this matter. This enterprise of buying cream is just one of many which are sponsored by the Farmers Union and will be incorporated under the Cooperative marketing laws of our State.

Mr. Butler was recommended as our buyer after starting operation with an inexperienced person, also considering that he was well-known to the farmers in this section.

At that stage I received information that we could expect considerable effort to prevent this man from operating a cream station in this community. Mr. Butler himself did not expect otherwise.

Now, in the light of presenting facts, I am wondering why small discrepencies should be limelighted regarding a station with such a small patronage as the one in question, in favor of some that have been in operation for years. I personally have patronized cream stations in Huntingdon for the past 12 years and never have received the results of a sediment test. Upon inquiry I have found that I am in position to furnish you with at least one-hundred affidavits that such tests are unknown to the respective signers.

Mr. Butler has nothing to gain by being dishonest and for this reason I feel that he should be reprimanded and given another chance. Laxity is not advisable, but fairness is essential.

Yours truly,
A. C. LANGE, Pres.
Carroll County Farmers Union

It turns out, as revealed by Mr. Lange, that the charges against Mr. Butler were for over-reading on tests! In other words, he was giving in some instances the farmer the break, when it came to tests and weights. He was testing in favor of the farmer instead of against him, as proved by the inspectors who checked the station.

Furthermore, another charge was that no sediment tests were being run. Yet, it was commonly known that it was not a practice of any of the local cream stations to run a sediment test. At least the farmers had not been informed of any such practice.

But here's the letter from Mr. Fuqua in answer to Lange:

Mr. A. C. Lange
Carroll County Farmers' Union
Huntingdon, Tennessee

Dear Mr. Lange:

We have no charges against you as the licensee of the Cream Station.

Our charges are against Mr. W. F. Butler who is a licensed tester, who has falsified his records and in addition manipulated tests in such a fashion as to give false and incorrect tests.

As stated in our letter of November 6th a visit was made to the Station on October 9th, at which time Mr. Butler was informed pertaining to the running of sediment tests and four check-tests were run on his cream at that time, three of which did not agree with the tests he had given to the seller of the cream, at which time Mr. Butler was informed that it was against the law to manipulate the test in any manner.

A re-inspection was made on November 2nd at which time it was found that Mr. Butler had falsified his records pertaining to the running of sediments and it was also found that the tests run on cream by him were inaccurate insofar as the records on his buying report were concerned, therefore a letter was written to Mr. Butler on November 6th giving him until Tuesday, November 12, 1946, to show

(Continued on Page 3)

Religion, Labor and Farm Conference Established

A state-wide Conference on Religion, Labor and Farm was established last month by Dean Fleming James, dean of the Theology school at the University of the South (emeritus) and by Homer Crabtree, state Farmers Union secretary.

First meeting, at which time large attendance is expected, is to be held Saturday, January 25th, in Lexington courthouse, in Henderson County. The conference will begin at 10 a. m. and close at noon. Delegations from religious, labor and farm groups were expected to attend at the time of this writing.

Heading the list of speakers will be Dean James, one of the South's most prominent theologians and long time supporter of the idea of organization of small farmers.

Although the Lexington meeting will be the inaugural meeting of the Conference, other meetings throughout rural Tennessee will be set within the near future. The conerence was established to bring closer harmony between church leaders, labor and farm groups and the general rural population.

Large Attendance Expected At Farmers Union School

Bakewell Colored Farmers Will Hear Union Described

CHATTANOOGA.— The second meeting for Bakewell colored farmers near here to discuss the program and plans of the Farmers Union will be held in the school house, February 13 (Thursday) at 7 p. m., R. G. Price, Secretary-Treasurer of the Tri-State Co-op, announced last week.

Bakewell is near Soddy, Tennessee, in Hamilton County, and is known as one of the most successful Negro farm communities in the state. Several farmers have expressed interest in setting up a local Farmers Union in the school, but at a previous meeting in December, severe weather prevented large attendance.

Dr. P. A. Stephens, prominent Negro doctor, author of the book, DEMOCRACY AND LASTING PEACE, and president of the large Chattanooga chapter of the National Association for Advancement of the Colored People, has been invited by Price to address the meeting along with other Farmers Union officials.

In an interview with Professor Leonard Robinson, principal of the Bakewell school, it was learned that several of the farmers plan, after organization of a local, to send one or two students to the Farmers Union school to be held in Monteagle this month. Mr. Robinson, one of the leading Negro citizens of Hamilton County, is a charter member of the Southern Rural Educational Service, founded by the Tennessee Territorial Farmers Union last year.

8 Unions Back Farmers Union

Support from other than farm organizations for the repeal of the gas tax used on farm machinery, wholehearted opposition to the retail sales tax, and support for the proposed teachers' salary increase, was gained last month by Farmers Union representation in Nashville, A. C. Lange, state president, reported.

The unanimous support for these three legislative stands of the Tennessee Farmers Union before the Nashville legislature came from the following Unions:

Painters' Union (AFL)
Teamsters' Union (AFL)
Brotherhood of Locomotive Firemen and Enginemen (Independent)
Brotherhood of Maintenance of Way (Independent)
All CIO Unions in Tennessee
Brotherhood of Railroad Trainmen (Independent)
Typographical Union
Order of Railroad Conductors (Independent)

In addition, union representatives in Nashville from the Brotherhood of Railroad Trainmen and the CIO both agreed to call on their national officers, Al Whitney and

Aubrey Williams, Other Prominent Southerners To Teach In Monteagle

MONTEAGLE—An outstanding list of instructors are awaiting Farmers Union students at the Farmers Union school here this month. The class will be conducted during the week February 16 to 21 at Highlander Folk school, atop Cumberland Mountain.

Field reports from Union officials throughout the state are enthusiastic in the number expected to attend from locals and from members-at-large throughout Tennessee. Expenses for board and room and tuition while at the school are being borne by the State Farmers Union, as announced last month in the UNION FARMER.

More than a score of Union members in Carroll, Henry and Henderson counties alone have indicated a desire to attend, and reservations for a number of others in other parts of the state have already been made. Franklin, Grundy, Greene, Hamilton and one Alabama county bordering Tennessee have already sent in tentative names of students.

Topping the list of well-known leaders who will lecture, conduct discussions or otherwise participate in the one week school, is **AUBREY WILLIAMS**, publisher of the SOUTHERN FARMER, and former close personal advisor to President Franklin D. Roosevelt. Mr. Williams was recently elected to the presidency of the Alabama Farmers Union. During his instruction time, the long-time Farmers Union member will discuss the question, **"What Are Farmers Headed For?"**

SCHEDULE

A schedule of topics and teachers includes the following:

"Farm Legislation and How to Get It?'—RUSSELL SMITH, legislative secretary of the National Farmers Union (Washington office). Mr. Smith received acclaim recently from Southern farmers for his keen analysis of the causes behind the fall in cotton prices, and his testimony to Congressional representatives concerning alleviatory legislation on that South-wide problem.

BENTON STONG, editor of the National UNION FARMER, will also discuss legislation with Mr. Smith.

"Cooperatives Here and Abroad," DR. ALVA W. TAYLOR, former professor of social ethics at Vanderbilt University, and life-long advocate and champion of the cooperative movement.

"Agencies the Farmers Need and How to Get Them."—DR. GEORGE MITCHELL, former regional administrator for the Farm Security Administration. Dr. Mitchell is known to Southern farmers through his extensive work with rural populations through both governmental and private agencies.

"Rural Health — KENNETH POHLMAN, assistant health administrator, Farm Home Administration (formerly Farm Security Administration).

"Religion and the Farmer"—REV. EUGENE SMATHERS, author of the UNION FARMER column, **Religion and the Countryside**, and well-known for his community and agricultural work in Big Lick, Tennessee. Rev. Smathers is a member of the state board, Tennessee Territorial Farmers Union.

"Know Your Farmers Union,"—STANLEY VOGT, assistant to the director of education, National Farmers Union.

"Tennessee Cooperative Law" will be taught by **TOM LUDWIG**, state field representative; **MRS. ZYLPHIA HORTON** will conduct singing, and discuss **"Your Local Union and Your Community."**

MYLES HORTON, state director of organization, Farmers Union, will be in charge of the week-long program, and will conduct a daily class in **"Leadership."**

Other National Union officers are expected, but direct confirmation of their presence at the school has not been received, school officials reported.

APPLICATION BLANK

Students desiring to attend the one week term may turn to page 5 for application blanks. A full page advertisement further describing classes, with an application blank which should be mailed by February 10th to Box 3, Monteagle, Tennessee, will be found on that page.

Wildersville Local Meets

Free movies were presented at the last Farmers Union meeting at Wildersville schoolhouse, Henderson County, last month. Although two flooding creeks kept some farmers in this vicinity from attending, a large crowd including women and children saw the free Farmers Union films. A. C. Lange, Al Meggs, and James Walton spoke.

Greene County Seeks Back Money From Warehouses

Greene County Farmers Union members continued last month to investigate the lagality of practices of the tobacco auction warehouses in Greeneville, with an eye toward prosecution of the warehouses for alleged illegal charges against tobacco growers this past season.

Old state laws provide maximum charges that may be made by warehouses against tobacco growers in this state, and provide also for penalties for violation to be paid farmers retroactively for six years.

At the same time A. C. Lange, state president of the Farmers Union, has been requested by the East Tennessee Farmers Union to look into the possibilities of having legislation regulating tobacco warehouses passed in the present state Legislature. Lange is representing the Farmers Union while the legislature is in session.

A full statement of the charges against the local tobacco houses was made in last month's UNION FARMER special Greene County edition. H. N. Hatley and J. J. King, Jr., president and secretary respectively of the Dairy co-op, are leading the struggle of farmers here to recover recent alleged overcharges by the tobacco association. (See advertisement, page 6).

TENNESSEE
Industrial Planning
NEWSLETTER
INDUSTRIAL DEVELOPMENT DIVISION
TENNESSEE STATE PLANNING COMMISSION
432 SIXTH AVENUE NORTH, NASHVILLE 3

Vol. 1, No. 6 Geo. I. Whitlatch, Editor October 1, 1945

ARE YOU READY TO TALK BUSINESS?

At the present time, this Commission's Industrial Development Division is in contact and working with some 50 towns and cities that would like to develop new industries in their respective communities. Obviously, with our small staff, we are very thinly spread and cannot give a great deal of personal assistance to any one community. This "Newsletter" gives publicity to out-of-state industrial inquiries of more or less general application, and numerous towns and cities have indicated their interest in these by writing to us. Wherever practical, we present the interests of such towns and cities. And, in an advisory capacity, we are being able to render definite assistance to other Tennessee communities in their planning for new industry.

But, we cannot perform miracles. Of necessity, our job is mainly that of an intermediary between community and industry, and we cannot just bring an industry to a town because your community needs one. First, there must be an interest by industry, either local or out-of-state, in your community. Then, this interest must be developed, although many times you may fail to obtain the industry sought. The selection of a location for a new plant is a complex problem, and the industry making the choice makes the final decision as to which point offers the most economic advantages.

It is evident, therefore, that local industrial development involves both community and industry. But the primary question is how willing is your community to work to obtain a new industry. This Division may be of some assistance through the inquiries received in this office, yet these are limited and far from sufficient for the many towns that would like to have new payrolls. Further, the mere act of writing or telling us of your needs will not bring results. Frankly, successful industrial advancement of a community will depend largely on its own efforts.

There is no formula for obtaining new industries. Some locations have natural industrial advantages. Other locations are made attractive by constructive thinking and planning by forward-looking citizens. In this latter category are the towns and cities which have analysed their positions, have recognized their needs, and have formulated plans for taking care of new industries. Such towns have made funds available for the construction and leasing of any needed new buildings, have adopted liberal industrial tax policies, have agreed upon the public services that can be extended to new industry, and have taken other constructive steps.

With the right kind of thinking and honest effort, almost any town or city can obtain "leads" on industrial prospects. Bankers, wholesalers and retailers, advertising agencies, local electric power boards and cooperatives, and similar sources should be fully explored. In some cases, the direct approach works best. Delegations from a community simply go to a prominent manufacturer and show him the advantages of locating in their town. Again, financial assistance to some local concern may be the very best kind of expansion for your town.

All of this will require work - plenty of genuine effort, with many disappointments before any successes are won. Yet, the net result will pay good dividends. And,

remember, all towns cannot be "oases of industry", but if you think your town or city has possibilities, then you'll have to work to develop these potentialities.

One of the most apparent weaknesses observed in our assistance to communities is lack of organized planning for industry. Suppose you should have a chance to confer, today, with the officials of a company that is considering your community as a new plant location. Can your group, with authority, give definite answers and binding decisions on what the community can do in providing needed public facilities?

New water and sewerage lines must be laid to the plant site. What can you do on those -- will the construction be free or what will it cost the industry? Where is a suitable site, and approximately what is its value per acre? Your normal tax assessments are high. Can these be reduced to the new industry? Can you give actual figures as to the probable annual taxes on the proposed plant? Where can coal, fuel oil, and power be obtained, and what are your local delivered costs on these items? What are local construction costs, on a square-foot basis?

Think your situation through, and if you are not prepared to give specific answers on the above points and numerous others that may be asked, then you are not ready to talk to prospective industrialists. The engineers or other industrial personnel that would come to investigate new plant locations are too busy and their time too valuable for talking generalities; they are accustomed to dealing with facts, and their decisions will be based on facts. Upon their decisions will depend the investment of thousands of dollars. The community which is prepared to present its case clearly but briefly, in actual dollars and cents, will be able to negotiate in a convincing fashion, with greatly enhanced chances of success.

So, if you are not ready to talk business, begin now to assemble the necessary facts and figures. Get together with your mayor, your county judge and reach a definite agreement as to what can be offered as an industrial tax policy -- what you can do in providing public services. Let your industrial development committee become an authoritative spokesman for the community. It may save you embarrassment and disappointment when you sit down to talk business with that industry you have been wanting.

* * *

CAMDEN SURVEYS LABOR SUPPLY

A recent survey taken in Camden indicates that a total of 2,000 persons are available in that area for industrial employment.

- - -

Correction on Status of Milan War Plant

In the last issue of the "Newsletter", our news item on the V-J closure of Tennessee war plants left the erroneous impression that the Wolf Creek Ordnance Works at Milan was continuing limited operations indefinitely.

The Milan Chamber of Commerce advises us that operations at the "Wolf Creek" plant will not extend beyond January 1, 1945.

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any of the industries listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

48. Paint Manufacturer: Desires location in small town or city, with accessibility to river and rail transportation.

    Needs building with 75,000 sq. ft. floor space, either single- or multiple-story. Will employ several hundred, mainly male workers.

53. Work Shirts & Pants: Nationally recognized manufacturer -- over $1,000,000 capital -- now operating seven Mid-West plants, seeks location in town of 3,000-5,000 population. Policy of complete community participation and interested only in town with strong local unity. Will not consider location that has another garment plant or allied industry. Employ about 300 women (ages 16-35) and 10-20 men.

    Requires strictly modern industrial building 25,000 sq. ft., one-floor. Will furnish standard plans to communities interested in constructing necessary plant. Company will pay nominal annual rental but does not desire acquisition of plant building.

* * *

SALES AND PURCHASE OPPORTUNITIES

Cotton & Rayon Goods: Manufacturer of linens, with nation-wide sales coverage to the country's best retail stores, desires to act as exclusive selling agent for Tennessee manufacturers of bath mats, cotton or rayon bed spreads (chenille and candlewick), and other related lines of quality merchandise. Interested mills are invited to arrange for appointments through this Division.

Parking Meters: Surplus supply of 100 parking meters for sale, by an East Tennessee City Government, at price well below original cost. Reason for sale is that needs of city are met by the 150 presently installed.

This city has found meters to be profitable -- a total of $100 is collected weekly from their meters.

* * *

SOME DECEPTIVE ASPECTS OF PUBLIC SUBSIDY

(Third of a series of advisory articles on industrial development problems)

Propositions submitted to communities are often deceptive in their initial presentation as against actual results. Garment manufacture offers one of the most deceptive.

This is one of the simplest of industries, merely a home occupation transferred to mass production. Equipment is relatively simple and inexpensive. Only a minimum of skills is required for operation, and, consequently, wages are of relative low scale.

Equipment and working capital for a plant of 200 employees need not exceed $10,000 to $15,000. For this a manufacturer may ask for a building and auxiliary facilities that would require a $50,000 investment by the community, with the promise of a payroll of $2000 to $3000 per week or $100,000 to $150,000 per year. With a turnover of money in circulation derived from the payroll estimated at 3 to 6 times, a new volume of local business averaging $500,000 annually may be shown by the prospective manufacturer. By indicating that the local average business profit would be 10%, a community can be shown where it would receive an annual net return of $50,000 on the investment in the building.

However, let us assume that the industry fails to maintain the initial wage scale or the total employment promised. Then, the annual payroll, instead of the anticipated $100,000 to $150,000, may possibly average only $50,000 or $60,000. Again, perhaps, the local merchants' profits average only 3%, instead of 10%, owing to a large volume of the new industry's business transactions being with the public utilities which have low margins of profit. Further, some of the expected profits may go to non-resident owners or the over-all year-after-year circulation of money does not come up to expectations.

Hence, with only 3% profit, and assuming that one-half of a gross payroll turn-over of $200,000 stays in the community, the actual return to the community is equivalent to only 1½% of the net payroll, or $3000 annually on a $50,000 investment. As a definitely plausible and possible eventuality, such 6% return on the investment reflects many of the answers and objections to subsidization of industry.

* * *

"KINGSPORT: AN INDUSTRY PATTERN"

Kingsport, Tennessee's famous planned industrial city, is the subject of an article under the above title in the August 31 issue of the "Monthly Review", published by the Federal Reserve Bank of Atlanta.

Written by Earle L. Rauber, the article traces the growth of Kingsport from its settlement in 1748, through the Civil War and reconstruction days during which the old town was practically destroyed economically, up to today's modern industrial city -- planned and built on a new site as a result of the vision of one man, John B. Dennis.

As the builder of the Clinchfield Route of the Carolina, Clinchfield & Ohio Railroad through Kingsport, Mr. Dennis realized that successful operation of the road depended on the development along its route of freight tonnages that would supplement the line's coal haulage. Out of this idea grew the plan to build a modern industrial town at Kingsport, and to this end was organized the now famous Kingsport Improvement Corporation.

Rauber's tracing of the location, expansion, and interdependence of Kingsport's industries, which include Borden Mills, Tennessee Eastman Corp., Mead Corp., Kingsport Press, Holliston Mills, and Blue Ridge Glass Corp., is brief but entirely adequate to demonstrate that this is one of the most unique developments in industrial history.

"For the benefit of other communities that care to profit from its experiences, . . . Kingsport has demonstrated certain important principles of sound industrial growth. It has shown, in the first place, that a considerable development of industry can be created on a relatively slender basis of natural resources if care is taken that the individual industries are of a sort that will to some extent mutually support one another."

Furthermore, Kingsport demonstrates that the first step in building such an industry pattern is careful analysis to determine the industries best adaptable to local labor supply, resources, and other factors of the existing industrial situation. "The second step is, then, to seek out diligently such industries and persuade them of the opportunities that exist."

"Finally, Kingsport has demonstrated that industrial development can be achieved without promiscuous subsidization and the offering of special favors to new industries."

* * *

INDUSTRIAL RESEARCH INSTITUTE LAUNCHED

The University of Chattanooga, on September 20, inaugurated its Industrial Research Institute, under the direction of Dr. Raymond B. Seymour. In his address at the dedication of the Institute, Dr. Seymour outlined the South's vast natural resources and pointed out that this region has the opportunity to "become one of the most important sections of our country," but only if its research facilities are expanded and its resources developed scientifically."

The new research facility, operating on a non-profit basis, will provide contract research services to Chattanooga and other Tennessee industries, as well as to others throughout the South. The Institute, housed in a new specially designed building on the University campus, will be equipped to investigate problems in the various branches of Chemical and Chemical Engineering, with supporting assistance from the University's departments of Chemistry, Physics, Biology, Geology, Mathematics, and Economics and Commerce.

Projects for investigation may be submitted by any individual or any industry or association, regardless of size or location. Costs will be limited to actual expenditures, including salary of the technologist, use of special materials and equipment, and proportionate share of overhead and supervisory expenses.

Additional information concerning the Research Institute may be obtained from Dr. Raymond B. Seymour, Industrial Research Institute, University of Chattanooga, Chattanooga 3, Tennessee.

* * *

PRODUCTION LINE NEWS AND NOTES

Governor Checks On State's War Facilities

Bayard Tarpley, Executive Secretary to Governor Jim McCord, was in Washington early in September to discuss with government officials the probable disposition of military installations in Tennessee, particularly those in which State funds were invested.

Some decision on surplus airfields, Tarpley reports, is expected to be announced in Washington by October 15 and on other military installations in November.

Governor McCord plans to go to Washington on October 7 for further conferences on this subject with war department officials.

Industrial Directory Being Revised

"Tennessee Manufacturers", this Commission's directory of the State's manufacturing concerns, currently is being revised by the Industrial Development Division.

This directory, issued in October 1943, represented the first attempt at state-wide listing of industries and, throughout the war period, it met continuing needs for this type of information, particularly for war agencies such as WPB and OPA.

The revision now under way contemplates expansion of listings to include all mining and quarrying operations in the State and certain groups of wood-working industries, all of which were omitted in the first edition. The new edition, will be more truly an industrial directory rather than the present more limited directory of manufactures.

In the work of revision, the local CED groups of Middle and East Tennessee, Chambers of Commerce, University of Tennessee Bureau of Business Research, Chattanooga Manufacturers Association, and other industrial and civic organizations are cooperating in the distribution of questionnaires to individual industries.

Job Layoffs Moderate in State

A total of 31,444 persons, up to September 15, had been laid off in Tennessee plants since V-J Day, according to the State Department of Employment Security. In this period, there was a total of 19,435 job openings.

The Memphis area, with 4,933 job layoffs, was hardest hit; the Nashville area was second with 5,455; and Milan was third with 5,161.

New Setup for Science & Industry Association

The Southern Association of Science and Industry, which has been in existence for 5 years, was formally incorporated on September 9 at a meeting in Birmingham. Under this reorganization, the association will increase its board membership to 180 and will request a fund of $500,000 for its operation. Objective of the new program will be increased efforts to improve the South's educational structure and to develop Southern resources industrially in order to bring the region's per capita wealth on a par or above the national average.

Aids to Veterans

"Getting Into the Trucking Business" is a small guidebook for veterans who are thinking of going into the trucking business. This small pamphlet, available from the American Trucking Associations, Inc., Washington, D. C., tells how to get into the business; points up the value of "know-how", initiative, selection of area of operations, etc; describes types of operations; and answers a long list of specific questions that are most commonly asked about trucking.

"Getting Started Farming After the War", Publication 290 of the University of Tennessee Agricultural Extension Service, briefly outlines probable postwar trends in agriculture and then presents the opportunities and difficulties for young people who farm in partnership with parents, rent farms, or farm on part-time basis.

* * *

Industrial and Marketing Plans Made at Jackson

The greater Jackson and Madison County Development Association in mid-September voted to form an industrial building corporation that can provide suitable buildings for new industries locating in that city.

Under this proposal, the industrial building corporation will be empowered to raise funds - by public stock subscription - for the construction of general purpose industrial buildings, to be leased to responsible new industries on a basis sufficient to cover interest charges, insurance, taxes, and reasonable depreciation. The buildings may be sold to renting industries at cost, less depreciation.

In presenting the resolution for the proposed building corporation, Mr. Frank Caldwell of the Association's Industrial Committee, pointed out the success of the Louisville (Ky.) Industrial Foundation* through similar use of publicly subscribed funds in assisting in local development of new industrial enterprises. Numerous West Tennessee cities and towns, Mr. Caldwell pointed out, are offering free plants and other forms of public subsidization in their bidding for new industries, and, to offset this, Jackson must make some provision to attract industry. The Association's resolution specifically declares against outright gifts or bonuses, but urges the City and County governments to grant reasonable tax concessions to new industries for a limited period of time.

In a separate session, the Trade Relations Division of the Association named a committee to establish at Jackson markets for the area's varied types of farm produce. The committee will contact leading buyers of vegetables and other farm produce with a view to having them establish offices and market facilities in Jackson. After sales potentials have been established, the local farmers will be asked to take production apportionments in order to prevent glutting of the market.

*See: The Louisville Industrial Foundation, A Study in Community Capitalization of Local Industries, Federal Reserve Bank of Atlanta, Feb. 1945. This was reviewed in Tennessee State Planning Commission's "TENNESSEE PLANNER", April 1945.

* * *

RFC OFFERS PLANTS AND EQUIPMENT FOR SALE

Government-owned war plants, machine tools and other industrial equipment, and many construction materials, declared surplus as a result of cancellation of war contracts, are now up for disposal through the RFC. If you are considering expansion of your business or intend to establish a new plant of any kind, it will pay to investigate the possibilities of these government surplus facilities and materials.

In Tennessee, the Chattanooga plant of the Southern Ferro Alloys Company, totaling approximately 14,000 sq. ft. and equipped with machinery and electric furnace for the manufacture of ferrosilicon, is being offered for purchase or lease. A number of additional plants, ranging from around 100,000 to 765,000 sq. ft. of floor space are "on the market" in Chattanooga, Memphis, Nashville, and other Tennessee points.

Approximately $12,000,000 worth of construction materials and equipment, including lumber, telephone poles, fire hydrants, nails, roofing, plumbing fixtures, electrical motors and other equipment, rope, wire, water pumps, desks, filing cabinets, and many other items, are soon to be offered for sale from the Indiana Ordnance Works, through the Louisville (Ky.) RFC offices.

Machine tools and other industrial equipment can be obtained through the Tennessee office of RFC at Nashville. Interested parties should submit their requirements to the RFC office in triplicate, indicating clearly their needs by groups of various types of equipment.

* * *

POSTWAR JOB CHART

Discharged service men, as well as personnel managers of industry and business, can use to advantage the "Post-War Job Chart" published in Forbes magazine for September 1.

Tabulated in the chart are the principal military occupations, as aerial gunner, cartographer, tank crewman, boatswain's mate, etc., with their civilian counterparts. Use of the chart will indicate the various types of civilian occupations for which special military training has best fitted the Army or Navy veteran. Both military and civilian occupations are briefly described, with reference books cited for each of the latter.

War veterans who are interested in establishing their own service businesses or small industrial enterprises may find the chart of some usefulness as a preliminary check on their industrial qualifications.

* * *

BUSINESS OPPORTUNITIES

Laundries: Middle and East Tennessee towns of 4,800 and 2,300 population, respectively, are in need of laundry facilities. Government-owned surplus laundry equipment now available for purchase offers an opportunity for enterprising local capital to establish these needed local services.

Bakery and Ice Plant: East Tennessee town of 2,800 population wants a bakery and ice plant to serve local trade.

* * *

INDUSTRIAL BUILDINGS AND PLANT SITES AVAILABLE

Industrial Buildings

The "Newsletter", as a public service, will list for Tennessee communities data on any available industrial buildings, or plant sites, provided complete information is filed with this Commission. The Industrial Development Division will be glad to furnish interested parties with additional information on those plants and sites listed below or in previous issues of the "Newsletter".

Middle Tennessee

Town of 500 population: Two-story brick building, 40 x 100 sq. ft., clear working space; lower floor concrete; upper floor woodsupported by hewn beams; monitor-type roof, composition roofing; building formerly used for sewing operation.

Two-story brick building, 50 x 75, formerly used by garage; on street by railroad.

East Tennessee

Town of 5,000 population: Two-story brick building, 70,000 sq. ft. area, equipped with escalators, hydraulic elevator, two large steam boilers, sprinkler-protected. On railroad spur, within 200 yds. of concrete highway. Ample labor supply - particularly female.

West Tennessee

Town of 500 population: 3 buildings, 1 vacant lot. One two-story brick building, 5,300 sq. ft.; one one-story building, 2,400 sq. ft.; one partial building - concrete floor. All within fifty feet of railroad spur. Tax-free, rent-free.

Town of 1,500 population: Group of iron-clad buildings, one-story, concrete floors, sprinkler protected, totaling 25,000 sq. ft.; private rail spur; served with public light, water, and natural gas lines; in area of low tax rates and plentiful labor supply. Close to major market center of the South. Owner of building willing to furnish plant and part of capital for an industry with the proper background of experience and promising future prospects.

Town of 500 population: Three-story concrete building, elevator, total 12,500 sq.ft., fronts on street; 50 yds. from railroad and near State highway.

Plant Site

West Tennessee

City of 300,000 population: 6½ acres of rolling land, formerly the location of a lumber mill, inside the corporate limits and served by the city water mains with power and gas lines to site; 2000 ft. from street, with surfaced road to site. Public railroad siding. In industrial zoned area.

* * *

SYMPOSIUM OF SMALL BUSINESS AIDS

Industrial committee members of Chambers of Commerce or other civic organizations that are concerned with advancing industrialization in their communities should have, as required reading, a symposium of papers entitled "Financing Small Business", published in the Summer-Autumn issue of Duke University's "Law and Contemporary Problems".

Particularly pertinent to problems of local industrial development are the articles on the following subjects - "The Role and Problems of Small Business", covering the advantages and disadvantages of small business, the value of aids to small business, and similar problems applicable to the economy of most small communities; "How Small Business Competes for Funds", i.e., sources of financing open to small business, as commercial banks, industrial banking companies, equipment manufacturers, private venture capital, and private industrial development groups; "Financing the Acquisition of Surplus Plants and Goods"; Financial Advice and Guidance for Small Business"; "A Regional Experiment in Practical Development of Industries", covering the methods used in New England to promote the development of new industries to offset earlier losses through migration of old established industries to other regions, mainly the South and West; "The RFC 75% Program", covering this organization's program of financial assistance in encouraging industrial development (reviewed below in detail).

Copies of the report on "Financing Small Business" are available from the Duke University School of Law, Durham, N. C. at $1 per copy.

* * *

RFC 75% PROGRAM

Communities considering construction of plant facilities for reliable industries will do well to investigate the RFC's Blanket Participation Agreement (BPA) program of financial assistance.

Under the BPA program, loans made by approved banks to business enterprises are provided practically automatic guaranty up to 75% of the principal, without the necessity of filing loan applications with the RFC. By this action, industry is assured of the availability of sufficient credit to convert effectively to peacetime production and, also, private banking is encouraged to assist in creating and developing new postwar commercial and industrial enterprises.

Application for loans under the BPA program are made directly to commercial banks which, in turn, are required to obtain RFC approval of the schedule of salaries and other compensation of officers and other key personnel of the proposed borrower. If these are approved by the RFC Loan Agency Manager, the bank can make the loan, providing that it does not exceed $250,000 and that the bank takes 25% new money participation. Loans so made must be secured by validly pledged collateral of an appraised value in excess of the unpaid balance of the loan, are repayable in yearly installments aggregating not less than 10% of principal, and bear interest not in excess of 4% on the RFC's part nor 6% on the bank's part.

"Business enterprises" entitled to loans under this program are defined as any businesses privately owned and operated for profit which assist in maintaining and

promoting the econimic stability of the country, or encourage the employment of labor. This is intended to include all industrial or commercial concerns which are engaged in manufacturing, distributing, and marketing products.

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Plateau Manufacturing Co., Crossville, whose plant on the "Cumberland Homesteads" was razed by fire last year, was scheduled to resume its furniture production in September at another plant on the "Homesteads".

- - -

The Rock City Paper Box Company, Nashville, has been sold to the Newth-Morris Box Corp., Baltimore, through sale to the latter of the Nashville company's common stock. No changes in the plant's operations are anticipated, except for expansion of output through addition of new equipment and gradual addition of new employees.

- - -

Dempster Bros., Inc., Knoxville has purchased an 8½ acre tract in suburban Nashville, off Murfreesboro Road, for the construction of a display room-warehouse and a shop to handle the company's road building construction equipment.

- - -

Carter Manufacturing Company of Memphis has awarded contracts for the construction of three plants at Memphis, Nashville, and Birmingham for the manufacture of trailer and truck bodies. Rust Engineering Co., Pittsburg, received the contract awards.

- - -

Jersey Pride Creamery of Columbia has been re-purchased by G. G. Pinkston who sold it two years ago. It is reported that Mr. Pinkston plans to build a new plant, expanding production to include the manufacture of ice cream.

- - -

Sale for $10½ million of the Chicago Corporation's interest in the Tennessee Gas & Transmission Company's 1,265 mile natural gas pipeline was made early in September to a group headed by Stone & Webster Engineering Corporation.

Tennessee Natural Gas Lines, Inc., which has contract arrangements for Tennessee distribution of gas from TG&TC's pipeline, is not affected by the sale.

- - -

Recent consolidation of American Airlines with Mid-Continent Airlines greatly advances Tennessee's position as a transcontinental airways center. The merger will provide a direct link, via "American" connections at Tulsa, with Minneapolis, St. Paul, Omaha and other Midwest points and with Shreveport and New Orleans.

- - -

- - -

Fulton Sylphon Co., Knoxville, in late August, returned to a full eight-hour first shift and a partial second shift, after a few days of 4-hour operations during reconversion.

The Aluminum Company of America, Alcoa, also has returned to production after a short layoff due to inventory taking. No important reconversion changes were necessary for the "Alcoa" operations.

REPORT CONTINUES TO RECEIVE PRAISE

We are still receiving very flattering comments on our recently released "Industrial Resources of Tennessee". Here are a few more excerpts from varied sources:

"..... wish to commend you on the excellent work shown in your ...fine volume "Industrial Resources of Tennessee"...Carry on the good work. It serves a needed purpose in Tennessee." - Tenn. minister.

".....we are all of the opinion that the subject matter selected and the method of presentation are excellent." - Nationally known Calif. engineering firm.

"May I compliment you on the very excellent work done in producing this publication. I am forwarding it to other interested divisions of our organization for their information." - Penna. manufacturer.

"This is a splendid piece of work and shows in a clear-cut and graphic way many of the resources of the State. It should go a long way toward stimulating postwar development in the State." - Agricultural specialist.

"This is a very complete report and it has been of a great deal of help to the writer in some studies he is now making." - S. Car. engineering firm.

Copies of this report are still available at $1.00 per copy.

ADVERTISING AND PUBLIC RELATIONS

That "Advertising pays" is a demonstrable fact and a too-familiar expression to need much elaboration. The American public is advertising conscious. It makes most of its purchase from nationally advertised brands. Millions of dollars are annually expended by manufacturers, fruit growers, and other producers in convincing us that their products are superior to unadvertised brands. This isn't always true, but advertising sells the goods and that's what counts.

Take California oranges, for example. The Orlando (Fla.) Reporter- Star, in a recent editorial points out that "not since 1923 has California produced such a crop of marble-sized oranges. Ordinarily you would not expect them to find public favor. But the public has been sold on their merit, and the public is buying them in ever-increasing amounts. The reason -- California citrus growers told the public the smaller oranges were richer in juice, and a good value for the price asked. In other words, 'advertising did it'."

Now we're not in the orange business, but we think the California technique is applicable to industrial development in Tennessee. After all, we've got something to sell here and, figuratively speaking, our products are not marble-sized oranges but are full-blown, up-to-standard fruit. First we're selling Tennessee's many outstanding industrial advantages -- low-cost power and fuel, huge reservoirs of efficient native labor, a wide variety of mineral, agricultural, and forest resources, excellent highway, river, and rail transportation, comfortable living conditions at reasonable costs, and unparalleled recreational facilities.

But these are only a part of our selling job. In the State are many small cities and towns, modern and progressive, that have much to offer the new industries that become "sold" on Tennessee's basic advantages. Many industries prefer to locate in the smaller cities and towns where they are free of the smoke, congestion, delays, and attendantly increased operating costs imposed by the metropolitan manufacturing centers. There's a lot of good selling argument in a location where the worker can have his own garden, and the boss can drive out to the lake or golf course in 10 minutes.

Some of our Tennessee towns and small cities are beginning to realize that they must "sell" their community -- that they must advertise its advantages, if they want to attract new industries. In the past year, a considerable number of Tennessee cities and towns have issued well-prepared factual advertising brochures, often with accompanying illustrations of the community's parks, schools, public buildings, and other attractions. We believe that this is a sound investment, if properly handled, because there's nothing like "tooting your own horn and letting the world know you are there."

A word of advice, however. Don't think a single advertising brochure can do the whole job. If your plans for increased industrialization get anywhere, you will have to work at the job. The advertising can serve only to attract attention to your city or town. Once you have that, the selling of your prospect is the real job.

And maybe you will have the experience of a West Tennessee town which recently mailed out a considerable number of advertising brochures. From one large, nationally known shoe manufacturer came an acknowledgment of its receipt, with the curt statement that

"at this time we are not interested in establishing a plant in your community, and, therefore, do not feel that you should go to the trouble to send us your prospectus." That, from a company which has spent millions in advertising to build up the name of its shoes and to obtain consumer goodwill. Undoubtedly, the official making that reply for the company had never heard of "public relations."

Remember, no asset is any more valuable than good "public relations," regardless of whether you are a manufacturer selling shoes or a town selling a plant site. If you can't sell your community to an industry, be gracious in your disappointment. A single act of discourtesy may slam the door to any possible future consideration of your community by that industry. Further, you often can win much goodwill by recommending location of an industry in a nearby community, if your town can't fill the bill. The poorest policy of all is to try to "hog" all the prospects. Industry located in your neighboring town will benefit your town, and much more can be gained through cooperation than through local jealousy and competition.

* * *

SALES OPPORTUNITIES

Responsible concern would like to purchase for cash:

(1) Paint plant or chemical plant readily convertible to paint manufacture; production to include both industrial finishes and usual consumer lines, plus specialties; net worth of plant should range from $250,000 to over $1,000,000.

(2) Food manufacturing plant with national or strong sectional sales.

(3) Pharmaceutical & chemical products plant with national or strong sectional sales.

(4) Department stores; own real estate or have favorable lease; must have leading position in local community.

Toys and Furniture: Sales promotion organization with nation-wide representation would like to negotiate drop-shipment propositions with Tennessee manufacturers of toys and/or juvenile and household furniture.

Leather Goods: Recently organized retail company wants dependable supplies of good-quality harness, saddles, and similar leather items.

Automotive Items: Sales organization wants contacts with Tennessee manufacturers of automobile and truck parts, accessories, and other lines of automotive items.

* *

CLASSIFICATION OF SURPLUS FEDERAL REAL ESTATE

The Federal Surplus Property Board currently is seeking the cooperation of all local non-governmental and governmental groups in a nation-wide classification of surplus Federal real estate, in order to insure that future use of such properties is in the best interest of the communities concerned.

The Federal Government now owns many million dollars worth of real estate which will become surplus and will be offered for disposal. These properties are scattered throughout the United States and are located in and around communities of every size. They include innumerable types of lands and buildings. These properties are owned or controlled by more than 100 Federal agencies.

After a property has been declared surplus by one of these agencies, the SPA "classifies" it and assigns it for disposal to one or more disposal agencies, as RFC or FHA. When the SPA classifies a property, it determines how the land should be divided into areas or parcels, how each part should be earmarked in terms of use for which the property appears best suited, and what general program shall be adopted for disposal of land, buildings, and other structures.

What happens to these Federally owned surplus lands is of serious concern to every community in which any of them are located. The "classification operations" of the SPA can help or hurt your town. The SPA is anxious to have the assistance of each and every local community group which has a valid community concern in the disposal of these properties. Consequently, SPA urges interested communities to submit their own recommendations as to the most acceptable uses in terms of the public interest and the greatest local benefit.

This Division will be glad to advise Tennessee communities as to the approved form for submitting their recommendations to the Surplus Property Administration.

* * *

SOUTHWARD TEXTILE MIGRATION TO CONTINUE

A survey recently completed by the Postwar Planning Committee of the National Box Manufacturers Association indicates that the textile industry, during the next few years, will continue its migration to the South, with additional expansion of that industry in West Coast areas.

Extensive change of location by many plants, "particularly from the New England and Middle Atlantic areas to the Southern states" is forecast by the report. Preferences as to localities in such moves appear to be Tennessee, North Carolina, Kentucky, Texas, and Alabama. Greater proximity to sources of the cotton and the synthetic fiber materials now being extensively produced in the South and this region's abundant labor supply are chief reasons cited for the anticipated moves.

* * *

SMALL BUSINESS OPPORTUNITIES OFFERED BY TENNESSEE TOWNS

The development in Tennessee of new service establishments, retail stores, and other businesses are as important to the State's industrial expansion as are new manufacturing plants. With increasing industrialization, the consequent improvement in earning power of Tennessee workers is creating demands for better standards of living, including more and better consumer goods and general services.

Numerous communities in the State, even to some of the smallest, are alive to the desirability of obtaining new and modern drugstores, soda fountains, movie houses, radio service shops, garages, men's furnishing stores, food lockers, tourist courts, restaurants, and similar retail trade and service establishments.

Many of these offer excellent business opportunities for the investor with limited capital. Returning war veterans who have obtained certain training while in the military services, or who had practical experience in retail or service trades prior to induction, can well afford to consider the possibilities in these fields. It is estimated that 300 new modern tourist courts alone will be needed to take care of the expected increases of tourist travel in Tennessee during the next few years.

This Division, through its contacts with cities and towns throughout the State, has obtained information on specifically needed service and retail establishments for a number of communities. One East Tennessee college town of 2,500 population, for example, has indicated their need for men's furnishings, feed-seed-implement, jewelry, and furniture stores, plumbing and electrical services, a restaurant, and a hotel. Bakeries are needed in four Middle Tennessee towns, and laundries in three. Food lockers are wanted by three East Tennessee towns and by one West Tennessee town. Other needed services or retail stores wanted by one or more Tennessee towns and cities include apartment houses, hotels, drug stores, electrical supply service, furniture store, feed mill, ice plant, specialty printing plant and shoe repair shop. One town would like to have a manufacturer's agent establish offices in their community. These opportunities are in widely scattered communities, with populations ranging from towns of 500 up to cities of more than 100,000.

Interested parties can obtain from this Division information on any of the above-listed opportunities. In turn, towns or cities with recognized deficiencies in their local service or retail set-ups are invited to list such needs with this Commission.

A general list of small business opportunities is being prepared by this Division and should be available within a few weeks. Such list may be of value in suggesting fields for investigation by war veterans and others with limited capital who want to venture into businesses of their own. Also in preparation is a South-wide study of deficiencies in industrial production that will serve as a general guide for promotion of new industries in Tennessee.

* * *

EFFICIENCY OF TENNESSEE LABOR COMMENDED

Within recent weeks, two out-of-state industrialists have commented most favorably on the aptitude and efficiency of Tennessee workers. Both remarked that native workers in one instance, after only two weeks of training, were equal in quality of work and definitely superior in quantity of output to labor which they had been employing in similar capacities elsewhere in the country.

* * *

FINANCING NEW INDUSTRIAL PLANTS
(Fourth of a series of advisory articles on industrial development problems)

Some 20 Tennessee cities and towns have funds available for assistance in the financing of construction of new industrial plants. The sums range from $25,000 up to as much as $200,000. In some instances, these funds will be or have been made available through municipal and/or county bond issues, but most communities have private capital willing to underwrite such investments. In the latter cases,

any financial assistance extended to new industry is more or less a banking proposition, with full repayment of the loan plus interest. Payments, however, usually can be arranged on a long-term monthly rental basis.

In one of the major cities of the State, private investors will undertake the construction of ordinary general purpose industrial buildings at figures ranging from $2.50 per sq. ft. for structures of 25,000 sq. ft. floor space to $1.87 per sq. ft. on 100,000 sq. ft. structures. Rental of the smaller of such structures is offered at 28¢ per sq. ft. On the average, this Division thinks that $2.50 per sq. ft. is a fair estimate of prevailing construction costs in Tennessee for industrial plants of moderate size, without air-conditioning or other special features.

The Louisville Industrial Foundation Plan, mentioned in our last Newsletter, is being followed by at least two cities. Under this plan, funds are raised through individual contributions or sale of stock and are loaned to industries through a board of directors. Amortization of such loans, with interest, over a relatively short period is desirable in order that the funds can be repeatedly re-invested. This type of revolving fund plan has been projected at Jackson, as outlined in our "Newsletter" of last month, and recent advices are to the effect that a similar plan is underway at Greeneville. At the latter city, the Greene County Foundation has been formed and it is hoped that $150,000 to $200,000 in stock can be sold. Several other cities have formed or plan to form similar private development corporations -- at Brownsville, for example, 80 local business and professional leaders recently pledged $1,000 each or a total of $80,000, with local banks agreeing to carry the notes.

Unfortunately, all Tennessee cities with funds available for industrial plant construction have not developed specific businesslike plans. This is especially true in some communities planning to use public funds. In truth, certain municipal officials still appear willing to use such funds for outright subsidies -- in other words, to build a plant for free use by an industry or to exact no more than a token rental of $1, $10, or $100 or so per annum. As we have repeatedly stated here, complete public subsidy of new industry is wholly undesirable and can be definitely disastrous.

Limited indirect subsidy is contained in propositions being offered by several towns. One city, for example, will finance construction up to $75,000 with an annual rental of $5,000 for 15 years, the plant to be deeded to the industry at the end of that period. The occupant, during the 15-year period will be expected to maintain repairs and pay insurance, but, as this is to be a municipally owned structure, it is obvious that the industry is being accorded a 15-year tax exemption, in addition to an interest-free loan of $75,000. In all, the interest and tax concessions amount to a sizeable subsidy, but the proposition is definitely superior to offering a rent- and tax-free building.

Other cities are offering to finance new buildings on long-term lease at annual rentals ranging from 5% to 6% up to 8% and 10% of actual construction costs. Under such plans, leases are usually for a term of years sufficient to amortize the investment and give the industry an option to purchase any time during the life of the lease. If such purchase option is exercised, an annual depreciation is taken into account -- one city is figuring this at 2%. Where rentals are calculated at only 5% or 6%, repairs and insurance are usually to be carried by the tenant, but rentals at higher percentages will include upkeep and insurance. As pointed out above, in all cases where these buildings are to be built with public funds, the industry is receiving tax exemption throughout the lease period. At

least two privately financed propositions, on deals involving around $100,000 investment, have been offered on 10 to 20 years amortization at 4½%.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any of the industries listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

54. Dress Shirts: Nationally known manufacturer of dress shirts (capital around $1,000,000) seeks location in West Tennessee city or town, preferably where labor experienced in sewing operations is available.

    Need site large enough to accommodate plant of 50,000 to 100,000 sq. ft. space on one floor, with access to railroad siding. Good railroad facilities are prerequisite.

(Above inquiry was subject of this Division's circular letter, dated October 8).

* * *

MANUFACTURING OPPORTUNITY

Textiles: Individual or small company fully experienced in the manufacture of high-grade chenille bedspreads and bath mats can obtain financing for new plant building at West Tennessee source of major yarn requirement, professional assistance in developing new designs, and assured national market to best retail outlets through leading sales agency. Initial annual output need not exceed $50,000.

Suitable opportunity only for those with the right "know-how".

* * *

INDUSTRIAL BUILDINGS AND PLANT SITES AVAILABLE

Industrial Buildings

East Tennessee

City of 11,350 population: Two one-story, 50 x 100 sq. ft. brick and metal buildings and a small office building on 250 x 250 ft. lot, with railroad siding. Buildings need some repair, and lessee expected to make these and other improvements, cost of same to be adjusted in rental agreement.

City of 2,575 population: Two plants of 10,000 sq. ft.; immediate possession. Formerly two clothing plants operated in this town, thus assuring an ample supply of labor for any similar operation.

Plant Sites

East Tennessee

City of 11,351 population: Tract of approximately 20 acres, purchaseable in whole or in part; only a short extension of rail siding necessary to reach property.

Near city of 3,350 population: Large level tract along railroad, two highways; unpolluted mountain creek water, hardness 16 ppm, 6 to 8 millions gallons daily. Coal supplies within 100 miles, direct shipping. Suitable for large complete textile operation, as rayon, including bleaching, dyeing, and finishing.

Middle Tennessee

Near city of 4,650 population: 70 acres, RR through center, 3/4-mile frontage along river, 2 miles E. of city on main highway. TVA power lines cross property.

Town of 960 population: Tract of approximately 2 acres inside corporate limits, with 1 acre adjacent; streets on 3 sides. Water main to site; no railroad spur but can be readily built to site.

West Tennessee

Near city of 6,400: Tract of 1,265 acres, formerly used as army camp contains 50 warehouses, totaling 400,000 sq. ft. floor space; 275,514 sq. yds. paved streets; 16,661 lineal ft. of railroad tracts; water and sewerage systems, each 1,400,000 gals. daily capacity. Artificial lake, 13 acres, 21.5 ft. depth.

Town of 1000 population: Level tract large enough to accommodate plant of 100,000 sq. ft. or more, alongside RR, with 24-hour switching service. Local financing of building can be arranged on 20-year monthly rental basis, property to be deeded to occupant at end of that period -- no taxes on building and nominal *ad valorem* taxes on equipment.

* * *

GENERAL MILLS PLANS SOUTHERN EXPANSION

General Mills, Inc., which operates a mill at Johnson City, is now planning a "gigantic expansion program in the Southeast as a part of the company's reconversion program", according to press reports of the "Nashville Banner's" representative on the recent newsmen aerial tour of the nation's industrial centers.

Harris Bullis, president of General Mills, is reported as watching closely the industrial progress of the Southeast and he predicts that, "during the next five years, (this region) will outstrip the rest of the country."

General Mills' southern headquarters are in Atlanta.

* * *

PRODUCTION LINE NEWS AND NOTES

West Tennessee Assured Over $1,000,000 In New Plants

Field surveys by this Division during October revealed that at least 10 new industrial plants are under construction or are practically assured for location at eight widely scattered points in West Tennessee. Conservatively estimated, the combined construction costs of these new plant facilities alone will exceed $1,250,000.

Five of these plants -- a plastic products plant and two furniture plants at Memphis, a novelty paperweight plant at Covington, and a garment plant at Dresden -- have already been publicly announced, and this issue of the "Newsletter" carries an item on each of them. The Covington plant of the Atlas Crystal Works, in fact, has been in production for several weeks, despite incomplete installation of its equipment.

Of the remaining five plants scheduled for location in West Tennessee, contracts have been signed for two of them and construction probably will begin in the near future.

Thus, West Tennessee, long a predominantly agricultural region, appears to be rapidly shifting toward a better balanced economy. Current trend of new industries to the region reflects, in part, the advantages obtainable there from plentiful supplies of efficient labor, excellent transportation facilities, low-cost natural gas and electric power, and local natural resources, particularly ceramic clays and timber. Equally important, however, is the sincere desire of numerous small cities and towns to obtain new industries and their willingness to plan and to work hard to achieve their goals. Practically every West Tennessee community of any consequence has an active civic organization charged with industrial development, and a number of them have made specific plans for financially assisting in the location of new industrial plants.

The 10 new industries most lately selecting West Tennessee locations include metal, wood, plastic, and textile manufactures, all relatively small. Such diversification and wide distribution of industries, if continued, will do much toward creating a broad, stable economic base for the region.

Madison and Sweetwater Issue Booklets

The Chamber of Commerce of Madison and the Sweetwater Public Utilities Service recently issued advertising booklets on their respective communities. Madison is an unincorporated suburban city in the Nashville area, with a population of over 3,200 persons. Sweetwater, in the heart of the rich Sweetwater Valley of East Tennessee, has a population of about 2,600.

New Industry for Covington

Atlas Crystal Works has recently begun production of its "Snowfall Crystal Paperweights" at a new plant in Covington. Manufacture of these popular souvenir novelties brings to the state an extremely interesting mass-production type of industry, the location of which benefits from the availability of low-cost natural

gas and the excellent distribution facilities of southwestern Tennessee.

The paperweights consist of a porcelain hand-decorated figurine encased in a liquid-filled glass ball, seated on a black-glazed ceramic base. Figurines, of which more than 60 varieties are produced, and the bases are fired in a modern tunnel kiln, operating on natural gas. Other equipment of the plant includes the latest designed clay mixers, electrically operated die presses (for forming the bases), and automatic glazing machine. A total of about 40 persons are employed in the plant.

Distribution, amounting to thousands of the products daily, is to some 24,000 retail outlets, handled through 24 jobbers.

Mr. W. M. Synder, owner and operator, is preparing to produce a line of souvenir dinner plates that will feature, in full color, biblical subjects and famous metropolitan scenes, as of New York and Washington.

Humboldt Moves for Industrial Financing

The City Council of Humboldt, on the recommendation of the local Chamber of Commerce, has passed a resolution favoring a municipal bond issue to afford funds for construction of industrial buildings, with requirements for amortization of such construction costs.

Mr. J. H. Parker recently was appointed Secretary-Manager of the Humboldt Chamber of Commerce, succeeding the late Dr. W. B. Boyd.

Southern Labor Situation Good

The labor supply of most cities in the Southeast states is in the "balanced" or "substantial surplus" categories, according to late October reports of the U. S. Employment Service.

Knoxville is the only Tennessee city classed as having a relatively stringent labor situation. Nashville is listed as in balance, while Memphis is reported as having a substantial surplus.

Total layoffs in the State, since August 15 through October 6, were 41,048, according to State Employment Security Department figures. Knoxville area layoffs totaled 13,770 in that period; Memphis area, 11,698; Nashville area, 5,624; Chattanooga area, 6,357; and Johnson City area, 3,599.

The Rural Industrialization Bill

H. R. 4068 and S. 1385, identical legislative bills introduced in Congress on September 14 by Senator Bailey of North Carolina and Representative Hays of Arkansas, are referred to as the "Rural Industrialization" bills.

These bills, as introduced, authorize the appropriation of a total of $5,000,000 -- available to the Departments of Commerce, Labor, and Agriculture -- for encouraging and aiding "the expansion of established, and the development of new, private enterprise and industrial employment in regions and areas of the United States without adequate industrialization."

Under the provisions of the bills, the specified Federal agencies are to provide technical aid and assistance to farmers, businessmen, civic organizations, local and State agencies and other groups, including payments or grants-in-aid to certain local and state agencies; to prepare and distribute technical and economic information pertinent to the stimulation of industrial development of the regions concerned; and to provide aid and assistance to Federal, State, local and private agencies engaged in the training and placement of returning servicemen, war workers, and others to meet the needs of new or expanding industries of a region.

AIDS TO ESTABLISHING NEW BUSINESSES

"Will Making Concrete Blocks Pay in Your Community?", a new bulletin issued by the U. S. Department of Commerce, discusses in detail all phases of the establishment and operation of concrete block-making plants of various sizes and in various localities. Methods of analysing market prospects, plant layouts, estimates of costs of establishing and operating plants, and sources of financing are among the subjects discussed. Bulletin may be obtained for 15¢ from the Atlanta office of U. S. Department of Commerce.

"Establishing A Service Station" and "Establishing A Restaurant" circulars prepared by the U. S. Bureau of Foreign and Domestic Commerce, give information on the opportunities, selection of location, needed equipment, experience and capital, profits, and other data on these types of business ventures. Free on request from the U. S. Department of Commerce.

"NEWSLETTER" ARTICLES REPRINTED

Thanks to the "Memphis Daily News" and to the "Lauderdale County Enterprise" of Ripley for their reprinting of the lead editorial of last month's "Newsletter" -- "Are You Ready to Talk Business?" We appreciate such publicity of this Division's work.

* * *

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

S. R. Hungerford Co., a division of the S. R. Hungerford Lumber Co., will soon start manufacture at Memphis of solid mahogany period bedroom furniture. The company's new plant is now under construction. Anticipated production is estimated at $2,000,000 annually.

- - -

Arrangements have been completed by Breezy Wynn of Knoxville and R. H. Clagett of Centerville for the location in Dresden of a 25,000 sq. ft. garment factory. Dresden, in August, voted a $75,000 bond issue for financing construction of plant buildings for new industries.

- - -

Pennsylvania-Central Airlines expected to reactivate their Route 51 between Norfolk and Knoxville about October 15. Two flights daily were scheduled for this route, on which service was suspended early in the war due to curtailment

of the PCA fleet.

- - -

R. L. McGaugh of Madison has been granted the necessary county zoning permission to construct a $40,000 food locker plant in that city. Early construction of the plant is anticipated.

- - -

Hearing was begun, in late October, before the Federal Power Commission on the application of Tennessee Natural Gas Lines, Inc., to construct and operate a 14-mile pipeline that would connect the Nashville distribution system with the Tennessee Gas & Transmission Company's trunkline at a point in Cheatham County. If the line is authorized, TNGL initially expects to transport to the Nashville system only sufficient natural gas to enrich the city's present supply of artificial gas, but during the spring and summer of 1946, TNGL proposes to convert the city system wholly to natural gas. The State Railroad & Public Utilities Commission already has granted the Nashville Gas & Heating Company authority to enter into contract with TNGL for purchase of natural gas for the city system.

- - -

Cherokee China Company, Jonesboro, has been granted a charter of incorporation to manufacture, buy, sell, and otherwise deal in pottery or plastic products. Incorporators are G. F. Brandt, J. H. Winston, and Walter B. Hodges. The "Newsletter" in September noted the proposal to establish this pottery, and early construction is anticipated.

- - -

The White County Food Processing Company, Sparta, has purchased a site in that city for a new 500-locker plant. In addition to freezing and locker-storage services, the plant will have salt curing and smoke rooms, lard rendering facilities, and bulk storage space. Construction is scheduled to start within a few weeks.

Gloria Rayon Mills, Johnson City, recently announced plans for a $60,000 one-story addition to its mill, including equipment.

- - -

Sparta Planing Mill, recently organized, is constructing a new building in Sparta and is expected to be in operation by mid-December. Herchel and Herman Swindell will operate the new company's mill.

- - -

A modernly equipped milk plant has recently been completed by the Humboldt Pure Milk Company in that city. Cecil Bryant is owner and operator.

- - -

Carlton Smith Industries is constructing a new plant at Memphis for the manufacture of semi-finished furniture, including table and dresser tops. Southern hardwoods, principally gum, will be used. Operations are expected to begin within a few weeks; about 25 persons will be employed. The company has been engaged in similar production at Beardon, Ark., since 1940.

- - -

Cummings Highway Frozen Lockers, Inc., Chattanooga, plans to construct a $40,000 food locker plant.

- - -

Grayson-Johnson Manufacturing Company, Nashville, in late October was granted a charter of incorporation for the manufacture of household and office furniture and appliances, toys and novelties, and all types of woodwork. Incorporators are A. H. Johnson, S. K. Grayson, and Ferriss C. Bailey.

A similar charter also was granted recently to Cumberland Wood, Inc., Nashville. Incorporators were Fred S. Powell, John K. Maddin, and Ferriss C. Bailey.

Vol. 1, No. 8 Geo. I. Whitlatch, Editor December 1, 1945

THE INDUSTRIAL DEVELOPMENT DIVISION

of the

TENNESSEE STATE PLANNING COMMISSION

extends best wishes for

A MERRY CHRISTMAS

&

A HAPPY NEW YEAR

* * *

TAKE A LOOK AT YOUR TOWN!

Take a look at your town! The representatives of that new industry you need so badly will most certainly look at your town, and with very critical eyes. Are you proud of your town's clean, progressive appearance, or are you just a little ashamed of its run-down-at-the-heel stores, dirty and rutted streets, uncut courthouse lawn, smelly restaurants, and unpainted homes.

The experience of one of Tennessee's leading textile manufacturers well illustrates the value and need for civic pride in relation to industrial development. Recent advances of the southern textile industry into the high-quality synthetic-thread hosiery field, this owner points out, will necessitate increased technical staffs to insure the quality production essential to meet national competition. Yet, on numerous occasions in the past 30 years, he relates, negotiations with technical men for employment in his mills usually have progressed satisfactorily up to the point of disclosure of the mill location. From then on, the prospect would no longer be interested.

Such employment, the technician would suspect, meant going to a small, remote town in the South which might have very limited modern housing, only passable schools, inadequate shopping and recreation facilities, and little in the way of community spirit or cultural opportunities. Why, the technician would ask himself, should a man of his qualifications remove his family from a community of good homes, good schools, sparkling shopping centers, and other modern conveniences for a less comfortable living, even at an above-average salary.

This Tennessee manufacturer is solving his problem by actively backing every

local plan for improving and modernizing the community in which his mill is operated. More than that, he initiates plans for civic improvement and accepts leadership in promoting them. This is one executive who realizes that industrialization, to be successful, must have the proper personnel and that, to assure employment in southern industry of such high-type personnel who will be satisfied to stay on the job, industrialists should seek plant locations in attractive progressive communities. And, present industries in the South are finding it pays to assist in local civic improvements, as our Tennessee manufacturer is doing.

So, let's go look around the ole town again. Don't blind yourself to the town's defects; try to see your situation as it looks to strangers. Now honestly, do you think you are ready for inspection by that industrial prospect? What's the verdict?

* * *

KNOXVILLE SHOWS LARGE GROWTH

Greater Knoxville now has a population of 206,743, or wartime growth since 1940 of about 33 1/3%, according to a recent estimate based on the newly released 1945 city directory.

It is estimated that there was a population increase of 4,774 persons in Greater Knoxville during the past year.

At mid-November, total non-agricultural employment in the Knoxville area was reported at 145,000, including that at the Clinton Engineering Works. Job openings for the 14 counties of East Tennessee during the first half of November totaled nearly 4,000, with the most critical shortages being in the textile industries. Other important employment opportunities include the aluminum and mining industries, construction, and trades and services. The aluminum industry at Alcoa is advertising extensively, in Knoxville and other local papers, job openings for veterans and for farm labor willing to work during the slack winter months.

MEMPHIS WATER SITUATION IMPROVED

Groundwater levels are reported to be rising in the Memphis area, owing to decreased pumpage by several large industrial users since the termination of war production. In recent years, drop of water levels in Memphis wells pumping from the sand at the 500-foot depth has been persistently downward. In August, these levels in wells within the city were up 0.5 to 1.5 feet higher than in the corresponding month of 1944, according to cooperative studies being carried on by the U. S. Geological Survey and the Memphis Light, Gas & Water Division. Wells outside the city showed rises of as much as 3.5 feet.

Daily pumpage from the "500-foot sand" increased from 84 million gallons in August 1941 to 114 million in 1943, and 110 million in 1944. Total pumpage in August 1945 averaged only 93 million gallons daily.

* * *

BELDING-HEMINWAY SELECTS MORRISTOWN FOR NEW MILL

Belding-Heminway Company, the nation's foremost thread producer, announced on November 13 the company's postwar expansion plans for a new thread-throwing mill at Morristown, Tennessee. The new mill will be used primarily for throwing nylon and other synthetic yarns for the company's plants at Bedford, Va., and Putnam, Connecticut.

Morristown was selected by Belding-Heminway for their new operations only after careful field investigations of several East Tennessee cities recommended by our Industrial Development Division. Active personal assistance to company representatives making these investigations was given by staff members of this Division and of the TVA Commerce Department and the University of Tennessee Bureau of Business Research.

The site selected at Morristown comprises 7½ acres on which a plant of 50,000 sq. ft. of floor space will be erected, construction commencing in the Spring of 1946. Approximately 250 persons will be employed when the mill is in full operation.

In addition to the new Morristown unit, Belding-Heminway's postwar program includes new machinery and certain additions to their Virginia and Connecticut mills, involving an expenditure of about $1,500,000.

The present firm of Belding-Heminway Company dates back over 110 years, and over the years the company has constantly strengthened its position through numerous mergers. Before the war it was the world's largest maker of silk thread, and with the recent reduction in silk supplies, the company has been expanding its activities in nylon and other thread fields. The extent of the company's activities in the thread field is indicated by the fact that more than 100,000 different kinds, sizes, and colors of thread are carried in stock.

* * *

UNIVERSITY OF TENNESSEE FORMS RESEARCH COUNCIL

The University of Tennessee, recognizing the importance of research to the State's future progress, has completed a "Research Council" after more than a year's study in perfecting its organization.

The new UT Research Council consists of 16 representatives of all present university research agencies -- including the agricultural and engineering experiment stations, bureau of business research, aviation research committee, bureau of public administration, and research corporation -- and of a number of the university departments -- including physics, chemistry, bacteriology and geology.

"The principal functions of the council include the stimulation of a broad functional program of research, the co-ordination of research projects in progress, and the promotion of the application of research findings to the industrial, social, and economic problems of the State".

Industry and business of the State can arrange with the Council for research work on their problems through grants-in-aid sufficient to defray actual expenses of such work. The council can also accept gifts from organizations or individuals desiring to assist in expanding the university's research program.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of any of the industries listed below, or listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

60. Men's Work Clothing: Well-rated manufacturer of men's work clothing desires to locate branch operations in a Tennessee city. Will employ 200 persons, 92% female. Prepared to start with unskilled workers and will train them in necessary sewing skills. Pay will be on piecework basis, according to nationally recognized rates.

    Requires single-story mill-type building, 30,000 sq. ft., sprinkler protected and, preferably, with wood floors; site of 2 acres and one-car R.R. siding desirable; good trucking facilities are essential.

    Company does not seek any financial subsidy and will negotiate on rental or amortization basis with local interests willing to finance construction of suitable building.

    Interested communities should submit statement of approximate basis on which they are willing to construct necessary plant facility.

    (Above inquiry was subject of this Division's circular letter, dated Nov. 16.)

62. Dress Shirts: Established operator of several plants, well rated by Dun & Bradstreet, wants location for branch plant in Tennessee. Initially will employ 300 persons, largely female, but eventual employment expected to be about 500 workers. No objection to locating in town with other garment plant.

    Initial need is for plant of 30,000 sq. ft. with hardwood floors, heating and sprinkler systems; eventual expansion to 50,000 sq. ft. planned. Will consider an existing plant of minimum size or will negotiate for local financing of construction of new facility on basis of reasonable rental or amortization charges; long-term contracts not objectionable.

    This manufacturer does not ask for any kind of subsidy. The chief objective of the company is to locate their plant in a community that will give the maximum of cooperation, thus insuring permanency of operations. Further, the community must assure the company of local financial assistance for eventual expansion of the plant to 50,000 sq. ft.

    Interested towns and cities, if unable to furnish existing suitable building, should submit for consideration some tentative basis for construction of needed building, indicating approximate annual return expected on investment and whether or not occupant will be liable for taxes, maintenance, and insurance on building. Propositions so submitted are not to be binding on either party.

(Listings continued on next page)

63. Trailer coaches: Manufacturer of house-trailers wishes to expand operations. Employ 50 to 100 persons. Desires building or buildings aggregating 50,000 sq. ft. Inquiry only preliminary and further information requested on needs. This type of operation probably employs practically all men, at skilled or semi-skilled wages and may be especially suitable for lumber-producing centers.

64. Dress Shirts: Executive experienced in production management, who has voluntarily severed connections with dress shirt manufacturing company, seeks location for establishment of his own plant.

Desires to purchase or lease existing one-story plant facility or to negotiate for construction of plant on fair rental basis. Needs 30,000 sq. ft. floor space, preferably free of any support columns or other obstructions. Access to R.R. siding desirable.

Initial employment 300 persons, largely female; plans for later expansion will require 500-600 workers within two years, and location chosen must assure this ultimate employment need.

Investigation of locations being handled by legal firm which states that their client's record will withstand closest scrutiny. No subsidy asked.

Interested towns and cities should submit to this Division outline of approximate basis for negotiating on this proposition.

65. Glass Products: Well-known manufacturer and distributor of finished glass products - in business 73 years - wants West Tennessee location for branch plant within radius of 125 miles of Memphis. Initial employment about 100, mainly male workers.

Needs one-story building, approximately 30,000 sq. ft. floor space, minimum ceiling height 10 ft., concrete floors. Essential to have R.R. siding with frequent freight service in and out of selected location; available land adjoining plant to permit future contemplated expansion.

New building not necessary, provided one of suitable size can be remodeled to specifications.

Rental must be reasonably low but quality of this prospect warrants full investigation. Company ready to start operations by March 1, 1946, so please submit propositions promptly.

* * *

71. Ladies Dresses: Manufacturer of nationally advertised dresses, Dun & Bradstreet high credit rating - up to $500,000 capital, desires branch plant location. Annual payroll of $500,000.

Needs substantially constructed building of 25,000 to 60,000 sq. ft. Supply of available young women workers prerequisite.

Preliminary inquiry - company being asked for details on rental to be paid and other aspects of their plans.

LOCAL INDUSTRIAL OPPORTUNITIES

Bakery-Laundry:

Thriving East Tennessee city of 5,000, near large manufacturing center, needs a bakery and a laundry. Excellent opportunity for experienced war veteran; financial assistance probably can be obtained by right parties.

Bobbins-Shuttles:

West Tennessee city of 3,600 would like to negotiate for plant to manufacture textile bobbins or shuttles. Large cotton textile plant in this town. Local financial assistance in construction of necessary plant probably could be arranged.

* * *

"THIS IS THE SOUTH"

Much interesting and valuable information on Tennessee's large and growing textile industry is contained in "This is the South", a 63-page special feature section devoted to the southern textile industries published in the October issue of Apparel Manufacturer.

Tennessee is cited as one of the fastest growing apparel manufacturing states in the country. It is the nation's leading producer of work shirts and, in the production of work clothes as a whole, is exceeded only by Missouri and New York. The State's annual output of work clothes, exclusive of work shirts, in 1939 was valued at more than $14,000,000. Tennessee is the South's second biggest producer of male clothing.

Even before the late war, Tennessee mills had an output of over $40,000,000 dollar's worth of hosiery and underwear.

In other important branches of the textile and related industries covered by the feature article, Tennessee's several rayon plants, numerous of its leading cotton yarn, cotton fabric, woolen and worsted, and knitted cloth mills receive mention. The Patent Button Company of Knoxville receives special mention as one of the nation's leaders in its field of production.

* * *

KENTUCKY REQUESTS LARGE PUBLICITY FUND

The Kentucky State Division of Publicity is asking their Legislative Council for $300,000 annual appropriation to expand their program of State advertising during the next biennium. The Legislature, meeting next January, is expected to act favorably on the request.

* * *

CUMBERLAND HOMESTEADS TO GO "ON BLOCK"

"Cumberland Homesteads", government subsistence project built near Crossville during the depression days of '33, has been marked for liquidation. Some 200 farm units, each consisting of an attractive stone house with 10 to 160 acres of land, are soon to be offered for sale by the Federal Public Housing Administration.

* * *

INDUSTRIAL BUILDINGS AND PLANT SITES AVAILABLE

Industrial Buildings

East Tennessee

Town of 2,281 population: Modern mill, 15,000 sq. ft. sprinkler protected, steam heat. Formerly used for hosiery manufacture; in good repair.

East Tennessee

Town of 2,285 population: Brick, 1- and 2-story building, 70,000 sq. ft., including basement with concrete floor; two 2-story wings, each with four rooms 50 x 110 ft.; wings extend off central room that also connects with other rooms of varied dimensions; all rooms have outside ventilation; equipped with escalators, hydraulic elevator, steam heat (two large boilers); property in use up to late Fall of 1945 as woolen mill and in excellent repair.

Plant Site

Middle Tennessee

City of 3,580 population: Excellent level building strip, totaling about 20 acres, alongside railroad. Property immediately outside corporate limits but within easy access to public utilities.

* * *

PRODUCTION LINE NEWS AND NOTES

Obion Organizes Chamber of Commerce

The organization of a Chamber of Commerce at Obion was effected at a recent meeting attended by some 40 local businessmen. The new organization intends to work for the general advancement of Obion's civic interests and of the southern part of Obion County.

Sweetwater Plans for Civic Development

At a recent meeting of the Kiwanis and Lions clubs of Sweetwater, a permanent organization was set up to perfect plans for the future development of that city. One committee, under the chairmanship of S. J. Randall, will devote its efforts toward furthering local industrial expansion. A second committee, with John W. Riley as chairman, will serve as a local planning and zoning commission for civic improvements.

Local Governments Reduce Indebtedness

Tennessee counties and municipalities, within the 5-year period of 1939-44, reduced their outstanding general obligations by more than $53,676,000, according to the latest Tennessee Taxpayers Associations' report released early in November. This reduction compares with the $198,130,000 of local bonded debt still outstanding. Counties in the 1943-44 fiscal year, for the sixth consecutive year, reduced their gross debt; their net debt, for the third consecutive year. Both gross and net debt of the municipalities were reduced for the fifth consecutive year.

Guides For Local Industrial Promotion

A helpful outline of "what-to-do" in seeking new industries is contained in a pamphlet entitled "How You Can Bring Progressive Industries to your State-Region-Community" published by the McGraw-Hill Publishing Company, New York City. This latter publication is primarily designed to solicit industrial development advertising, but it will be useful to anyone assisting in community planning for new industries.

You can obtain from the U. S. Department of Commerce a copy of "A Guide for Local Industrial Production" -- Economic (Small Business) Series No. 47. This is largely a series of statistical data covering the many manufacturing industries of the U. S., on the points of number of establishments, employees, value of output, etc.

The following U.S.D.C. pamphlets also have been issued recently on small business opportunities:

Establishing a Real Estate and Insurance Brokerage Business ---	free
Establishing a Diaper Service----------	free
Establishing a Laundry----------	free
Establishing and Operating Your Own Business----------	10¢
Establishing and Operating a Small Saw Mill Business----------	35¢

Address request to U. S. Department Commerce, 603 Rhodes Building, Atlanta 1, Georgia.

There's Something to This Advertising!

Re: our editorial last month, "Advertising and Public Relations". If you still don't think "Advertising pays", then why should the Assembly of the Church of England vote unanimously to spend $4 million in a 5-year advertising and public relations program to overcome the "spiritual anemia" of the British people.

INDUSTRIAL HONOR ROLL NEXT MONTH

In the January "Newsletter" will be carried a summary listing of the number of new industries located or in process of being located in Tennessee towns and cities during 1945. If your community is to be fully represented on this "Industrial Honor Roll", send us by Dec. 20 a list of all new industries established locally in the past 12 months, excepting garages, filling stations, and similar service and retail businesses.

* * *

The old Dayton Coal & Iron Company properties, including 30,000 acres of lands in Rhea, Bledsoe, and Meigs counties Tennessee and two Georgia counties, have been purchased by Nashville interests. Cinders and slag from old dumps on the property are expected to be reclaimed as aggregate material for concrete block manufacture; shipments probably will begin January 1. Farm lime and coal are other products planned by the new operators.

* * *

The Somerville Young Business Men's and Lions Clubs recently joined forces for the purchase of obtaining new industries in that city.

* * *

State Oil and Gas Data Released

The Tennessee Division of Geology has released for general distribution a new oil and gas chart covering the Northern Cumberland Plateau area. Maps of the chart show locations of drilled wells in Cumberland, Morgan, and Scott counties, with tabulated data on the results of such drillings. Columnar sections, descriptions of formations, and a brief history of explorations in this area are given on the chart.

Copies of the chart may be obtained at 50¢ per copy from the Division's offices, Room G-5, State Office Bldg., Nashville 3.

Stove Manufacturers Discuss Research

Stove manufacturers of Tennessee and of other states met, on November 2-3, at the University of Tennessee to discuss stove and heating equipment research projects to be carried out by the UT Engineering Experiment Station, which for a number of years has given aid to many Tennessee stove manufacturers on their problems of design and combustion.

During the conference, the postwar development of cooking stoves, room heaters, and furnaces was emphasized. Speakers included E. R. Kaiser, assistant director of research, Bituminous Coal Research, Inc., Pittsburgh, and R. S. Dill of the U. S. Bureau of Standards.

* * *

SALES AND PURCHASE OPPORTUNITIES

Auto & Builders Supplies:

Rathburn A. Ray, Manufacturer's Agent, Athens, Tenn., desires to obtain lines suitable for sale to automotive, hardware, and builders supply dealers throughout East Tennessee. Manufacturers wishing representation for their products in that region should address Mr. Ray at P. O. Box 115, Athens, Tenn.

Herbs:

Coeburn Produce Co., Coeburn, Va., wants to purchase crude medicinal roots and herbs, as golden seal, blood root, may apple, slippery elm bark, and similar commodities. Interest dealers should contact company directly.

Cotton Cloth:

California manufacturer wants to purchase 10-oz. duck in carload lots. Address replies to Mr. Wesley P. Kliewer, 1155 Sequoia Ave., Tulare, California.

Locker Plant:

War veteran desires to purchase an operating food-locker plant, preferably in a community of 5,000 to 10,000 population. Would also consider similar communities in need of new locker plants, provided some local financial assistance is available.

Cabin Materials:

Readi-cut logs and other materials for erection of cabins and cottage are sought by out-of-state inquirer. Lumber mills producing or capable of furnishing such products, please advise editor of "Newsletter".

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Jackson Building Corporation will commence construction, about January 1, of a 60,000 square-foot factory building that will be leased to a Midwestern sports manufacturing concern. This new industry, the identity of which is not yet revealed, will employ 500 persons. The investment in plant and land, reported as totaling $180,000, will be carried by the Building Corporation organized by Jackson citizens in September (see "Newsletter", October issue).

- - -

Ground was broken at Memphis on November 9 for a $1,000,000 addition to the Ford Motor Company's local assembly plant. The construction contract is held by the Virginia Engineering Company, Newport News. Six hundred Ford workers and numerous city and company officials watched Mayor Chandler break ground for the new addition which will include a new parts supply building and an extension of the main plant.

Car production is expected to begin at the Ford Plant by mid-December; 1800 workers will be employed when full-time production is reached.

- - -

Union City officials have been notified of the Majestic Manufacturing Company's decision against building a new stove plant in that city. The St. Louis stove concern, which contracted for the Union City location several months ago, stated that change in "several primarily important conditions" since negotiating the contract necessitated their adverse decision.

- - -

Paris Coffee Co., Inc., Chattanooga, a wholly owned subsidiary of Stewart's of Memphis, producing potato chips, roasted nut meats, and roasted coffee, has acquired a new plant building for expansion in operations. Including purchase and renovation of property and installation of new equipment, the expansion will cost $40,000 to $50,000. Employment is expected to be increased from 12 to 50 or 100 persons.

- - -

Tennessee Fabricating Company, manufacturer of light hardware and garden tools, is one of the latest additions to Memphis industry. The plant, purchased from McLeary Industries, has 25,000 sq. ft. of floor space and will employ 150 persons when remodeling work is completed. A complete machine shop will handle job work and die making. Mr. A. Sauer is president of the new company.

- - -

Leon Ferenbach Co., Johnson City, has completed an expansion of its silk throwing mill, essentially doubling output capacity.

- - -

Noland Tank & Galvanizing Co., Nashville, has been granted a State charter to engage in the manufacture or processing of all kinds of metal, plastics, or similar products.

Modern Packages, Inc., Memphis, has awarded a $50,000 contract for construction of new 70,000 sq. ft. plant.

- - -

Preliminary plans for a $115,000 FM radio station at Chattanooga are reported to have been completed by the International Ladies Garment Workers Union of New York City.

- - -

Chenille bedspreads and house coats are to be manufactured by the National Merchandise Company at Johnson City. A former retail store building is being converted for this new operation.

- - -

Castings Manufacturing Company, Lewisburg, is constructing a new foundry of around 17,000 sq. ft. floor space. This new company, expected to begin operations about January 1, 1946, will make stove grills and other light iron castings.

- - -

Motor Wheel Corporation, Memphis wooden barrel manufacturing firm, was recently sold to National Distillers, Virginia whiskey corporation.

- - -

O. B. Andrews & Company is completing a new paper box factory at Johnson City.

- - -

The Eagle Soap Company of Tennessee, Memphis, was granted a charter of incorporation by the Secretary of State in early November.

- - -

Williamson Locker Storage Co., Franklin, has announced plans for a $50,000 expansion, including a meat curing room and new short-time storage lockers.

- - -

New food locker plants are being completed at Lafayette, McMinnville, and Dickson. Early in November, Manchester was reported to be planning construction of a locker plant.

- - -

Green Brothers, Nashville seed company, has announced plans for establishing a 1,000-acre hybrid seed growing station in Wagoner County, Oklahoma, at an estimated cost of $150,000.

- - -

Orgill Bros. & Co., Memphis, has under construction a $300,000 building expansion program, including warehouse and an addition to its present four-story structure. This 99-year old firm is reported the largest wholesale hardware firm in the mid-south.

Jackson Cookie Co., Memphis, has been granted a building permit for a new $80,000 baking plant.

- - -

Pennsylvania - Central Airlines and Northeast Airlines are on a merger deal, subject to approval by stockholders of each company and Civil Aeronautics Board. The merger would give PCA important routes to Boston and other points in New England. Knoxville and Chattanooga are flight-stops on PCA's present southern routes.

- - -

Robilio & Cuneo, Memphis, has let a contract for $50,000 factory.

- - -

Abandonment by the N.C. & St. L. Railway of 18.26 miles of its trackage between Columbia and Lewisburg has been ordered by the Interstate Commerce Commission. The order does not set a date, but early dropping of the line is anticipated.

- - -

Memphis Transports, Inc., 1407 Sterick Bldg., Memphis, has been granted a charter of incorporation to engage in the trucking business.

- - -

Lookout Oil & Refining Co., Chattanooga, has announced plans for a new $230,000 hydrogen plant.

- - -

Crescent Amusement Company has announced plans for a new uptown movie theater in Nashville, to be built within the next year. The new showhouse, costing between $750,000 and $1,000,000, will be built behind the Warner Building and reached by a lobby extending through that office building.

- - -

The Southern States Cooperative, a farmers organization operating in Kentucky, Maryland, Virginia, Delaware, and West Virginia, has announced plans for building a $475,000 fertilizer plant at Nashville.

- - -

Consolidated Vultee Aircraft Corporation's plant at Nashville is scheduled for early conversion into an electric and gas kitchen range manufacturing unit. Production of the ranges is expected to start by February of 1946, with a total of around 4,500 employed when full-time operation is reached. Aviation Corporation, parent company of the Nashville division, will market the stoves.

- - -

H. & H. Transport Co., and the Petroleum Company have been granted permission by the State Railroad & Public Utilities Commission to transport petroleum products from river terminals at Nashville and Memphis to various Middle and West Tennessee points.

- - -

United Hosiery Mills Corp., Chattanooga, plans the installation of additional equipment and facilities to increase current output by 50 percent.

- - - -

INDUSTRIAL RESOURCES OF Tennessee

TENNESSEE STATE PLANNING COMMISSION

STATE DEPARTMENT OF EDUCATION
DIVISION OF VOCATIONAL EDUCATION
ROOM 202 WAR MEMORIAL BUILDING
NASHVILLE 3, TENNESSEE

March 18, 1946

To: County Superintendents of Schools and others concerned with Farm Training Programs for Veterans

Re: Procedures for setting up Farm Training Programs for Veterans

1. A further conference with the Veterans Administration representatives indicates that no contract with the Veterans Administration need be entered into by county and other boards of education operating farm training programs for veterans since that agency already has a contract with the State Board.

2. County boards of education will be reimbursed at the rate of $20.00 per month for each veteran enrolled under a special instructor. (Less such amount, if any, as may be necessary to administer the program on the State level. This to be apportioned on a statewide per capita basis.)

3. Reimbursements will be made through the State Board for Vocational Education at the end of each quarter. (It will be necessary for the county board of education to make the necessary appropriations for the initiation of the program pending initial settlement by the Veterans Administration.)

4. All training programs must be approved by the State Board for Vocational Education, and all instructors employed shall be subject to approval by the State Board.

5. Fill out and submit in triplicate a copy of the attached "Application for Approval of a Training Program" for each special instructor employed. If any veterans are taking farm training under regularly employed teachers of vocational agriculture another application should be filed in triplicate covering all such trainees in the county. Only one application in triplicate need be filed for this group of trainees irrespective of the number of vocational agriculture teachers in the county.

6. The question has been raised a number of times as to what salary should be paid special instructors of veterans. It is our opinion that the salary paid should not exceed that paid regular teachers of vocational agriculture with similar training and experience. It should be borne in mind too that there are other items of expense which the board of education will need to meet out of receipts for this program such as fuel, lights, replacement and repair of shop and other equipment, and any additional clerical help which may become necessary.

   Travel should be at the rate of 5¢ per mile for necessary official travel if an automobile is used. No other means of travel would appear to be acceptable.

7. Detailed instructions for filing claims for funds will be sent to you at a later date.

8. On receipt of your application for approval of a training program, the application will be examined and you will be notified immediately of the action taken. If approved one copy of the application will be returned to you which will be your authority to proceed with the program.

(This release is supplemental to original and not in lieu thereof.)

HIGHLANDER FOLK SCHOOL EXECUTIVE COUNCIL MEETING APRIL [illegible], 1946
A.F.H.W. Hall, Chattanooga, Tennessee

Present: Lucy R. Mason, C.W. Dannenburg, Charles Wilson, W.H. Crawford, Matthew Lynch, Alton Lawrence, Myles Horton, Mary Lawrance, Catherine Winston. Other staff members: Bill Elkuss, Tom and Bettie Ludwig, Ermon Fay Johnson.

Visitors: Helen Gregory, TWUA, William Frazier, U.S.A.

Council Members not present: Christopher and Pieper, in Washington, Dombrowski notified would bot be able to be here; Gillman, engagement in Atlanta, Haigler; Mitchell, notified unable to get here, Reid, wired unable to be here, Starling, meeting in Detroit, Williams, meeting in New York, Jones; Z. Horton, unable to be at meeting.

Meeting came to order at 9:30 a.m. W.H. Crawford, presiding. The following agenda was presented by Catherine Winston and approved:

- -- Introduce new staff
- -- Report on Mail Poll: budget, Callaghan, Mc Coy
- -- Elect secretary of meeting
- -- Approve minutes of 1945 Council meeting
- -- 1946 Program
  - -- Residence terms
    - CIO Term
    - Special union terms : FTA, AFHW, UPWA, URWA, USA, UAW, Farmers Union
    - Labor Journalism
  - -- Field Program: Classes in Chattanooga, etc
  - -- Programs with veterans groups
  - -- Programs with Negro groups
  - -- Tennessee Farmers Union
  - -- Community Program, in relation to other phases of the school's work
- -- 1945 Financial Report
- -- 1946 Budget
- -- Building Program
  - -- building plans
  - -- revised costs
  - -- fund raising
- -- Election of chairman for 1946

B. Ludwig was elected secretary. Minutes of last Executive Council which had been mailed to Council members were approved.

As new staff members have been added since the last Council meeting the Chairman suggested they introduce themselves and tell a little of their background. Bill Elkuss, former Staff member and now returned from service, and Tom and Bettie Ludwig were introduced.

Reports:

1. Mail Poll. Winston reporting
Date of meeting, unanimous except Williams; Acceptance of resignation of Callaghan, unanimous; Election of Mc Coy to Council, unanimous; 1946 Budget, unanimous, - Wilson and Jones did not reply; Lynch did not receive letters in time to reply as he was being discharged from Navy.

2. 1946 Program . Winston reporting

a. CIO Term. This year the Cio Term is late in getting started because of the various strikes and the fact that the CIO is tied up with plans for a Southern Organizing Drive. The Term will begin on May 6 and run to June 2. The Southern Regional Directors set up a committee consisting of Christopher, Gillman and Haigler, who planned the term. They have sent letters asking for contributions, and announcements to the international unions. In the past, the School has subcidized the term but this year due to its financial situtation it is not able to do so. All money must come from the CIO.

b. Special Union Terms:

1. FTA - This will be the first FTA term at Highlander. It will be a combination of their former non-resident schools at Memphis and Winston-Salem. The term will be one week beginning April 21.

2. The Hosiery Workers Federation will hold a week-end Institute on April 13. They are interested in a week term later in the summer.

3. The Packinghouse Workers are interested in having a term. They have invited a representative of the school to attend their District Convention at Moultrie, Georgia on April 20-21. They are planning an extensive educational program and have approached the School on helping put it into effect in this region.
- Horton added they are interested eventually in holding a Farmer-Labor Term at School. It is most natural for this union since they are closely allied to farmers.

4. Rubber Workers - The URWA had a term last year, but there's some doubt as to whether they will have one this year. Their Executive Board said there is no money. However, the National Convention passed a resolution asking the General Executive Board to plan an educational program and specifically mentioning Highlander. Several URWA locals are still anxious to have a term this year.

5. Auto Workers - The UAW prospects of having a term are uncertain, due to strikes and the fact that many plants under contract in this region have closed.

6. Steel workers - The USA is very anxious to have a term but the Executive Board says there is no money. - Chairman Crawford added there is a discussion now as to whether they can give $1000 for the CIO Term or have a USA term. It is hoped that we can have both.

7. National Farmers Union - The National office is very interested in having a session in the fall for its southern members. The FU Workshop which had been a tentative plan was cancelled by the National office.

8. Labor Journalism - Carl Haessler, Managing Editor of Federated Press, will teach a week's course. There has been increasing interest each year in this session. It has taken the place of the Writers Workshop. Time has not been set.

Report accepted. Horton added that since many of the special union terms may not materialize, it would be well to consider having a general "Highlander" term, sponsored by the school, and open to all union members endorsed by unions, in the late summer.

3. Field Program

a. Winston briefly outlined 1945 field program. (attached)
b. Chattanooga - Lawrance, M. reporting
At present M. Lawrance is conducting 2 two hour sessions a month, teaching Parliamentary Law, Public Speaking, and Legislation. The State Council contributes $15.00 a month towards expenses. This program can be extended to nearby cities.
c. Memphis - the U.T.S.E.A (Transport Service Employees) is setting up an educational program and has asked for our advice.
d. New Orleans - In New Orleans at Dillard University, they are interested in setting up a Workers Education Program as part of their Extension Program. Lawrance has been invited to attend their first planning conference; and they have asked if we could send them material and help in other ways.
New Orleans is interested in starting their educational program there. They especially want to tie it in with HFS in some way.

M. Lawrance suggested that HFS could be of some aid in education at Columbia where there are about 5 CIO locals. Wilson said Alton Lawrence knew the situation up there about the best and suggested she write him. (A. Lawrence had not come into meeting at this time.) It would be possible per-

haps to coordinate a program with the Columbia and Mt. Pleasant

Report accepted.

4. Veterans - Elkuss reporting

Elkuss reported that Chattanooga was being used as a testing ground for the establishment of a union veterans program. There are many vets there and they have set up a Union Veterans Organizing Committee. The aim is to start a new American Legion Post and then affiliate with the National Conference of Union Labor Legionnaires, becoming a Union Labor Legionnaire Post. There are 130 such posts in the U.S. with only one in the South - in New Orleans. The Conference was organized in 1928 and is a very progressive group. It fights the anti-labor activities of the American Legion. Originally it was predominantly A.F.L. but now the CIO belongs to it too. It is small - represents 25,000 Legionnaires, but it is growing. The National CIO is in favor of more such Union Labor Posts.

The Conference may be open to other veterans organizations such as the VFW. Veterans in the American Legion, who are not members in a Union Labor Post, can also join.

It has been learned that there is no provision in the State charter of the American Legion concerning racial segregation and it is hoped that this Chattanooga post can be interracial. At the present time there are two posts in Chattanooga, one white with 3000 members and one with about 600 colored members, which will support the union veterans.

Elkuss said he is working on a pamphlet for union people in the South, which would be a simple outline of veterans organizations here in the South - both friendly and unfriendly to labor.

5. Program with Negro Group's Outside the Unions - Elkuss report.

Elkuss, who has been back only three weeks reports that he made contacts with various Negro groups in Chattanooga. This was made possible largely through the local chapter of the Southern Conference for Human Welfare which has members from unions.

An education program has been planned with the Negro branch of the Y.M.C.A. in Chattanooga. Beginning April 25th Elkuss will give series of six talks on current events.

Horton added that this is the first time we've assigned a staff member to work with groups other than labor. The message is going out that the answer to such questions as anti-Semitism, or anti-Negro prejudice etc, lies in the unions.

Report accepted.

6. Farmers Union - Horton Reporting.

We've had considerable progress in getting organizations established.

In Dechard, we have a coop warehouse. Also from here came Homer Crabtree, who is the State Secretary.

In Carroll County, have about 150 members. Also we have the full support of the A.A.A. In this county impetus for the organizing was given by the State Representative of the Brotherhood of Railroad Trainmen. He has given considerable aid to us.

In Green County have about 135 members and a Coop. It is growing slowly. Here we are dealing with the Pet Milk Company. The relationship between the FU dairy farmerw and the CIO union in the plant is very good and represents the sort of thing we want to further.

Homer Crabtree, official spokesman for the FU, on his own iniative correspons with Senators and Representatives on the 65¢ minimum wage bill, on Full Employment, etc. giving the FU arguments.

We are setting up a State Committee which will be a policy-making group. Will have Jean Smathers on it.

A delegation from Tennesee was taken to the FU Convention in Topeka, Kansas from which they returned with great enthusiasm. On the convention floor the farmers pledged steers, grain, etc. to the relief of the International Harvestor's striking Farm Equipment Workers and also to the Genral Motors strikers. They also donated $2,000. Our Tennessee people got a fuller understanding of the cooperation possible between industrial and farm workers.

Attached is a letter signed by 24 ministers supporting F. U.

Chattanooga Area - Ludwig Reporting

The development here is significant because it is an industrial area and it is easier to organize the farmers because they have more contact with the industrial workers.

There is the immediate problem of a Farmers Market. Now it is practically impossible for the farmer to retail. They want to both retail and wholesale. First, tried to remedy conditions at the so-called Farmers Markey at 11th street; went to City Commission, Mayor, etc. but didn't get any results. Then got the farmers sold on starting

their own Coop. They're cautious, but they are working towards it. Have only 30 or so members in this Tri-State area but growing slowly. We're emphasizing this need for getting the retail and wholesale outlets. The Cooperative Market has been incorporated with the State for $25,000. We've been successful in getting excellent publicity on the radio and in the newspaper, (The Times) for the Coop Market.

Community Program - Johnson reporting.

Winston briefly outlined 1945 program.

We've had fewer on the staff to work with the community during the war. The School needs community support just as much as the community needs the School. The 1946 plans aren't too definite since we need more staff. The community needs a nursery school, also, a recreation program for the young people. Horton is working with the Fu Cooperative.

This year the majority of the F.T.A. students will be Negroes. This is an example of need for good community backing.

Report Accepted.

Budget for 1946 Winston reporting

Our 1946 budget is $100,000, which includes expenses for the year's program and operating the school, and the cost of a community-library building. The Washington fund-raising committee recommended that only the community -library building be included in this year's budget and that money for this building be raised first. We are also planning a dormitory which will house 75 to 100 students.

Dannenburg brought up question of staff salaries remarking that the '46 budget allowed only $2800 for a staff of 8 or more.

Lawrence, A. stated that a stable, capable staff rested on having adequate financial support.

Mason said 100% for it. Must regard fact that living expenses are to be considered with the salary, unless definite sum is subtracted for Board and Room.

Horton: Minimun salaries would add $10,000 to our budget. We have to work very hard to raise $20,000. Is it accepted that we shouldn't pay sub-standard wages?

After lengthy discussion, motion made and seconded that Executive Council go on record for the principle of paying salaries to the staff and set up a committee to study the matter and make proposals to the Council.

Motion passed. Chairman appointed Dannenburg, A. Lawrence, and Mason on this committee. They will consult with the staff when necessary.

Fund-Raising - Horton Reporting.

About $65,000 needs to be raised. The Washington Committee has not been able to go ahead on this because of illness in the family of Mrs. Camille Ross, who was to have headed the drive. They are getting up a National Sponsoring Committee of prominent people for an appeal.

It also has been suggested that we have a Budget Committee to include Dr. Lillian Johnson, Dean James, and Mrs. Hugo Black. This committee would be sent regular financial statements on money raised for buildings. This will give assurance to contributors that their money will be well spent.

The New York Committee has a full-time secretary - Mrs. Ruth Blahd, a former staff member.

The Chicago Committee has not been fully coordinated as yet. We just have a list of names so far.

We will use Committees in every place possible.

We're planning a pamphlet on the school for mass mailing and distribution. We're still using our old mailing list. We're getting more publicity - last week writers for the Nation came by and are doing a story on the School.

The question of Funds contributing was brought up and Horton said we're getting money from a few small foundations.

Relationship of School and Southern CIO Drive

Lawrence, A. stated there should be a relationship between the school and the Southern CIO Drive. Now is the time for friends of Highlander to suggest that Highlander be used to train organizers in a direct way. Now the school has direct identification with the CIO but doesn't get adequate support.

Horton: School threw its support to the CIO when it was still a gamble. It is available to this current problem:- the southern CIO drive.

Lawrence, A. : We should get Regional Directors, National and International Representatives to put pressure on the CIO to use the school in specific ways: a weeks orientation for organizers and literature. (see end of minutes.)

Mason: Idea on literature is good; the material from New York is often too sophisticated for our people down here.

Fund-Raising - Report by M. Lawrance

Been in field for four weeks and raised approximately $1,000. We should raise at least $50,000 in the South. Roughly, that would be a quota of $7,000 from each southern state, except Mississippi. We need a blueprint for each state - the meetings of unions, potential sources of money etc. We should have a Committee in each State to line up things for our staff when they come through, so there wouldn't be so much time wasted.

So far, have raise money in Chattanooga, Knoxville, and Nashville, Money is also coming in from Negro groups which is a new source.

Dannenburg raised the question of the staff having to spend time raising money. Suggested that money come from the unions and quotas be set.

Lawrence, A. said there should be an official committee made up of Southern Regional Directors and representatives of unions, and people from the Southern Organizing Drive. Then have a month devoted to the Highlander fund-raising drive. Try and have one big drive - not isolated efforts.

Dannenburg made motion: Executive Council goes on record adopting a program in which $50,000 be raised from the Southern CIO unions and each union be given a quota on the basis of its membership and the responsible people notified. SEconded, and carried.

Horton: If CIO has 200,000 members and need $50,000, can roughly estimate 25¢ per member.

Mason: Figures are difficult to obtain but 200,000 members is a good estimate.

Lawrance, M. This program then will replace staff members going to local unions. I shall be responsible for carrying out the Executive Council's recommendation.

Building Program - Horton reporting

First unit to be built will be the Community Center and

Library. The old buildings will serve as dormitories until we can build new ones. The buildings are to be year-around quarters - to be used in the winter.

Report accepted.

Election of Chairman

Dannenburg nominates Crawford. Seconded by Mason. Elected unanimously.

Meeting adjourned at 3:30.

Motion passed under Relationship of School and Southern CIO Drive.

Executive Council authorizes a staff member to work up a definite proposal regarding the relationship of the school with the Southern CIO Organizing Drive, and submit this proposal personally, to the leaders of the Drive.

VOL. I NO. 3

LABOR MARKET LETTER

NASHVILLE RESIDUAL AREA

AUGUST 1946

(Counties included: Bedford, Cannon, Cheatham, Dickson, Giles, Hardin, Hickman, Houston, Humphreys, Lawrence, Lewis, Lincoln, Macon, Marshall, Maury, Montgomery, Moore, Perry, Robertson, Rutherford, Smith, Sumner, Trousdale, Wayne, Williamson and Wilson)

Prepared By-monthly by:

Department of Labor
United States Employment Service, and
Tennessee Department of Employment Security

This is the third of a series of Labor Market Letters which will be issued bi-monthly on the counties (except Davidson) served by the Nashville Area Office of the United States Employment Service. The purpose of this letter is to bring to employers and interested agencies and groups up-to-date and valid information concerning the various counties in the area. An attempt has been made to make these summaries brief and to the point. Persons desiring more complete information on any area may secure it by contacting the individual local office, the Nashville Area Office or the Reports and Analysis Section, United States Employment Service and Tennessee Department of Employment Security, 305 Cotton-States Building, Nashville, 3, Tennessee.

CLARKSVILLE - UPWARD TREND IN EMPLOYMENT

A small but consistent gain in total employment is reported for the three counties in this area, Montgomery, Robertson and Houston. Construction, food and apparel industries contributed to this recent employment gain, while one new apparel plant and the expansion of another will provide job opportunities for women during the next few months.

Employment opportunities for men in the construction industry may be expected during the next few months, as a result of a housing project, the remodeling of a group of barracks at Camp Campbell. This project will provide employment for approximately 300 workers, and will make some 500 apartments available in the Clarksville - Hopkinsville area, which is currently suffering from a housing shortage.

Unemployment continues high in this area, with a continued increase in the number of unemployment compensation claimants, both veteran and non-veteran. It is believed, however, that the number of veterans filing claims for readjustment allowance is probably at peak, and that the load will now start to decrease.

COLUMBIA - SCATTERED INDUSTRIAL EXPANSION; OVERALL LABOR SURPLUS

This area includes the four counties of Maury, Hickman, Lewis and Perry. All four counties report a labor surplus in excess of probable job opportunities.

In Maury County, which is a fairly well industrialized section, little expansion has occurred or is anticipated. Seasonal food processing will provide employment for some 125 workers, for the most part negro women. One new block-making plant will provide employment for about 20 men, while expansion of an insulation manufacturing concern will provide employment for 25 men.

Such job opportunities as exist are for men; most of these opportunities are for laborers, and are hard to fill. Labor supply appears to be concentrated in higher skill brackets, with a surplus of female clerical workers.

In Perry County, an apparel plant is now under construction; when completed, this plant will employ approximately 300 workers, mostly women.

In Lewis County, an increase in employment is anticipated in a leather product plant. There is also a possibility that a new shoe plant may be established in this county.

In Hickman County, an increase in employment will occur during the next few months, as a new shoe manufacturing establishment gets into operation.

DICKSON - INCREASING LABOR SURPLUS

Little employment expansion has occurred in either Dickson or Humphreys County, the only new establishment being a small furniture manufacturing plant. Since job opportunities for men are limited, the labor surplus is increasing steadily, as ex-servicemen return to the area.

GALLATIN - UNEMPLOYMENT HIGH AMONG RETURNING SERVICEMEN

Job opportunities are few in this area which comprises Sumner, Macon and Trousdale Counties, at the present time. Low wage rates make it difficult to interest applicants in such job openings as exist. The rate of unemployment is high among returning servicemen, in spite of the fact that many veterans have returned to the farm.

An employment expansion of some 200 is anticipated by a local tobacco company, while employment for approximately 300 workers, mostly women, is expected to result from the establishment within the area of two textile plants. Plans for these plants are, however, still in the preliminary stage.

LAWRENCEBURG - SURPLUS OF MALE LABOR: NEED FOR NEW INDUSTRY

Job opportunities for men, except in timber cutting and saw-mills are few in Lawrence County. A large labor surplus, for the most part returned servicemen indicates the need for a new industry which would afford employment opportunities for men. A new garment plant, now under construction, will offer employment, when completed, to some 200 women workers.

LEBANON - SURPLUS OF MEN, SHORTAGE OF JOBS

Since Smith and Wilson Counties are both primarily agricultural, job opportunities are few except in strictly rural industries. Such industralization as exists in this area is of a type exploying women, while the surplus of labor is largely male. Except for a construction project or so, little prospect exists of employment opportunities for men.

LEWISBURG - SKILLED WORKERS NEEDED

The industrialization of Marshall County, which was accelerated during the war, is expected to continue as additions to localplants get into operation. A shortage of certain types of workers, such as die setters, tool makers and machinists, is already apparent, and the shortage may extend to other occupations as labor demands increase. There is an artificial shortage of laborers at the present time, due to the fact that workers who acquired partial skills during the war now refuse to return to laboring jobs, even though they are actually qualified for nothing higher in a peace time economy.

MURFREESBORO. SCOPE FOR INDUSTRIAL EXPANSION

A large surplus of labor exists in the two counties of this area, Rutherford and Cannon, while little expansion of existing industry is expected during the next few months.

There is definitely a need for plants to absorb the surplus labor in this area. Plants employing up to 2,500 men and 500 women could easily be staffed by the local labor supply.

Facilities in the area could easily accomodate several new plants. In Rutherford county area there are six banks with combined deposits of approximately thirty million dollars. The public school system consists of eight high schools plus one of the most modern grammar schools in the state, which is operated as a demonstration school by the State Teachers College. There is one college located in the city of Murfreesboro, Middle Tennessee State College, which has an enrollment varying from 775 to 900. It is a four year college, offering courses leading to Bachelor of Arts and Bachelor of Science degrees.

Electricity for this area is furnished by the Tennessee Valley Authority and distribution to the city of Murfreesboro and the surrounding area is effected through the Murfreesboro Electric Department and Middle Tennessee Electric Membership Corporation, the latter which is a cooperative and has a comparable rate schedule with other such cooperatives.

This area has a splendid water supply with very reasonable rates. A recent $200,000 addition to the Murfreesboro City water supply affords an adequate industrial water supply to care for any needs.

Health facilities consists of a modern 84 room hospital which includes 50 patient beds. A lso, there is a modern hospital located at Woodbury, Tennessee with approximately 30 patient beds.

This area is served by three newspapers, one daily and two semi-weekly.

Transportation facilities consists of a Nashville-Chattanooga and St. Louis Railway, bus service to all points in the area, and an airline service, Berry Field.

This area is supplied with artificial gas through facilities of the Tennessee Gas Company which has approximately 35 miles of mains serving the city.

PULASKI - EMPLOYMENT LEVEL NORMAL, LABOR SURPLUS GROWING

Population of this county, Giles, dropped 5 per cent during the war years because of military withdrawals, wives leaving to be with husbands and a general exodus of workers going into War Industries. Since V.J. Day the treck back of in-migrants has outnumbered the out-migrants which may partially account for the shortage of community facilities such as housing and hospital facilities along with an acute shortage of medical service, a condition for which no improvement for the near future can be predicted.

This county is basically a farming and dairy section, the latter industry providing pay checks during this period of approximately one-half million dollars. Little change has taken place in the number of workers in these industries over the past six years. Manufacturing and service industries rank second in size, little change in number of workers during the current year. However, in the past two years the manufacturing industry shows an increase of 10 per cent.

Plans now being made for the rebuilding of city streets may absorb a Sizeable number of laborers during the next few months, but all other industrial expansion has been retarded primarily by material shortages, also by recent cancellation of bids on a large road construction contract for which no federal aid is available at the present time.

One manufacturing plant cancelled an order for ten workers because of inability to secure sulphuric acid, another manufacturing concern has idle machines due to material shortages. An auto repair company plans to open a warehouse and paint shop division as soon as skilled workman can be secured. One-half of the supply of needed raw materials were received last month by a good manufacturing concern.

Total unemployment shows a slight decrease during the period, as estimated from a count of applicants in May and July which reflects a noticeable withdrawal of women from the labor market partly due to wives resuming home duties or changing residence to other areas.

A conservative estimate of the current labor supply in this area would be around seven hundred. During the later part of this period the trend has been towards new applicants off-setting the number leaving the labor market. Of the number comprising labor supply 6 per cent are skilled; 25 per cent semi-skilled; 25 per cent unskilled; 20 per cent clerical sales and service workers with the remaining number falling in the agricultural group. Approximately 80 per cent of all labor supply is made up of veterans and no immediate absorption of this group seems evident, as peak employment in On-Job-Training has been passed and these ex-service men for the most part were previously employed on farms and have since acquired skills for which there are no local openings. There is a tendancy among this group to out-migrate and an increasing number shows interest in foreign employment.

There is a definite trend toward an increased pay scale for this area. Practically every employer visited during July reported raises for workers. One milk plant gave a sizeable raise to the laboring group.

SAVANNAH - EMPLOYMENT EXPANSION SLATED

While a considerable surplus of labor exists, predominantly composed of ex-servicemen, there are prospects of expansion in this area which should provide job opportunities for many of the unemployed.

Up until 1942 Hardin and Wayne Counties with a population of approximately 32,500 only industry was agriculture and timber. In 1943 and 1944 Wayne County secured a button factory and Hardin County a shoe factory. A majority of these workers for these two plants consisted of female workers of which adequate supply is available.

In the year 1945 these employers were so well satisfied with the class of employees that they were able to hire to operate these plants, they immediately began to make plans to increase their establishments. At present a shoe company has under construction in the city of Savannah a building 186 x 400 feet in which they expect to house approximately 800 workers in the manufacture of shoes. They hope to have ready for occupancy this building in about sixty days provided they can secure the necessary materials.

A button plant has under construction a building 30 x 120 feet that will house around 100 workers in the cutting and manufacture of buttons which they hope to get in operation by October 1, of this year.

Wayne County has made the necessary financial arrangements to construct in the immediate future a shoe factory that will employ approximately 400 workers.

In addition to these plants the construction progress of housing and roads in Hardin and Wayne Counties will come up in the immediate future, and will employ considerable labor of which the supply from Hardin and Wayne Counties is adequate.

SHELBYVILLE - EXPANSION PROSPECTS SLIGHT; LABOR SURPLUS

In Bedford, Lincoln and Moore counties, total employment is estimated at approximately 18,697, of which approximately 9,500 is in agriculture. Since there were no military installations or new war industries in this area, reconversion to a peace time economy presented no serious problem in this area. However, there is now a lack of balance between labor demand and labor supply; no economic expansion has occurred or is slated, while there has been an influx of returning servicemen and war workers returning from other areas, for whom jobs are not now available. There is an obvious need for either new industry or for large construction projects to provide employment for the surplus male labor in the area.

RECEIVED
SEP 10 1946
Southern Regional Council

Labor Market Letter

JACKSON, TENNESSEE, AREA

AUGUST 1946

(Counties included: Benton, Carroll, Chester, Crockett, Decatur, Dyer, Fayette, Gibson, Hardeman, Haywood, Henderson, Henry, Lake, Lauderdale, Madison, McNairy, Obion, Stewart, Tipton, and Weakley)

Prepared Bi-monthly by:

Department of Labor
United States Employment Service, and
Tennessee Department of Employment Security

This is the third of a series of Labor Market Letters which will be issued bi-monthly on the counties (except Shelby) served by the Memphis Area Office of the United States Employment Service. The purpose of this letter is to bring to employers and interested agencies and groups up-to-date and valid information concerning the various counties in the area. An attempt has been made to make these summaries brief and to the point. Persons desiring more complete information on any area may secure it by contacting the individual local office, the Jackson local office, or the Research and Analysis Section, United States Employment Service and Tennessee Department of Employment Security, 305 Cotton States Building, Nashville 3, Tennessee.

DYERSBURG - AREA SEEKS NEW INDUSTRIES

This primarily agricultural area, which consists of Dyer, Lake and Lauderdale counties, is on the lookout for new industries which will afford a better balanced economy. As has been mentioned previously, a furniture factory and a small wood products factory are under construction, but material shortages are delaying completion. Dyersburg and the neighboring town of Ripley are both negotiating with apparel manufacturers for the location of plants in the area. With the large surplus of women workers these towns should afford suitable sites.

Employment in the area has increased about 900 during the past months; almost all of the increase has been in the highly seasonal food processing industry and the majority of the additions have been women. Employment in this industry is expected to increase slightly until September but there will be a drop of about 700 by November.

Unemployment in the area, as measured by claimants is comparatively low. More than three times as many veterans are drawing self-employed allowances as are drawing unemployed allowances. There is a large "potential" supply of female labor which does not show up in the claims load.

JACKSON - EMPLOYMENT STATIC; LITTLE DEMAND

This is a large rural area composed of Chester, Crockett, Decatur, Fayette, Haywood, Henderson, Madison and Tipton counties. Manufacturing employment, which is very small for so large an area, gained only 200 during the past two months in scattered industries.

A large labor surplus exists in this area and is expected to continue even though several small plants (mostly apparel) are either in the construction or planning stage. These plants will not begin to absorb the supply in the area. Furthermore, they will employ women almost entirely while the majority of the surplus is men.

MILAN - INDUSTRIAL EXPANSION PLANNED WILL NOT ABSORB LABOR SURPLUS

The curtailment in employment at Milan Ordnance Center, which occurred at the end of the war, has resulted in a large labor surplus in Gibson and Carroll Counties which the area has not yet been able to absorb. An increase in employment of about 800, which was concentrated almost entirely in one establishment, occurred during the past two months. The same establishment is planning a large layoff in August which will result in a decrease in employment of more than 1,700, the majority men. The expansions in other industries--mostly apparel and food processing will not begin to absorb the displaced workers. Thus, there will be an immediate increase in the number of unemployed in the area. Looking a little farther into the future, however, there will be some expansion of industry.

As was noted in the June letter, a nationally known footwear manufacturer is to open a plant at Milan within a few months. Garment plants are to be located at Trezevant, Huntingdon, Humboldt and Dyer. Other plants in the are are expanding. This industrial expansion is not large enough, however, to absorb the labor surplus Furthermore, the demand will be primarily for women, while the majority of the unemployed are men.

PARIS - LARGE LABOR SURPLUS CONTINUES IN FACE OF NO INDUSTRIAL DEMAND

This area, which includes Henry and Benton counties, continues as a supply area for sections of the country more blessed with industry. With practically no industrial employment in either county people are forced of economic necessity to out-migrate.

Paris has the prospect of a rubber plant being located there. Plans are being delayed because of material shortages.

SELMER - STATIC LABOR MARKET DURING LAST TWO MONTHS

Very little change has occurred in the job market in McNairy and Hardeman counties during the past two months. Construction employment has increased but there has been little change in other industries. Shortage of materials has delayed the construction of the building for the tannery at Bolivar and shoe company in McNairy county. The garment plant at Adamsville is expected to begin operations about October 15.

In spite of the location of three new plants in the area, opportunities for employment will not be in proportion to the labor supply. McNairy County needs a plant which will employ men and Hardeman County a plant which will employ women.

UNION CITY - FEW JOB OPPORTUNITIES

There is little prospect of industrial job opportunity in Obion and Weakley counties, which are primarily agricultural. The labor supply is large and demand practically nil. A garment plant has been located at Troy, but it is too small to make much dent on the labor supply. There is a definite need in this area for industries which will employ male workers.

EMPLOYMENT TREND IN TENNESSEE

August 1946

HIGHLIGHTS

TOTAL EMPLOYMENT INCREASES AS NATIONWIDE LABOR DISPUTES ARE SETTLED.

MANUFACTURING EMPLOYMENT REACHES 240.7 THOUSAND —— THE HIGHEST LEVEL SINCE SEPTEMBER 1945; FOOD, LUMBER AND FINISHED PRODUCTS INDUSTRIES ACCOUNT FOR MAJORITY OF INCREASE.

MANUFACTURING EMPLOYMENT EXPECTED TO INCREASE 10,000 DURING THE NEXT FOUR MONTHS; APPAREL, TEXTILES, IRON AND STEEL AND LEATHER INDUSTRIES ACCOUNT FOR 75 PER CENT OF THE ANTICIPATED INCREASE.

NUMBER OF CLAIMANTS RECEIVING SRA AND U.C. UNEMPLOYMENT BENEFITS REACHES 79,700 —— AN INCREASE OF ALMOST 4,000 FROM MAY; IT IS EXPECTED THAT THE PEAK HAS BEEN REACHED.

JOB OPENINGS ON HAND IN USES OFFICES TOTAL 8,500 —— A DECREASE OF 800 FROM MAY.

Employment Security

TOTAL EMPLOYMENT EXPANDS

With most of the major strikes throughout the nation settled total employment in Tennessee followed the national upward trend during June and July. Factual data in most non-manufacturing industries were too fragmentary to attempt an estimate of total employment. Reports from all industries, however, indicate an increase in employment. Manufacturing employment increased 1,600 from May to July, reaching the highest point since September 1945. While comparative figures on construction employment for May are not available, estimates from local offices throughout the state indicate an employment level of approximately 45,000 in this industry--about 3,000 above the 1940 level. Reports from wholesale and retail trade establishments point toward a fairly steady expansion of employment in these industries.

MANUFACTURING EMPLOYMENT REACHES POST-WAR HIGH

Estimated manufacturing employment for July increased by 1,600, in spite of strike in two fairly large establishments, to reach a level of 240.7 thousand--the highest point since September 1945, at which time many of the post-war layoffs had not occurred.

The settling of most of the strikes throughout the country and the loosening of some government regulations resulted in a release of materials which in turn was largely responsible for an increase in employment in several industries. Food, lumber and finished lumber products were the three industries showing the largest increase in employment. The large drop in chemical employment was caused primarily by layoffs at Clinton Engineer Works, although seasonal layoffs in other chemical industries also contributed to the decrease. The decline in employment in the iron and steel group was due to a strike at one large establishment. If employment figures for this establishment are omitted, employment in the iron and steel industry actually increased.

MANUFACTURING EMPLOYMENT MAY EXPAND BY 10,000 DURING NEXT FOUR MONTHS

If estimates of employers are not overly optimistic, manufacturing employment in the state is slated for a 8,000 increase during the next two months and 10,000 during the next four months. 1/ With most of the major labor disputes settled and with the release of more materials, it is quite likely that employer estimates which represent the employment level employers hope to attain, will be met. This is especially true since a large part of the expansion is expected in new plants which are nearing completion and for which both labor and materials will probably be available. Apparel, textiles, iron and steel and leather account for 75 per cent of the anticipated expansion. The increase in both apparel and leather is due partly to the fact that new plants and additions to plants in these industries are nearing completion and partly to expansion of exisiting plants. The expansion in textiles is caused partly by a few new small plants, but largely by an effort on the part of existing plants to attain an employment level they have been unable to reach because of a shortage of workers for this industry. The increase

---

1/ This does not include estimates for Clinton Engineer Works, which are not available. It is possible that decreases in employment at this project may offset gains in other industries.

Total Employment Estimates for Shelby County, Tennessee

U. S. Department of Labor
United States Employment Service and
Tennessee Department of Employment Security

AREA EMPLOYMENT SUMMARY
MEMPHIS, SHELBY COUNTY, TENNESSEE
AUGUST, 1946

Prepared by: Department of Labor
United States Employment Service, and
Tennessee Department of Employment Security

TOTAL EMPLOYMENT SHOWS SLOW BUT STEADY GAIN

Estimated total employment has increased only slightly since May, 1946. While changes in employment level have been relatively small from month to month, the cumulative increase in employment from September, 1945 to July, 1946 amounts to a total of approximately 7,500. Economic recovery, since the cancellation of war production, has been slow but fairly steady.

CONSTRUCTION AND TRADE REPORT EMPLOYMENT GAINS

The greater part of employment gains since September has been in construction and trade. The continued increase in construction employment since March is the result of an extensive building program in veteran housing. Transportation, trade and government are other non-monufacturing industries which show appreciable gains over the past two months. The employment increase in trade, while small, has been gaining steadily since September 1945, resulting from replacing of workers in restoration of pre-war service, and to re-opening of small businesses, forced out during the war because of manpower and other shortages.

TOTAL MANUFACTURING EMPLOYMENT STATIC: FLUCTUATIONS WITHIN INDUSTRIES

The manufacturing division has remained almost static since September 1945. While the division as a whole showed no gain during the past two months, employment increases occurred in lumber and finished lumber products industries, reflecting the increased demand for such products in construction. Textile and apparel industies also showed an upward trend, while food, paper and chemicals have shown a consistently downward trend, primarily due to material shortages and in the chemical industry in the past sixty days to seasonal layoffs. Technological changes, designed to maintain production with fewer workers, has also affected employment level in certain industries during the past few months.

FUTURE EMPLOYMENT TREND EXPECTED TO BE SLIGHTLY UP

Indications are that the trend in employment for the next few months will be slightly upward. In the manufacturing division, textiles, lumber and finished lumber products and chemicals all indicate anticipated increases in employment. In non-manufacturing, transportation and retail trade report anticipated increases.

LABOR DEMAND UPWARD FOR NEXT TWO MONTHS

Demand in the next two months , as reflected by reporting establishments, is estimated at 918, of which 571 are in the manufacturing division. No significant demand is anticipated by any industry during this period. No expansion demand is forecast for construction in the next two months, as workers now employed will be switched from job to job as new construction is started, and as materials be-

come available. In trade, which reflects the greatest increase in non-manufacturing in the next sixty days, demand is contingent upon receipts of merchandise and upon the extent to which additional workers will be needed to care for fall and holiday trade.

CURRENT JOB OPENINGS EMPHASIZE DEMAND IN UNSKILLED, CLERICAL AND SERVICE OCCUPATION

Of the 1,017 job openings on order with the U.S.E.S. in July, 256 were in the clerical and sales group. About one-half of total current openings are for unskilled labor, mostly in cotton compresses and as replacements in construction. The remainder of the demand is in skilled, semi-skilled and service.

LABOR SURPLUS PREDOMINANTLY VETERAN

Labor supply has shown an upward trend for the past several months, chiefly because return of men in the Armed Services has occurred at such an accelerated rate that immediate absorption of this supply by industry has been impossible. Total labor supply, estimated at 13,942, is more than one-half unskilled, approximately one-third semi-skilled and the remainder mostly clerical and sales. The labor surplus continues to show a predominance of men; male workers constitute 86 percent of the total supply. Two months ago veterans comprised 53 percent of the supply, whereas in July the percent had dropped to 50. Absorption by industry, return to school and an increasing trend toward self-employment all contribute to the lessening of the number of unemployed veterans.

PEAK OF LABOR SURPLUS NEAR: POSSIBLE DECREASE SEEN

It appears probable from the trend in claims and applications, and as the peak of returning veterans has passed, that there will be a leveling off or a possible decrease in the labor surplus in the next sixty days.

CONSTRUCTION UNDER WAY TO COMBAT HOUSING SHORTAGE

While the housing shortage is still acute, some 2,100 housing units have been started in the area, with approximately 1,400 now under construction. The goal set for 3,500 units in 1946 is expected to be met. The lumber situation has somewhat eased up, as has window sash; doors still critical and plumbing fixtures are very critical, and holding up otherwise completed jobs.

Vol. 2, No. 5 Geo. I. Whitlatch, Editor September 1, 1946

LET'S GET READY FOR A BUYER'S MARKET!

By the Editor

In a year of swift reconversion, industry and business in this country have made tremendous progress, despite the delays and interruptions of strikes earlier in the year. The goal of full employment has been achieved. Many industries currently are producing at record peacetime levels. So is agriculture. Pipelines to markets are rapidly being filled, with inventories in various consumer goods lines steadily mounting. Even now, straws in the trade winds indicate that numerous sellers markets are fast becoming buyers markets. In short, the postwar boom is well underway, much of the rush is already over, and, from here on out, more real salesmanship is going to be essential to profitable operation of business and industry. As supply catches up with demand, the consuming public becomes more and more selective in its purchases.

The same is applicable to the future industrial expansion of Tennessee. In the months immediately prior to and following V-J Day, many industries were ready with plans for quick expansion of production and were seeking new plant locations. Tennessee was fortunate in being considered as the possible site for many of these projects and, as a result, during the last half of 1945 and early this year the State experienced a distinct industrial expansion "boom". The few reasonably modern plant facilities available were soon leased or purchased, and the demand for vacant plant space far exceeded the supply. Consequently, communities in the State that were prepared to finance construction of needed facilities were able to obtain industrial plants - in some instances, without any real effort on the community's part. In short, Tennessee during the past 12 months has been in a sellers market and, in less than a year, has profited by the boom to the extent of several hundred new industries.

Today, much of the rush by industry to obtain new plant space is over. Most of the industries susceptible to rapid expansion or rapid establishment have found locations. From now on, Tennessee is entering the buyers market stage of its industrial expansion. Industry, no longer motivated largely by the need for speed, will be more critical, more demanding in its selection of locations. There will be less willingness to compromise on requirements; the maximum advantages for economical operation will be sought; the most "livable" and attractive communities will be favored. True "selling" of a prospect will be in order, rather than mere showing or inviting his inspection of a community and its site possibilities. This type of salesmanship by a community will involve complete knowledge of its industrial potentialities and will necessitate sincere work on the part of any civic group desirous of promoting their local industrial expansion.

Nevertheless, the possible rewards to a community for increased efforts are apt to be proportionately greater, because many of the new industries developed in Tennessee during the next few years will be those larger projects for which longer periods of planning and investigation are prerequisite to final site selection. Within the past month or so, our Division has noted a decrease in requests for assistance by the small, relatively easy-to-locate industries, yet inquiries on larger projects continue to increase. At the moment, this Division is lending aid in investigations for four projects, no one of

which involves potential investments of less than $10 million and will afford no less than 1,000 new job opportunities. In further evidence of Tennessee's rapidly expanding industrial base, this issue of the "Newsletter" alone carries items on some 30 new industries and expansions, several of which are in the million-dollar class.

Present CPA building restrictions and similar uncertainties in the economic picture probably have contributed to the decreased plant-location activities noted by us during the current summer, yet much of it obviously is due to the seasonal factor. Nobody likes to work too hard in the hot summer months - not even your editor, and this year businessmen and industrialists for the first time in five years have been enjoying their vacation period to the fullest extent. For the summer, most of them probably have been thinking more about swimming, golfing, fishing, and other recreational pleasures than about plans for future expansion of their businesses.

The same apparently has been true of many of our contacts in Tennessee communities. We guess that most of you, succumbing to the lure of the beautiful sparkling TVA lakes or the cool shadowy fastnesses of the Smoky Mountains, just filled up the old family bus with gas and took off on a well-deserved vacation. For this, anyone is excused!

But now, its mid-August, and as we write this, the day is refreshingly cool, with a briskness to the air that reminds us of the fast waning of Summer. Only a few short weeks more until Autumn and the end of the vacation period. Then, businessmen and industrialists will be returning to their offices, once again ready to tackle that vacation-delayed job of finding a new plant location. Some of those plans may be pointed toward your town. Are you going to be ready to talk business and do a successful selling job?

Is your industrial committee well organized and capable of furnishing to prospects complete factual information on your area's resources and advantages? Is your town among the 40-odd in the State that have specific plans for financing construction of new plant space and otherwise assisting local industrial development? Has your industrial committee kept this Division sufficiently advised to permit accurate presentation of your local situation to prospects that call for our assistance in selection of new plant locations? Has your town filed with us and kept up to date the economic data listed in our official "Inventory" forms? Is any and all vacant industrial plant space of your town listed with this Division?

Check up on these items. Get your industrial committee out of the summer doldrums, and let us hear as to your town's plans and activities. Let us know whether or not you are still in the market for new industries. After all, our job is to help your town obtain or develop new industries, but its a two-way affair. We cannot do the job alone. There must be mutual cooperation, and we do have that with a number of towns. Most of these towns have worked hard all summer on the promotion of their local development and, on every appropriate occasion, have sought and obtained our guidance and aid. In return, we have received from them prompt and cordial responses to any and all our requests for information on their local situations. It is gratifying, therefore, to report that several of these towns have been successful in achieving their goals of industrial expansion. What these towns have accomplished, others can do, provided there is equal sincerity of purpose and unstinted effort on the part of some local civic group. To such groups this Division always stands ready to extend its fullest cooperation.

* * *

RFC STREAMLINES AID TO SMALL BUSINESS IN SURPLUS BUYS

RFC has "streamlined" its procedures to assist small business (less than 500 employees) operators in their purchases of surplus property from the War Assets Administration. Under the new set-up, direct purchases from the WAA are made by RFC, under its third-place priority, for the small business operator. Those interested should contact their nearest RFC office.

A 28-page booklet on how, what, and where to make purchases of surplus government materials and properties is available free from the WAA regional and district offices.

* * *

SALES AND OTHER BUSINESS OPPORTUNITIES

Art Pottery: Tennessee pottery producing lines of decorative glazed jardinieres and urns, suitable for hotel lobby, garden, and similar uses, can accept some additional orders from well-established trade outlets.

Laundry: West Tennessee city of 4,000 population (county, 30,000) would like to have either experienced individual or concern construct and operate a local laundry. No laundry within 35-mile radius. Local assistance available on any necessary financing.

Manufacturers' Representative: Promotion of world-wide sales for both large and small Tennessee manufacturers of hardware, toys, novelties, pottery, electrical appliances, gift items, enamel wares, and housewares is offered by the Virginia Specialty Corp., 916 Commerce St., Lynchburg, Va. Interested manufacturers should contact corporation directly.

Grain Mill: Local group, in Middle Tennessee city of 4,000, will finance construction of feed and grain mill for operator of proved ability. Will lease mill on very reasonable terms to right party. Location is in growing agricultural area, and local capital would be available for eventual construction of grain elevator.

* * *

DUPONT NYLON PLANT ASSURED FOR CHATTANOOGA

DuPont's long-projected $20-million nylon yarn plant at Chattanooga, mentioned here last month, became a reality on August 9 when W. E. Gladding, director of the duPont nylon production division, announced plans for early construction. Application for construction approval has been submitted to the CPA offices at Memphis and work would start as soon as possible following such approval.

One of the largest and most important industrial developments in Chattanooga history, the new nylon yarn unit - third to be established by the duPont organization - will be built on a 600-acre tract, purchased in 1944, along the north side of Tennessee River between the TVA Chickamauga Dam and Hixson Pike. The suburban area known as Lupton City is immediately to the southwest of the site. Core drill tests and other preliminary engineering work have been completed on the site. In addition to the manufacturing unit, the project will include an administration building, pump house, filter plant, process and steam heating plant, and parking lot, according to the Chattanooga Times. About 18 months will be required for completion of the plant, and some 1,000 persons will be employed initially.

* * *

EAST STATE PLANT SITE SURVEY COMPLETED

Map survey of a total of 33 potential sites for large industries in the East Tennessee Valley has been completed by this Division and a tabulation of the data prepared for distribution to interested companies. All sites included in the survey are on rivers or other streams capable of supplying large volumes of industrial waters. In size, the sites range from 40 to 1500 acres, but the majority are between 200 and 500 acres. Estimates of site acreages, on the average, restrict differences in elevation to about 20 feet, although on some of the larger sites the maximum relief is around 40 feet. The tabulated data include, for each site, name of stream with minimum and/or mean flow data, proximity to railroads, highways, and TVA power lines, and identifying remarks. All sites are keyed to the standard TVA topographic maps (scale 1/24000) upon which the survey was based. Copies of these site data are available without cost from this Division.

* * *

EMPLOYMENT TRENDS UP TO AUGUST, 1946

Knox-Blount Counties

Non-agricultural employment has shown little overall change during past 60 days, but unemployment down 5%. In manufacturing group, despite increased employment in textile, apparel, and non-ferrous industries, employment has decreased about 3%, owing to labor disputes in iron-steel, clay-stone, and miscellaneous industry groups. Non-manufacturing industries showed a slight gain. Construction employment, currently about 4,900, is up 3% since May 1. Trend in next 60 days depends on settlement of labor disputes, and if this is accomplished, slight uptrend anticipated. Majority of job openings in textile industry and for stenographers, typists, and bookkeeping machine operators. Brickmasons, auto-body repairmen, service workers, and male unskilled laborers also needed.

Hamilton County Area

Slight continued uptrend in total employment during past 60 days relects increases in iron and steel, food, and lumber products industries. Slight decrease in textiles. Construction and other non-manufacturing employment has shown little change since May. Future employment trend uncertain, but new duPont nylon plant (announced elsewhere in this issue) should afford new openings soon. Labor surplus of 6,300 characterized by war skills and inexperienced workers. Greater demand is for unskilled or special skills as moulders, mechanics, loopers, and weavers. Easing of material and equipment shortages would materially increase demand in construction and textile industries.

Chattanooga Residual Area

Athens: Meigs County situation continues critical because of lack of any employment opportunities. McMinn County has large labor surplus, with very little demand, but condition considered temporary and dependent on release of materials.

Cleveland: Slight increase in total employment but labor surplus mounting. Total demand has decreased steadily; for next 2 months demand in mining, iron and steel, and textile industries expected to be about 475, of which 132 is for unskilled males in Polk County copper mining.

Cookeville: Unemployment estimated at 2,100 of which 300 are women. Gradual rise in employment indicated within period of months. New bottling company opened at Sparta. Negotiations underway for garment plant. Two new coal companies anticipate employment of 250 in next 3 months.

Livingston: Little hope of reducing large male labor surplus. Expansion of garment plant underway but will employ mostly women.

McMinnville: Little industrial change in past 2 months except for opening of shoe plant which promises to alleviate unemployment in Warren County. Situation remains acute in DeKalb County.

Tullahoma: Employment fairly stable. Plans for expansion in local shoe and athletic goods plants underway.

Winchester: Male labor surplus unchanged. Demand will be slight in next 2 months. One apparel plant plans increased employment from 130 to 400.

* * *

COAL MINING EXPANDS AT MONTEREY

Preliminary work is underway on the opening of a large new coal mine in the Monterey area, according to the Putnam County Herald. A Pennsylvania firm, as yet unidentified, is said to have bought mineral rights to several thousand acres of coal lands about 6 miles northeast of Monterey, and mining crews are now working three shifts in driving

an opening onto a coal vein, reportedly 6 feet thick. Local advices indicate that the new mine will employ from 400 to 700 miners and that negotiations are underway for a railroad spur to the mine.

The Monterey Coal Co., whose mine is about 2 miles northeast of town, is producing 700 to 800 tons daily and is said to be planning expansions that will double the output. About 100 miners are employed in current operations.

* * *

FIVE WAR PLANTS SOLD BY WAA

Walter Davenport in a recent Collier's article - "Headaches Down South" - asserts that "Tennessee's war born industries are being reconverted to peacetime production faster and more successfully than any other Southern state's". Sale during July and August by the War Assets Administration of five Government-owned war plants in Tennessee add much more weight to Davenport's statement, because each sale has assured to the State continued operation of important industrial facilities.

As noted elsewhere in this issue, the U. S. Rubber Company has acquired a part of the Milan Ordnance Works and the Tennessee Products Corporation has purchased the Rockwood furnace. In addition, the WAA has announced the sales at Memphis of the Q O Chemical Company's furfural plant to the Quaker Oats Company for the price of $1,362,000; of the Southern Acid and Sulphur Company's caustic soda and phenol plant to the Heyden Chemical Co., for $1,060,000; and the Reynold Metals Company's fabrication plant site of 269 acres and completed warehouse (85 x 270 ft.) for $65,000 to the Hodges Armature Co., of Memphis. The Heyden Chemical Company is expected to spend up to $750,000 in additions and other improvements to the "Southern Acid & Sulphur" facility.

The WAA also has negotiated with Southern Ferro Alloys Company of Chattanooga a 2-year lease, with a further 3-year option, for the ferrosilicon unit operated by the company in that city during the war

A cut-off date for proposals on the purchase of the uncompleted "Goodyear" truck tire plant at Nashville has been set by the WAA for September 3, and sale of the facility should be announced shortly after that date.

* * *

AVAILABLE INDUSTRIAL PLANTS AND SITES

Middle Tennessee: City of 4,000. Site, approximately 250 x 550 ft., available for heavy industry; 250-ft. spur track of L. & N. R.R. on west side, U. S. Highway on east side. Local capital willing to construct and lease mill-type or other general purpose building up to total cost of $150,000. Large surplus of male labor in area that is willing to commute from farms to obtain industrial employment.

Plants For Sale

Industrial plant of 255,000 sq. ft. in metropolitan area, consisting of several connected and adjoining 1- to 3-story buildings, all in excellent condition; fully sprinklered; modern rest rooms, air-conditioned offices, large cafeteria; average ceiling height 11 to 12 ft. Plant suitable for most types of manufacturing and particularly for textile operation. Complete details on request.

Chattanooga: Story and half reinforced concrete building, totaling 27,000 sq. ft. floor space; 4 blocks from business section, 1 block from Tennessee River; served by Southern Railway.

* * *

U. S. RUBBER ACQUIRES MILAN FACILITIES

(Item inadvertently omitted from August "Newsletter")

Announcement was made in mid-July of the purchase by U. S. Rubber Company of a part of the Wolf Creek Ordnance Works for a reported price of $175,000. The 45-acre section

purchased is known as line "G" and includes five buildings, which will be converted to the manufacture of sports footwear. Employment initially will be around 500, rising to 1200 the second year.

War Assets Administration, through which the sale was consummated, expects to be able to turn the plant over to the U. S. Rubber Company by Sept. 15.

* * *

INQUIRIES ON INDUSTRIAL LOCATIONS

The Industrial Development Division will be glad to hear from any city or town in regard to buildings, plant sites, or developed plans that may possibly meet the needs of the industry listed below, or of any listed in previous issues of the "Newsletter". In corresponding about any of the listings, please mention both number and classification.

141. Dress Shirts: Well-rated manufacturer of dress shirts seeks building of about 10,000 sq. ft., in small town with adequate labor supply to furnish 100 female and 15 male employees.

* * *

ROCKWOOD FURNACES SOLD TO TENNESSEE PRODUCTS CORPORATION

Tennessee Products Corp., Nashville, in mid-August purchased through the War Assets Administration the Government-owned Rockwood ferromanganese plant which the corporation operated for the government during the war. Purchase price was $200,000, and immediately after announcement of the sale, the Tennessee Products Corporation revealed plans for spending an estimated $750,000 in modernization of the plant, which consists of two 1870-type blast furnaces.

The corporation expects to continue its ferromanganese production at the unit, and, possibly at an early date, some pig iron will be produced.

DO YOU KNOW THAT:

The Southern Highland Handicraft Guild, Inc., is a non-profit educational organization dedicated to the preservation and advancement of the arts and handicrafts of the Southern Appalachian mountain region. The Guild, established in 1930, is composed of individual craftsmen and groups of native craftsmen working in schools and workshops - called "producing centers" - that produce only genuine hand-made articles of dependable quality. "Allanstand", 16 College St., Asheville, N. C., is the Guild's all-year-round shop through which its members market their wares.

The executive office of the Guild's Craft Education Program is located at Gatlinburg, Tenn. The second Guild Workshop, part of the Craft Education Program of the Guild, will start classes at Penland (N. C.) School of Handicrafts on August 29 and continue through September 6. Instruction will be given in weaving, pottery, jewelry, wood-working and other crafts. Non-members may take such training at very nominal cost. The executive office of the Craft Education Program is located at Gatlinburg, Tenn.

Tennessee producing centers of the Guild are located at Apison, Pleasant Hill, Russellville, and Gatlinburg (2 centers).

BRISTOL TO GET $1-MILLION OFFICE MACHINES PLANT

Plans for construction of a $1,000,000 branch manufacturing plant of the Monroe Calculating Machine Co., Inc., of Orange, N. J., are underway at Bristol, Tenn.-Va. A single-story structure of about 100,000 sq. ft., of most modern design is being planned for location on a 30-acre tract within the city limits of Bristol, Va., along U. S. Highway 11 and the Norfolk & Western Railway. The new Bristol unit, representing an expansion

of the company's New Jersey operations, will produce calculating machines from the raw material to the finished machine. Peak employment is expected to be about 750, mainly skilled labor, of which 95% will be hired locally.

Training of employees has already begun at Bristol in leased quarters totaling 45,000 sq. ft. of floor space. Mr. Chas. R. Mason has been employed as local plant manager.

* * *

INDUSTRIAL COMMUNITY TO RISE FROM CORDOVA PLANT SALE

A new industrial community is promised for the Memphis area under the plans of Francis G. Hickman of Memphis who, on August 17, purchased the "National Fireworks" property near Cordova (about 17 miles east of Memphis). In the announcement of purchase, Mr. Hickman revealed that the Cordova Industrial Development Company will be organized to sell or lease tracts in the plant area for use either in manufacturing or distributing.

Privately built in 1942 by National Fireworks, Inc. - subsidiary of Clark-Babitt Industries of West Hanover, Mass. - for production of anti-aircraft ammunition, the Cordova plant includes some 165 buildings on a 261-acre tract which is served by 1½ miles of N. C. & St. L. Railway trackage, 5 miles of hard-surfaced roads, deep wells, complete water and sewerage systems, TVA power, garages, and other facilities.

Any industry in need of fairly large areas of open floor space and average overhead clearance can be accommodated in existing structures at the Cordova site, Mr. Hickman points out. These buildings, he indicates, are especially suitable for wood-working shops (toys, games, small furniture, etc.), cardboard and wooden box makers, textile and garment manufacturers, metal working shops with small machine tools, candy makers, food processors (plant is in good agricultural area), foundries, concrete block makers, and similar small industries. Distributors of non-weathering goods who do not need spot-storage in Memphis are assured of finding ample space in the area. Plenty of covered warehouse space also is available for raw materials or accumulated stock of Memphis manufacturers, supply houses, wholesale distributors, and also all operators of production units within the Cordova industrial area itself.

In the Cordova "community of industries", as now being planned, tenant companies will receive the benefits of centralized service on water, power, private rail switching, and similar necessary facilities and protection. As soon as the development warrants, a dispensary will be set up, with a trained nurse on duty during working hours.

Mr. Hickman is editor and publisher of The Cotton Trade Journal and president of realty companies owning the Parkview Hotel and Medical Arts Bldg., in Memphis. He will be president of the Cordova Industrial Development Company and will be associated in this new venture with his sister, Miss Jane A. Hickman.

Manufacturers or others who may be interested in the possibilities for plant or storage space in the "Cordova industrial community" should address inquiry to Mr. Francis G. Hickman, c/o The Cotton Trade Journal, Cotton Exchange Bldg., Memphis 3, Tenn.

PRODUCTION LINE NEWS AND NOTES

Tullahoma Organizes C of C

The first regular meeting of the newly organized Tullahoma Chamber of Commerce was held on July 29. Offices of the new organization will be in the Marshall Theater building, and plans are being made to employ a secretary. Present membership is 125.

Minerals Yearbook Off Press

To those interested in the mineral products industries, the U. S. Bureau of Mines annual Minerals Yearbook, 1944 edition, is now available from the Supt. of Documents, U. S. Government Printing Office, Washington, D. C., at $3.00 per copy.

New U. S. Commerce Dept. Office for Nashville

A new district office of the U. S. Department of Commerce is expected to be opened at Nashville by September 1.

Industrial Trends Cited For Tennessee Valley Area

An article on "Industrial Trends in the Tennessee Valley", written by Lewis C. Copeland and W. K. McPherson of the TVA Commerce Department and published in Social Forces for March, 1946, is now available in reprint form. The study traces the growth of new industries in the Valley area since the TVA was established in 1933, the expansion of value of manufactured products and volume of trade, trend of income of the Valley people over that period, and other economic changes. Indicative of the trend of industrial activity over the period studied is the fact that 721 more industries existed in the Valley in 1939 than in 1933, an increase of 54% against a national increase during the same period of only 30%. The increase in industrial plants in the Valley over that period was due largely to expansion of established industries in chemicals, textiles, light metals, shoes, wood products, and others.

T T & D Association Plans Nashville Office

The Tennessee Tourist & Development Association, formerly the Southern Highlands Association, is planning to move its headquarters to Nashville, in October, in accordance with action taken by the executive committee at an early August meeting held in Nashville. At the same time, the organization voted to expand its activities to include West Tennessee, thus placing the group on a Statewide basis. Elected as West Tennessee vice-president was J. D. Wooten of the Mid-South Oil Co., Memphis; James Haskins, Union City, and J. P. Lasater, Paris, were named as directors from that area.

Industrial Training Film Index Offered

The Eastman Kodak Company, Rochester, N. Y., can supply to interested industrial executives an index of over 1700 industrial training films, covering aviation, electronics, communications, and many other basic industries. Films on training in special industrial skills, as welding and drafting, also are listed and described. Write the company for "The Index of Training Films". It is free.

New Engineering Firms Open Offices

Cooper & Perry have announced the opening of offices at 204 Journal Bldg., Knoxville, for the practice of architecture and engineering. Both members of the firm belong to the American Institute of Architects; Mr. Samuel D. Cooper received his B. A. degree in Architecture from Carnegie Institute of Technology and Mr. C. Reginald Perry, the same degree from the University of Texas. Total volume of work executed by the firm members to date amounts to over $70,000,000 on schools, hospitals, churches, housing, commercial, and governmental projects.

Mr. J. Sanders Parker, consulting engineer, has opened an office at 816-8th Ave. South, Nashville. Mr. Parker will specialize in the practice of sanitary engineering, particularly on municipal sewerage projects.

Southern Engineering, Nashville firm specializing in industrial design and product engineering, also has opened a new office on South 8th Ave.

Dairy Film Makes Hit

Your editor had the privilege of attending the premier showing in Nashville, on August 7, of the new, full-color film on "Dairying in Tennessee", made by Sam Orleans & Associates, Knoxville, for the University of Tennessee Agricultural Extension Service. A write-up on this film was given in last month's Newsletter, but after seeing it, we know how far we missed doing the film justice. It must be seen to be appreciated; the audience at this premier showing was lavish in its praise of the film.

INDUSTRIAL EXPANSIONS AND CONTRACTIONS

Kimberly-Clark Corp., Memphis, in late July received CPA approval for proposed expenditure of $556,500 on reconversion of the "Memphis Fisher Aircraft" plant purchased by the corporation early this year(see April Newsletter). Under the CPA permit, the plant is to be reconditioned, equipment installed for cutting and packaging "Kleenex", and a restaurant, locker rooms, and similar facilities installed. The work will proceed as rapidly as materials are available, and manufacture of "Kleenex" will start as soon as equipment can be installed, with pulp being shipped from K-C's northern mills.

- - - - -

The Farmers & Merchants Bank of Mt. Pleasant is opening a branch at Spring Hill, with Harry Borum in charge.

- - - - -

A new cheese plant, costing over $50,000, is to be built at Gainesboro by the Borden Cheese Company, according to a Nashville Banner report in late July. Company officials, in the announcement of the proposed plant, are said to be planning establishment of collection routes in Jackson and adjoining counties to bring supplies of milk to the plant, which will make American cheddar cheese.

- - - - -

Sears Roebuck & Company is planning to construct a $2,000,000 retail store building in Knoxville.

- - - - -

The Teaco Bottling Co., Nashville, plans to start operations in September, under the direction of Dandridge W. Caldwell. "Teaco", a cola-type soft drink will be bottled for distribution in Nashville and Davidson County. The Nashville Loan Agency of RFC assisted in the capital financing for this project.

- - - - -

Approval by CPA was given in late July for a $50,800 foundry building at Dayton to be constructed by the newly organized Dayton Stove & Foundry Co., backed by local capital. The new firm, according to the Dayton Herald, will produce gray iron castings for the automobile, farm implement, and electric appliance industries and, in addition, will produce a line of stoves. Between 50 and 70 men will be employed.

Local businessmen reported as backers of the project include Frazier Davis, Igou Hodges, Dr. A. C. Boyles, and about a dozen other citizens of Dayton.

- - - - -

Athens Photo Service, Inc., which opened in that city in mid-August, has a modernly equipped photo-finishing plant, combined with a retail photographic supply store. Mr. Fred Wankan, former official State photographer, is owner and operator of this new business.

- - - - -

Fire in late July heavily damaged the plant of Dixie Brick & Tile Company, Puryear. Main offices of the company were saved. O. A. Harker, Jr., is owner and operator of the plant.

- - - - -

Purchase by the Cook Truck Lines, Inc., Memphis, of the M & N Freight Lines, also of Memphis, has been approved by the State R. R. & P. U. Commission. The M & N lines operate principally between Memphis, Nashville and Paris. The Cook lines have previously served only Mississippi points.

- - - - -

Fairyland Toy & Novelty Co., Chattanooga, which early in August received a State charter of incorporation, specializes in the manufacture of toy furniture. Toy Dutch and French dining room suites are being produced, and authentic copies of period furniture will be manufactured. A toy copy of Washington's Mount Vernon bed is to be featured soon in a national magazine, according to a Chattanooga Times' report. A. T. Carter of the newly organized company is also president of Carter Bros. Co., Chattanooga rug and bedspread manufacturers.

- - - - -

Work by the TVA was resumed late in July on the Watauga and South Holston dam projects in Upper East Tennessee, immediately following Congressional approval of a $14 million appropriation for their completion. Construction of the two dams, which will cost estimated totals of $29,500,000 and $31,500,000, respectively, was halted during the war period after about one year's work. Peak employment on the combined projects will be about 3,000 workers, according to Geo. K. Leonard, manager for both projects.

- - - - -

The Cleveland Banner, Inc., is a new company organized for the recent purchase of the Cleveland Daily Banner, published in that city for 30 years by Will L. Rodgers. Walling Keith, president of the new corporation, is publisher of the Macon (Ga.) Telegraph and only recently resigned from the editorship of the Gadsden (Ala.) Times in order to take over the Cleveland paper. Mr. Rodgers is to remain as editor of the Daily Banner and will become chairman of the board of directors of the new publishing corporation.

- - - - -

Owens Agricultural Phosphate Corporation, a phosphate mining concern operating at Centerville, has been granted its State charter of incorporation for the transportation and sale of phosphate, commercial fertilizers, limestone and similar products. Louis L. Williams, Rodney L. Bell, and Frank S. Owens are listed as incorporators.

- - - - -

Tri-Cord Corporation of Brooklyn, N. Y., has leased a former school building at Dyer and anticipates start of manufacture there about September 1. Children's pajamas will be made at this new plant, which will initially employ 150 persons. Incorporation and operation of the Dyer unit probably will be under some other name than that of the parent company.

- - - - -

Capitol Broadcasting Company, Nashville has received tentative FCC authorization for operation in that city of a standard 250-watt radio station (1230 kilocycles, unlimited time).

- - - - -

The Union Dairy Company's milk plant at Union City was sold in early August to Howard McIntyre and Wassell Randolph, both of Memphis. The new owners are experienced dairymen and operate dairies throughout the Mid-South, according to the Nashville Banner's report of the sale. Mrs. Villa Paulsen, owner of the Union City plant during the past 2½ years, did not include her herd of purebred Jerseys in the recent sale.

- - - - -

The Interstate Commerce Commission has set September 24 as the date for hearing of the Oneida & Western Railroads petition to abandon its line between Oneida and Jamestown. Hearing will be at Crossville.

- - - - -

The Henry S. Sawrie Co., Nashville, has received CPA approval for construction of a $30,000 warehouse.

- - - - -

Lobelville Gas Company has been granted a State charter of incorporation to purchase natural gas from the Tennessee Gas & Transmission Company and its successors and other companies for resale in the Lobelville area. Incorporators listed are C. C. Cunningham, Ralph Patterson, Jack Leeper, Woodrow Byrd, and Brown Daily. Authorized common stock capital is $10,000.

- - - - -

American Airlines, in late July, increased their service through Nashville by the addition of six new flights between New York, Memphis, and Dallas.

- - - - -

Cumberland Laundry & Dry Cleaning Co., Crossville, has under construction a new 4,500-sq. ft. concrete block building into which the company expects to be able to install $10,000 worth of new equipment by mid-November. On completion of the new plant, the company plans to expand its services to nearby towns through use of two new delivery and pick-up trucks.

- - - - -

The Tennessee Handle Co., Cookeville, in mid-August was granted a CPA priority of $25,000 to rebuild its plant which was razed by fire a few months ago.

- - - - -

Wilmar Co., Inc., of Hickory, N. C. is reported by the Sullivan County News to have broken ground for erection of a chemical plant near Blountville. Organic chemicals and pharmaceutical supplies will be manufactured in the plant's laboratories. Preliminary operations were expected to get underway by late August in temporary quarters already erected on the site. The company's president and treasurer, L. L. and S. J. Marion, are natives of Blountville, and the new local unit represents an expansion of their North Carolina business.

- - - - -

Eureka Pants Mfg. Co., Shelbyville, is reported to have a new plant building under construction that probably will be ready for occupancy by the first of next year.

- - - - -

Volunteer Bag Co., Nashville, has begun initial operations in the reprocessing of cotton and burlap bags for feed and similar products. This new industry, said to be the third of its kind serving feed and flour mills in the Middle Tennessee area, is planning to construct a new plant next Spring and expects to increase employment from its present 8 workers to 35, most of which will be power sewing machine operators.

- - - - -

Troy Manufacturing Co., Troy, expects to start production about September 1 on shirts, pajamas, and other wearing apparel at its new plant in that city. Owners, as listed by Southern Textile News, are Mrs. Myrtle G. Bentley and Alfred D. Ulio.

- - - - -

Hallscraft Sheet Metal Works, situated near Halls, has announced change of its firm name to Hallscraft Welding Service.

- - - - -

The Sun Publishing Co., publishers of the Jackson Sun, has been granted FCC permit for the construction of a new FM radio station in Jackson. The company now operates a standard 1,000 watt broadcasting station, WTJS. The new FM unit, having an effective radiated power of 30,000 watts, will be constructed as soon as the equipment becomes available.

- - - - -

Cabin Crafts, Inc., of Dalton, Ga., has announced that its "Needletuft" rug division at Cleveland is completing an expansion program that more than triples present floor space.

- - - - -

The first rail shipment of kitchen ranges from Aviation Corporation's "Consolidated-Vultee" unit at Nashville was made on August 8, formally opening the new spur connection from the plant to the N. C. & St. L. Railway's mainline. The "Convair" plant, which is converting from wartime aircraft manufacture to electric and gas kitchen range production, is currently employing about 900 persons.

- - - - -

Chickamauga Producers, Inc., Dayton quick-freezing plant, reports a seasonal pack of quick-frozen peaches totaling 122,239 lbs. Of this total, 34,257 lbs. were packed in one-pound consumer packages. All of the total pack, consisting of 4,800 bushels of peaches, was purchased from local growers, with the exception of one truck load. The largest single day's pack was 4,300 small packages, involving the processing of 6,500 lbs. of fruit during a single shift.

- - - - -

Columbia Iron Works, Chattanooga, in late July received CPA approval for construction of its new $275,000 foundry.

- - - - -

Commissioner Paul S. Mathes of the State Department of Conservation has been authorized by Governor Jim McCord to initiate action that will make Tennessee a member of the Interstate Oil Compact Commission, an interstate group sponsoring cooperative oil conservation practices. Legislative action will be necessary before Tennessee can join the Commission, and the Governor will request such action at the forthcoming January session of the Legislature Impetus has been given the move by the recent Sgt. York oil strike in the Upper Cumberland District (See July Newsletter).

- - - - -

Ground was broken in early August for a new 7,500 sq. ft. concrete and steel structure to be occupied by the Columbia Machine Works. Move to the new quarters, expected to be completed in October, will permit the company to expand its machinery and auto repair work.

- - - - -

General Shoe Corporation, Nashville, announced in late August, construction award for a 50,000 sq. ft. plant at Waynesboro. According to the Nashville Banner, the new unit, which will have a daily peak production of 5,000 pairs of dress shoes, will eventually employ 400 to 600 workers. The plant building will be a one-story concrete and steel structure. William Parks Construction Co., Lawrenceburg, Tenn., received the building contract; Hart, Freeland & Roberts, Nashville, are architects.

Operation of General Shoe's new McMinnville unit for the manufacture of women's play shoes began operation in July; ultimate employment will range from 500 to 700. The Corporation's new Centerville shoe-manufacturing unit, to employ about 750 workers, was officially dedicated with an all-day celebration late last month. In early August, ground was reported being broken at Manchester for a new sole-leather plant.

- - - - -

Tennessee Cigar Factory, Dresden, is reported planning enlargement of its plant to the extent that present employment of 60 workers will be doubled.

- - - - -

Colonial Shirt Co., Woodbury, expects to begin manufacture of men's shirts about September 1. Organized in December 1945, the company has been awaiting completion of its new $20,000 plant and installation of equipment. About 100 persons will be employed. President of the company is M. Tuchinsky; S. Berger is treasurer and plant manager.

- - - - -

Tennessee Valley Furniture, Dickson, began operation in July. This new industry is expected to furnish employment to about 100 persons.

- - - - -

Controlling interest in the Dayton Hosiery Mill, Dayton, was sold in late July to Alfred P. Slaner of Scarsdale, N. Y., representing a large hosiery manufacturing organization. Enlargement of the mill, with approximate doubling of employment, is contemplated by the new owners as soon as equipment and materials are available, according to the Dayton Herald. The Dayton Hosiery Mill was organized in 1913 by local capital to give a new source of employment, following the closing of the old Dayton Coal & Iron Company.

- - - - -

Morristown Knitting Mills has purchased a building in Russellville for remodeling into a knitting mill. Operations are expected to begin around November 1, with about 50 employees. Hose made at the Russellville unit will be shipped to Morristown for finishing, according to the Knoxville News-Sentinel report.

- - - - -

The N. C. & St. L. Railway has announced placement of an order for $3,500,000 worth of new freight equipment. The order, obtained by the Pullman-Standard Car Mfg. Co., Birmingham, Ala , is for 1,000 freight cars - 500 all-steel boxcars, 200 all-steel gondolas, and 300 all-steel hopper cars. Financing is being done by an all-Southern banking syndicate, headed by the Hamilton National Bank of Chattanooga, with leading Nashville, Memphis, and Atlanta banks participating.

- - - - -

Pure Oil Company is reported planning construction of a $75,000 terminal and storage plant at Knoxville along Tennessee River.

- - - - -

The Board of City Commissioners of Cookeville has awarded the contract for construction of a dam on Falling Water River, to impound Cookeville's water supply. The J. M. Hickman Construction Co. of Harriman were the successful bidders.

THANKS TO STATE PRESS EDITORS

Copies of last month's Newsletter mailed to editors of State papers carried a note suggesting that the Planning Commission would welcome regular receipt of their papers, in order that the Commission staff could keep better informed on local activities and developments in all areas of the State.

To-date, you editors have been extremely generous in your prompt response, and we wish to take this method of expressing the Commission's appreciation to the following papers from which we have already received copies of one or more issues:

Morristown Sun	Lauderdale County Enterprise
Rockwood Times	Fayette Falcon
Dickson County Herald	The Register
Perry Countian	Shelbyville Gazette
Bledsonian Banner	Old Hickory News
Jefferson County Standard	Lake County Banner
Columbia Herald	Plain Talk & Tribune (Newport)
Dandridge Banner	Halls Graphic
Trenton News Gazette	Bill Fiske's Bugle (Celina)
Carroll County Democrat	Sullivan County News
Daily News (Memphis)	Rutherford Courier
Milan Exchange	Etowah Enterprise
Crossville Chronicle	Lebanon Democrat
	Democrat Union (Lawrenceburg)

We thank each and every one of you. This fine representation of each region helps insure that we shall not overlook any important activities in the cities and towns of the State. If other editors feel like its a fair deal to send us their papers in exchange for our "Newsletter" and other publications of the Commission, we shall be equally grateful for their kindness.

* * *

PLEASE! REPORT NEW INDUSTRIES AND PLANT SPACE

The "Newsletter" will appreciate cooperation from Tennessee towns and cities in making available to us information on all new local developments. If you have a new industry announced for the community - concrete block plant, creamery, textile mill, or what not - send us newspaper clipping on it or use form below. Similarly, we shall be grateful for cooperation in making known to us any vacant buildings that can be used for industrial purposes. Let us have the dope, so we can list them in the "Newsletter". That might bring you the industry you want.

Fill out and return to: Industrial Div., TSPC, 432 6th Ave., N., Nashville 3.

TENNESSEE MANUFACTURING EMPLOYMENT DECLINES DURING SEPTEMBER

For the first time since February manufacturing employment in Tennessee has declined. According to the latest estimates, manufacturing employment in Tennessee decreased 1,600 workers between mid-August and mid-September with the level on September 15, 1946 at 243,200 workers. The current level is 9,900 workers above that of a year ago and, except for the August peak, is the highest level attained since the end of the war. The decline in the current 30-day period occurred in industries manufacturing nondurable goods. This group dropped 3,000 workers between August 15 and September 15, while the industries manufacturing durable goods added 1,400 workers.

The largest employment reduction between mid-August and mid-September occurred in the food industry which had a loss of 3,700, leaving a total of 22,900. The greater part of the drop was due to seasonal fluctuations in the canning industry plus a decrease in meat packing plants which was due in part to price uncertainties prior to the lifting of price controls. There were minor declines of 100 employees each in lumber, miscellaneous durable goods, apparel, and printing and publishing industries.

Partially offsetting these declines were employment gains in several industries. The largest increase during the 30-day period was the addition of 700 workers in the iron and steel industry. This gain resulted from increased activities in the manufacture of heating and plumbing equipment. In the textile industry the number of workers increased in both cotton and knitting mills, but these gains were partially offset by a decline in woolen and worsted mills resulting in a net advance of

only 400 workers for the industry.

In addition to these increases, manufacturers of machinery (except electrical) and furniture and finished lumber products registered gains of 500 employees. The remaining industries showed only minor gains of 100 to 200 workers during the 30-day period.

The table on the following page summarizes employment changes in manufacturing industries in Tennessee for September 1946, August 1946 and September 1945.

ESTIMATED NUMBER OF EMPLOYEES IN MANUFACTURING INDUSTRIES IN TENNESSEE 1/

Industry Groups	Sept. 1946	Aug. 1946	Sept. 1945	Net Change From Aug.'46 To Sept.'46	Percent Change From Aug.'46 To Sept.'46	Percent Change From Sept.'45 To Sept.'46

1/ Estimates include all full-time and part-time wage and salary workers who were employed during the pay period ending nearest the fifteenth of the month.

2/ Includes electrical machinery; automobiles and automotive equipment.

3/ Includes tobacco manufacturers; products of petroleum & coal; and miscellaneous manufacturing industries.

TENNESSEE STATE COLLEGE
Office of Veterans' Affairs
Nashville 8, Tennessee

Dear Veteran:

Your letter concerning Vocational Trades and requesting a catalog has been received. Our present catalog does not include courses in trades that are offered to Veterans, therefore, I am sending you this letter. I believe that the following statements will give you the desired information.

We now have under way a vocational training program in the following courses:

1. Auto Mechanics
2. Woodwork
3. Plumbing
4. Power Plant
5. Steamfitting
6. Electricity
7. Brick Laying
8. Painting and Decorating

The general entrance requirements will be those for admission to high school or above. We prefer that Veterans who will enroll for these courses will have had at least two years of high school work, but we will not deny you the opportunity of preparing for gainful employment if you have not had two years of high school work. You must, at least, be able to read understandingly, trade literature in your field.

Veterans may enter these trade courses at any time, but it will be to your advantage to enter now or at the beginning of a six weeks period. The second six weeks period of the Spring Quarter will begin on April 29. The Summer Quarter will begin on June 10.

Please contact your nearest Veterans Administration and file application form 1950 before coming to school. Your Letter of Eligibility should be filed in our office when you register or shortly thereafter, in order that you may begin receiving your subsistence checks.

Your board, lodging and other living expenses are not paid by the Veterans Administration by law. You should bring with you sufficient money to live at least one month while waiting for your first check from the government.

I regret to inform you that we do not have living accommodations in the dormitories, but temporary houses consisting of trailers are being installed on the campus for single and married Veterans. Space in the trailers may be secured by applying to this office and paying one month's rent in advance.

If you are interested in taking a vocational trade, kindly write me at once. I shall be glad to furnish you additional information upon request.

Very truly yours,

(Mrs) Rachel J Patillo,
Counselor to Veterans

Tennessee

PLAN OF OPERATION FOR AGRICULTURAL

TRAINING OF VETERANS

A great many questions have been raised regarding the training of veterans who wish to establish themselves in farming following their release from the armed forces.

An agreement has been signed by the State Board for Vocational Education with the Veterans Administration in which the general plan for the training program is set up.

It provides for or stipulates that the veteran must devote at least 150 hours each year to organized classroom instruction under a qualified instructor. It provides further that the veteran must receive not less than 96 hours supervision on the job each year and that his farming program must be under his control and of sufficient scope to require not less than 36 hours each week of actual participation in farming operations.

It also sets up a county committee to help plan the veterans farm program, to approve his facilities and council with the educational authorities on the organized instructional program.

This release has to do with the instructional program for which local school authorities will have full administrative authority and responsibility, subject to the standards set forth herein as follows:

1. Regularly employed teachers of vocational agriculture may, each, in the County Superintendent's discretion, be assigned not more than two veteran trainees. No tuition will be paid by the Veterans Administration for trainees thus assigned for the remainder of this fiscal year, but any additional travel expense incurred by agriculture teachers in supervising veteran trainees in accordance with the above will be reimbursed from vocational funds in the usual manner.

2. When the number of veterans desiring farm training exceeds 2 per employed agriculture teacher or when the total number in any county is sufficient to warrant it, special instructors are to be employed for the veterans training program. For each veteran enrolled and in good standing in a farm training program under a qualified special instructor, the Veterans Administration will pay the County Board of Education, or operating agency, a tuition fee of $20.00 per month. From this tuition fee of $20.00 per month per trainee the operating agency must pay all costs of the training program including the special instructor's salary and travel, except as set forth below.

3. Special instructors will be under the direct supervision of such regular teachers of vocational agriculture as the County Superintendent may designate. In counties in which no vocational agriculture teachers are employed special teachers will report directly to the Superintendent of Schools.

4. Special instructors for farmer veteran trainees will be employed by county boards of education in the same manner as other employees of the board.

5. Special instructors shall meet one of the following standards:

   a. He must be a graduate of a standard college of agriculture and in addition must have had at least two years successful farm experience.

   b. He must be a high school graduate, must be actively engaged in farming, and generally recognized as a successful farm operator considerably above the average farmer in his county or community.

   c. In either event he must be acceptable to the county committee referred to below.

6. There shall be set up in each county a farmer veterans training committee, composed of the following - The County Superintendent of Schools, a vocational agriculture teacher, the County Agent, a representative of the soil conservation service and/or representatives of any other agricultural agencies in the county who are considered to be in a position to render valuable service.

   The functions of the county committee in general shall be to review the facilities of the trainee, to assist him in planning his farm program, to approve or disapprove same, to council with the school authorities and its employees on the training needed by each trainee, and to recommend qualified instructors.

7. Such vocational agriculture facilities as the county may have, may at the County Board's discretion be made available to special instructors of farmer veteran trainees but care should be exercised in doing so to the end that regularly enrolled students of vocational agriculture in the high school, adult farmer groups and veterans may receive maximum benefits therefrom.

   If the county owns no such facilities plans for the use of similar facilities privately or publicly owned must be made by rental, donation or in some other acceptable manner.

   The Veterans Administration will in addition to the $20.00 per month tuition for each trainee, pay for such supplies as may be necessary in effectively carrying out the instructional program (this shall not be interpreted as including farm machinery or equipment, seed, feed, fertilizer and similar items).

Some Questions and Answers

Ques. How many applicants for farmer training must there be before a class can be set up?

Ans.: No specified number. $20.00 per month tuition will be paid and if the

number of trainees does not justify the employment of a full time instructor, one may be employed on a part-time basis.

Ques. What is the maximum number of trainees a full time instructor could effectively teach and supervise?

Ans.: Not more than 20.

Ques. What will be the nature of the classroom instruction?

Ans.: It must be individual instruction designed to meet the needs of the individual in executing his own farming program, and must therefore be based upon a careful analysis of his particular situation, his previous experience, etc.

Ques. How is the classroom time to be distributed throughout the year?

Ans.: Not less than 4 hours may be given in any calendar month but hours of class time may vary with seasonal demands.

Ques. How are the 96 hours of supervision to be distributed over the year?

Ans.: Not less than 2 hours supervision on the job by the instructor may be given in any calendar month. The remainder should be given at times when it will be most beneficial to the trainee.

Ques. What should I as County Superintendent do to get this program under way?

Ans.: Take the steps necessary and enter into a contract with the Veterans Administration in accordance with terms outlined above. Call the representatives of the agencies named and others you may deem proper and set up the county committee. Ask the committee to give you its recommendations as to teaching personnel. Ask the committee to set up minimum, acceptable standards as to farm facilities and programs and a plan for checking those of each applicant for farmer training.

Ques. What must be the farm status of a veteran in order to qualify for training?

Ans.: He must be (a), an owner operator of a farm (b), a partner in a farm business (c), a renter operator (d), or an employee on a farm with a definite agreement as to operations to be performed and responsibility to be assumed.

37 - UN - Conf. on Freedom of Info. 1948

PROVISIONAL AGENDA OF THE UNITED NATIONS CONFERENCE
ON FREEDOM OF INFORMATION

Adopted by Resolution of the Economic and
Social Council, August 15, 1947

Chapter I

1. General discussion on the principles of freedom of information, taking into consideration the views on this subject expressed by the General Assembly, the Economic and Social Council, the Commission on Human Rights, the Sub-Commission on Freedom of Information and of the Press, and other organizations in this field.

2. Consideration of the following fundamental principles to which media of information should have regard in performing their basic functions of gathering, transmitting and disseminating news and information without fetters:

(a) To tell the truth without prejudice and to spread knowledge without malicious intent;

(b) To facilitate the solution of the economic, social and humanitarian problems of the world as a whole through the free interchange of information bearing on such problems;

(c) To help promote respect for human rights and fundamental freedoms for all, without distinction as to race, sex, language or religion, and to combat any ideologies whose nature could endanger these rights and freedoms;

(d) To help maintain international peace and security through understanding and cooperation between peoples, and to combat forces which incite war, by removing bellicose influences from the media of information.

Chapter II

Note: By "information," for the purposes of the Conference, is meant the following means of bringing current situations, events and opinions thereon to the knowledge of the public: newspapers, news periodicals, radio broadcasts and newsreels.

3. Measures to facilitate the gathering of information

(a) Facilitating the entry, residence, movement and travel of accredited news personnel (including press, news periodical and radio correspondents and newsreel operators);

(b) Providing, if appropriate, for international professional cards for news personnel;

(c) Protecting them against arbitrary expulsion;

(d) Permitting the widest possible access to news sources, private and official, without discrimination between nationals and accredited foreign news personnel;

(e) Eliminating unreasonable or discriminatory taxes affecting the operations of foreign news agencies and news personnel.

4. Measures

4. Measures to facilitate the international transmission of information

(a) Facilitating the progressive elimination of peace-time censorship as it affects the international transmission of information; and, in so far as it appears impossible to obtain the abolition of all peace-time censorship owing to the requirements of national security, facilitating agreements which will reduce a number of the inconveniences of censorship through such means as the following:

(i) By establishing in advance the categories of information subject to previous inspection, and by publishing the directives of the censor announcing forbidden matters;

(ii) By carrying out the censorship at the place of despatch and in the presence of the correspondent concerned, so that he may immediately know which portion of his text has been censored;

(iii) By fixing the charge on the number of words composing a telegram after censorship;

(b) Recommending through the Economic and Social Council to the International Telecommunications Union and the Universal Postal Union preferential telecommunication and postal treatment for news materials by all media to encourage the widest possible dissemination;

(c) Recommending non-discriminatory transmission rates and services for foreign news agencies;

(d) Recommending means for alleviating economic or commercial restriction on imports of news material by all media, including:

(i) Existing tariffs, quotas, and exchange controls;

(ii) Restrictive or monopolistic commercial practices;

(e) Recommending measures to prevent such cartelization of news agencies as may endanger the freedom of the Press.

5. Measures concerning the free publication and reception of information

(a) Consideration of the restrictions imposed by Governments on persons or groups wishing to receive and disseminate information, ideas and opinions with particular reference to:

(i) Discrimination by Governments for political or other reasons in the provision of materials and facilities;

(ii) Censorship;

(iii) The limitation or regulation by Governments of the right of all persons under their authority to possess and operate radio receiving sets covering all bands used for domestic and international broadcasts;

(iv) The requirements of national security and public order;

(v) The demands of public decency;

(vi) Laws

(vi) Laws of libel;

(vii) Ownership, control, administration and availability of enterprises in the field of information;

(viii) The distinction to be drawn between the rights of correspondents, information agents, etc., working in their own country and those of foreign correspondents.

(b) Recommending means to increase the amount of domestic and international information available to all peoples, by

(i) Improving and increasing the supply of physical facilities, such as printing presses, paper, radio equipment, film projectors and rapid transmission facilities and services, due consideration being taken of the work being done by existing international organizations active in this field;

(ii) Recommending removing or alleviating existing tariffs, quota regulations and exchange controls on the physical facilities mentioned above;

(iii) Considering the disproportion existing in mass media facilities now at the disposal of various countries; and considering means for overcoming foreign exchange problems created for correspondents coming from weak currency countries;

(iv) Considering the present unequal development of news agencies in certain countries and recognizing the problem of the development of national news agencies through provisional measures until such time as these news agencies are capable of meeting international competition;

(v) Eliminating monopolistic, restrictive and exclusive practices limiting the importation and dissemination of information for domestic publication.

(c) Recommending measures for improving the quality of information in the direction of greater accuracy, objectivity, comprehensiveness and representative character, by

(i) Promoting within the limits of national possibilities the widest possible interchange of correspondents on the basic of reciprocal agreements; the training of correspondents in professional competence and standards of accuracy and fairness, and in knowledge and understanding of the countries where they will work; and the training of technicians in the operation of modern facilities;

(ii) Counteracting false information through

(1) The study of measures for counteracting the spreading of demonstrably false or tendentious reports which confuse the peoples of the world, aggravate relations between nations or otherwise interfere with the growth of international understanding, peace and security against a recurrence of nazi, fascist or Japanese aggressions;

(2) The study of measures, especially legislative measures which are designed to establish the responsibility of the owners of newspapers which spread false and tendentious reports of a nature which worsen relations between peoples, provoke conflicts and incite to war;

(3) The

(3) The study of the various laws of libel with a view to recommending the removal of anomalies in the legislation in different countries;

(4) The study of the possible universal adoption of the right of reply;

(5) The study of the dissemination through domestic news channels of official denials, particularly with respect to matters of concern to another nation;

(iii) Encouraging professional bodies concerned with the collection and dissemination of information to lay down for themselves standards of professional conduct and competence;

(iv) Studying the desirability and the practical possibilities of organizing in all principal news centres of the world foreign correspondents corps with self-disciplinary powers.

6. Consideration of the drafting of a charter of rights and obligations of the media of information, including:

(a) Statement of the rights of the media of information and the means of safeguarding these rights through international conventions or multilateral or bilateral agreements within the framework of the United Nations;

(b) Statement of the obligations of the media of information and the measures necessary to ensure the fulfilment of these obligations.

7. Consideration of possible continuing machinery to promote the free flow of true information

A. Such machinery might perform such functions as:

(a) Receiving, considering carefully, and reporting on compalints regarding false news, tendentious or defamatory campaigns and regarding obstructions to the flow of information and violations of any international conventions arising out of the recommendations of the world conference and other international agreements operative in this field;

(b) Suggesting from time to time changes in the provisions of any such conventions or agreements, and publishing other recommendations on the question of freedom of information;

(c) Continuing study of the current performance of news agencies and other processes of international information;

(d) Recommending the mutual study of the current work of the various agencies by means of mutual visits based on bilateral agreements between countries;

(e) Regulating the issue of international professional cards for news personnel.

B. Examination

B. Examination of the advisability or necessity for the establishing or maintaining of machinery subject to the United Nations to carry out any of these functions.1/

8. Consideration of the problems involved in the establishment of governmental and semi-governmental information services in order to make information available in countries other than their own

Consideration of whether the facilities and safeguards necessary for the establishment of such information services might best be assured by means of bilateral agreements and if so to indicate in general terms the nature of the facilities and safeguards for which such agreements should provide.

9. Consideration of the possible modes of action by means of which the recommendations of the Conference can best be put into effect, whether by resolutions of the General Assembly, international conventions, bilateral agreements, or by the adoption on the part of the individual States of appropriate laws, or other means.

1/ The Economic and Social Council in its consideration of the inclusion of this agenda item noted that the Conference by its terms of reference was precluded from taking steps toward the establishment of any machinery but considered that the Conference might report to the Council on the subject.

General Assembly Resolution

on

SLANDEROUS INFORMATION

Passed by the United Nations General Assembly

Second Session, 1947

THE GENERAL ASSEMBLY

CONSIDERING that under Article 1 of the Charter, Members are bound to develop friendly relations amongst themselves and to achieve international co-operation in promoting and encouraging respect for human rights and fundamental liberties;

that to attain this end it is essential to facilitate and increase the diffusion in all countries of information calculated to strengthen mutual understanding and ensure friendly relations between the peoples;

that substantial progress in this sphere can be achieved only if measures are taken to combat the publication of false and tendentious reports likely to injure friendly relations between States;

(I) INVITES the governments of States Members

(1) To study such legislative or other measures as might with advantage be taken on the national plane to combat the diffusion of false or tendentious reports likely to injure friendly relations between the States;

(2) To submit reports on this subject to the Conference on Freedom of Information so as to provide the Conference with the data it requires to enable it to start its work immediately on a concrete basis.

(II) RECOMMENDS to the Conference on Freedom of Information that it study, with a view to their co-ordination, the measures taken or advocated in their connection by the various States.

(From United Nations General Assembly doc. A/C.3/180, 24 October 1947.)

PAGE PARTIALLY ILLEGIBLE

General Assembly Resolution

on

MEASURES TO BE TAKEN AGAINST PROPAGANDA

AND THE INCITERS OF A NEW WAR

Passed by the United Nations General Assembly

Second Session, 1947

WHEREAS in the Charter of the United Nations the peoples express their determination to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and to practice tolerance and live together in peace with one another as good neighbours; and

WHEREAS the Charter also calls for the promotion of universal respect for, and observance of, fundamental freedoms which include freedom of expression, all Members having pledged themselves in Article 56 to take joint and separate action for such observance of fundamental freedoms,

THE GENERAL ASSEMBLY

1. CONDEMNS all forms of propaganda, particularly propaganda controlled by governments or their political agencies, which is designed to encourage acts of aggression.

2. REQUESTS the Government of each Member to take appropriate steps within its constitutional limits;

(a) to promote friendly relations among nations based upon the Purposes and Principles of the Charter;

(b) to encourage the dissemination of all information designed to give expression to the undoubted desire of all peoples for peace.

3. DIRECTS that this resolution be communicated to the forthcoming Conference on Freedom of Information, as being relevant to the discussion of Item 2(d) of its Provisional Agenda.

37- UN - Conf. on Freedom of Info, 1948

ARTICLES ON FREEDOM OF INFORMATION

Proposed by

The United Nations Sub-Commission

on

Freedom of Information and of the Press

February 1948

Article Proposed for International Declaration on Human Rights

"Every one shall have the right to freedom of thought and expression: this shall include freedom to hold opinions without interference; and to seek, receive and impart information and ideas by any means and regardless of frontiers."

Article Proposed for International Covenant on Human Rights

1. Every person shall have the right to freedom of thought and expression without interference by governmental action: this right shall include freedom to hold opinions, to seek, receive and impart information and ideas, regardless of frontiers, either orally, by written or printed matter, in the form of art, or by legally operated visual or auditory devices.

2. The right to freedom of expression carries with it duties and responsibilities. Penalties, liabilities or restrictions limiting this right may therefore be imposed for causes which have been clearly defined by law, but only with regard to:

(a) matters which must remain secret in the vital interests of the State;

(b) expressions which incite persons to alter by violence the system of government;

(c) expressions which directly incite persons to commit criminal acts;

(d) expressions which are obscene;

(e) expressions injurious to the fair conduct of legal proceedings;

(f) expressions which infringe rights of literary and artistic property;

(g) expressions about other persons which defame their reputations or are otherwise injurious to them without benefiting the public.

Nothing in this paragraph shall prevent a State from establishing on reasonable terms a right of reply or a similar corrective remedy.

3. Previous censorship of written and printed matter, the radio and newsreels shall not exist.

4. Measures shall be taken to promote the freedom of information through the elimination of political, economic, technical and other obstacles which are likely to hinder the free flow of information.

CONFERENCE ON HUMAN RIGHTS AND FREEDOM OF INFORMATION

Auditorium, New State Department Building
Washington, D. C., March 4, 1948

AGENDA

8:45 a.m. Registration - New State Department Auditorium

9:30 a.m. General Session - New State Department Auditorium

Opening of the Conference by the Chairman, Mrs. Margaret R. T. Carter, Chief, Division of Public Liaison, Department of State

9:40 a.m. "Review of the Geneva Conference on Human Rights" - Mrs. Franklin D. Roosevelt, United States Delegate, United Nations Human Rights Commission

10:00 a.m. "Human Rights and the Bogota Inter-American Conference" - Mr. William Sanders, Associate Chief, Division of International Organization Affairs, Department of State

10:15 a.m. Round Table Discussions

Group I - GENEVA DRAFT OF THE INTERNATIONAL DECLARATION ON HUMAN RIGHTS - Room 2180

Discussion Leader: Mrs. Margaret R. T. Carter

Panel: Mr. James P. Hendrick, Acting Associate Chief, Division of International Organization Affairs, Department of State

Mrs. Rachel Conrad Nason, Adviser to the United Nations Commission on the Status of Women

Mr. A. Abbot Rosen, Chief, Civil Rights Section, Department of Justice

Mr. Earle V. Simrell, Assistant General Counsel, Employment Security Division, Federal Security Agency

Group II - GENEVA DRAFT OF THE COVENANT ON HUMAN RIGHTS - Room 2003

Discussion Leader: Miss Doris H. Cochrane, Information Liaison Officer, Division of Public Liaison Department of State

Panel: Mr. John W. Halderman, Assistant Chief, Division of International Organization Affairs, Department of State

Mr. Kenneth Meiklejohn, Assistant Solicitor, Department of Labor

Mr. Herzel H. E. Plaine, Office of the Assistant Solicitor General, Department of Justice

Mr. Jack B. Tate, Deputy Legal Adviser, Department of State

Group III - IMPLEMENTATION OF HUMAN RIGHTS, GENEVA DEVELOPMENTS - Room 5105

Discussion Leader: Mr. Harry W. Seamans Information Liaison Officer, Division Of Public Liaison, Department of State

Panel: Mr. Durward V. Sandifer, Special Deputy Director, Office of United Nations Affairs, Department of State

Miss Dorothy Fosdick, Foreign Affairs Specialist, Office of European Affairs, Department of State

Miss Marjorie M. Whiteman, Assistant to the Legal Adviser, Department of State

Mr. James Simsarian, Specialist, Division of International Organization Affairs, Department of State

Group IV - AMERICAN CONTRIBUTIONS TO INTERNATIONAL UNDERSTANDING AND PEACE - Room 2181

Discussion Leader: Mr. Garland C. Routt, Information Liaison Officer, Division of Public Liaison Department of State

Panel: Mr. Ben G. Crosby, Assistant Chief, Division of Public Liaison, Department of State

Mr. John M. Patterson, Assistant Chief, Division of Public Liaison, Department of State

Mr. William A. Wood, Acting Chief, Radio Branch, Division of Public Liaison, Department of State

Miss Eleanor Saymon, Information Liaison Officer, Division of Public Liaison, Department of State

Mr. Donald Wilson, Information Officer, Division of Public Liaison, Department of State

Miss Mary M. Reminger, Speaking Arrangements Officer, Division of Public Liaison, Department of State

Mr. Leonard R. Cowles, Acting Chief, Public Views and Inquiries Section, Division of Public Liaison, Department of State

12:15 p.m. *Subscription Luncheon - Hotel Washington (Fifteenth Street and Pennsylvania Avenue, NW.)

Chairman: Mr. James W. Swihart, Acting Director, Office of Public Affairs, Department of State

Informal Remarks by
Mr. Howland H. Sargeant, Deputy Assistant Secretary of State

*NOTE: Those who have made reservations for the Conference luncheon are urged to purchase their tickets at the Conference Registration Desk as early as possible. The cost is $2.50.

1:15 p.m. "Human Rights and the United Nations",-
Mr. Durward V. Sandifer, Special Deputy Director, Office of United Nations Affairs, Department of State

1:45 p.m. "Freedom of Information" -
Mr. Lloyd A. Free, Special Assistant to the Director, Office of Information and Educational Exchange, Department of State

2:45 p.m. Round Table Discussions

Group I - (Continued from morning session) - Room 2180

Group II - (Continued from morning session) - Room 2003

Group III- (Continued from morning session) - Room 5105

Group V - FREEDOM OF INFORMATION - Room 2181

Discussion Leader: Dr. G. Bernard Noble, Chief, Division of Historical Policy Research, Department of State

Panel: Mr. Lloyd A. Free

Mr. Michael J. McDermott, Special Assistant to the Secretary for Press Relations, Department of State

Mr. George T. Washington, Assistant Solicitor General, Department of Justice

Mr. Samuel De Palma, Specialist, Division of International Organization Affairs, Department of State

Mr. Saxton E. Bradford, Deputy Director, UNESCO Relations Staff, Department of State

4:15 p.m. General Discussion Session - Auditorium, New State Department Building

Chairman: Mrs. Margaret R. T. Carter

Brief Reports from Round Table Discussions.
Discussion of Questions from the Floor.

ADJOURNMENT

UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

GENEVA, SWITZERLAND

COMMENCING MARCH 23, 1948

A Fact Sheet

February 1948

Division of Historical Policy Research
Office of Public Affairs
Department of State

F O R E W O R D

The United Nations Conference on Freedom of Information, convoked by the Economic and Social Council, will be called to order at Geneva, Switzerland, on March 23, 1948. It has as its objective the advancement of the freedom of the human mind--a forward step in the long pilgrimage of the peoples of the world toward effective freedom and understanding. Success in achieving this objective depends, however, upon the solution of extremely delicate and complex international problems.

"Since wars begin in the minds of men, it is in the minds of men that the defenses of peace must be constructed ..." So states the UNESCO Constitution. In fact, one of the most important aspects of the problem of freedom of information is its close relationship to the maintenance of world peace.

If war is to be avoided and if international cooperation is to become a reality, world opinion must be free to play its proper role as arbiter in the peaceful settlement of the international differences among nations. Only as the peoples of the community of nations have access to uncensored information and are able to express their thoughts and feelings without fear, can world opinion exercise its influence toward peace and cooperation.

V.	The American Position	6
	Appendix: Resolution of the General Assembly of the United Nations, December 14, 1946, on the Calling of an International Conference on Freedom of Information	8

I. The Meaning of Freedom of Information

The rights and privileges which together constitute freedom of information are difficult to specify with any degree of conclusiveness. Agreement has never been reached upon a definitive enumeration of them, and they are not yet fully recognized in statutory or international law.

The elements of freedom of information may be classified in various ways, such as domestic rights and international rights; legal, enforceable rights and moral rights; and the rights of the public, of journalists, and of the media of mass communication. If the last of these is taken as an illustration, freedom of information may be regarded as including - in the American view - certain rights, namely:

(1) of the public, primarily the right to receive information and the moral claim to be comprehensively informed on the basis of full news coverage;

(2) of reporters and other writers, especially the right to gather and report information; and

(3) of the media of mass communication (such as newspapers, radio stations, and the motion-picture industry), particularly the right to acquire and disseminate information.

According to the American outlook, members of the public should enjoy the right to receive and read printed materials originating at home or abroad, to listen to domestic or foreign broadcasts, to view films produced domestically or in foreign countries, and to proclaim views orally or in writing on political and other subjects. These freedoms are based on the general premise that the public has a moral right to receive and to disseminate information on all sides of controversial issues.

The freedoms applying especially to journalists include, in the American view, the opportunity (subject to laws and regulations aimed at preserving national security) to enter all countries, to travel within them, to have nondiscriminatory access to sources of information, to gather information, to transmit information by telecommunication and by mail without censorship, and to leave without molestation.

The media of mass communication, including the press, radio, and screen, should have the right to acquire information by sending correspondents and photographers to the sources of domestic and international news; to receive dispatches, scripts, and other informational materials originating at home and abroad; to produce and distribute publications and films (freely at home and without undue restrictions in foreign countries); to exhibit films both domestic and foreign; to stage and exhibit plays; and to produce and broadcast radio programs. These privileges imply a corresponding moral obligation to present news comprehensively and without distortion, in order that the public may be adequately informed.

Although all the cherished rights which have been mentioned are inherent in the concept of freedom of information, they are nevertheless subject to certain limitations. Questions naturally arise as to what limitations are proper. In the traditional as well as current answers to these questions, there is general assent to the proposition that restrictions may be imposed upon freedom of information in the interest of military security, public order, public morals, and prevention of libel. Wide disagreement exists, however, particularly between countries, regarding specific restrictions within these accepted categories.

II. Origin and Purpose of the Conference

Of the "four freedoms" enunciated by Franklin D. Roosevelt on January 6, 1941, the first was "freedom of speech and expression - everywhere in the world." This freedom was discussed at the San Francisco Conference of 1945 which drew up the Charter of the United Nations. Although the Charter refers in various articles to the promotion of human rights and freedoms, without specific allusion to freedom of information, the Chairman of the United States Delegation, Secretary of State Edward R. Stettinius, Jr., reported his understanding that these references were intended to cover freedom of information.

A conference on the subject was first proposed by the Delegation of the Philippine Commonwealth to the General Assembly of the United Nations, which presented a draft resolution early in 1946 concerning the calling of an "International Press Conference". The resolution was received too late to be included in the agenda for the First Part of the First Session of the General Assembly, but on February 9, 1946 the Assembly voted to place the question upon the agenda for the Second Part of the First Session, to be held that fall in New York.

At the autumn meeting the Delegation of the Philippine Republic submitted a new draft resolution authorizing a conference of all members of the United Nations on freedom of information. In discussing this resolution, the representative of the Philippine Republic in the General Assembly's Third Committee, which had the resolution under consideration, explained that his Delegation had proposed the new resolution because it believed that radio and motion pictures must be considered along with the press in dealing with freedom of information.

The resolution, with a slight change in form but not in substance, was unanimously adopted by the General Assembly at its plenary session of December 14, 1946.[1] It declares that freedom of information "is a fundamental human

---

[1]For the text of the resolution, see the appendix at the end of this fact sheet.

right and is the touchstone of all the freedoms to which the United Nations is consecrated". Implying "the right to gather, transmit and publish news anywhere and everywhere without fetters", freedom of information - according to the resolution - "is an essential factor in any serious effort to promote the peace and progress of the world". It requires, however, "as a basic discipline the moral obligation to seek the facts without prejudice and to spread knowledge without malicious intent". The resolution further states that "Understanding and co-operation among nations are impossible without an alert and sound world opinion which, in turn, is wholly dependent upon freedom of information".

The resolution concluded with an authorization for an international Conference on Freedom of Information and an instruction to the Economic and Social Council to undertake its convocation in accordance with certain guiding principles, the chief of which was that the purpose of the Conference "shall be to formulate its views concerning the rights, obligations and practices which should be included in the concept of the freedom of information".

III. Highlights of the Provisional Agenda

The provisional agenda of the Conference was prepared by an agency known as the Sub-Commission on Freedom of Information and of the Press, which is the latest link in the chain of organs established within the United Nations to deal with proposals, to make decisions, and to take action concerning freedom of information. Beginning at the highest level, the other organs are the General Assembly, the Economic and Social Council, and the Commission on Human Rights.

The Sub-Commission devoted the greater part of its first session (May 19-June 4, 1947) to a discussion of the items to be included in the agenda of the forthcoming Geneva Conference. A far-reaching draft proposed by the United States member of the Sub-Commission, Professor Zechariah Chafee, Jr., of the Harvard Law School, was taken as the basis for discussion. Various proposals were discussed at length, comparatively few of the items on the agenda being placed there without a formal vote; and members more than once made specific demands that their views and reservations appear in the record of the meetings. It was agreed that no agenda item should be considered as expressing the view of the Sub-Commission on matters of substance, and that the items should be considered only as titles or topics upon which the Conference would be invited to reach its own conclusions. It was, however, the view of a substantial majority of the Sub-Commission that the provisional agenda which was adopted opened the way for wide and useful discussion of all the main points contained in the terms of reference of the Conference.

The Economic and Social Council on August 15, 1947 approved with modifications the draft agenda referred to it by the Sub-Commission. On November 17, 1947, the General Assembly approved the provisional agenda, after a strenuous effort had been made by the representative of the Soviet Union to obtain the insertion in the agenda of references to compulsory obligations of the press. The provisional agenda will become definitive upon adoption by the Conference.

As finally adopted, the provisional agenda calls first for a general discussion of the principles of freedom of information and next for consideration of four fundamental principles which the press, radio, and films as media of information should regard in performing their basic functions of gathering, transmitting, and disseminating news and information without fetters. These are:

1. To tell the truth without prejudice and to spread knowledge without malicious intent.

2. To facilitate the solution of the economic, social, and humanitarian problems of the world as a whole through the free interchange of information bearing on such problems.

3. To help promote respect for human rights and fundamental freedoms for all, without distinction as to race, sex, language, or religion, and to combat any ideologies whose nature could endanger these rights and freedoms.

4. To help maintain international peace and security through understanding and cooperation between peoples, and to combat forces which incite war, by removing bellicose influences from the media of information.

Among the specific problems on the provisional agenda is the topic "Measures to facilitate the gathering of information". This includes facilitating the entry, residence, movement, and travel of accredited news personnel; protecting them against arbitrary expulsion; permitting the widest possible access to news sources; and eliminating unreasonable or discriminatory taxes.

The Conference will also discuss "Measures to facilitate the international transmission of information". This topic covers the progressive elimination of peacetime censorship as it affects the international transmission of information, as well as recommendations for preferential telecommunication and postal treatment for news materials, nondiscriminatory transmission rates and services for foreign news agencies, alleviation of economic or commercial restriction on the importation of news material by all media, and prevention of such cartelization of news agencies as may endanger the freedom of the press.

"Measures concerning the free publication and reception of information" is an additional subject for Conference discussion. This will entail consideration of the restrictions imposed by governments on persons or groups wishing to receive and disseminate information, ideas, and opinions, and recommendation of means to increase the amount of domestic and international information available to all peoples and to improve the quality of information in the direction of greater accuracy, objectivity, comprehensiveness, and representative character.

A further item on the agenda is "Consideration of the drafting of a charter of rights and obligations of the media of information", including (1) a statement of the rights of these media and the means of safeguarding such rights through international agreements within the framework of the United Nations, and (2) a statement of the obligations of the media of information and the measures necessary to ensure the fulfilment of these obligations.

The Conference is also scheduled to discuss "Consideration of possible continuing machinery to promote the free flow of true information". According to the agenda, the functions of such machinery might include (1) receiving, considering, and reporting on complaints regarding false news, tendentious or defamatory campaigns, obstructions to the flow of information, and violations of any international conventions in this field; (2) suggesting changes in the provisions of such agreements, and publishing other recommendations on the question of freedom of information; (3) continuing study of the current performance of news agencies and other processes of international information; and (4) regulating the issuance of international professional cards for news personnel.

Finally, the provisional agenda provides for "Consideration of the problems involved in the establishment of governmental and semi-governmental information services in order to make information available in countries other than their own" and "Consideration of the possible modes of action by means of which the recommendations of the Conference can best be put into effect, whether by resolutions of the General Assembly, or by the adoption on the part of the individual states of appropriate laws, or other means".

IV. Organization of the Conference

Taking note of the recommendations of the Sub-Commission on Freedom of Information and of the Press, the Economic and Social Council decided on August 14 and 15, 1947 that the Conference (1) should be held at Geneva beginning March 23, 1948, and (2) should be guided by certain principles. These principles include the following:

That voting rights at the Conference shall be exercised only by members of the United Nations.

That in addition to members of the United Nations, the following nonmember States shall be invited to participate: Albania, Austria, Bulgaria, Eire, Finland, Hungary, Italy, Pakistan, Portugal, Rumania, Switzerland, Transjordan, and Yemen.

That certain specialized agencies, intergovernmental organizations, and nongovernmental organizations shall be invited to participate in the preparations for the Conference and to attend it. Among these are the International Labor Organization and the United Nations Educational, Scientific and Cultural Organization; the International Postal Union, the International Telecommunications Union, and the International Trade Organization (if brought into existence before the Conference); and the American Federation of Labor and the International Organization of Journalists.

That delegations to the Conference shall consist of not more than five delegates from each State, not more than five alternates, and advisers as required.

Among the papers which the Conference will have before it are (1) a memorandum to be prepared by the Secretary-General of the United Nations on the basis of replies to a questionnaire sent to participating governments regarding freedom of information in their respective countries, and (2) three documents adopted by the Sub-Commission on Freedom of Information and of the Press at its second session, namely, draft articles for inclusion in an International Declaration on Human Rights and an International Covenant on Human Rights (sponsored by the Human Rights Commission) and a tentative statement on the rights, obligations, and practices which should be included in the concept of freedom of information. The Sub-Commission also recommended that the Conference be apprized of the findings of UNESCO on the technical information needs of war-devastated areas.

V. The American Position

The first article in the "Bill of Rights" amendments to the Constitution of the United States provides in sweeping terms that "Congress shall make no law ... abridging freedom of speech, or of the press." Provisions safeguarding freedom of speech and of the press also appear in the Constitutions of all forty-eight of the States of the Union. These legal guarantees do not, however, apply to seditious utterances, obscene publications, or similar categories of expression which are likely to endanger national security, public order, public morals, or the reputations of individuals.

The question of the extent to which freedom of expression may properly be curbed in the interest of broader objectives has often been discussed in the United States. The Alien and Sedition Acts of 1798 (which expired in 1801) clearly went too far. The latter act made it a prison offense to utter or publish "false, scandalous and malicious" remarks about the Government of the United States, the President, or either House of Congress. The standard of judgment now commonly accepted in the United States was formulated by Justice Oliver Wendell Holmes in 1919. He held that prosecutions for seditious utterances are valid if the utterances constitute a "clear and present danger" to the safety of the country. A Federal law of 1940 explicily prohibits the spread of literature advocating violent overthrow of the Government.

In the international field, the United States has conducted negotiations both bilaterally and multilaterally in the effort to insure unhampered communication of knowledge. In 1944 both major political parties advocated, and Congress indicated its sympathy with, the promotion of freedom to report the news by international compact.

For example, the Treaty of Friendship, Commerce, and Navigation between the United States and Italy signed in February 1948 contains an article guaranteeing freedom of reporters to carry on their work and freedom of nationals of each country to publish in the territory of the other. This treaty will come into force upon the exchange of the ratifications by the two Governments. The United States proposes to include in similar Treaties of Friendship, Commerce, and Navigation to be negotiated with a number of other countries a provision relating to freedom of information. Other measures include (1) the rejection by the Department of State of protests of foreign governments against utterances made by private U.S. citizens and considered offensive by those governments; and (2) the stipulations incorporated in foreign-aid agreements that American reporters must have the privilege of reporting on the distribution of the aid.

Among the multilateral declarations in which the United States has participated with a view to promoting freedom of information are the articles guaranteeing that freedom in the Treaties of Peace with Italy and the lesser allies of Germany, the article on this subject in the agreed clauses of the proposed Austrian treaty, and the declarations of policy issued at Potsdam and elsewhere respecting the occupation and future of Germany and Japan. Pertinent resolutions were also adopted at the Mexico City Conference of 1945 on Problems of War and Peace and at other international meetings.

Outstanding, however, is the utilization of the various agencies of the United Nations to further the ideal of world-wide freedom of news and ideas. Representatives and nongovernmental experts of the United States have participated actively in the presentation and discussion of relevant proposals in the General Assembly, the Economic and Social Council, the Human Rights Commission, and the Sub-Commission on Freedom of Information and of the Press, as well as in the United Nations Educational, Scientific and Cultural Organization. At the forthcoming U.N. Conference on Freedom of Information and through other channels of the United Nations, the United States will seek solutions to the following problems among others:

1. Implementing the moral right of the people to be provided with comprehensive news coverage. For example, how may we ensure the receipt of unexpurgated reports from correspondents abroad? How may we obtain the privilege of sending correspondents abroad to places - in eastern Europe and elsewhere - from which the entire world wants more news? It should be remembered in this connection that the exclusion from the United States under the immigration law of those who advocate violent overthrow of the United States Government applies also to journalists who advocate such violent overthrow, unless they are officials of foreign governments or correspondents accredited to the United Nations.

2. Promoting the entry of periodicals, books, and films into countries where now such entry is hindered by political and economic obstacles, such as acknowledged and unacknowledged censorship, currency restrictions, quotas, etc.

3. Harmonizing the moral responsibility of the press with genuine freedom of the press. For example, how can the problem of so-called "war-mongering" be dealt with in democratic countries without destroying freedom of expression?

At the Geneva Conference and at other meetings, broad areas of international agreement will be mapped out and international machinery will be developed to give life and strength to real intellectual freedom.

Appendix

Resolution of the General Assembly of the United Nations, December 14, 1946, on the Calling of an International Conference on Freedom of Information

The General Assembly,

Whereas

Freedom of information is a fundamental human right and is the touchstone of all the freedoms to which the United Nations is consecrated;

Freedom of information implies the right to gather, transmit and publish news anywhere and everywhere without fetters. As such it is an essential factor in any serious effort to promote the peace and progress of the world;

Freedom of information requires as an indispensable element the willingness and capacity to employ its privileges without abuse. It requires as a basic discipline the moral obligation to seek the facts without prejudice and to spread knowledge without malicious intent;

Understanding and co-operation among nations are impossible without an alert and sound world opinion which, in turn, is wholly dependent upon freedom of information:

Resolves therefore, in the spirit of paragraphs 3 and 4 of Article 1 of the Charter, to authorize the holding of a conference of all Members of the United Nations on freedom of information;

Instructs the Economic and Social Council to undertake, pursuant to Article 60 and Article 62, paragraph 4, of the Charter, the convocation of such a conference in accordance with the following guiding principles:

(a) The purpose of the Conference shall be to formulate its views concerning the rights, obligations and practices which should be included in the concept of the freedom of information;

(b) Delegations to the Conference shall include in each instance persons actually engaged or experienced in press, radio, motion pictures and other media for the dissemination of information;

(c) The Conference shall be held before the end of 1947,[1] at such place as may be determined by the Economic and Social Council, in order to enable the Council to submit a report on the deliberations and recommendations of the Conference to the following regular session of the General Assembly.

---

[1]The decision to change the date of the Conference to 1948 was approved by the General Assembly on November 17, 1947.

37-UN-Conf on Freedom of Info-1948

DEPARTMENT OF STATE

Washington, D.C.

March 25, 1948

Dear Organization Leader:

It is a pleasure to send to you a review of the proceedings of the Conference on Human Rights and Freedom of Information which was held at the Department of State in Washington, D.C. on March 4, 1948. The review includes the addresses made at the General Sessions of the Conference and summaries of the Round Table Discussions which were presented at the final session. The list of organizations represented and persons who attended is also enclosed for your information.

Complete transcripts of the proceedings of the Conference are already in the hands of officers of the Department of State who are dealing with the problems involved in international human rights and freedom of information.

May I assure you that the contributions of American organizations are deeply appreciated by the Department of State and that they are being given careful consideration.

Sincerely yours,

Margaret R. T. Carter

Margaret R. T. Carter
Chief
Division of Public Liaison

CONFERENCE ON HUMAN RIGHTS AND FREEDOM OF INFORMATION

New State Department Building, Room 5105
March 4, 1948 - 10:15 a.m.

Group III - IMPLEMENTATION OF HUMAN RIGHTS:
GENEVA DEVELOPMENTS

AGENDA

1. Who should be entitled to complain of violations of the Covenant?
   - States parties to the Covenant?
   - States not parties to the Covenant?
   - Individuals?

2. How serious should an alleged non-compliance be in order to serve as a violation under the Covenant?

3. Should there be any implementation machinery provided in the Covenant?

4. If so, what should the machinery be?
   - International Court of Human Rights
   - International Court of Justice
   - Security Council
   - General Assembly, Economic and Social Council, Commission on Human Rights
   - Committees of arbitration
   - Committees of conciliation and mediation
   - If committees are used, who should choose them? Who should service them?

5. What force should the recommendations of any of these bodies have?

Panel: Mr. Durward V. Sandifer, Special Deputy Director, Office of United Nations Affairs, Department of State
Miss Dorothy Fosdick, Foreign Affairs Specialist, Office of European Affairs, Department of State
Miss Marjorie M. Whiteman, Assistant to the Legal Adviser, Department of State
Mr. James Simsarian, Specia t, Division of International Organization A irs, Department of State

Reporter: Miss Marjorie M. Whiteman

Discussion Leader: Mr. Harry W. Seamans, Information and Liaison Officer, Division of Public Liaison, Department of State

37- United nations - Conf. on Freedom of Information, 1948

DEPARTMENT OF STATE

FOR THE PRESS

MARCH 25, 1948
No. 231

OPENING SPEECH BY THE HONORABLE WILLIAM BENTON, CHAIRMAN OF THE UNITED STATES DELEGATION TO THE FREEDOM OF INFORMATION CONFERENCE IN GENEVA, MARCH 25, 1948

"The Word is Freedom"

There are some occasions in man's slow progress toward ultimate knowledge when it is possible to say: Here is a landmark, here we learned a fundamental truth. This first United Nations conference on freedom of information and the press can become such an occasion. The fact that we are here at all proves that men have perceived the essential connection between freedom of expression and human dignity. The fact that we are here is evidence that men everywhere have learned that there is an essential connection between freedom of information within states and peace between states. Our work here at the call of the United Nations is testimony to our belief that, if world freedom of expression can be achieved, men everywhere can learn to live in dignity and peace. There are some who will say that this hour of crisis is not the time for the United Nations to have called this conference. Some will say that in these dangerous and troubled times, when men are dying from hunger, when nations are losing their independence and when elemental fear for personal and national security so harasses mankind, some will say that in such times freedom of information is a luxury and that peoples and nations cannot afford it. My delegation does not share this view. It avows that in such times as these, the times that try men's souls, it is imperative to give top priority to the safeguarding of freedom of information. These are indeed most propitious times for this conference dedicated to the defense of this fundamental freedom.

Freedom of expression is unique among the liberties and goods known to man for it protects and promotes the other freedoms that create a free society of happy men. Where men cannot without hindrance convey their thoughts to one another, no other liberty is secure. Where freedom of information between peoples and states is denied, peace itself can never be secure. Thus in seeking freedom of information we are not operating at the periphery of the work of the United Nations; on the contrary, we are operating at the very heart of the problem of the dignity of man and of peace among nations.

Of what

Of what does the dignity of man consist? It consists first of all of adequate food, clothing, shelter and the opportunity to provide these by man's own labor. Realizing this, we in the United States are today preparing to undertake heavy sacrifices through the European recovery program and other measures to play our part in helping men and nations to achieve economic well-being. But human dignity demands far more than the satisfaction of physical needs, it demands that man be free. It is man's mind that distinguishes him from the beasts of the field and it is his mind that allows him to make progress toward ultimate knowledge and ultimate goodness. But if his mind is to develop, it must be free to think, it must be freely informed, it must be free to express itself without fear of penalty or punishment.

The policy of the United States today is to help build a world in which man's mind can be free, the kind of world in which man can walk upright and unafraid in the image of God. For this reason we from the United States are vitally concerned with freedom of information. It is the bedrock foundation of man's freedom on this earth. That there will always be difference of view and thus differences between men and nations can hardly be denied, but I think that we reject our birthright as members of the human race if we do not also agree that it is possible to lift such conflict from the plane of violence and brute force to the plane of discussion and free choice. The attempt to regiment man's thoughts, to stifle his words, this is the basest denial of his dignity. However elaborate or tortured the dialectic which defends such practices, the real premise upon which they are based is clear, it is disbelief in the intelligence and capacity of man.

We of the American Delegation start from the opposite premise; we believe that the masses of mankind as well as the elite can be trusted to distinguish between right and wrong, between true and false, if given access to the facts they need to make the choice. Etched in the memory of all of us who have lived through the melancholy events of the past 30 years is the grim three-step sequence of dictatorship, control of expression and aggressive war. Time after time we saw this dreadful pattern unfold before our eyes: Seizure of power within a nation by a minority group; the creation of a police state; institution of speech control, press control, thought control; erection of censorship walls; liquidation of all opposition. Then an all-out armament program accompanied by a vicious propaganda campaign of hate and fear against other countries carried on behind self-created walls of ignorance and finally the marching of armies, the roar of the guns and the sudden death of men and states.

Those of us who have not been deprived of our right to think have come to some conclusions about war. We have observed that where people have the right fully to be informed and to express their opinions, freely to choose their rulers and to determine national policies, in those countries it would be difficult if not impossible to lead the people into an aggressive war. We have concluded that, if we are to have lasting peace in the world, freedom of information must be sought in all countries. The time may be long but we must never waver in our pursuit of the goal. We must all of us be humble in our admission that we have much to learn but we must be firm in our adherence to basic principles of freedom.

Therefore,

Therefore the primary concern of this conference should be to make progress towards these three ultimate objectives:

1. Mutual guarantees by states that their citizens will be given full access to internal and external sources of information;

2. Mutual guarantees by states that their citizens will be accorded such freedom of internal expression that their views freely expressed may have full opportunity to influence the acts of their governments; and finally

3. Limitations upon the power of any state so to restrict or intimidate accredited foreign correspondents or so to censor their reports that other countries cannot obtain the truth about what is going on in that country.

Especially because of our new feeling of responsibility in world affairs, we, the people of the United States, want to learn the truth about what is happening in all the countries of the world. Similarly we want the people in all countries of the world to know the truth about what is happening in the United States. Thus we seek the widest possible two-way flow of news and information between the United States and every other country. We feel that the world's security demands it and that our happiness and prosperity depend upon it.

In hope of making progress toward these ends the United States at this conference will seek international agreement covering the gathering and transmission of news across national boundaries free from arbitrary national restraints. We shall support all resolutions fostering the rights of people and of information agencies in all states to receive, publish, broadcast or otherwise transmit news and information from all possible sources. We shall hope to examine with you all suitable ways to develop your and our technical facilities, press, radio and other, so that the access of your and our peoples to more sources of information can be expanded. Finally we shall seek the inclusion in the proposed United Nations declaration and covenant on human rights of the most vigorous provisions supporting freedom of expression.

I would be less than candid however if I did not concede the possibility that this conference may not reach substantial agreement on any large part of its agenda. The subject we are to consider here is so vast and cuts so deeply into the present day realities of politics that it may not now be possible to reconcile some national positions. Even if this conference adjourned without general agreement on one single resolution, we from the United States shall not feel that the conference has been in vain. We shall feel that our work here has justified all our efforts if the conference succeeds in clarifying the use of some of the noble words and expressions which have been subject to such reckless abuse. We shall feel that our work is justified if we succeed in defining more sharply some of the principles involved and in making clear their relation to peace and the good life.

There are grave dangers implicit in attempting to reach unanimous agreement in this new and unfamiliar area for international conferences. This is no conference about money or

wheat

wheat or radio frequencies where divergent viewpoints must and should be compromised. This is a conference about principles essential to free men. It is thus far better for us here to build slowly for the future on the bedrock of principle maintained than to build faster on the shifting sands of principle compromised.

We shall not get very far here at Geneva before we run head-on into the question of responsibility in the exercise of freedom of information. Ever since kings confiscated handpresses operated by men who challenged rule by divine right, confiscating them on the ground that their pamphlets were disturbing public order; ever since medieval times the rulers and exploiters of the people have raised the cry of responsibility when they wished to destroy freedom. The issue of freedom versus responsibility is therefore nothing new throughout the centuries. It has been the issue of the rights of the people against the power of tyrants, the rights of the governed against their governors. Monarchs, dictators and autocrats have always tried to hamstring the press with legal obligations of responsibility.

For centuries philosophers have argued about the moral obligations of responsibility that must necessarily accompany freedom in any field. But peoples who have at great cost achieved democratic self-government, while accepting the moral obligations that accompany freedom, have always guarded freedom of expression with special jealousy for they know that any power capable of enforcing responsibility is also capable of destroying freedom. They have observed that freedom of information achieves reality only if they set rigid limits upon the power of their governments to regulate, control or suppress the voice of the people or of the press.

The United States of course recognizes that in any free society there are elements which exercise their freedom irresponsibly. However, we refuse to risk the destruction of the very foundation of all our liberties simply because a few irresponsible elements abuse their freedom. The United States thus holds that freedom of expression is the moral right of all men.

It holds further that it should be the legal right of all men. We do not however claim that the moral right of free public discussion is unconditional. It carries with it the moral duty to seek the truth. It does not carry with it the moral right to be irresponsibly in error. It does not carry with it the right for any owner or editor to use the lie as a deliberate instrument of policy. Further in certain limited recognized fields we approve of legal remedies for irresponsibility as in cases of libel, misbranding, obscenity, direct incitement to riot and sedition in case of clear and present danger. Except in these limited fields redress for irresponsibility must come through moral, social and competitive pressures which grow through the exercise of freedom.

The United States will therefore support at this conference as the surest and most promising remedies all measures designed to guarantee to peoples in all countries access to the widest variety of information. Where freedom and diversity prevail, responsibility tends to develop naturally. There are other and secondary ways to promote responsibility and these the United States will also propose or support. These include the encouragement of the development of organizations of

journalists

journalists with self-regulatory codes of ethics, the training of journalists at an advanced level and the setting up of continuing procedures by the United Nations for studying information agencies and for investigating the barriers to the free flow of information. We know full well the risks involved in relying upon freedom to correct the abuses of freedom but the risks in depending upon artificial controls to cure irresponsibility are infinitely greater. In fact they destroy freedom itself.

Here I should like to try to make quite clear the difference between the real issue of responsibility of the press and the spurious one. I am not prepared to defend every aspect of the American press. We in the United States know it has its faults which we hope will be corrected in time. I think, however, that most of you will agree that the charges against our press in the General Assembly of the United Nations last September were a political diversion, an offense as a form of defense, the purpose of which was political propaganda. The charges were loosely drawn. No effort was made to distinguish between a free press with its infinite variety of voices on the one hand and the monopoly voice of government with its one and powerful and often malignant voice on the other. Any effort to get at evils in this field should avoid the expression "war-mongering" which I'm told was hasty though powerful translation of the Russian phrase "inciters to war". Any effort in this field to promote peace should have directed charges against inciters to hatred of other peoples and these charges should have been directed also at governments which make incitement to hatred a deliberate matter of policy. The finger should have pointed east to the official lie rather than west to the free press.

There has thus unhappily been injected into this conference, which was originally called to consider ways and means for removing the barriers to freedom of information, the question of the adoption of measures, and I quote the words, "to combat the diffusion of false or distorted reports likely to injure friendly relations between states". This is a danger area for this conference. Instead of discussing more freedom we may find ourselves discussing new restrictions. At this conference we must face squarely the fact that freedom of information and of the press are not soothing salves. Rather they operate as corrective remedies. They operate to bring things out in the open. This is often most unpleasant medicine.

If a state is engaged in expansionist acts that cause other states to fear for their own security, then freedom of information and international understanding are instruments through which the news and the alarm is spread. The result may be indignation in other countries, preparations for defense protests and even talk about the probability of war. But it is surely a fantastic perversion of the truth to call such reactions or the news reports that create them slander or war-mongering. It is the original acts, it is the fear creating acts of governments that produce fear and all the reactions of fear. These are what lead to war.

Freedom to call a spade a spade, freedom to call expansion and aggression by their proper names, these are not causes of war. On the contrary they operate to discourage war. They can marshal the opinion of the people of the world

so that

so that the potential aggressor nation may be brought to its senses. The best cure for war-mongering or false reports remains as it has always been, a multiplicity of sources of information available to the public. The most vicious accomplice of war-mongering and false reports, as always, is a monopoly of information whether private or governmental. This is another way of saying that the more air tight the monopoly of information is in any country the more it becomes a monopoly of misinformation.

Finally, I hope it is not necessary for me to urge this conference to look to motives when it considers where unhappy compromises will inevitably lead. I urge this conference steadfastly to keep to its real objective which is action to remove barriers to freedom of information and the press. A few days ago President Truman made his historic address to a Joint Session of our Congress. The President spoke of the tragic death of the Republic of Czechoslovakia only four weeks ago and within five hundred miles of this place freedom died in that unhappy country. We saw it die as we have seen it die in a number of other countries not far away. The pattern is now all too familiar.

These cruel events should dispel whatever fog may have remained over the essential connection between freedom of information, the dignity of man and the maintenance of peaceful relations between states; for these acts in Czechoslovakia have struck terror to the hearts of all people throughout the world who value the dignity and freedom of their persons, the freedom of their consciences and the independence of their country.

It is the task of this conference to lay a foundation for the growth of freedom throughout the entire world. It is our task here to erect new and stronger defenses to freedom of expression wherever in the world it still guards the dignity of man and the peace and independence of nations.

FINAL ACT

OF

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

F I N A L A C T
of the
UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

1. Pursuant to Resolution 74 of the Fifth Session of the Economic and Social Council, the United Nations Conference on Freedom of Information met at the European Headquarters of the United Nations, Geneva, Switzerland, during the period from 23 March to 21 April 1948.

2. Delegations representing the following Governments attended the Conference:

1. Afghanistan
2. Albania
3. Argentina
4. Australia
5. Austria
6. Belgium
7. Brazil
8. Bulgaria
9. Byelorussian Soviet Socialist Republic
10. Canada
11. Chile
12. China
13. Colombia
14. Costa Rica
15. Cuba
16. Czechoslovakia
17. Denmark
18. Dominican Republic
19. Ecuador
20. Egypt
21. El Salvador
22. Ethiopia
23. Finland
24. France
25. Greece
26. Guatemala
27. Hungary
28. India
29. Italy
30. Lebanon
31. Luxembourg
32. Mexico
33. Netherlands
34. New Zealand
35. Nicaragua
36. Norway
37. Pakistan
38. Panama
39. Peru
40. Philippines
41. Poland
42. Portugal
43. Roumania
44. Sweden
45. Switzerland
46. Turkey
47. Ukrainian Soviet Socialist Republic
48. Union of South Africa
49. Union of Soviet Socialist Republics
50. United Kingdom
51. United States of America
52. Uruguay
53. Venezuela
54. Yugoslavia

Observers representing the following governments attended:

BOLIVIA IRAN IRELAND

Observers and Consultants from the following Organizations attended:

Inter-Governmental:

International Labour Officer.
International Telecommunications Union.
United Nations Educational, Scientific and Cultural Organization.

Non-Governmental:

International Cooperative Alliance.
International Organization of Industrial Employers.
International Organization of Journalists.
Inter-Parliamentary Union.
World Federation of United Nations Associations.

3. The Conference elected Ambassador Carlos P. ROMULO (The Philippines) as President. Delegates representing the following countries were elected Vice-Presidents: Canada, China, Cuba, France, the Union of Soviet Socialist Republics, the United Kingdom and the United States of America.

4. The Conference adopted as its Agenda the Provisional Agenda proposed by the Economic and Social Council with the addition of the two Resolutions referred to the Conference by the General Assembly, on Measures to be Taken Against Propaganda and the Inciters of a New War and False or Distorted Reports; and two proposals made by the International Organization of Journalists.

5. The Conference adopted as its Rules of Procedure the Draft Rules of Procedure prepared by the Secretary-General at the request of the Economic and Social Council. When challenged, the decision of the Council that voting rights at the Conference be exercised only by Members of the United Nations was reaffirmed.

6. The Conference set up the following Committees:

(a) a General Committee (Bureau), comprising the President of the Conference, the Vice-Presidents, and the Chairmen of the four principal committees;

(b) four principal committees upon which each delegation was invited to be represented:

(i) Committee I, on the basic tasks of the press and other media of information, and the basic principles of freedom of information, as well as general problems common to other committees.

This Committee held thirty-one meetings. Dr. G. J. van Heuven GOEDHART (the Netherlands) was elected Chairman; Mr. Franco ROSSI (Uruguay), Vice-Chairman; and Mr. Nihat ERIM (Turkey), Rapporteur.

(II) Committee II, on the gathering and international transmission of information.

This Committee held twenty-two meetings. Dr. Vladislav RIBNIKAR (Yugoslavia) was elected Chairman; Mr. Jamil MIKAOUI (Lebanon), Vice-Chairman; and Mr. Sven DAHLMAN (Sweden), Rapporteur.

(iii) Committee III, on the free publication and reception of information.

This Committee held eighteen meetings. Dr. Raul NORIEGA (Mexico) was elected Chairman; Mr. Christian CHRISTENSEN (Norway), Vice-Chairman; and Mr. S. M. IKRAM (Pakistan), Rapporteur.

(iv) Committee IV, on law and continuing machinery.

This Committee held twenty-seven meetings. Sir Ramaswami MUDALIAR (India) was elected Chairman; Mr. Alexei ROMANOV (Byelorussian S. S. R.), Vice-Chairman; and Professor Fernand DEHOUSSE (Belgium), Rapporteur.

(c) A Committee on Credentials, comprising the Representatives of Argentina, Australia, Belgium, the Byelorussian Soviet Socialist Republic, Czechoslovakia, Denmark, Egypt, Pakistan and Venezuela, of which Mr. Emilio D. CIPOLETTI (Argentina) was elected Chairman and Rapporteur. This Committee held three meetings, and reported to the Conference on the credentials of the Representatives.

7. The Conference resolved:

(i). That all documents passed by the Conference, Resolutions or Draft Conventions, be referred to the Economic and Social Council for study at its next session;

(ii). That all Governments invited to this Conference be requested to forward to the Secretary-General of the United Nations before 5 July 1948 their comments on the Draft Conventions proposed by the Conference and proposals for other

Draft Conventions based on the recommendations of this Conference;

(iii). That the Economic and Social Council be requested to examine, at its Seventh Session, the Draft Conventions referred to it by the Conference, in the light of such comments and other proposed Draft Conventions as provided in paragraph 2; and to submit to the General Assembly, at its third session, Draft Conventions which may thereafter be opened at that session for signature or accession by those States entitled and willing to become parties thereto and remain open subsequently for additional accessions.

8. On the basis of the deliberations of the Conference and its committees, as recorded in the records and reports of the plenary meetings and the meetings of the respective committees, the Conference prepared and forwarded to the Economic and Social Council the Draft Conventions referred to above, which are appended to this Final Act as Annex A.

9. At the request of the Economic and Social Council, the Conference also prepared draft articles for the Draft Declaration on Human Rights and the Draft Covenant on Human Rights. These draft articles are appended to this Final Act as Annex B.

10. In addition, the Conference adopted the resolutions which are appended to this Final Act as Annex C.

11. The Conference authorized its Executive Secretary to bring this Final Act to the attention of the Economic and Social Council.

12. IN WITNESS WHEREOF the President and the Executive Secretary of the Conference have signed this Final Act in the English and French languages, in the City of Geneva, this 22nd day of April 1948, each text being equally authentic. Texts in the five official languages of the United Nations will be deposited with the Secretary-General of the United Nations who will send certified copies to each of the Governments invited to send Representatives to the Conference.

The President of the Conference:

(SIGNED) CARLOS P. ROMULO

The Executive Secretary of the Conference:

(SIGNED) JOHN P. HUMPHREY

ANNEX A

DRAFT CONVENTIONS

I. DRAFT CONVENTION ON THE GATHERING AND INTERNATIONAL TRANSMISSION OF NEWS.

THE CONTRACTING STATES,
DESIRING to implement the right of their peoples to be fully informed,
DESIRING to improve understanding between their peoples through the free flow of information and opinion,
HAVING RESOLVED to conclude a Convention for this purpose,
HAVE AGREED As follows:

Article 1

For the purposes of the present Convention, the following expressions are to be understood in the sense hereinafter defined.

A. Information Agency

A press, radio or film organization, whether public or private, created or organized under the applicable laws and regulations within the territories of a Contracting State, regularly engaged in the collection and dissemination of news (including opinion) to the public, including press associations, news feature services, newspapers, periodicals, radio and television broadcasting organizations, and newsreel companies.

B. Foreign Correspondent

An individual employed by an information agency, or a national of a Contracting State, who in either case is regularly engaged in the collection and reporting of news (including opinion) to the general public, and who is the holder of a valid passport identifying him as a correspondent or of a similar document internationally accepted identifying him as such.

C. News Material

All news material, whether of information or opinion, and whether visual or auditory, for public dissemination.

Article 2

In order to encourage the freest possible movement of foreign correspondents in the performance of their functions, the Contracting States shall expedite, in a manner consistent with their respective laws and procedures, the administrative measures necessary for the entry, residence, move ment and travel of foreign correspondents, together with their professional equipment, and shall impose no special, discriminatory or unusual restrictions on such ingress or ogress, nor upon the transit through or residence in their territories of such correspondents.

Article 3

The Contracting States shall permit and encourage the widest possible access to news, official and non-official, for all foreign correspondents on the same basis as for national correspondents and shall not discriminate among foreign correspondents as regards such access.

Article 4

The Contracting States shall permit ogress from their territory of all news material of foreign correspondents and foreign information agencies without censorship, editing or delay; provided that each of the Contracting States may make and enforce regulations relating directly to the maintenance of national military security. Such regulations must, however, be communicated to foreign correspondents and apply equally to all foreign correspondents and foreign information agencies.

If the requirements of national military security should compel a Contracting State, in peace-time, to establish censorship for a certain period of time, it shall:

(1) establish in advance such categories of news material for the use of an information agency in another country as are subject to previous inspection and publish the directives of the censor announcing forbidden matters;

(2) carry out censorship as far as possible in the presence of the foreign correspondent;

(3) where censorship in the presence of the person concerned is not possible:

(a) fix the time-limit allowed the censors for the return of the news material;

(b) require the return of news material submitted for censorship direct to the foreign correspondent or foreign information agency so that they may know at once what has been censored in their text and what use they may make of the censored information;

(c) base the charge on the number of words composing a telegram after censorship;

(d) return the total telegraph charges for telegrams submitted for censorship, the transmission of which has been delayed more than six hours.

Article 5

The Contracting States, while recognizing that foreign correspondents must conform to the laws in force in the countries in which they are operating, agree that foreign correspondents legally admitted into their territories shall not be expelled on account of any lawful exercise of their right to seek, receive or impart information or opinion.

Article 6

The Contracting States agree that foreign correspondents shall have access to all facilities generally and publicly used for the international transmission of news material and may transmit news material from one country to another on the same basis and at the same rates applicable to all other users of such facilities for similar purposes.

Article 7

Each of the Contracting States agrees to permit all news material of foreign correspondents and information agencies of the other Contracting States to enter its territory and reach information agencies operating therein on the same conditions as are accorded to any other foreign information agencies.

Article 8

Nothing herein contained shall be construed as depriving any Contracting State of its right to make and enforce regulations prohibiting obscene news material.

Article 9

The present Convention shall not apply to foreign correspondents who, while not otherwise admissible under Article 2 into the territory of a Contracting State, are nevertheless admitted conditionally in accordance with an agreement between that Contracting State and the United Nations, or a Specialized Agency thereof, in order to cover its proceedings, or pursuant to a special arrangement made by the Contracting State in order to facilitate the entry of such correspondents.

Article 10

Nothing herein contained shall be interpreted as exempting foreign correspondents or foreign information agencies from public laws and regulations promulgated by any Contracting State for the protection of national security.

Article 11

The present Convention shall be ratified on behalf of the States signatory hereto in conformity with their respective constitutional procedures. The instruments of ratification shall be deposited with the Secretary-General of the United Nations, who shall notify all signatory and acceding States of each such deposit.

Article 12

The present Convention shall remain open for accession of all States which are not signatories. Instruments of accession shall be deposited with the Secretary-General of the United Nations, who shall notify all signatory and acceding States of each such deposit.

Article 13

The present Convention shall come into force as soon as two states have deposited their respective instruments of ratification or accession. The Convention thereafter shall come into force with respect to each other State on the date of the deposit of its instrument of ratification or accession.

Article 14

(a) A State party to the present Convention may at the same time of its accession thereto or at any time thereafter by notification addressed to the Secretary-General of the United Nations declare that the present Convention shall extend to any of the territories for the international relations of which it is responsible, and the Convention shall extend to the territories named in the notification as from the thirtieth day after the date of receipt by the Secretary-General of the United Nations of the notification.

The respective Contracting States undertake to seek immediately the consent of the Governments of such territories to the application of the present Convention to such territories, and to accede forthwith on behalf of and in respect of each such territory, if and when its consent has been obtained.

(b) A State which has made a declaration under paragraph (a) above extending the present Convention may with the consent of the Government concerned at any time thereafter by notification to the Secretary-General of the United Nations declare that the Convention shall cease to extend to any territory named in the notification, and the Convention shall then cease to extend to such territory six months after the date of receipt by the Secretary-General of the United Nations of the notification.

Article 15

The present Convention shall remain in force indefinitely, but may be denounced by any Contracting State, by means of six months' notice in writing given to the Secretary-General of the United Nations, who shall

transmit a copy of the notice to each of the other Contracting States. After the expiration of this period of six months, the Convention shall cease in its effect as regards the State which denounces it, but shall remain in force for the remaining Contracting States.

IN WITNESS WHEREOF, the Plenipotentiaries of the respective States, being duly authorized thereto, have signed the present Convention.

DONE at _____ this _____ day of _____, 1948 in the _____ _____ _____ languages, each equally authentic, the original of which shall be deposited in the archives of the United Nations. The Secretary-General of the United Nations shall transmit certified copies thereof to all of the signatory and acceding States.

II. DRAFT CONVENTION CONCERNING THE INSTITUTION OF AN INTERNATIONAL RIGHT OF CORRECTION.

THE GOVERNMENTS PARTIES to the present Convention,

CONSIDERING the danger to the maintenance of friendly relations between peoples and to the preservation of peace, presented by the publication of inaccurate reports;

CONSIDERING that at its Second Session, the General Assembly of the United Nations recommended the adoption of measures designed to promote friendly relations among nations and to combat the dissemination of false or distorted reports likely to injure the friendly relations between States;

CONSIDERING, however, that it does not at present appear possible or desirable to envisage the institution on the international level of a procedure for verifying the accuracy of a report such as might lead to the imposition of penalties for the publication of false or distorted reports;

CONSIDERING, moreover, that to prevent the publication of false or distorted news or to reduce its pernicious effects, it is above all necessary to sharpen the sense of responsibility of the various media of information and to promote the wide circulation of news;

That an effective means to this end is to give all those directly affected by a report which they consider false or distorted and which is spread by an organ of information the possibility of ensuring commensurate publicity for their corrections or replies; that the right of reply or correction had been embodied in the legislation of a large number of States and that its legitimacy is recognised in the Draft of Article 17 of the Covenant on Human Rights which the Sub-Commission on Freedom of Information and of the Press decided, at its Second Session, to recommend to the Commission on Human Rights; that failing the adoption, by all States, in their own legislation, of a like right available to foreign nationals under the same conditions as to their own nationals, it is particularly desirable to institute on the international level a right of correction; that it is necessary, however, in order to prevent any abuse, strictly to define the extent of the right of correction, and clearly to specify the conditions for its exercise;

HAVE ADOPTED the following Articles:

Article 1

In cases where a Contracting State alleges that news reports likely to injure its relations with other States transmitted from one country to another country by foreign correspondents or by news agencies and disseminated abroad, are false or distorted, it may submit its version of the facts (hereinafter called "communique") to the Contracting States within whose territories such reports have been published in one or more newspapers or periodicals or disseminated by radio. Such communique may be issued only with respect to news reports and must be without comment or expression of opinion. As far as possible the communique should not contain a larger number of words than the news report objected to, and in no case more than double the number of words in the news report to be corrected. The communique must be accompanied by a verbatim text of the report as published or disseminated, and by evidence that the report objected to has been transmitted from one country to another by a foreign correspondent or by a news agency.

Article 2

1. Any Government of a Contracting State receiving such a communique shall, whatever be its opinion concerning the facts in question, make available to the news enterprises functioning in the territory where it exercises its authority the communique of the Government exercising the right of correction and, within five clear days from the date of receiving this communique, shall facilitate its dissemination through customary channels in accordance with its procedure for releasing news concerning international affairs.

2. In the event of the failure of any Contracting State to discharge its obligation under this article with respect to the communiques of another Contracting State, the latter may discharge on the basis of reciprocity its obligation with respect to any communiqués thereafter submitted to it by the defaulting State.

Article 3

If any of the Contracting States to which this communique has been transmitted fails to fulfil, within the prescribed time-limit, the obligation laid down in the preceding article, the Government exercising the right of correction may submit the said communique to the Secretary-General of the United Nations

who shall, within five clear days from the receipt thereof, give it appropriate publicity. This paragraph shall come into force as soon as the General Assembly of the United Nations has instructed its Secretary-General to perform this duty.

Article 4

Every Contracting State may, to the extent strictly limited by the exigencies of the situation, derogate from its obligations under the present Convention.

(a) as long as a state of war or public emergency prevails in its own territory,

(b) as long as such a state prevails in the territory of one or other Contracting States, but only with regard to those States.

Article 5

Any dispute between any two or more Contracting States concerning the interpretation or application of the present Convention which is not settled by negotiations shall be referred to the International Court of Justice for decision unless the Contracting States agree to another mode of settlement.

Article 6

The present Convention shall be open for accession to every State invited to the United Nations Conference on Freedom of Information held at Geneva in March and April, 1948, and to every other State which the General Assembly of the United Nations shall, by resolution, declare to be eligible.

Accession shall be effected by the deposit of an instrument of accession with the Secretary-General of the United Nations.

Article 7

When any two of the States mentioned in Article 6 have deposited their instruments of accession, the present Convention shall come into force between them on the thirtieth day after the date of the deposit of the second instrument of accession. It shall come into force for each State which accedes after that date on the thirtieth day after the deposit of its instrument of accession.

Article 8

Any Contracting State may denounce the present Convention by notification of denunciation to the Secretary-General of the

United Nations. Denunciation shall take effect six months after the date of receipt by the Secretary-General of the United Nations of the notification of denunciation.

Article 9

1. A State party to the present Convention may at the same time of its accession thereto or at any time thereafter by notification addressed to the Secretary-General of the United Nations declare that the present Convention shall extend to any of the territories for the international relations of which it is responsible, and the Convention shall extend to the territories named in the notification as from the thirtieth day after the date of receipt by the Secretary-General of the United Nations of the notification. The respective Contracting States undertake to seek immediately the consent of the Governments of such territories to the application of the present Convention to such territories, and to accede forthwith on behalf of and in respect of each such territory, if and when its consent has been obtained.

2. A State which has made a declaration under paragraph 1 above extending the present Convention may with the consent of the Government concerned at any time thereafter by notification to the Secretary-General of the United Nations declare that the Convention shall cease to extent to any territory named in the notification, and the Convention shall then cease to extend to such territory six months after the date of receipt by the Secretary-General of the United Nations of the notification.

Article 10

The Secretary-General of the United Nations shall notify each of the States referred to in Article 6 of the date of the deposit of every instrument of accession and of the date on which this Convention comes into force and of any information received by him in accordance with the provisions of article 5 and of every notification received by him in accordance with the provisions of Articles 7 or 8.

III. DRAFT CONVENTION ON FREEDOM OF INFORMATION

THE STATES PARTIES TO THIS CONVENTION,
CONSIDERING that the free interchange of information and opinions, both in the national and in the international sphere, is a fundamental human right and essential in the cause of peace and for the achievement of political, social and economic progress,
and
DESIRING to co-operate fully with one another to promote the peace and welfare of mankind by this means,
HAVE ACCEPTED the following provisions:

Article 1

Subject to the provisions of Articles 2, 4, 5 and 6 of this Convention,

a) each Contracting State shall secure to all its own nationals and to the nationals of every other Contracting State lawfully within its territory freedom to impart and receive information and opinions, orally, by written or printed matter, in the form of art, or by legally operated visual or auditory devices without governmental interference;

b) no Contracting State shall regulate or control the use or availability of any of the means of communication referred to in the preceding paragraph, in any manner discriminating against any of its own nationals or of the nationals of any other Contracting State on political or personal grounds or on the basis of race, sex, language or religion;

c) each Contracting State shall secure to all its own nationals and to the nationals of every other Contracting State, freedom to transmit and listen to information and opinions within its territories and across its frontiers by any legally operated means without governmental interference;

d) each Contracting State shall permit the nationals of other Contracting States as much freedom to seek information as it grants to its own nationals;

e) the Contracting States shall encourage and facilitate the interchange between their territories of those of their nationals engaged in the gathering of information and opinions for dissemination to the public and shall deal expeditiously with applications by such persons to enter their territories.

Article 2

1. The freedom referred to in Paragraphs (a), (c) and (d) of Article 1 carry with them duties and responsiblities and may therefore be subject to necessary penalties, liabilities and restrictions clearly defined by law, but only with regard to:

(a) matters which must remain secret in the interest of national safety;

(b) expressions which incite persons to alter by violence the system of government or which promote disorder;

(c) expressions which incite persons to commit criminal acts;

(d) expressions which are obscene or which are dangerous for youth and expressed in publications intended for them;

(e) expressions which are injurious to the fair conduct of legal proceedings;

(f) expressions which infringe literary or artistic rights;

(g) expressions about other persons, natural or legal, which defame their reputations or are otherwise injurious to them without benefiting the public;

(h) legal obligations resulting from professional, contractual or other legal relationships including disclosure of information received in confidence in a professional or official capacity;

(i) the prevention of fraud;

(j) the systematic diffusion of deliberately false or distorted reports which undermine friendly relations between peoples or States.

2. A Contracting State may establish on reasonable terms a right of reply or a similar corrective remedy.

Article 3

Each Contracting State shall encourage the establishment and functioning within its territory of one or more non-

official organizations of persons employed in the dissemination of information to the public, in order to promote the observance by such persons of high standards of professional conduct, and in particular:

(a) to report facts without prejudice and in their proper context and to make comments without malicious intent;
(b) to facilitate the solution of the economic, social and humanitarian problems of the world as a whole and the free interchange of information bearing on such problems;
(c) to help promote respect for human rights and fundamental freedoms without discrimination;
(d) to help maintain international peace and security;
(e) to counteract the persistent spreading of false or distorted reports which promote hatred or prejudice against States, persons or groups of different race, language, religion or philosophical conviction.

Article 4

Nothing in the present Convention shall affect the right of any Contracting State to take measures which it deems necessary in order:

(a) to bring its balance of payments into equilibrium;
(b) to develop its national news enterprises until such time as such news enterprises are fully developed;
(c) to prevent agreements in restraint of the free flow of information or the cartelization in regard to information;

provided that such measures may not be used as a means of preventing the entry of nationals of other Contracting States who are engaged in the gathering of information and opinions for dissemination to the public.

Article 5

Nothing in the present Convention shall prevent a Contracting State from reserving under its legislation to its own nationals the right to edit newspapers or news periodicals produced within its territory.

Article 6

Nothing in the present Convention shall limit the discretion of any Contracting State to refuse entry into its territory to any particular person, or to restrict the period of his residence thereon.

Article 7

As between the Contracting States which become parties to any general agreement on Human Rights sponsored by the United Nations and containing provisions relating to freedom of information, the present Convention shall be superseded by such agreement to the extent that the two instruments are inconsistent.

Article 8

In time of war or other public emergency a Contracting State may take measures derogating from its obligations under the present Convention to the extent strictly limited by the exigencies of the situation.

Any Contracting State availing itself of this right of derogation shall promptly inform the Secretary-General of the United Nations of the Measures which it has thus adopted and of the reasons therefor. It shall also inform him as and when the measures cease to operate.

Article 9

Any dispute between any two or more Contracting States concerning the interpretation or application of the present Convention which is not settled by negotiations shall be referred to the International Court of Justice for decision unless the Contracting States agree to another mode of settlement.

Article 10

1. The present Convention shall be open for accession to every State invited to the United Nations Conference on Freedom of Information held at Geneva in March and April, 1948, and to every other State which the General Assembly of the United Nations shall, by resolution, declare to be eligible.
2. Accession shall be effected by the deposit of an instrument of accession with the Secretary-General of the United Nations.

Article 11

When any two of the States mentioned in Article 10 have deposited their instruments of accession, the present Convention shall come into force between then on the thirtieth day after the date of the deposit of the second instrument of accession. It shall come into force for each State which accedes after that date on the thirtieth day after the deposit of its instrument of accession.

Article 12

Any Contracting State may denounce the present Convention by notification of denunciation to the Secretary-General of the United Nations. Denunciation shall take effect six months after the date of receipt of the Secretary-General of the United Nations of the notification of denunciation.

Article 13

(a) A State party to the present Convention may at the same time of its accession thereto or at any time thereafter by notification addressed to the Secretary-General of the United Nations declare that the present Convention shall extend to any of the territories for the international relations of which it is responsible, and the Convention shall extend to the territories named in the notification as from the thirtieth day after the date of receipt by the Secretary-General of the United Nations of the notification. The respective Contracting States undertake to seek immediately the consent of the Governments of such territories to the application of the present Convention to such territories, and to accede forthwith on behalf of and in respect of each such territory, if and when its consent has been obtained.

(b) A State which has made a declaration under paragraph (a) above extending the present Convention may with the consent of the Government concerned at any time thereafter by notification to the Secretary-General of the United Nations declare that the Convention shall cease to extend to any territory named in the notification, and the Convention shall then cease to extend to such territory six months after the date of receipt by the Secretary-General of the United Nations of the notification.

Article 14

The Secretary-General of the United Nations shall notify each of the States referred to in Article 10 of the date of the deposit of every instrument of accession and of the date on which this Convention comes into force and of any information received by him in accordance with the provisions of Article 11 and of every notification received by him in accordance with the provisions of Articles 12 or 13.

ANNEX B

DRAFT DECLARATION AND DRAFT COVENANT

ON HUMAN RIGHTS

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION,

HAVING CONSIDERED the resolution of the Economic and Social Council of 3 March 1948 referring to the Conference for its consideration and report Articles 17 and 18 of the Draft Declaration on Human Rights and Article 17 of the Draft Covenant on Human Rights with the recommendations of the Sub-Commission on Freedom of Information and of the Press,

IS OF THE OPINION that:

I. Articles 17 and 18 of the Declaration may be embodied in one Article as follows:

Everyone shall have the right to freedom of thought and expression; this right shall include freedom to hold opinions without interference and to seek, receive and impart information and ideas by any means and regardless of frontiers.

II. Article 17 of the Draft Covenant on Human Rights may be as follows:

1) Every person shall have the right to freedom of thought and the right to freedom of expression without interference by governmental action; these rights shall include freedom to hold opinions, to seek, receive and impart information and ideas, regardless of frontiers, either orally, by written or printed matter, in the form of art, or by legally operated visual or auditory devices.

2) The right to freedom of expression carries with it duties and responsibilities and may, therefore, be subject to penalties, liabilities or restrictions clearly defined by law, but only with regard to:

(a) matters which must remain secret in the interests of national safety;

(b) expressions which incite persons to alter by violence the system of Government;

(c) expressions which directly incite persons to commit criminal acts;

(d) expressions which are obscene;

(e) expressions injurious to the fair conduct of legal proceedings;

(f) infringements of literary or artistic rights;

(g) expressions about other persons natural or legal which defame their reputations or are otherwise injurious to them without benefiting the public;

(h) the systematic diffusion of deliberately false or distorted reports which undermine friendly relations between peoples and states;

A state may establish on reasonable terms a right of reply or a similar corrective remedy.

3) Measures shall be taken to promote the freedom of information through the elimination of political, economic, technical and other obstacles which are likely to hinder the free flow of information.

4) Nothing in this Article shall be deemed to affect the right of any State to control the entry of persons into its territory or the period of their residence therein.

III. THE CONFERENCE, having considered the above Articles of the Declaration and the Covenant, and the Second Report of the Sub-Commission,

IS OF THE OPINION that Article 17 of the Covenant is intended to apply to the freedom of expression of individuals as well as to the freedom of media of information and, considering there are particluar provisions in many sources of law which restrict the freedom of expression and information other than those permitted by the Draft Article 17 suggested above,

RESOLVES, that the problem created by the omission of such provisions be called to the attention of the Commission on Human Rights.

ANNEX C

RESOLUTIONS

CHAPTER I

GENERAL PRINCIPLES

Resolution No. 1

WHEREAS

Freedom of Information is a fundamental right of the people, and is the touchstone of all the freedoms to which the United Nations is dedicated, without which world peace cannot well be preserved; and

Freedom of information carries the right to gather, transmit, and disseminate news anywhere and everywhere without fetters; and

Freedom of information depends for its validity upon the availability to the people of a diversity of sources of news and of opinion; and

Freedom of information further depends upon the willingness of the press and other agencies of information to employ the privileges derived from the people without abuse, and to accept and comply with the obligation to seek the facts without prejudice and to spread knowledge without malicious intent; and

Freedom of information further depends upon the effective enforcement of recognized responsibilities,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION RESOLVES, THEREFORE,

1. That everyone shall have the right to freedom of thought and expression: this shall include freedom to hold opinions without interference; and to seek, receive and impart information and ideas by any means and regardless of frontiers;

2. That the right of news personnel to have the widest possible access to the sources of information, to travel unhampered in pursuit thereof, and to transmit copy without unreasonable or discriminatory limitations, should be guaranteed by action on the national and international plane;

3. That the exercise of these rights should be limited only by recognition of and respect for the rights of others, and the protection afforded by law to the freedom, welfare, and security of all;

4. That in order to prevent abuses of freedom of information, governments in so far as they are able should support measures which will help to improve the quality of information and to make a diversity of news and opinion available to the people;

5. That it is the moral obligation of the press and other agencies of information to seek the truth and report the facts, thereby contributing to the solution of the world's problems through the free interchange of information bearing on them, promoting respect for human rights and fundamental freedoms without discrimination, fostering understanding and co-operation between peoples, and helping maintain international peace and security;

6. That this moral obligation, under the spur of public opinion, can be advanced through organizations and associations of journalists and through individual news personnel;

7. That encouragement should be given to the establishment and to the functioning within the territory of a State of one or more non-official organizations of persons employed in the collection and dissemination of information to the public, and that such organization or organizations should encourage the fulfilment inter alia of the following obligations by all individuals or organizations engaged in the collection and dissemination of information;

(a) To report facts without prejudice and in their proper context and to make comments without malicious intent;

(b) To facilitate the solution of the economic, social and humanitarian problems of the world as a whole through the free interchange of information bearing on such problems;

(c) To help promote respect for human rights and fundamental freedoms without discrimination;

(d) To help maintain international peace and security;

(e) To counteract the spreading of intentionally false or distorted reports which promote hatred or prejudice against States, persons or groups of different race, language, religion or philosophical conviction;

8. That observance of the obligations of the press and other agencies of information, except those of a recognized legal nature, can also be effectively advanced by the people served by these instrumentalities, provided that news and opinion reach them through a diversity of sources and that the people have adequate means of obtaining and promoting a better performance from the press and other agencies of information.

Resolution No. 2

WHEREAS the peoples of the world have embodied in the United Nations their determination to protect mankind from the scourge of war and to prevent the recurrence of aggression from Nazi, Fascist, or any other source;

WHEREAS the attainment of a just and lasting peace depends in great degree upon the free flow of true and honest information to all peoples and upon the spirit of responsibility with which all personnel of the press and other agencies of information seek the truth and report the facts;

and WHEREAS, by inaccurate reports, by defective or distorted presentation and deliberate or malicious misinterpretation of facts in various parts of the world, peoples have been misled and their mutual understanding has been seriously endangered;

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

ENDORSES the resolutions of the second General Assembly on propaganda which is either designed or likely to provoke or encourage any threat to the peace, breach of the peace, or act of aggression, and on the spreading of false and distorted reports;

DECLARES that all such propaganda and such reports:

(a) are contrary to the purposes of the United Nations as defined in the Charter;

(b) constitute a problem of the first importance calling for urgent corrective action on the national and international planes;

CONDEMNS solemnly all propaganda either designed or likely to provoke or encourage any threat to the peace, breach of the peace, or act of aggression, and all distortion and falsification of news through whatever channels, private or governmental, since such activities can only promote misunderstanding and mistrust between the peoples of the world and thereby endanger the lasting peace which the United Nations is consecrated to maintain;

APPEALS vigorously to the personnel of the press and other agencies of information of all the countries of the world, and to those responsible for their activities, to serve the aims of friendship, understanding and peace by accomplishing their task in a spirit of accuracy, fairness and responsibility;

EXPRESSES its profound conviction that only organs of information in all countries of the world that are free to seek and to disseminate the truth, and thus to carry out their responsibility to the people, can greatly contribute to the counteracting of Nazi, Fascist or any other propaganda of agression or of racial, national and religious discrimination and to the prevention of recurrence of Nazi, Fascist, or any other aggression;

AND THEREFORE RECOMMENDS that all countries take within their respective territories the measures which they consider necessary to give effect to this Resolution.

Resolution No. 3

WHEREAS the first Committee of the United Nations Conference on Freedom of Information on 9 April 1948 unanimously adopted a Resolution declaring that all propaganda designed or likely to provoke or encourage any

threat to the peace, breach of the peace, or act of aggression, and also the spreading of false and distorted reports likely to injure friendly relations between States, constitute a problem of the first importance calling for urgent corrective action on the national and international planes, and

WHEREAS in the said Resolution the first Committee expressed its profound conviction that only organs of information in all countries of the world which are free to seek and to disseminate the truth, and thus to carry out their responsibility to the people, can greatly contribute to the counteracting of Nazi, Fascist or any other propaganda of aggression or of racial, national and religious discrimination and to the prevention of recurrence of Nazi, Fascist, or any other aggression, and

WHEREAS, the said Resolution having been adopted by this Conference, it is desirable that all appropriate steps should be taken to implement this resolution.

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION TRANSMITS the said Resolution to the Economic and Social Council, and

RECOMMENDS that all countries should promptly inform the Secretary-General of the United Nations of any measures taken by them to give effect to the Resolution;

RECOMMENDS that appropriate national bodies should supplement the work of information agencies and associations of journalists and of others engaged in the collection, publication and dissemination of news, in ensuring the impartial presentation of news and opinion;

RECOMMENDS that the United Nations should give consideration to means by which they may be able to assist in implementing the Resolution; and further

RECOMMENDS that the Sub-Commission on Freedom of Information and of the Press in carrying out the functions which may be assigned to it in accordance with the recommendations of the Conference should consider appropriate means by which measures taken to give effect to the Resolution may be co-ordinated.

Resolution No. 4

CONSIDERING that there are in some countries media of information which disseminate racial and national hatred,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RECOMMENDS that the governments of such countries should:

(a) Encourage the widest possible dissemination of free information through a diversity of sources as the best safeguard against the creation of racial and national hatred and prejudice;

(b) Encourage, in consultation with organizations of journalists, suitable and effective non-legislative measures against the dissemination of such hatred and prejudice; and

(c) Take, within their constitutional limits, appropriate measures to encourage the dissemination of information promoting friendly relations between races and nations based upon the purposes and principles of the United Nations Charter.

CHAPTER II

MEASURES TO FACILITATE THE GATHERING AND INTERNATIONAL TRANSMISSION OF INFORMATION

- - - -

Resolution No. 5

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION RESOLVES THAT:

1. Governments should encourage the freest possible movement of foreign correspondents in the performance of their functions; and that

2. Governments should expedite in a manner consistent with their respective laws and procedures the administrative measures necessary for the entry, residence, movement and travel of foreign correspondents, together with their professional equipment, and should impose no special, discriminatory or unusual restrictions on such ingress or egress, or upon the transit through or residence in their territories of such correspondents.

Resolution No. 6

CONSIDERING that a clear definition of which news personnel are to be regarded as professional foreign correspondents of newspapers, news agencies, periodicals, broadcasting enterprises and newsreel enterprises has not been established; and

CONSIDERING that the various recommendations adopted by this Conference are of particular importance in securing free and unhampered working conditions for foreign correspondents; and

CONSIDERING that the establishment of adequate means of identifying the professional foreign correspondents will facilitate for governments the realisation of their commitments for furthering the free flow of information;

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RECOMMENDS to the Economic and Social Council that the Sub-Commission on Freedom of Information and of the Press be requested to:

(1) Study the possibility of obtaining a clear and practically applicable definition of such news personnel as are to be given th status of professional foreign correspondents;

(2) Consider whether measures should be taken with a view to providing foreign correspondents with appropriate documents of identification as to their professional capacity;

(3) Consider additional administrative and technical facilities might be granted to foreign correspondents holding such documents of identification;

(4) Conduct this work in close collaboration with international and national professional organizations of the press, radio and newsreel, especially by drawing upon the experience of news personnel actively engaged in the gathering and transmission of news; and

(5) Consider whether the task of handling any practical measures to be taken could be entirely or partially entrusted to a permanent organisation collaborating with professional bodies of the press, radio and newsreel, or to such professional bodies.

Resolution No. 7

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION WHILE RECOGNIZING that all foreign news personnel must conform to the laws in force in the countries in which they are operating,

DECLARES that no such person legally admitted to a foreign territory should be expelled on account of any lawful exercise by him of his right to seek, receive and impart information or opinion.

Resolution No. 8

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION RESOLVES

That Governments should permit and encourage the widest possible access to news, official and non-official, for all

foreign correspondents on the same basis as for national correspondents;

AND FURTHER RESOLVES

That Governments should make no discrimination between foreign correspondents as regards access to news provided for in the above paragraph.

Resolution No. 9

CONSIDERING that the United Nations, in accordance with the aims and purposes of its Charter, should be prepared to grant all the necessary facilities for enabling media of information to function with full freedom and responsibility in following the course of its work and that of Conferences called by it and its specialized agencies

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RECOMMENDS that the United Nations General Assembly adopt a resolution urging that accredited news personnel of all countries should have free access

(a) to countries where meetings of the United Nations or its specialized agencies or any Conferences convened by them take place, in accordance with the terms and conditions of agreements made by the United Nations or its specialized agencies with the governments of such countries; and

(b) to all sources of information connected with such meetings except in cases where, in accordance with the Rules of Procedure, meetings are held in private.

Resolution No. 10

CONSIDERING that one of the purposes and principles of the United Nations as enunciated in the United Nations Charter is the encouragement of respect for human rights and for fundamental freedoms for all without distinction as to race;

BELIEVING that any racial discrimination is incompatible with freedom of information and that the latter can be

facilitated by the unconditional application of the principle of racial equality; and

CONSIDERING that it is imperative that access to all sources of information and to public utilities should be available to foreign correspondents, within the framework of exising laws and regulations without distinction as to race;

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

DECLARES that in order to ensure the application of this principle, it is essential that governments and public utilities should not deny to foreign correspondents on racial grounds:

(a) access to any sources of information within the framework of existing laws and regulations;

(b) access to press conferences, legislative bodies, public meetings and demonstrations, theatres, concerts, exhibitions, public lectures, and educational institutions, etc.;

(c) access to communication facilities;

(d) access to means of transport; and

(e) access to facilities relative to accommodation and supplies

Resolution No. 11

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

INVITES governments to conclude bilateral or multilateral agreements with a view to eliminating unreasonable or discriminatory taxes affecting the operations of foreign information agencies and news personnel, being guided, in particular, by the results of the work of the Fiscal Commission of the Economic and Social Council concerning double taxation.

Resolution No. 12

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION RESOLVES

That governments should permit egress from their territory of all news material of foreign correspondents and foreign information agencies, whether of information or opinion, and whether visual or auditory, without censorship, editing or del

provided that governments may make and enforce regulations relating directly to the maintenance of national military security; and

That such regulations should, however, be communicated to foreign correspondents and should apply equally to all foreign correspondents and foreign information agencies.

FURTHER RESOLVES

That if the requirements of national military security should compel governments, in peace-time, to establish censorship for a certain period of time, they should:

(1) establish in advance such categories of information or photographs for the use of a newspaper news agency, broadcasting station or newsreel enterprise in another country, as are subject to previous inspection and publish the directives of the censor announcing forbidden matters;

(2) carry out censorship as far as possible in the presence of th journalists; and

(3) where censorship in the presence of the person concerned has not been possible;

(a) fix the time-limit allowed the censors for the return of the copy or photograph;

(b) require the return of copy submitted for censorship direct to the reporters or news agencies so that journalists may know at once what has been censored in their text and what use they may make of the censored information;

(c) base the charge on the number of words composing a telegram after censorship; and

(d) return the total telegraph charges for telegrams submitted for censorship, the transmission of which has been delayed more than six hours.

Resolution No. 13

STRONGLY CONVINCED that Freedom of Information should be assured to everyone,

HOLDING that any form of censorship constitutes a curtailment of this freedom,

CONSIDERING that censorship deprives the information which it passes of its credibility and often gives information from unspecified sources an unwarranted value;

THE UNITED NATIO S CONFERENCE ON FREEDOM OF INFORMATION

SOLEMNLY CONDEMNS the use in peace-time of censorship which restricts or controls freedom of information, and

INVITES governments to take the necessary steps to promote its progressive abolition;

AND CONSIDERS THAT

Nothing in this resolution shall, however, prevent governments from maintaining regulation of newsreels provided their release may only be prohibited on grounds of public morality.

Resolution No. 14

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RECOMMENDS to the Economic and Social Council for suggestion to the INTERNATIONAL TELECOMMUNICATIONS UNION that where teleprinter lines have been installed on long-term lease between two or more news agencies, not only may the agencies bound by contract exchange news over these lines, but correspondents of the affiliated agencies may also use them without extra charge for transmitting news to the agencies for which they work.

Resolution No. 15

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION RESOLVES that foreign correspondents should have access to all facilities generally and publicly used for the international transmission of news material and should be enabled to transmit news material from one country to another on the same basis and at the same rates applicable to all other users of such facilities for similar purposes.

Resolution No. 16

BELIEVING that the widest possible publication, circulation, movement and interchange of news, newspaper,s news periodicals, newsreels, and other media of a distinct news character are a necessary part of freedom of information, and

RECOGNIZING that governments should, to the extent of their abilities and within the limits of their currency positions, facilitate the securing of raw materials and equipment needed for the development of their domestic information agencies and organizations,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RECOMMENDS that, as hard currencies and foreign exchange become increasingly available and more free, governments should encourage and, as far as practicable, facilitate the necessary action which will ease quantitative, exchange and tariff restrictions on the importation of news, news publications and productions, and raw materials and equipment therefor, and

FURTHER RECOMMENDS that the governments of countries which possess hard currencies encourage by appropriate steps the above-mentioned action.

Resolution No. 17

CONSIDERING that it is advisable to adopt measures relating to the free reception and exhibition of newsreels,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RECOMMENDS that all States should take steps to foster the interchange of newsreels in proportion to each nation's productive capacity, and should at the same time study the disparities in the development of the production enterprises in the different countries and deal with the problem of the development of national enterprises by means of provisional measures; and

FURTHER RECOMMENDS that monopolistic practices, in all their forms, open or concealed, in relation to the showing of such films, be eliminated, in order to avoid any kind of restriction, exclusion or privilege.

Resolution No. 18

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION CONSIDERS that governments should permit all news material of foreign correspondents and foreign information agencies to enter their territories and reach information agencies operating therein on the same conditions as are accorded to any other foreign information agencies.

Resolution No. 19

WITH A VIEW to encourage wider and freer flow of information through the development of national news agencies in countries where such agencies are under-developed,
THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION RECOMMENDS that any foreign news agency operating within the territory of a country where national news agencies are under-developed, while it should enjoy full freedom as regards the international transmission of news, should refrain from releasing, at the locality of its operation, news concerning the country's domestic affairs, and further refrain from transmitting such news to any other locality in that country for publication, except by mutual arrangement with the national news agencies or with local newspapers.

Resolution No. 20

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

WHILE AFFIRMING its conviction

THAT effective news agencies are a natural outgrowth of the vigour and co-operation of the organs of publication which they serve, and

THAT the dependence of news agencies on those organs themselves is an important factor in ensuring the objectivity of the information which they supply,

IS HOWEVER of opinion that in countries where national news agencies are not sufficiently developed provisional measures may appropriately be taken by governments to encourage their development as independent news agencies, and is further of opinion that at no time should the

development of foreign news agencies by unfair or abnormal means be allowed to prejudice the normal development of national agencies.

Resolution No. 21

CONSIDERING that the increase in the amount of information should apply without exception and in equal measure to all countries with a view to obtaining an ever-wider and more accurate knowledge of their problems, achievements and contributions to international co-operation and world peace; and

CONSIDERING that this aim has not been fully realised in the case of all nations, about some of which information is scanty and in many cases distorted or biased, and that as a result there is too often ignorance as to the true character of their civilisations and their importance in material progress, intellectual achievements and contribution to social justice, the defence of freedom and world harmony;

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RECOMMENDS that press enterprises and agencies for the publication and dissemination of news be encouraged to establish an efficient information service dealing with all countries, and especially information service dealing with all countries, and especially with their achievements and concern for human progress, for their own political, economic and social independence and for the closest friendship and harmony among peoples; and

FURTHER RECOMMENDS that stress be laid on the desirability of all governments making permanently available to such enterprises and agencies all information material likely to contribute to the above aim, and to the elucidation or rectification of news and comments which tend to hamper or prevent its realisation.

Resolution No. 22

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION, CONSIDERING the desirability for the full realization of freedom of information in all countries,

RESOLVES that all countries should co-operate in the procurement and advancement of the facilities for the transmission and dissemination of information.

Resolution No. 23

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

TAKES NOTE of the Secretariat Document on International Communications and the Freedom of Information (E/CONF.6/29), and

RECOMMENDS that, in view of the highly technical nature of the matter, the Economic and Social Council refer it to the International Telecommunications Union for its consideration.

Resolution No. 24

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

HAVING GIVEN CONSIDERATION to the problems involved in the establishment of governmental and semi-governmental information services in order to make information available in countries other than their own.

REQUESTS the Economic and Social Council to refer consideration of this matter to the Sub-Commission on Freedom of Information and of the Press, and to draw its attention to the views expressed at this Conference and to the proposal of the United Kingdom delegation on the subject.

CHAPTER III

MEASURES CONCERNING THE FREE PUBLICATION AND RECEPTION OF INFORMATION

Resolution No. 25

CONSIDERING that governments should put no obstacles in the way of persons and groups wishing to express themselves through the means of mass communication,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RECOMMENDS that all governments should, to the extent that they make available materials and facilities for the mass media, undertake not to discriminate on political or personal grounds or on the basis of race, nationality, sex, language or religion, or against minorities.

Resolution No. 26

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

CONSIDERING that, in view of the diversity of the laws of libel in force in different countries, and the diversity of legal systems and conditions with reference to which laws are made, this Conference is not in a position to make a close study of such laws for the purpose of recommending specific improvements; and

RECOGNIZING that all branches of law must be kept in accord with public opinion and that this is especially true of the laws relating to the liberty of discussion,

RECOMMENDS that States should from time to time review their laws of libel, taking into consideration the general conclusions of this Conference, in order to remove anomalies, and to secure to all persons the maximum freedom of expression compatible with the maintenance of order and with due regard to the rights of others; and

CONSIDERING it necessary to determine the fundamental principles in this matter which may serve as a uniform basis for the laws of the various countries,

FURTHER RECOMMENDS:

(1) that the Economic and Social Council invite a Committee of Jurists or an International organization (such as the International Association of Criminal Law) to:

(a) study the laws of libel of the various countries in order to note their defects and anomalies; and

(b) formulate a body of fundamental rules and principles regarding libel, taking into account the role played by the press in a democratic State; and

(2) that the Economic and Social Council draw the attention of the various Governments to this body of rules with a view to their being taken into consideration in the formulation of national laws of libel.

Resolution No. 27

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RECOGNIZING that there is a diversity in different countries in the ownership and control of media of information and that freedom can flourish under widely different systems;

RECOMMENDS that governments should undertake to put no obstacles in the way of persons or groups wishing to express themselves through the means of mass communication, and should ensure insofar as they are able that persons do not suffer discrimination in the use of the media on political or personal grounds or on the basis of race, sex, language or religion, and

FURTHER RECOMMENDS the investigation by each country in its own way of public and private monopoly, in ownership and control of the media of information, where such monopoly exists.

Resolution No. 28

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

CONSIDERING that the free interchange of information and opinions promotes the welfare of all nations and is indispensable to the peace of the world,

RECOMMENDS that governments grant the right to all nationals of their States to possess and operate radio receiving sets covering all the bands used for domestic and

international broadcasts, free from intimidation or pressure and subject only to the accepted rules governing licensing and copyright.

Resolution No. 29

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION IS OF THE OPINION:

1. THAT the tax on the sale of receiving sets, valves and spare parts should be reduced to the maximum extent;

2. THAT the possession of receiving sets is necessary to assure a really free flow of information and is in no way a luxury;

3. THAT the annual, or monthly, charge payable by the possessors of such sets should be allocated exclusively to meet the operating costs of national radio organizations; and

4. THAT receiving sets installed in the schools of all countries should be exempt from all taxes and charges.

Resolution No. 30

CONSIDERING that in many countries the price of radio receiving sets is unduly high; and

CONSIDERING that one of the aims of the Conference is to recommend means to increase the amount of domestic and international information available to all peoples;

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION RECOMMENDS to the Economic and Social Council that a study be made of all appropriate measures so that the general public can obtain radio receiving sets at low prices.

Resolution No. 31

WHEREAS one of the means of expanding interchange of information is by the reception of press transmissions by

radio addressed to multiple destinations, and

WHEREAS thirty-seven nations now permit private reception of multiple-address newscasts;

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION TAKES NOTE of the practice of private reception of multiple-address newscasts, and

SUGGESTS to the Economic and Social Council that the problem be referred for further study to the International Telecommunications Union or any other competent body.

Resolution No. 32.

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION HAVING CONSIDERED the investigations of UNESCO into the technical needs of war-devastated countries,

1. EXPRESSES the hope that UNESCO will proceed with the utmost speed to carry out the programmes it has prepared in this connection;

2. NOTES with satisfaction that UNESCO is taking expeditious steps for ascertaining the requirements of other countries, whose detailed wants have not been investigated so far but which are handicapped, on account of material inadequacies, in making satisfactory arrangements for the provision of domestic and international information;

3. RECOMMENDS that the Economic and Social Council instruct its regional economic commissions and request the competent specialized agencies to assist UNESCO in its task of reducing the inequalities in information facilities caused by the devastations due to war, or other handicaps, and

4. FURTHER RECOMMENDS that very early arrangements may be made by UNESCO, with the help of other specialized agencies concerned in the matter, for dealing with the requirements of these countries.

Resolution No. 33

TAKING COGNISANCE of the conclusions concerning newsprint reached by UNESCO as the outcome of its enquiry carried out in 1947 in twelve war-devastated countries of Europe and the Far East, and of the decision of UNESCO to continue its enquiry in

1948 in other parts of the world,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

DRAWS the attention of the Economic and Social Council to the harm and dangers which inadequate production of newsprint, and unequal distribution thereof, have on the exercise of freedom of information;

RECOMMENDS that the Economic and Social Council consider as soon as possible, in the light of the enquiries carried out by the Council and by UNESCO, practical measures to remedy the situation; and

RECOMMENDS that governments give their support to the UNESCO plan for aid to war-devastated countries; and

INVITES UNESCO to extend such aid to other countries suffering from an acute shortage of newsprint.

Resolution No. 34

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

TAKING NOTE of the proposal submitted directly by UNESCO to establish under the auspices of that agency an International Institute of Press and Information, and

CONSIDERING that such an Institute could be conducive to the improvement of the quality of information,

REQUESTS the Economic and Social Council to invite governments and professional organisations, national and international, to examine together the possibility of implementing this proposal and, if it is found practicable, to cooperate in carrying it out.

Resolution No. 35

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION,

DESIRING to improve the quality of information,

RECOMMENDS

(1) THAT the curricula of schools of journalism, governmental and private, include

(a) intensive study of the history and culture of other peoples as a background for correct interpretation of international news and events;

(b) inculcation in future journalistsoof a keen sense of the moral and social responsibility of their profession, stressing the undesirability of commercialism, sensationalism and racial and religious intolerance; and

(c) training in the habit of objectivity, accuracy and comprehensiveness in reporting and writing;

(2) THAT journalistic organizations exchange views concerning the desirable qualifications, technical requirements, and the working conditions of foreign correspondents;

(3) THAT systems of awards be established for news personnel for conspicuous service in upholding high journalistic ideals and for excellence in writing, especially in the field of international news and its interpretation, and in promoting the ideals of the United Nations, thereby strengthening friendship between peoples.

Resolution No. 36

CONSIDERING that the task of drafting and enforcing an international code of honour for journalists and other information personnel requires as a principal condition the discussion in advance by the professional organizations active in this field; and

CONSIDERING also that any such code of honour should be sufficiently wide to include all media of information and to cover the activities of all information enterprises, including the activities of journalists, editors, managers, directors and publishers of such enterprises,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION, RECOMMENDS:

1. THAT the question of drafting an international code of honour and of the possibility of establishing an international court of honour be referred to the Sub-Commission on Freedom of Information and of the Press:

2. THAT the Sub-Commission should also examine in this connection the Draft Convention concerning an International Court of Honour proposed by the Delegations of Colombia and Peru, which the Conference has taken note of without pronouncing an opinion on its substance, and any other Draft Conventions on the subject referred to in paragraph 1 which may be proposed;

3. THAT national and international professional organizations be invited to contribute such material as they may consider to be of value to the Sub-Commission in its deliberations; and

4. THAT the Sub-Commission be requested to present the results of its investigations to the Economic and Social Council for consideration by any international conference of journalists, editors, managers, directors and publishers which may be convened by the United Nations to consider these specific matters.

Resolution No. 37

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

CONSIDERING the desirability of encouraging the adoption of measures guaranteeing the independence of news personnel and consequently the freedom of information; and

CONSIDERING that to attain this end all those who derive their main livelihood from the practice of the profession should be assured freedom from want in their old age, or in the case of disability, sickness or unemployment, or for their families in the event of death,

RECOMMENDS:

THAT the Economic and Social Council invite governments to include in their legislation a system of social security guaranteeing apart from the rights conferred on news personnel by their contracts of employment,

(a) payment (pension or lump sum) during their old age and in the event of disability;

(b) compensation for a certain period in the event of unemployment or sickness including an adequate notice of discharge; and

(c) payment (pension or lump sum) to the widow and dependent children; and

FURTHER RECOMMENDS that social benefits be financed by contributions made on the one hand by employers and on the other by news personnel themselves, and, possibly, by contributions from the State.

Resolution No. 38

CONSIDERING

That the problem of freedom of information, in relation to the reception and transmission of true and objective news, is intimately bound up with the economic conditions under which professional news personnel work,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION RECOMMENDS that in all states Members of the United Nations and Non-Member States the advisability be considered of assuring, by free negotiation between employers and employees, or, where necessary, by law, the protection of news personnel whose main source of livelihood is the gathering or dissemination of news or opinion, whether they work for daily newspapers, news periodicals, news agencies, or news departments of broadcasting or motion picture organizations; and

FURTHER RECOMMENDS that such provisions should cover the following points without exclusion of other benefits;

1. The initial emoluments of the professional journalist;

2. Automatic system of increase in salaries for seniority, taking into account previous experience;

3. Stability of employment and compensation in case of wrongful dismissal;

4. Superannuation and retirement;

5. Payment of salaries during vacations;

6. System of compensation for accidents at work and occupational diseases; and

7. Settlement of professional disputes.

CHAPTER IV

CONTINUING MACHINERY TO PROMOTE THE FREE FLOW OF INFORMATION

Resolution No. 39

CONSIDERING

That the work of the various Committees has shown the need to set up continuing international machinery to carry on the work undertaken by the Conference on Freedom of Information and, in particular, to study the problems involved in the application of the resolutions adopted by this Conference and the implementation of the draft conventions recommended by it,

CONSIDERING

that it is expedient, in order to avoid the multiplication of specialized agencies, to entrust this task to the Sub-Commission on Freedom of Information and of the Press,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION RESOLVES

1. That the Economic and Social Council be requested to continue the Sub-Commission on Freeddm of Information and of the Press for a period of three years;

2. That the Sub-Commission's terms of reference include the consideration of issues and problems involved in the dissemination of information by newspapers and news periodicals, radio broadcasts and newsreels;

3. That, to carry out these terms of reference, the Sub-Commission may:

   (a) Study and report to the Economic and Social Council on:

      (1) Political, economic and other barriers to the free flow of information;

      (2) The extent to which freedom of information is accorded to the various peoples of the world;

(3) The adequacy of the news available to them;

(4) The development of high standards of professional conduct;

(5) The persistent dissemination of information which is false, distorted or otherwise injurious to the principles of the Charter of the United Nations;

(6) The operation of any inter-governmental agreements in the field of freedom of information;

(b) Receive for its own information communications from any legally constituted national or international press, information, broadcasting or newsreel enterprise or association relating to the items enumerated in paragraph 3(a) above with a view to assisting it in the formulation of general principles and proposals in the field of freedom of information;

(c) Discharge with the approval of the General Assembly and the Economic and Social Council such other functions as may be entrusted to it by inter-governmental agreements on information; and

(d) Initiate studies and make recommendations to the Economic and Social Council concerning:

(1) The promotion of a wider degree of freedom of information and the reduction or elimination of obstacles thereto;

(2) The promotion of the dissemination of true information to counteract Nazi, fascist or any other propaganda of aggression or of racial, national and religious discrimination;

(3) The conclusion or improvement of inter-governmental agreements in the field of freedom of information; and

(4) Measures to facilitate the work of foreign news personnel.

4. That the General Assembly be requested to make adequate funds available for the work of the Sub-Commission and in particular, funds for providing the Sub-Commission with the full-time expert staff, within the Secretariat of the United Nations, necessary for the discharge of its important functions.

CHAPTER V

MISCELLANEOUS

Resolution No. 40

HAVING CONSIDERED the proposal of the International Organization of Journalists regarding a Day of Friendship and Mutual Understanding in the Press,

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION REQUESTS the Economic and Social Council to refer the proposal of the International Organization of Journalists to the Sub-Commission on Freedom of Information and of the Press for consideration and such action as may be considered desirable.

Resolution No. 41

The Conference requests the Secretary-General of the United Nations to convey to Dr. Lev Sychrava its appreciation of his memorandum on The Principles of Free Exchange of Information (Document E/CN.4/Sub.1/50) and the regret of the Conference that he could not be present at its meetings.

CHAPTER VI

POSSIBLE MODES OF ACTION BY MEANS OF WHICH THE RECOMMENDATIONS OF THE CONFERENCE CAN BEST BE PUT INTO EFFECT

Resolution No. 42

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RESOLVES that some of the recommendations of the Conference can best be put into effect in the form of Conventions.

Resolution No. 43

THE UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

RESOLVES:

1. THAT all documents passed by the Conference, Resolutions or Draft Conventions, be referred to the Economic and Social Council for study at its next session;

2. THAT all Governments invited to this Conference be requested to forward to the Secretary-General of the United Nations before 5 July 1948 their comments on the Draft Conventions proposed by the Conference and proposals for other Draft Conventions based on the recommendations of this Conference;

3. THAT the Economic and Social Council be requested to examine at its Seventh Session the Draft Conventions referred to it by the Conference in the light of such comments and other proposed Draft Conventions as provided in paragraph 2, and to submit to the General Assembly at its Third Session Draft Conventions which may thereafter be opened at that session for signature or accession by those States entitled and willing to become parties thereto, and remain open subsequently for additional accessions.

37 - UN Conf. on Freedom of Information, 1948

DEPARTMENT OF STATE

FOR THE PRESS

MAY 7, 1948
No. 355

FOR RELEASE AT 7:00 P.M., E.D.T., SUNDAY, MAY 9, 1948. NOT TO BE PREVIOUSLY PUBLISHED, QUOTED FROM OR USED IN ANY WAY.

REPORT OF THE UNITED STATES DELEGATES TO THE
UNITED NATIONS CONFERENCE ON FREEDOM OF INFORMATION

The Honorable
Secretary of State,
Washington, D. C.

Dear Mr. Secretary:

This is the unanimous report of the United States Delegates to the United Nations Conference on Freedom of Information, which ended a fortnight ago.

It is the hope of the six of us that this Conference helped to turn the tide that has been running against freedom throughout much of the world. It is our conviction that in the future conduct of our foreign policy the United States should continue to take vigorous action in this field of freedom of thought and expression. Only thus can we carry through on the constructive achievements begun by the Conference. Only thus can we remain vigilant against the dangers this Conference has helped to expose.

The Conference on Freedom of Information was held in Geneva, Switzerland, from March 23 to April 21, 1948. It was called in accordance with a resolution adopted by the General Assembly of the United Nations in 1946. This resolution was initiated by General Carlos P. Romulo, of the Philippines, who subsequently was chosen to serve as the President of the Conference, a post which he filled with great distinction. The resolution characterized freedom of information as "a fundamental human right and...the touchstone of all the freedoms to which the United Nations is consecrated" and assigned to the Conference the task of formulating views "concerning the rights, obligations and practices which should be included in the concept of freedom of information." The General Assembly further defined freedom of information as implying "the right to gather, transmit and publish news anywhere and everywhere without fetters", and recognized it as "an essential factor in any serious effort to promote the peace and progress of the world."

PRE-CONFERENCE PESSIMISM

The high hopes held by the United Nations in 1946 when this resolution was adopted deteriorated rapidly. The world situation worsened, political and economic instability increased, and restrictive tendencies with respect to the free flow of information among peoples became more pronounced.

Monopolistic and restrictive practices inhibited the flow of news. Two years after the end of the war, censorship in some form was reportedly being exercised by half of the Members of the United Nations. Quotas and exchange regulations impeded the movement of films and periodicals. The world was gradually being divided into petty principalities of controlled thought. As the opening of the Conference approached, the prospect for world freedom of information was more bleak than it had ever been in time of peace in modern history.

The

The United States in attempting to promote freedom of information on an international scale was faced with two additional difficulties. One was a growing fear abroad that United States information agencies would use their preponderance in terms of facilities and techniques to further what was glibly called "American cultural imperialism". This fear was fanned on by anti-United States propaganda along nationalistic lines.

The second difficulty was a communist propaganda attack, which made considerable headway, carried on both within and without the United Nations against the American press and other organs of opinion. This attack was based on charges of alleged "warmongering" and "false reporting."

Against this background the United States Delegation approached the Conference with considerable pessimism. It appeared unlikely that substantial achievements could emerge. It was especially feared that the Conference would degenerate into a sounding-board for the philosophy of restriction rather than of freedom and that, over United States protest, compromises would be adopted which would serve to compromise the very principles of freedom of information itself.

CONSTRUCTIVE ACHIEVEMENT

The United States Delegates are happy to report, Mr. Secretary, that, with one important exception which will be discussed below, these fears were not justified. In the face of the difficulties, the record of constructive achievement of this Conference seems to us remarkable. Three draft international Conventions, two draft articles for inclusion in a Declaration and a Covenant on Human Rights, and some forty resolutions were adopted, most of them by overwhelming majorities. Out of this total of forty-five substantive propositions, the United States Delegation felt obliged to vote against only one and to abstain from voting on only three. Thus our Delegation was able affirmatively to support forty-one out of forty-five decisions of the Conference. More than this, with only one exception having to do with the Covenant on Human Rights, every proposal which in advance of the Conference the United States Delegation thought it desirable for the Conference to adopt was adopted by a very large majority. At the same time, considerably more than a score of proposals and amendments which would have served to cripple freedom of expression were decisively defeated.

UNITED FOR FREEDOM

The Conference, in our opinion, marked a decided change in the general political attitudes of most of the nations of the Western World during the last few months. While even immediately prior to its opening, there was widespread uncertainty whether the timing for the Conference was propitious, it is now apparent that it was -- and, indeed, that the Conference itself helped to hasten and crystallize this change.

While recognizing that compromise and adjustment with the Soviet bloc are desirable and indeed essential in some fields, the non-totalitarian nations are apparently coming to realize that in areas involving deep-seated differences in fundamental principles, present attempts at compromise are not only useless but can be extremely dangerous.

In his opening speech, the Chairman of the United States Delegation said: "This is no Conference about money or wheat or radio frequencies, where divergent viewpoints must and should be compromised. This is a Conference about principles essential to free men. It is thus far better for us here to build slowly for the future on the bedrock of principle maintained than to build faster on the shifting sands of principle compromised."

Thus, the search to find common ground in matters of basic principle between the world of freedom and the world of State-control was soon abandoned at Geneva.

This

This stiffening of attitude depended in turn upon several developments. One was the intransigence of the Soviet bloc which had made it abundantly clear in previous deliberations on freedom of information that they would not and could not proceed in the direction of greater freedom. Another was a keener realization of what the extinction of liberty means in those parts of the world which have fallen under communist control. The unhappy events in Czechoslovakia a short six weeks before the Conference convened dramatized this issue with telling effect. A third factor was the growing certainty that the United States means to help the Western nations protect their own freedom and independence through such measures as the European Recovery Program.

GENERAL PRINCIPLES

Uncertain as to how far this stiffening of attitude on matters of principle had developed, the United States Delegation decided in advance of the Conference to take a strong, affirmative position from the outset. One of its first moves at the opening of the Conference was to introduce a resolution on the general principles of freedom of information. This as finally approved by the vote of 36 in favor, 6 against (the Soviet bloc) and no abstentions appears as Resolution No. 1 on page 24 of the Final Act of the Conference.

In adopting this resolution the Conference approved a philosophy of freedom of information which may be summarized as follows:

(1) Freedom of information is a fundamental right, not of governments, not alone of information agencies, but of the people.

(2) In order that the people's right to be fully informed may be implemented, the right to gather, transmit and disseminate news anywhere and everywhere without fetters should be guaranteed on the national and international plane.

(3) Since a monopoly of information tends to become a monopoly of misinformation, a diversity of sources of news and opinion is essential.

(4) Freedom of information further depends upon the willingness of the press and other agencies of information to employ the privileges derived from the people without abuse.

(5) It is the moral obligation of the press and other agencies of information to seek the truth without prejudice and report the facts without malicious intent.

(6) The fulfillment of this moral obligation will contribute to the solution of the world's problems, will promote respect for human rights, will foster understanding and cooperation between peoples, and help maintain international peace and security.

(7) This moral obligation to seek the truth and report the facts cannot be enforced by legal means without destroying freedom of information itself, but can best be advanced through organizations and associations of journalists and through individual news personnel, under the spur of the people served by these instrumentalities.

The adoption of this resolution by the Conference with only the Soviet bloc in opposition may be looked upon as a victory for the principles of freedom of information which the United States has drawn from the main currents of Western civilization and which the Delegation hopes we are now prepared vigorously to defend along with nations which share this heritage.

PROPAGANDA INCITING TO WAR AND FALSE REPORTING

For some time prior to the Conference the Soviet bloc had carried on a propaganda offensive against the press and other information agencies in the United States and certain other Western countries on the ground that

they

they were guilty of "propaganda inciting to war" and of "false and distorted reports likely to injure friendly relations between States." While these phrases may at first glance appear to contain an element of plausibility, they in fact concealed a demand for censorship and suppression. Stripped of propaganda phraseology designed to confuse, the Soviet offensive amounted to a drive for the institution in other countries of a State-controlled press system, with governments deciding what is true and what is false, what is friendly and what unfriendly. The campaign well illustrates the skill and aggressiveness of the Soviet propagandists.

The United States Delegation took the initiative in sponsoring a resolution, along with seven other Delegations, in order to ensure that the discussion of this subject would proceed on the basis of a draft acceptable to the United States, rather than one sponsored by the Soviet bloc.

This draft was amended by the Conference in several particulars. It became sufficiently ambiguous to permit varying interpretations, without however compromising the American position against government control of the political reporting and expression by news media. The final product was adopted unanimously by the Conference and will be found as Resolution No. 2 on page 26 of the Final Act.

The stress remains on moral responsibility rather than government controls as the solution to the problem. Soviet propaganda will no doubt revert, nevertheless, to its original contention that governmental suppression is needed to prevent "propaganda inciting to war".

In the resolution the Conference condemns all propaganda designed or likely to provoke threats to the peace, breaches of the peace or acts of aggression and all distortion or falsification of news through whatever channels, private or governmental. It appeals to the personnel of the press and other agencies of information in all countries to serve the aims of understanding and peace by accomplishing their task in a spirit of accuracy, fairness and responsibility. It expresses the conviction that only a free press can greatly contribute to counteracting propaganda of aggression, or of racial, national or religious discrimination.

The United States Delegates particularly like the statement in the preamble of this resolution that the attainment of a just and lasting peace depends upon the free flow of true and honest information to all peoples, and upon the spirit of responsibility with which the truth is sought and the facts reported. As the Chairman of the Delegation stated to the Conference:

> "It is peace we are seeking here, and we from the free countries know the relationship between peace and freedom of information. Thus we attach the greatest importance to the provisions which state that only a free press and free people can effectively counteract Nazi, Fascist, or other propaganda of aggression, or effectively counteract racial, national and religious discrimination."

DECLARATION AND COVENANT ON HUMAN RIGHTS

The Conference was requested by the Economic and Social Council of the United Nations to express its views concerning the freedom of information articles of the projected Declaration on Human Rights and of the proposed Covenant on Human Rights, both of which are now being prepared by the Commission on Human Rights. The Declaration is intended as a statement of ideals toward which all nations should strive; the Covenant as a treaty, legally-binding on its signatories.

The Conference had as a basis for discussion draft articles prepared by the United Nations Subcommission on Freedom of Information and of the Press. The proposed article for the Declaration read as follows:

"Everyone

"Everyone shall have the right to freedom of thought and expression; this right shall include freedom to hold opinions without interference and to seek, receive and impart information and ideas by any means and regardless of frontiers."

There was general agreement that this article for the Declaration was highly satisfactory and it was approved with unanimity except by the Soviet bloc. (See page 22 of the Final Act.)

The formulation of the article for the Covenant, on the other hand, gave rise to strong differences of opinion. We shall go into this question in some detail because of its importance for the future. The Covenant, when adopted, will have the full force and effect of law for many years to come.

The draft submitted by the Subcommission contained a satisfactory statement of the right of every person to freedom of thought and of expression. This was followed by a list of seven specific limitations on this right -- limitations which the Subcommission felt might legitimately be imposed by governments if they so desired. Those permissive limitations were retained by the Conference without significant change. To these seven limitations the Conference added an eighth... the right of governments to impose penalties for "the systematic diffusion of deliberately false or distorted reports which undermine friendly relations between peoples and states." This was the so-called Indian amendment. (See pages 22 and 23 of the Final Act.)

The United States Delegation strongly opposed the whole concept of specific limitations on the ground that it was neither feasible nor desirable to attempt to list in a legally binding Covenant the many restrictions or limitations which the various governments now impose on freedom of expression or which they may in the future choose to find necessary. The Delegation further explained that a list of limitations tended to emphasize the restrictions on freedom of expression rather than the right itself.

The United States Delegation was particularly opposed to the Indian amendment. This could subject the media of information to arbitrary governmental interpretations of what might constitute false or distorted information. Such a power could be used by governments as a pretext for curbing the dissemination of unfavorable but legitimate information.

As a substitute for all eight of the specific limitations on freedom of expression the United States Delegation urged the acceptance of a general formula: that freedom of expression may be limited only to protect the rights of others, and the freedom, welfare and security of all. This proposal was decisively rejected by the Legal Committee of the Conference.

The complexity of this issue and the room for differences of opinion among those sincerely devoted to freedom of expression is indicated by the fact that almost all of the Delegations representing democratic States voted tor the Covenant article in its present form with the list of eight specific restrictions. Further, one United States Delegate, Professor Zechariah Chafee, Jr., felt that the seven specific limitations of the Subcommission constituted a method of stating the responsibilities connected with freedom of expression which is preferable to the general over-all clause. While Dr. Chafee was strongly opposed to the Indian limitation with regard to false and distorted reports, he felt, along with the vast majority of Delegates from other States, that the other specific limitations are justifiable in that:

(1) they are legitimate restrictions on abuses of freedom of expression widely recognized in democratic countries, including the United States;

(2)

(2) they are merely permissive and would not have to be enacted into law by any State acceding to the Covenant;

(3) they would constitute a guarantee against arbitrary restrictive measures since they would be the only restrictions permitted by international law, whereas a general limitation clause might permit serious abuses by any government inclined to limit freedom of expression arbitrarily.

We stressed in closing speeches that the United States believes strongly in the concept of a Covenant on Human Rights and will cooperate actively with other nations in preparing a draft of the article on freedom of information in harmony with the American position against government control of news media in the political field. However, for the reasons already stated, the Delegation decided to vote against the Convention article as approved by the Conference. This, we felt, helped to dramatize two issues -- the issue of the specific limitations and especially of the Indian amendment -- and to bring them more forcefully to world attention. We felt then -- we still feel -- that other democratic nations should be brought to a complete realization of the risks involved in this area, and that the United States can never accept government's right to interfere with the most basic of all freedoms -- man's right to knowledge.

THE BRITISH CONVENTION

The Convention on Freedom of Information proposed by the United Kingdom (See page 17 of the Final Act) also received the strong support of the Conference, 31 delegations voting in favor, 6 against (USSR group), and 2 abstaining (U.S. and Australia). This Convention seeks agreement among democratic states concerning broad principles of freedom of information and the extension of these principles to regions where they are not now fully recognized in practice. It is much wider in scope than the U.S. Convention on the Gathering and International Transmission of News which is duscussed under the next heading. While the latter applies only to foreign correspondents, the United Kingdom Convention would apply to all the nationals of all contracting States.

The United States Delegation was unable to support this Convention, first, because it is so general in scope as to be ambiguous in terms of its effects and, second, and more important, because of its second Article. This Article incorporates all eight of the specific limitations in the Covenant article just discussed (including the so-called Indian amendment), together with several additional permissive restrictions. The U.S. Delegation abstained on the vote. We of course support the general objectives of the United Kingdom Convention and recommend that the United States seek modifications in the Convention itself when it is considered by the Economic and Social Council.

The Chairman of the Delegation pointed out from the floor that the differences which caused us to abstain from voting for this Convention do not touch the fundamental community of spirit and of action which underlie our relations with the United Kingdom and other like-minded countries.

UNITED STATES CONVENTION

One of the outstanding accomplishments of the Conference was the adoption of the U.S. Draft Convention on the Gathering and International Transmission of News by a vote of 28 in favor, 6 against (the Soviet bloc) and 2 abstentions. The Draft Convention as approved will be found in the Final act beginning on page 7.

The United States Convention will not affect day-to-day actions of more than five or ten thousand individuals -- the foreign correspondents of the world. But its deeper effects will be felt by tens of millions. The foreign correspondents have been called "The Ambassadors of the Mind". The more fully they are able to report, the better they

will

will advance the understanding of men everywhere, and thus the better they will build the defenses of peace in the minds of men.

The articles of this Convention are clear-cut. They are designed to encourage the freest possible movement of foreign correspondents; to give foreign correspondents the widest possible access to news; to protect them against expulsion for any lawful exercise of their rights; and to insure equitable treatment of their outgoing dispatches.

For the first time in international law it is declared that there are no valid grounds for censorship on the international transmission of news material except regulations "relating directly to the maintenance of military security". It is the unhappy but stark reality of today's world that such a qualification is necessary. Everywhere censorship on this ground is exercised, however, it is limited, under a proposal advanced by the French Delegation and incorporated into the Convention, to a procedure every point of which is an additional protection for the press of the world.

This Convention, within the States that ratify it, will incorporate the rights and privileges already accorded in practice by many of the nations of the world into the body of international law, and thus give them added strength. No longer would these rights be subject to the shifting tactics of governments; they would rest on the firm foundation of law.

The U.S. draft Convention as approved will be transmitted to the Economic and Social Council of the United Nations for consideration in the light of comments to be submitted by the various governments at its session beginning in July. It will thereafter be opened for signature by individual states at the succeeding session of the General Assembly before the end of the year.

The same procedure will be followed with the other two draft Conventions adopted by the Conference.

THE FRENCH CONVENTION

In the original draft of the U.S. Convention on the Gathering and International Transmission of News, an article was included providing for an international right of official correction. This applied to cases where a State felt that a report likely to injure its relations with other States sent out by a foreign correspondent was false or distorted. The complaining government could in such cases send its own version of the facts to the State in which the report had been published. The latter would then be obliged to make this version available to the information agencies which supply news to its public. These information agencies would not, of course, be required to publish the correction.

The French Delegation submitted a much broader Convention on this subject which involved the establishment of elaborate United Nations machinery. A compromise was reached in accordance with which the French amended their Convention to incorporate the U.S. article in a somewhat expanded form. A provision was added that if any State failed to discharge its obligation to make the corrective version of facts available to the information agencies in its territory, resort could be had by the complaining Government to the Secretary-General of the United Nations. He would then be obliged to give the version of facts appropriate publicity. (See page 13 of Final Act).

No power to compel publication is contemplated at either the national or international level. The United States Delegates look upon this Convention as a legitimate attempt to provide a remedy for false or distorted reporting, thoroughly consistent with the principles of freedom of information. It need hardly be pointed out that American newspapers follow the general practice of publishing corrections and denials.

OTHER

OTHER RESOLUTIONS

Additional resolutions were passed by the Conference on many aspects of freedom of information. One condemns censorship in peacetime and calls on Governments to take the necessary steps to promote its abolition. (Resolution No. 13, Page 34 of the Final Act.) Others deal with the gathering and international transmission of information. Many of these served as support for corresponding articles in the U.S. Convention. Another group covers the free publication and reception of information. The most interesting of these have to do with attempts to remedy deficiencies in the physical facilities of mass communication (newsprint, radio receivers, film projectors, etc.) in the war-devastated and underdeveloped countries of the world.

This last subject is of great importance to the United States, in the opinion of the U.S. Delegation. Effective freedom of information--- with all that it connotes for the democratic way of life -- is impossible on both the national and international planes in the case of countries suffering from crippling deficiencies in the sinews of communication. A two-way flow of information between peoples cannot be undertaken without radio equipment, film projectors, and printing presses. A free press cannot thrive without newsprint.

The United States currently consumes 61% of the total newsprint supply of the world. A recent survey by UNESCO has revealed that 50,000 additional tons of newsprint would remedy the most crucial deficiencies in twelve war-devastated nations. This by way of illustration amounts only to about one-tenth of the newsprint used annually by one newspaper of large circulation in the United States.

The problem is both one of dollar shortages and of unused capacity for production of newsprint. Obviously the questions involved are complex. Both governmental policy and economic rehabilitation are major factors. The United States Delegation can only call attention to the seriousness of the situation. Freedom of information is impossible while such shortage of newsprint continues.

This report has dealt largely with the substantive results of the Conference which are given in definitive language in the Final Act. There were many corrollary results as well, and they may prove to be as important in total as the formal agreement. Among these were: (1) the opportunity our Delegation had to observe at first hand the tactics of communist propaganda, including its attempts to becloud the issues through twisted definitions of such great words as freedom and democracy; (2) our opportunity to discuss common problems with newspaper people of democratic countries, notably in Mr. Martin's talks with working newsmen in Italy and the U.S. Zone of Germany (where his speeches were widely acclaimed), in Mr. Canham's discussions looking toward closer cooperation between the editors of Western Europe and those of the United States, and in the proposal of Mr. Brown for seminar press studies on an international basis which are still in a formative stage of discussion with the Swiss press; and (3) our opportunity to clarify our own attitudes with respect to the admission of legitimate correspondents to the United States regardless of their political convictions.

CONCLUSION

Taking into account the maladjusted world in which the Conference was held, the United States Delegation can point with confidence to the record of constructive achievement of the Conference on Freedom of Information. This was the case both in the positive sense of extending the concept and the practice of freedom and in the negative sense of combatting incursions upon freedom. The U.S. Delegation proposed in the final days at Geneva that a second conference on freedom of information be convened within five years, perhaps more technical in character than the Geneva meeting.

The

The United States Delegation also sponsored a resolution, which was adopted by a large majority, recommending the continuation with expanded but carefully guarded terms of reference of the United Nations Subcommission on Freedom of Information and of the Press, in order that there would be continuing machinery at work in this complex field (Resolution No. 39, page 48 of the Final Act); a world focal point is needed if the impressive start made by the Geneva Conference is to be carried forward. At the same time, the Delegation insisted that no continuing governmental machinery, UN or otherwise, should have the authority to pass upon the accuracy of news reports or exercise control over news matters or expressions of opinion in the political field.

Other immediate steps are to be taken. The draft articles for the Declaration and Covenant on Human Rights will soon come before the United Nations Commission on Human Rights. In July the Economic and Social Council will consider the Draft Conventions sponsored respectively by the United Kingdom, France, and the United States. At all international gatherings which bear on this field, we must be prepared to defend the position of the U.S. with all the wisdom and vigor at our command.

The six undersigned Delegates are in unanimous agreement as to the importance of continuing initiative in this field as an integral part of U.S. foreign policy. Our recent foreign policy has understandably stressed economic assistance abroad. The power of ideas, however, has not received commensurate attention. If the United States is to exert moral leadership in a world which has felt its economic power but not its spiritual force, it must resolutely push forward the frontiers of freedom.

In promoting freedom of information, it must be made clear that we do not seek to monopolize news gathering by our agencies of communication. We would welcome the development of strong organs of information by all countries of the world. It is as important for us to know about other peoples as it is for them to know about us. We want to learn about them and for them to learn about us from as many news sources as possible. We seek to promote freedom of information in order to extend and implement the right of everyone everywhere to be fully informed in the interests of democracy and international understanding, but we do oppose all restrictive measures under whatever guise.

A heavy responsibility rests upon the Department of State in accomplishing this task. It will require knowledge of many complexities. It will demand adequate staff. It will involve close liaison with the American press, which at times seems unaware of the crucial importance of the international aspects of freedom of information to its present and future welfare.

The problem of the relation between freedom and responsibility is perennial. It will be with us for decades and centuries to come. No adjustment on an international basis will ever be completely satisfactory or permanent. Both patience and flexibility will be required.

Yet we dare hope that through international cooperative action new avenues to liberty may eventually be opened to all the peoples of the world.

This report is signed by the five Delegates appointed by President Truman and by Mrs. Oveta Culp Hobby, the Alternate Delegate who replaced Mr. Canham when he had to leave Geneva in the closing days of the Conference.

Enclosed for your interest and for possible usefulness in the educational program of your organization are sets of materials on two United Nations organizations of special concern to farm people.

(1) UNRRA. The need for accurate information and clear thinking by the people about the United Nations effort in the relief and rehabilitation field and about the part of this nation in that effort would appear to be a very great one during the next year or two. Here are the crucial facts. Additional copies of these three items may be obtained in quantities without charge for general distribution by writing to Mr. A. E. Casgrain, Chief of Groups Liaison, Washington 25, D.C. In addition, a limited number of sets of a larger "Speaker's Kit" of materials may be obtained for the information of discussion leaders and speakers.

(2) UNFAO. This office is at work at present on a farmer discussion guide on the United Nations Food and Agriculture Organization, but in view of the Quebec Conference now in progress many groups may want immediately to study this enterprise and its meaning for American farmers. The purposes of this organization bear a close relation to the United Nations effort to keep the peace, and all American farm people have a stake in those purposes and in that effort. The enclosed materials should be helpful to farm leaders. A limited number of copies of "Food for the Family of Nations" and of Dr. Tolley's Academy address, as well as of the mimeographed items are available through this office without charge. The "Food for Freedom" pamphlet may be obtained as indicated on the last page.

UNRRA IN OUTLINE

What is UNRRA?

UNRRA is an international organization made up of 47 member governments organized to provide relief and rehabilitation to the people of liberated territories in Europe and the Far East.

UNRRA is governed by a Council of official representatives of the 47 nations, which meets at regular intervals. Administrative responsibility is vested in the Director General, Herbert H. Lehman. UNRRA's staff is international, and by June, 1945 included persons of over 30 nationalities.

UNRRA assists a country in agreement with the national authorities; if the area is still under military control, in agreement with the military.

It is concerned with meeting immediate basic needs for food, clothing, medical care and disease prevention, household supplies, public utilities, and transport facilities.

UNRRA's funds are spent for relief and rehabilitation supplies mainly for those liberated countries whose governments are unable to pay for imports in foreign exchange.

What help does UNRRA provide?

Relief supplies Food, clothing, fuel, medicines, household supplies, etc.

Relief services Health and welfare services, repatriation of displaced persons, etc.

Rehabilitation supplies and services. Seeds, fertilizers, raw materials, machinery, transportation and other public utilities, technical service, etc.

How is UNRRA financed?

Funds consist of contributions from the member countries. Each member nation not occupied by the enemy was originally asked to contribute at least 1 per cent of its national income for the year ending 30 June 1943. A second contribution of like amount was recommended by the Council at its meeting in August, 1945. All member countries contribute to administrative expenses.

The original total UNRRA budget was approximately $1,862,000,000.

How big is UNRRA's task?

The relief problem of this war is unprecedentedly great, due to:

The destructive power of modern weapons and the scorched earth policy of the enemy.

The subjugation of more than 140 million people in Europe, over 84 million in China, and 130 million in southeast Asia.

The number of displaced persons requiring relief, estimated at 12 million in Europe and 40 million in China.

The acute scarcity of housing, food, clothing, blankets, shoes, soap, medical supplies, etc., increasing the prevalence of disease and the threat of large-scale epidemics and plagues.

The shortage of agricultural and industrial equipment, tools, livestock, and other means of resuming production.

The destruction of transportation facilities, power resources and installations.

The difficulty of re-establishing governmental controls and services.

How was UNRRA Organized?

On 9 November 1943, the representatives of 44 nations met at the White House to sign the Agreement which established the United Nations Relief and Rehabilitation Administration (UNRRA).

Two days after the signing of the Agreement, the Council opened its first session in Atlantic City, and elected Mr. Lehman Director General. A second session of the Council was held in Montreal, Canada, in September, 1944, and a third in London, in August, 1945.

UNRRA is now a fully established international organization, at work throughout the world—international in creation, in government, in staff, in financing, in activities.

"UNRRA'S PRINCIPLE IS HELPING PEOPLE TO HELP THEMSELVES."—Herbert H. Lehman.

What has UNRRA been doing?

Since its creation, UNRRA has been engaged in organizational, planning, procurement and operating activities. The Administration:

1) Established headquarters in Washington, D. C., responsible for global direction of policy and operations; a European Regional Office in London, responsible for management of European and African field operations; an area office in Cairo; a Regional Office for the Southwest Pacific in Sydney.
2) Made the necessary arrangements with the Governments of supplying countries for the contribution of goods and convertible exchange; obtained allocations for the procuring of supplies and shipping from the Combined Boards; and completed arrangements with the appropriate Governmental authorities for the procurement and forwarding of more than $1,000,000,000 worth of supplies. Made an agreement with SHAEF to provide assistance in connection with displaced persons in Germany. Completed formal agreements governing the provision of goods and services to the Governments of Greece, Yugoslavia, Italy, Czechoslovakia, San Marino, and Albania.
3) Took over relief operations in Greece on 1 April 1945 and in Yugoslavia on 15 April 1945, and is now providing relief also in Poland, Czechoslovakia, Albania, Italy, San Marino, and China.
4) Sent some 5,000 specialists at the request of the Allied forces to work in Germany and Austria in connection with assembling, feeding, caring for, and repatriating displaced United Nations nationals. These specialists include camp directors, doctors, nurses, welfare officers, transportation officers, and administrative assistants.
5) Since the spring of 1944 has been operating six large camps in the Middle East, housing approximately 40,000 Greek, Yugoslav and Polish refugees, and providing food, clothing, health care, some recreational facilities, and supervisory services. The population of the camps is being steadily reduced by repatriation of the occupants.
6) Conducted training courses for its overseas personnel, at schools set up at the University of Maryland in the U.S.A., at Reading in England, and at Granville in France.
7) Cooperated with voluntary agencies in the United States in collecting 15,000,000 pounds of used clothing in the fall of 1944, and 150,000,000 pounds of used clothing, shoes and blankets in the spring of 1945; helped organize similar collections in late 1945 in Australia and Canada.
8) Since 15 January 1945 has been responsible for administration of revised International Sanitary Conventions 1944, and in February began publication of a semi-monthly Epidemiological Information Bulletin, giving current data on diseases and epidemic situations throughout the world.

UNRRA UP-TO-DATE

1 September 1945

Acceleration of Program

V-J Day terminated hostilities, and opened the way for UNRRA's global operations on a full-scale basis. UNRRA is now procuring 800,000 tons of supplies as the initial program of aid to liberated China. The first ships for China will leave in September from Australia, Canada, the United States, and the United Kingdom.

To activate UNRRA's stepped-up operations, the Council met in London in August. Transactions included:

1. A resolution recommending another contribution of 1% of the national income of each of uninvaded nations, to raise about $1,800,000,000 more in order to complete UNRRA's operations in Europe and the Far East.
2. Admission of France and Canada to membership on the Central Committee, which makes policy decisions when the Council is not in session.
3. Admission of Denmark and the Ukranian and Byelo-Russian Soviet Socialist Republics to membership in the Council.
4. Aid on a full-scale basis to Italy, granted limited aid at the Montreal session; and classification of Austria, Korea and Formosa as regions which may qualify for relief aid.
5. Adoption of resolution asking supplying countries to ensure that UNRRA obtains prompt and equitable flow of supplies, and to make available war surpluses.

Supplies

UNRRA had shipped or delivered overseas over 1,700,000 long tons of supplies valued at more than $400,000,000 at the end of August 1945. About 80% of the tonnage shipped from the western hemisphere has been food, the remaining 20% consisting of clothing, textiles and footwear, medical supplies, and materials for agricultural and industrial rehabilitation.

UNRRA has experienced severe difficulties in procuring certain badly needed supplies, such as proteins, fats, oils, and soaps. UNRRA is busy combing the world for commodities in short supply. An UNRRA Mission was in India recently, procuring peanut oil and jute, and has gone to South Africa to obtain coal shipments for Greece. To ease its supply problems also, UNRRA is negotiating for the purchase of surplus military items. For example, UNRRA experts have gone to Europe to look over U. S. Army trucks, and plans call for probably 50,000 of these greatly-needed vehicles to distribute relief supplies on the continent.

Tentative estimates of supply requirements for the last half of 1945 amount to some 3,895,000 gross metric tons, valued at approximately $913,000,000.

Services

As of 1 September, about 5,000 UNRRA specialists were in Germany and neighboring areas, assisting in the assembling, caring for, and repatriation of United Nations nationals, of whom some 6,000,000 were found in the SHAEF areas of Germany. UNRRA personnel run assembly centers, and plans call for their taking overall responsibility for Displaced Persons work as of 1 November.

As of 15 August UNRRA had repatriated 5,781 Greeks, 15,930 Yugoslavs and 750 Dodecanese Greeks from the large UNRRA camps in the Middle East. UNRRA doctors are now serving in Greece, Yugoslavia, Italy, UNRRA's Middle East camps, in displaced persons operations in Germany, and in China. UNRRA is responsible for gathering and publishing official information regarding the incidence of epidemic diseases throughout the world, in the ***Epidemiological Information Bulletin.*** To date, 13 issues have been published. UNRRA welfare specialists are at work in the above-mentioned areas, and welfare officers are attached to every country mission and regional and area office in Europe and the Far East. They advise and aid Governments in organizing the handling of relief distribution to the needy and in providing institutional and communal care for children, the aged and handicapped.

Areas

Greece—Supplies delivered or en route through July, 922,469 long tons. Included grains and flour; used clothing; medical supplies; trucks; coal; livestock; freight car parts. Airplanes have been dispatched in connection with a large program of malaria control, to dust mosquito breeding grounds with DDT. Director General Lehman in recent inspection trip found UNRRA program in satisfactory order.

Yugoslavia—Supplies delivered or en route through July, 207,196 long tons. Port facilities improving constantly, thus permitting increasing volume of relief imports. Inland

transport remains critical. Director General Lehman met Marshal Tito in July and promised personal attempt to increase number of trucks for Yugoslavia. UNRRA has assumed leadership of typhus control program. No discrimination of any kind was found in relief distribution.

Poland—Supplies delivered or en route through July, 88,545 long tons. UNRRA delegation in Warsaw to conclude formal agreement, establish permanent mission, ascertain needs and formulate supply requirements. Reports show that conditions in Poland are desperate. Principal needs include meats, fats, livestock; transport locomotives, trucks; medical supplies; chemicals for tanneries; machinery tools.

Czechoslovakia—Supplies delivered or en route through July, 90,383 long tons. Consist chiefly of food, seeds, clothing, textiles, medical supplies, and machinery. Like Poland, this country suffered until recently from inadequate port facilities in Black and Baltic seas; situation now improving rapidly.

Italy—UNRRA Council in August made Italy eligible for full-scale relief. Supplies delivered or en route for previous limited program through July, 74,448 long tons, consisting chiefly of foodstuffs for children and nursing and expectant mothers. Some 400,000 persons being fed by UNRRA. Special food programs for school children of Naples and Rome. UNRRA assisting Italian Government extensively in combating malaria and tuberculosis, and improving nutritional standards.

San Marino—Agreement signed with Republic for providing medical, sanitary aid, and assistance to displaced persons, mothers, and children. Program expenditures will not exceed $30,000.

China—Plans call for initial shipments of some 800,000 tons of supplies, now that Japan's surrender has made possible opening of China ports. First ship loadings from U. S., U. K., Canada, and Australia, scheduled for September. UNRRA doctors now in Chungking, and have assisted in bringing cholera epidemic under control. UNRRA supply officers to be dispatched to Thailand and other countries in Southwest Pacific to obtain foodstuffs for famine-threatened areas in China. UNRRA works in closest cooperation always with CNRRA (Chinese National Relief and Rehabilitation Administration).

Philippines—UNRRA has allocated $1,000,000 for emergency relief, and first shipment, valued at over $600,000 and consisting principally of Canadian grains and U. S. medical supplies, now arrived in Islands.

Agreement for United Nations Relief and Rehabilitation Administration

"The Governments or Authorities whose duly authorized representatives have subscribed hereto,

"Being United Nations or being associated with the United Nations in this war,

"Being determined that immediately upon the liberation of any area by the armed forces of the United Nations or as a consequence of retreat of the enemy the population thereof shall receive aid and relief from their sufferings, food, clothing and shelter, aid in the prevention of pestilence and in the recovery of the health of the people, and that preparation and arrangements shall be made for the return of prisoners and exiles to their homes and for assistance in the resumption of urgently needed agricultural and industrial production and the restoration of essential services,

"Have agreed as follows:

"There is hereby established the United Nations Relief and Rehabilitation Administration....."

Let's Be Realistic

We are fighting two wars. One is being fought by our armed forces against the enemies of democracy. We are winning that war on all fronts.

But there is a second war that we must also win. It's the greatest war of its kind in human history. It's being waged against hunger, disease, and chaos. And unless we win this second war all of our military victories may prove in the end to have been useless.

To whip the Nazis and Japs, the United Nations mobilized armies and navies. To whip hunger and destitution and disease, the United Nations have created a special "task force" — UNRRA.

No one had to tell us that we couldn't lick Hitler unless we turned out the tools of war and supported our military leaders in every way. Well, we can't lick starvation and plague unless we give UNRRA the tools and support which it needs to finish its job.

It's as simple as that.

Smashing through Germany and capturing Iwo Jima weren't just the government's concern — they were the concern of the boy next door. Because the chances of a lasting peace depend also on how the devastated parts of the world are rehabilitated, you owe it to that boy in uniform — you owe it to yourself — to make the cause of UNRRA your concern.

UNRRA Adds Up To Common Sense

UNRRA stands for United Nations Relief and Rehabilitation Administration.

Some people are under the impression that UNRRA is a wartime agency of the United States Government. It isn't. The first thing to remember is that UNRRA is

not an American, or American-dominated, organization. UNRRA is an international organization, and as such it is as much Icelandic, or Peruvian, or Norwegian, as it is American. UNRRA offices are scattered all over the globe — in Washington — London — Chungking — Cairo — Sydney. There are UNRRA missions in the Balkans, in Latin America, in China. There are about thirty nationalities represented on the worldwide UNRRA staff.

Furthermore, private relief agencies from the United States, Canada, Australia, Great Britain, and other countries also participate in UNRRA's work. These agencies contribute both funds and staff for specialized services. There is wide opportunity for private relief organizations to supplement the work of UNRRA.

On November 9, 1943, representatives of forty-four United Nations signed an Agreement to handle jointly and cooperatively the relief and rehabilitation problems arising out of the war. The list of these nations begins with Australia and ends with Yugoslavia. It's important to remember that each of the forty-four nations in UNRRA — large and small — has only one vote in the Council. No more. No less.

Granted, then, that UNRRA is an international organization. But isn't it still just a "charity" organization— a handout? The answer is — no.

Herbert H. Lehman, Director General of UNRRA, has stated the purpose of UNRRA in straightforward, realistic language:

"The United Nations undertook this responsibility for three major reasons: (1) because simple humanity demands that we feed the starving, clothe the naked, and bind up the wounds of the sick; (2) because of military security: the stabilization of civilian conditions behind our fighting lines is obviously essential; and (3) because of enlightened self-interest: the knowledge that the world's future will be in constant peril if the areas liberated by our armies fester with disease, unemployment, inflation and unrest."

Let's put it this way: is it "charity" to keep a liberated area peaceful so that our armies can operate secure in

the knowledge that their supplies of food and materials won't be looted behind their backs? Is it "charity" to act now to prevent the spread of infectious diseases throughout the world? Or "charity" to help our allies who gave everything to save us all from the Fascists, and who, once they are back on their feet again, will be in a position to trade with us and buy our automobiles and refrigerators?

Is all this "charity" — or just plain common sense?

Who Gets UNRRA's Aid?

The biggest war in human history will be followed by the biggest relief problem ever seen. Can UNRRA take care of over 150,000,000 people in Europe, and over 250,000,000 people in the Far East, who were trampled on by the enemy, and left to starve or die of disease?

UNRRA was never asked to do the whole relief job. Our allies are just as proud as we are. They intend — and already have begun — to rebuild their smashed homelands with their own men and materials. Europe will meet 9/10ths of its own relief needs from its domestic production. However, the liberated lands must import from uninvaded countries certain supplies — for example, medicines and hospital equipment to replace those which were either destroyed or carried off by the enemy; machine tools and spare parts to enable smashed factories and railways to operate again; seed and fertilizer so that the scorched earth can produce once more.

But — and this is important — the liberated countries in Western Europe — France, Belgium, Holland, Luxembourg, Norway — can pay for the bulk of these imports. Therefore, UNRRA will not have to provide most of the supplies which they need.

Then who gets aid from UNRRA?

Those countries which were invaded, and whose resources were so completely depleted that they do not

possess enough foreign exchange to pay for the supplies which they must import. UNRRA will assist them.

Which are these countries?

The number is not fixed, for unforeseen events may make it necessary for new nations to ask for aid they did not require before. However, as matters stood in the early part of 1945, the following nations had asked to receive UNRRA assistance: China, Poland, Yugoslavia, Greece, Czechoslovakia, Ethiopia, and Albania. In addition, limited aid was being given to mothers and children in Italy.

Doesn't UNRRA ever help countries that can pay for their own relief imports?

Yes, for certain purposes. The problem of 12,000,000 displaced persons in Europe, and about 25,000,000 in the Far East cuts across all boundaries. People driven from their own countries have to be helped home. UNRRA will assist in the job of repatriation and in caring for these victims of war as the need arises. That's a common sense approach.

Special services — like those dealing with health and welfare assistance — will be yet another of UNRRA's contributions to both "paying" and "non-paying" countries.

UNRRA also sends emergency supplies to particularly devastated areas, even those areas belonging to "paying" countries. This will be done, because when people are in desperate straits, they must get help from whoever can reach them fastest with assistance. For example, UNRRA rushed in emergency supplies to take care of critical needs in Normandy in the Spring of 1945.

UNRRA doesn't ring doorbells. Aid is given only after a nation asks for it, and can prove that it must have it.

UNRRA gives aid — not as charity — but as common sense and gratitude. What UNRRA is doing is to recompense in a small way the neediest of those who stood steadfast against our common enemies, and who made such great and courageous sacrifices — enabling the uninvaded to gain the time and strength to turn the tides against the aggressors.

What Price UNRRA?

A very good question.

The aid goes to the invaded countries lacking resources. The aid comes from the uninvaded countries. This means that 31 out of 44 United Nations that signed the UNRRA Agreement share in contributing money and supplies to UNRRA.

Furthermore, they share proportionately and democratically. The UNRRA Council recommended that each of the uninvaded nations should contribute supplies, services, and money equal to one per cent of its national income for the year ending June 30, 1943.

What does this mean in actual practice?

It means that all the contributing nations are asked to give the same percentage — to bear the cost of UNRRA fairly and equally.

And that's how it's working out. From the largest to the smallest, UNRRA's member governments have responded. In fact, it might be said that it is much easier for rich industrial countries to contribute their one per cent than it is for little nations not over-blessed with resources and which have to exist on a modest rural economy. But just the same, these small countries have given their full measure to help the victims of war.

In addition, it should be pointed out that all the member states — including those that were invaded — contribute jointly to UNRRA's administrative expenses. So all the countries are working as a team to make sure that UNRRA gets the funds to do its job.

That's true democracy.

The Congress of the United States authorized a total contribution of $1,350,000,000 — equivalent to one percent of the national income. That is less than this government has been spending in one week on the war. It is certainly not too much for the purpose of binding up the wounds caused by the war.

The total contribution asked of all the uninvaded nations is in excess of $1,800,000,000.

Up to 90 per cent of each country's contribution may be spent for products and services within the country's own territory

Here's another important item to keep in mind: 90 per cent of each country's contribution will be spent inside its own borders — spent on producing and purchasing the supplies which that country will then contribute for use by the invaded nations which need them. In other words, the supplies which the United States and Canada will contribute for the relief of starving Greeks and Chinese will also provide employment for American and Canadian farmers and workers.

That adds up to helping liberated peoples — and ourselves — at the same time.

What UNRRA Must Deliver:

Food

Americans and Canadians are eating better today than they did before the war. Each gets on the average over 3300 calories a day. Because of the ruthless way in which the Nazis ruined Greece's villages, fields, and

fishing industry, the average Greek at home eats less than one-third as much as Americans — about 1,000 calories a day. In other words, unless Greece gets shipments from abroad until such time as she is rehabilitated sufficiently to feed herself, her inhabitants must starve.

And that goes for Yugoslavia, and great areas in other parts of Europe, as well as China. They need food desperately — not six months or a year hence but now!

Clothes

In Europe and Asia the textile mills fell into the hands of enemy forces. For years the civilians could buy no clothes at all. They couldn't buy shoes either. That's why millions upon millions of these war victims are completely destitute. Without UNRRA they will have no warm clothing to replace their rags — no shoes to replace the bandages or straw they have been wearing.

Medical Supplies and Services

Hunger, destitution, and cold breed disease. American public health authorities tell us that with the exception of influenza, every dangerous contagious disease has doubled, or trebled, its number of helpless victims. Malaria has swept across southern Europe. Rat-carried typhus has broken out in the Balkans and and Italy. Virulent diphtheria has been contracted by millions in central Europe — and thousands have already perished.

A generation of children has been struck by rickets, tuberculosis, and trachoma.

And remember — nothing is more international than disease. It doesn't respect national boundaries. We recall how Spanish influenza killed off millions after the last war in Europe and America. Europe's war victims need UNRRA's medical assistance today — and our own health is in danger unless UNRRA can do its full share in preventing epidemics from spreading across entire continents. UNRRA is responsible for safeguarding the world's health by the powers given it to control the spread of epidemics. The importance of this job

can't be over-estimated, and it's one which UNRRA's public health experts are working at day after day.

Agricultural and Industrial Help

It's not enough simply to send food in alone. UNRRA's main job is to help people to help themselves. And that can best be done by sending in seeds, fertilizer, livestock, plows and cropbinders where needed so that Europe and China can start growing their own foodstuffs — and in that way feed their own people.

Furthermore, by sending in tools and essential replacement parts — ranging from hammers and handsaws to wheels for railway locomotives, the factories can begin to turn out textiles and finished products, the railroads can transport them to where they are needed, and the economic life of the devastated areas can be put back on its feet once more.

Getting Displaced Persons Back Home

Nearly 12,000,000 people in Europe alone have been carried off from their homelands during this war, and forced to toil as slave labor in Hitler's war machine. The job of getting these tragic victims back home is literally staggering.

It will be necesary for UNRRA, working with the Military, to assemble and register all of these people, feed and look after them, communicate with their native lands and return them in an orderly way to their homes.

These are the supplies — these are the services — which UNRRA must deliver.

Can UNRRA do it?

How UNRRA Acts.

UNRRA is set up very much like the government of a democracy. Each of the 44 member nations has a vote on its Council. Its executive head is the Director General, who, with his staff, carries out relief operations as determined by the resolutions of the Council. In addition, there are committees dealing with the areas

where UNRRA will function and the particular tasks which UNRRA will handle. These committees are in a position to give expert advice so that UNRRA can perform its many jobs both effectively and efficiently.

In a sense, the Council is a sort of Congress for UNRRA, and the Director General and his staff are like the President and Cabinet of UNRRA.

But UNRRA is not a superstate lording it over the countries which brought it into existence. On the contrary, UNRRA is a service agency of the 44 United Nations. UNRRA at all times respects the sovereignty and interests of all the member countries.

Therefore UNRRA cannot demand — it recommends. It cannot go out and commandeer ships and supplies.

If it cannot act on the basis of force, then how does it act?

On the basis of goodwill and cooperation. UNRRA cooperates at all times with the Military and responsible political authorities. When a country requests UNRRA aid and has been liberated, UNRRA can enter that country only with the consent of the liberating armies. Once in, UNRRA cooperates with, and works under the supervision of the Military. The army authorities have final control until they decide to move on — at which time they relinqiush responsbility for supervising relief.

When the military moves on, UNRRA then cooperates with, and works under the supervision of, the responsible political authority of the country.

Moreover, UNRRA cooperates wholeheartedly with a large number of voluntary relief organizations from the United States and other countries, and several hundred representatives of these agencies have been performing invaluable services in the field as part of UNRRA's staff.

At all times UNRRA acts as a service agency.

However, by the terms of its Agreement, UNRRA makes sure that wherever it operates, there will never be any discrimination because of race, creed, or political belief in the distribution of supplies and services.

UNRRA acts by the principles for which our armies have fought — and won.

31 *uninvaded countries contribute in kind from their resources*

That's All Very Fine, But —

Isn't ACTION much harder than laying down principles or passing Council resolutions?

Much harder!

The problem is to translate these resolutions into accomplishments. UNRRA will not be judged by its printed resolutions, but by the job it does in the areas where people are starving, dying of disease and exposure, and need to have their homeland set back on its feet.

Before UNRRA can bring help to a liberated country, it has to get hold of the supplies. And that's not easy. Some supplies are abundant — such as wheat and raw cotton. UNRRA does not have to stockpile these supplies, but can obtain them with relative ease.

But what about meats and fats? Penicillin? Electrical equipment? There's no abundance of these supplies! Furthermore, they are much in demand;

helping to set in motion the economy of liberated countries

the allied armies and navies need vast quantities of food; they need medical supplies; they have to repair or replace electrical equipment constantly. Naturally, their needs must be met first. Therefore, the Military has first priority on all goods in short supply.

UNRRA understands and appreciates the necessities of the situation. Now, after the army and navy have had first choice, the remainder of the goods in short supply must be allocated among various governments and their agencies. UNRRA is a claimant agency.

As such, UNRRA is allocated its share by the Combined Boards which are responsible for seeing that demands are satisfied according to the urgency of their claimants' needs.

You can easily see that because of the heavy demands for supplies of which there are not enough to go all the way round, UNRRA often has great difficulty getting goods either in large quantities or just when it wants them. Therefore, UNRRA examines the requests of all

countries — both paying and non-paying — to see that none gets more than a fair share of the world's available relief supplies.

When supplies are made available for UNRRA's own use, it purchases them through national procurement agencies. For example, in the United States, the Foreign Economic Administration handles the orders. In some countries it's done by special mixed commissions.

But getting supplies is by no means the whole of UNRRA's headache. What's the use of having supplies unless they can be transported across the ocean to where they are needed?

Shipping has been the most critical bottleneck confronting the United Nations. Never before were two major campaigns waged at the same time on opposite sides of the earth. The Military has needed every ship available. As a result, UNRRA's ability to get hold of shipping space — and therefore UNRRA's ability to deliver the goods — has depended entirely on the success of our military efforts.

To complicate UNRRA's task still further, even once we obtain the supplies and the ships, a sizable obstacle still has to be overcome before relief operations can get underway. That obstacle is inland transportation.

In Greece, for example, the retreating Nazis smashed all available transport facilities, tore up tracks, and even dumped locomotives in the Corinth Canal. The necessary job of train-busting on the part of Allied fliers has depleted the rolling stock available for relief operations. In China most of the railroads fell into the hands of the Japs, while the river boats — on which so much of China's transport depends — have either largely been sunk or taken over by the enemy.

In parts of Europe and China, people have starved within a hundred miles of areas producing rich harvests — all because it was impossible to find the means to transport the food.

A major part of UNRRA's work in liberated countries will have to be the supplying of trucks and gasoline, and repair of railroads, to make relief deliveries possible.

Where Do We Go From Here?

We've talked about the need for UNRRA. We've discussed the difficulties facing UNRRA. Where do we go from here?

The answer: we've already gone a long way.

For example?

Let's take through the first few months of 1945. By that time, UNRRA was operating six large camps in the Middle East, looking after upwards of 50,000 Yugoslav and Greek refugees. Furthermore, it had repatriated a large number of displaced persons to Yugoslavia and Greece, all eager — and fitted by training received in the UNRRA camps — to assist in the rehabilitation of their homelands. It had done much more. UNRRA officials had signed essential agreements — without which UNRRA could not go into a liberated country and operate — with the governments of Greece, Italy, Yugoslavia and Czechoslovakia. These agreements flashed a green light to UNRRA country missions to start rolling — and in some cases move into high gear at once.

UNRRA had assumed responsibility from the Military for the relief and rehabilitation program in Greece, and an UNRRA hospital ship was bringing medical assistance to the islands off the Greek mainland.

UNRRA was cooperating with the Military in distributing supplies in Yugoslavia and on April 15, had taken over responsibility for relief operations in that country.

Soon after permission had been granted to proceed via the Dardanelles, UNRRA's first supplies to Poland and Czechoslovakia were on the high seas.

UNRRA was assisting mothers and children in war-torn Italy, and thousands of tons of supplies were pouring into that country.

Trained displaced persons experts had been assembled in teams, and between 5,000 and 6,000 stood ready at General Eisenhower's signal to enter Germany and assist in repatriating the millions who had been carried off from other countries to labor in Hitler's war machine.

After successfully cooperating in the fall of 1944 with American religious groups in gathering 15,000,000 pounds of used clothing — much of which went to Belgium, France, Luxembourg, and the UNRRA Middle East camp — UNRRA linked forces with American voluntary relief agencies in the spring of 1945 in a gigantic used clothing program. This was the United National Clothing Collection, and its goal was 150,000,000 pounds of clothing, shoes, and bedding — the largest campaign of its kind in American history.

By the spring of 1945, also, UNRRA experts were busy drawing up estimates and making plans in China, cooperating with the Chinese government, and preparing the way — as soon as military successes permitted — for the largest single national program of relief and rehabilitation.

That was UNRRA in operation early in 1945.

UNRRA was getting into high gear. It had gone a long way. It was getting ready to go the rest of the way — which meant performing the full relief and rehabilitation job which it was set up to do.

UNRRA is its own justification.

All of us want a post-war world in which we can live in peace and security. But there can be no peace and security if millions of people are allowed to perish of hunger and pestilence.

People talk glibly of reconstructing the world. Before reconstruction the world must receive relief and rehabilitation. First things first.

That's why it's so important that the people should know about UNRRA.

Summing Up—

1. UNRRA is a cooperative service agency of 44 United Nations.
2. UNRRA is non-political, non-discriminatory.
3. UNRRA is temporary; it ends with the solving of relief and rehabilitation problems in liberated areas.

Production of essential foods and commodities was halted by lack of tools and machine parts which UNRRA helps to supply

4. UNRRA's aid is based on the principle: Helping people to help themselves. Rehabilitation is as important as relief.

5. UNRRA assists liberated lands unable to pay for their own relief and rehabilitation. In addition, it gives supplementary, immediate assistance to particularly devastated areas in any liberated country, whether its government can pay or not.

6. UNRRA's aid comes chiefly in the form of food, clothing, medical supplies, agricultural and industrial assistance, and repatriation of displaced persons.

7. UNRRA receives relief supplies and services from uninvaded member countries which make contributions in keeping with the recommendation of one per cent of each country's national income for June 30, 1943.

8. UNRRA works at all times in cooperation with military and responsible political authorities.

9. UNRRA also acts, when requested, as adviser upon and expediter of orders of relief supplies by member nations that can afford to pay.

10. UNRRA represents:

—an expression of gratitude by the uninvaded nations to those which bore the brunt of enemy terror.

—not charity but common sense — for in helping liberated peoples to regain a healthy position in the world, we are also creating good-will for ourselves, and valuable post-war markets for our products.

This is a brief statement about a very complex organization. Surely you want to know more about it. You may obtain the following materials, free of charge, from United Nations Relief and Rehabilitation Administration, 1344 Connecticut Avenue, N. W., Washington 25, D. C.

A Program on United Nations Relief and Rehabilitation (1944, 29 pages).

Selected Reading List on United Nations Relief and Rehabilitation Administration (1945).

The following publications are for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

First Session of the Council of the United Nations Relief and Rehabilitation Administration. Selected Documents. (1943) Price 35 cents.

First Report to Congress on United States Participation in Operations of UNRRA. (President's Report, September 30, 1944.) Price 10 cents.

Second Report to Congress on United States Participation in Operations of UNRRA. (President's Report, April 11, 1945.) Price 10 cents.

"The sufferings of the little men and women who have been ground under the Axis heel can be relieved only if we utilize the production of ALL the world to balance the want of ALL the world. In UNRRA we have devised a mechanism, based on the processes of true democracy, which can go far toward accomplishment of such an objective in the days and months of desperate emergency which will follow the overthrow of the Axis."

From President Roosevelt's address at the signing of the United Nations' Agreement, 9 November 1943.

"The hope of the world centers in its children. At no other time in history have there been so many children among the helpless victims of warfare. There are millions who have known no other life than one filled with suffering and death, starvation and disease, separations and painful wanderings. The future of the liberated Allied countries and their place in the family of United Nations depends in great measure upon restoration of strength and vigor to the child victims of World War II. It is UNRRA's obligation, when requested, to assist in the rehabilitation of these unfortunate little beings, to bring to them a measure of health and to help re-introduce them to security in their homes. Justice and future world security demand no less."

HERBERT H. LEHMAN

USO

UNITED SERVICE ORGANIZATIONS, INC.
EMPIRE STATE BUILDING
NEW YORK CITY

PROGRAM AND SERVICES FOR RETURNING SERVICEMEN AND WOMEN

Field Service Bulletin #36 February 1944

From its inception, USO has been guided by the principle that its program to be vital and meaningful, needs constantly to be adjusted to meet new situations and new needs of members of the armed forces. The early program of USO established shortly after universal conscription became effective has been constantly adapted to meet the greater demands on USO program created by the rapid expansion of the armed forces. A second development to which USO is adapting is now taking place wherein the armed forces are changing from an army in training to an army in combat.

Today American servicemen are dispersed throughout eighty-two different combat zones. Casualties from battle fronts have been returning to the United States since Pearl Harbor in a slow but steady stream. More than fifteen thousand combat casualties have already been discharged from the services. Present indications point to a rapid, perhaps climactic intensification of the conflict with millions more of American servicemen involved in combat operations overseas. Men who have seen action in Africa, Sicily, Italy, the Aleutians and the South Pacific have been returned to the United States and are coming to USO Clubs.

The present bulletin describes the most effective approach for USO workers in relating USO program to the needs of returning servicemen and women. Because of limited program experience in this area it is necessarily not primarily composed of specific suggestions. It will be most valuable when used as a guide to help establish correct methods and procedures.

It is concerned with:

I. Identification of returned servicemen and women.

II. Functions of USO in serving returned servicemen and women.

1. Cooperation with military authorities
2. Providing established USO program to meet specific needs of returning men and women
3. Assistance in conditioning local community to normal acceptance of returned servicemen and women
4. Integrating servicemen and women into the civilian community

III. Program Planning to meet needs of returning servicemen and women.

1. Consultation with military authorities
2. Program suggestions
3. Community resources and cooperation with other agencies
4. Staff training
5. Volunteer training

I. Men are Being Sent Back to the United States

CASUALTIES - Many of the men who have returned to the United States from active duty in combat zones have been brought back because of wounds received in action, that require protracted hospitalization and rehabilitation, because of illness, or because they suffer from neuro-psychiatric disturbances.

TASK FORCES - Detachments of Marines, Army units and other task forces are at times returned to the United States after they have completed their special missions; Navy personnel who are on furlough or are being reassigned from ships which have returned to the United States after combat.

CASUALS - A proportionately small group who because of the extent and severity of their combat duty are given an extended furlough or are sent back to the United States for rest and reassignment. (Airplane crews are an example). The overseas commander determines when an individual should be returned to the United States. The rotation of whole units with a definite time limit for overseas duty is regarded as impossible because of insurmountable shipping difficulties.

Returning servicemen and women are coming to USO:

1. On furlough.
2. On sick leave.
3. On leave from AAF Distribution Centers.
4. In off-duty time from military posts in United States to which they have been reassigned.
5. During shore leave from ships and naval posts.
6. Ambulatory cases when USO is near a hospital.
7. After discharge from the service while still in uniform or in civilian dress.

II. Functions of USO in Serving Returned Servicemen and Women

It is the function of USO to meet those needs of the returned servicemen which can be served through the resources and techniques at its disposal in accordance with its established program. On the whole, returned servicemen will be served most effectively when the total program is responsive to their needs and interests and they are absorbed into it on the same basis as the men in training and other constituents. Program developed along these lines will be directed toward helping the returned servicemen reestablish normal, healthy social relationships. It will carefully avoid any expression of the inherent tendency to focus unduly or negatively on any difficulties which these men may have in adjusting. Any attempt to develop segregated activities for returned men should be discouraged. (An exception would be made in cases where hospital authorities might request special programs having specific purposes in mind).

The four main functions of USO in serving returning servicemen and women are:

1. To Provide its Regular Program of Activities and Services to Returned Servicemen and Women with a Definite Concern for their Specific Needs and Interests.

   The general objective is to help the returned servicemen and women reestablish healthy, normal and satisfying social relationships. As more experience is gained in dealing with their needs it will become increas-

ingly possible to support this general objective with more specific objectives. Some can, however, be stated as suggested guides:

a. To help them feel that their essential personality has not been impaired.

b. To help them feel that society places great value upon them as individuals, -- not only as heroes who have made a great contribution to the nation's welfare, but because as individuals they are accepted and liked and because their individuality is enjoyed by others in normal social intercourse.

c. To help them achieve a greater understanding of the things for which they are fighting and to affirm for themselves the worthwhileness of the part which they are playing.

d. To help them feel that they are needed and that they have a worthwhile contribution to make in the war effort and in civilian society.

e. To help them develop confidence in themselves that will enable them to face obstacles and reestablish the goals of their personal lives.

The achievement of objectives is a <u>process</u>. Objectives are reached through seemingly remote beginnings with simple but effective activities and relationships. A sightless man who is successfully learning to manage a cup of coffee for himself and to enjoy conversation with friends in the USO Club is facing the challenge of the difficulties before him. The confidence which he develops in doing so successfully will enable him to face greater challenges outside of the USO Club with equal success. The man whose abilities are recognized by others through his participation in events and activities begins to reaffirm the value of his own personality through the value placed upon it by others. The professional and volunteer worker must see that this process takes place through:

1. Activities
2. Services
3. Setting and atmosphere
4. Relationships of people to each other.

2. To Provide Assistance in Conditioning Local Community to a Normal Acceptance of Returned Servicemen and Women.

In most communities USO shares this function with a number of agencies. In some communities USO may be the only agency to undertake such responsibility. In either case the experience which USO has gained in working with members of the armed forces will be helpful in accomplishing the following:

a. Interpreting the needs of returned men.

b. Helping civilians in the community develop realistic and understanding attitudes toward the needs of returned men.

Community attitudes will have considerable effect upon the returning servicemen. It is well to hold in mind that many of them have been overseas in battle areas for long periods of time and that the American home front is more remote from actual war conditions than the home fronts of other countries. The "sense of difference and separation" which many feel upon returning, may be expressed in questions about: Rationing, industrial conditions, prices and other changed conditions. Such questions not only express a desire for information but often reflect a feeling of isolation or separation from civilian life. An unquestioning acceptance of these men by the community will do much to put them at ease and provide them with the opportunity to reestablish normal satisfying social relationships. Such an attitude on the part of the community cannot be taken for granted for there is little in the experience of most communities or individuals that would make it possible for them to develop understanding and constructive attitudes toward such problems. This will be particularly true in communities near Amputation Centers and Plastic Centers.

3. To Assist in the Integration of Returned Servicemen in Normal Community Life.

In this function as in the one discussed above, USO generally will be working in close cooperation with other agencies. The community which has been conditioned to anticipate returning servicemen through a realistic understanding of their needs will be better able to provide opportunities whereby the men can achieve real integration in community life. In many situations these men are stationed in a particular community for a long period of time. Some of them are ambulatory hospital cases but are about to be discharged or are reassigned to duty. The way in which these men are accepted in the community, its churches, its homes and social activities is part of the process of integration. Even though this may be a temporary and incomplete experience with many men, its value is unquestionably great. For those who are about to be discharged it is a step which will make their homecoming and their absorption into civilian life easier. It is in itself the beginning of readjustment to civilian life and may avoid some difficulties which may attend sudden and disturbing change.

Discharged Servicemen. THE SERVICES WHICH USO CAN RENDER THE DISCHARGED SERVICEMAN MUST BE DIRECTED TOWARD FURTHERING HIS READJUSTMENT TO CIVILIAN LIFE. Discharged men are entitled to participate in all USO activities and services and they should be welcomed with the same spirit with which men on active duty are received. However, they will be served best when they are assisted in reestablishing satisfactory relationships in civilian community activities. Therefore USO functions regarding discharged servicemen are:

a. Information Service. It should be possible for discharged servicemen to receive information in a USO club regarding National, State and local agencies serving their needs in vocational training, continuance of education, family problems, job placement, veterans' benefits, etc. Such information is also made available by the military authorities and Red Cross.

For discharged men and those about to be discharged, information on services and benefits which they can receive from governmental and private agencies will provide encouragement for their return to civilian life. Not only does this information describe real opportunities for them to reestablish their civilian lives and profit by the use of personal initiative; it may also instill confidence by indicating to them that their welfare is a real concern of the nation.

b. Counseling and Case Work Services. In many instances, USO workers will be called upon to assist individuals as they work out plans to return to civilian life. Many of the returning men and women who come to the USO locally will be strangers in the community, or non-residents. Helping non-residents with their personal problems requires a high degree of interviewing skills, rapid evaluation of individual's social situation, and use of all possible resources which may be available to carry out a social treatment plan. Travelers Aid workers are especially trained to give this type of service and are in a position to accept responsibility for assistance to people who find themselves in difficulty while away from home. Therefore, returning servicemen and women who need help with personal problems, including financial assistance or other specialized services provided by Travelers Aid, should be referred to the USO Travelers Aid Service or to a local Travelers Aid Society if there is one in the community.

c. Referrals. Where USO is functioning in communities in which there are civilian agencies equipped to give needed information, guidance, or other individual services, they should be utilized and proper referral procedures established.

In many cases, it will be important not only to give information but to help a person establish effective relationships with another agency. USO staff members should have information regarding the function of other agencies in the local community and should agree upon the most effective referral procedures to be used. In many communities, the civilian member agencies of USO may be particularly helpful to assist returning servicemen and women to reestablish civilian contacts.

Primary responsibility for meeting the needs of discharged servicemen rests with the local communities and those agencies established for that specific purpose. In some communities, where there is no established local agency able to do so, USO may perform a valuable service in bringing to the attention of the community the need to organize its resource to meet specific needs of discharged servicemen. Segregated activities for discharged men that help to maintain their identification with military life for an indefinite period and thus hinder their acceptance of civilian values and goals should be carefully avoided.

4. To Cooperate with Military Authorities in Meeting Needs of Returned Servicemen and Servicewomen.

The development of the USO program nationally and locally has been assist-

ed by continued consultation with military authorities. It is important that consultation be maintained locally regarding USO's part in meeting the needs of returned servicemen. Where possible, it should be established on a regular basis as the practice now is in many areas. It is aimed at discovering what adaptations in the regular program are advisable, what needs of the returning servicemen can best be served by USO and information about the personnel, as the needs of the men in an AAF Redistribution Center may be different from those of the men on leave from a hospital. In some cases daytime programs have been suggested because many ambulatory men may be free to visit in the community during the day. In other instances requests have been made to obtain the use of swimming pools and other facilities or to arrange special programs. It should be clearly understood that USO's concern for the needs of the returned servicemen implies no departure from the established USO program.

III. Program Planning for Returned Servicemen

As far as possible plans aimed at meeting the needs of returning servicemen should be developed on a staff conference and community-wide basis. The particular abilities of staff members should be kept in mind and when possible they should be employed for the benefit of the total program. Consideration in planning should be given to the following:

1. Consultation with military authorities
2. How to develop the program utilizing all USO resources
3. Community resources and other agencies
4. Staff training
5. Volunteer training

1. Consultation with Military Authorities.

Contact with military authorities should be made with reference to the participation of all USO operations in the local program. This contact and consultation should extend to chaplains, rehabilitation officers, military psychiatrists and other members of the medical staff and of the American Red Cross.

2. Program Suggestions.

Men who have been overseas, facing crucial hardships in combat far from their homes, often respond most favorably to simple things. A home-like, comfortable and cheerful atmosphere in the club is essential. Such surroundings, in contrast to the experiences from which they have recently come, may help to induce feelings of ease and security. USO workers report that "men who have been overseas are more inclined to use the club as they would their homes".

a. The activities which are available should be varied and permit greater individualization.

b. Most men who have been in combat overseas have experienced the strong friendship and feeling of belonging to a group such as: a Fortress crew, a tank crew, a group of scouts, or a gun crew,

that has shared hardship and danger. The USO club and particularly its activities can help them to develop substitute relationships, in groups and with individuals.

c. More concern for the interests of one, two and three men in any activity is justified.

d. Where one leader of the arts and crafts activity or other activities was formerly adequate, it may now be advisable to enlist two or three more.

e. A number of reports indicate a desire on the part of these men to "do things for themselves" and to "take part in the running of the program".

f. Attention should be given to learning more about their particular interest. There are indications that they are adverse to the "jitterbug" variety of events, that they like to spend time in relaxed conversation with individuals, mostly older men, women or girls. Many references have been made to their interest in changes which have taken place in communities since their absence and their concern with post war conditions.

g. New and customary activities should be considered in the light of these and other interests.

h. Participation is likely to increase when the techniques of exposure and demonstration are used informally in reading rooms, lounges and other places where the men gather.

Services. All services must be rendered in terms of a basic understanding of the needs of the returned men. This applies as much to incidental services as it does to those that are more important. Methods of rendering services which involve a number of different USO workers or other agencies should be worked out and thoroughly understood in advance. Personal services should be discussed in the staff conferences and planned for on a common basis with regard for the special functions of the Travelers Aid.

In communities near general hospitals, USO can render to the families of visiting men in the hospital services such as:

1. Location of rooms.
2. Care of children during visits to hospitals.
3. Assistance or information on how to get to camp.
4. Help in adjustment to facing new problems.
5. Referrals to sources of information on compensation, veterans' benefits, vocational guidance, job placement,etc.

Other such services for servicemen themselves may include:

1. Conveying messages.
2. Assistance to Chaplains in securing civilian religious advisors when requested.
3. Providing home hospitality on a selective basis

The particular skills of staff members should be utilized with reference to the functions of:

1. American Red Cross
2. Chaplains
3. Rehabilitation Officers
4. Medical Staff
5. Veterans Bureau
6. Civilian religious leaders
7. Social workers

Counseling on spiritual problems will be a matter for particular concern to USO. It will be necessary to face the limitations of professional workers who do not have special training and skills for such functions. It is important that recognition is given to the fact that many individual problems can be resolved only by the assistance of specially trained personnel and that an attempt to assist in some cases by untrained personnel may be harmful.

3. Community Resources and Other Agencies.

The utilization of community resources and the development of procedures with other agencies should be approached on a staff conference basis. After an understanding has been reached in the staff conference regarding the types of problems to be referred to other persons, federal, state agencies, private agencies, military medical staffs, chaplains, Red Cross or others, referral procedures should be agreed upon with these persons and agencies. It is therefore essential that the functions and services of other agencies be clearly understood. Participation by USO in community wide committees and councils concerned with developing a coordinated local program for the benefit of returning servicemen should be offered. In some cases it may be advisable for USO to bring to the attention of the community through the USO Council, the need for such organizations. Coordination should be directed toward a full use of resources, the avoidance of duplication, clearance of information, and the elimination of unnecessary or unproductive contacts with agencies by servicemen.

The number and variety of agencies in each community will, of course, vary. The agencies listed below are concerned with discharged servicemen and women:

a. Reemployment Committeeman attached to every Local Selective Service Board.

b. Army Emergency Relief.

c. Navy Relief.

d. United States Employment Service.

e. The Veterans' Administration .

f. The Vocational Rehabilitation and Training Division of the

Federal Security Agency, which operates under the State Department of Education in each individual State.

g. Information concerning Federal employment - may be obtained at any Post Office of any Civil Service Office.

h. The civilian member agencies of USO and other similar community agencies.

Note: See attached outline of functions and services of some of the agencies listed above.

4. Staff Training.

The Staff Conference should give consideration to setting up a program of staff training aimed at achieving increased understanding of the needs of returned men and the improvement of staff members' skills in meeting these needs. The following suggestions should be included for study:

a. The general and specific needs of returned servicemen.
b. Program objectives related to needs.
c. The functions of other agencies.
d. Identification of types of problems which require referral.
e. Referral procedures and techniques.

Assistance in organizing and conducting in-service training in the Staff Conference may be obtained by calling on staff members with special skills, military officials, Red Cross and local religious and educational leaders and other professional workers with the necessary experience and skill.

5. Volunteer Training.

Volunteers must be carefully trained with regard to the new relationship with returned servicemen which they may have. Careful selection should exclude those who are emotionally unsuited to such relationships. Older and more mature volunteers may be best suited to assist in certain phases of the program although younger persons carefully selected and well trained, can render equally important services. Trained leaders of small group activities will be particularly valuable. Reports indicate that veterans of the last war who have made successful adjustments in civilian life are generally good volunteers. Volunteer training should be based upon the following:

a. Sound concepts of mental hygiene.
b. Recognition of the limitations of the untrained persons in dealing with complex personal problems.
c. The functions of USO and objectives of the program.
d. Functions of other agencies and professional workers.
e. Functions and contributions of volunteers.

As previously stated, it should be clearly indicated that USO's concern for returned servicemen implies no departure in its established program but represents a desire to utilize this program to meet needs of returning men.

NOTE: The material included should be read and used for discussion and study material in the Staff Conference:

1. "Psychiatric Toll of Warfare," reprint from Fortune Magazine, December 1943.
2. "Understanding People in Wartime" (National Travelers Aid Association).
3. Rehabilitation of Disabled Soldiers (O.W.I.)

USO

Supplement 1 May 1944
Field Service Bulletin #36
Subject: USO Services to Discharged Servicemen*

Enclosures: Supplement 1A, Information necessary for INFORMATION, REFERRAL AND OTHER SERVICES TO DISCHARGED SERVICEMEN AND SERVICEWOMEN
Questionnaire on Local Resources

The following statement and the information contained in supplement 1A has been prepared in response to questions from the field on USO policy regarding discharged servicemen. This information is sent to USO field staff to develop further the policy stated in Field Service Bulletin #36, and to give basic information for referring discharged servicemen and servicewomen to those agencies best equipped to serve them. The enclosed questionnaire is designed to aid local staff in organizing information about resources for these services in their respective communities.

* *

"The services which USO can render the discharged serviceman must be directed toward furthering his readjustment to civilian life. Discharged men are entitled to participate in all USO activities and services and they should be welcomed with the same spirit with which men on active duty are received. However, they will be served best when they are assisted in re-establishing satisfactory relationships in civilian community activities." (From Field Service Bulletin #36, p.4)

USO was created to serve men and women of the armed forces and war industry workers. Services to discharged men can be rendered only in connection with existing USO operations and are incidental to the major program responsibility of USO.

DISCHARGED SERVICEMEN MAY SEEK OUT THE USO for help in getting information, or to participate in recreational activities because:

1. Some men recently discharged from the service find it difficult to adjust quickly to civilian life and find in the USO the opportunity to maintain a connection with their former military life. It is entirely possible that the transition to civilian life is made easier through maintaining such connection for a short period of time.

2. In some communities discharged servicemen and women come to USO because other leisure time and recreational facilities in the community are extremely limited.

3. Friends and acquaintances of their age group are in the service and the USO is one of the few places where discharged servicemen find men of their age.

4. For many servicemen, USO has been one of the few agencies besides public schools with whom they have ever had contact. They naturally expect that those who served them while they were in uniform will maintain their concern and interest in them after they have completed their duty.

*The term "Servicemen" is to be understood to include Servicewomen as well.

Whatever the reasons are that bring these men to the USO, whether they are still in uniform or already in civilian clothes, they should be welcomed and all facilities should be made available to them. However, the major responsibility of the USO in meeting the real need of the discharged servicemen is to assist them in making their re-entry into civilian life. One of the most important ways by which this assistance is given is by efficient referral to the community agencies which by the nature of their function can best serve these men.

The discharged serviceman is a civilian and his adjustment to civilian life will be more realistic if it is made through contact with civilian-serving agencies. The assistance which USO gives him in establishing a relationship with the proper agency is a service to him. The real purpose of service here cannot be accomplished by placing restrictions on his use of USO facilities.

USO STAFF HAS TWO FUNCTIONS IN SERVING DISCHARGED SERVICEMEN, for although the primary function is to help the servicemen take advantage of available resources and facilities in adjusting to the responsibilities of civilian life, it may also be possible to help him by meeting a need which cannot be met by existing community agencies or for which there are no community services.

In carrying out either function, USO can make available the following services:

Use of USO physical facilities
Information and referral
Casework and counseling
Opportunity to participate in program

AVAILABLE RESOURCES AND FACILITIES IN THE COMMUNITY will vary greatly from one community to another. The specific needs of the serviceman will also vary, depending on his relation to a given community, that is, whether it is his home community, the community where he is discharged, the community to which he comes as a new or temporary resident, or the community where he is a transient and non-resident.

It is the responsibility of the USO staff worker to know the local situation and the specific needs of the serviceman so that connection may be made speedily and effectively between the serviceman and the appropriate agency or organization.

CENTRAL REFERRAL RESPONSIBILITIES have been assumed in some communities by agencies which were established to perform some other service and which carry this as an additional responsibility. Many of these agencies are prepared to give counselling service as a basis of referral to other agencies. USO staff workers should not duplicate this function, but should make use of whatever central referral service is set up in communities in which they operate. Examples of agencies which have assumed this responsibility in some communities are:

Information Centers, organized and staffed as a co-operative effort by a combination of federal agencies and private organizations.
The Local Draft Board, which in many communities, especially in smaller towns, has added skilled interviewers to the draft board staff to be responsible for referral of ex-servicemen to appropriate public or private agencies for employment, vocational training, temporary relief, hospital, medical care, etc.
U.S. Employment Service. In some communities the Veterans' Representative attached to the U.S.E.S. is qualified to give this service.

Private Organizations, such as the YMCA, Catholic Welfare Agencies, YWCA, Jewish Community Centers, The Salvation Army, etc.
The Local Travelers Aid Societies, which are equipped to advise and assist ex-servicemen who are transients or non-residents.
Veterans' Organizations
The American Red Cross

GOVERNMENT AGENCIES HAVING LEGAL RESPONSIBILITY for specific services to discharged servicemen (as of May, 1944) are listed below. For details of the specific responsibilities carried by these agencies, see Supplement 1A, enclosed with this bulletin. (pp. 1-8)

1. Selective Service System.
2. Veterans Administration.
3. Veterans Employment Service of the War Manpower Commission.
4. U. S. Civil Service Commission.
5. Vocational Rehabilitation Service of the Federal Security Agency (in conjunction with the Bureaus of Vocational Rehabilitation of the State Department of Education.

PARTICIPATION IN COMMUNITY PLANNING is an important aspect of USO service to discharged servicemen. Primary responsibility for meeting the needs of the men rests upon local communities and agencies established for that specific purpose. USO, as a part of the community, shares this responsibility.

Prior to the present emergency, the six member agencies of USO had had long experience in working with young men and women. After more than three years' intensive service they have gained more understanding of servicemen's needs and have adapted and developed methods of work accordingly. This first hand knowledge should be available to communities as they approach the change from war to peacetime living.

In some communities planning for USO program has been but part of a much larger local program and such experience can be used in this as well as other phases of the transition from war to peace. In many other communities, local planning for USO program has been the first experience in community planning and the marshaling of total community resources to solve broad problems. Leading citizens, as members of USO Councils or operating committees, have accepted the responsibility of knowing the resources of their community and of using them. There are established and actively functioning USO Councils in approximately 1000 communities, so that the scope of experience in a new type of community action is wide. Similar co-operative community effort should be developed and existing structure should be adapted to play a part in developing community services to discharged servicemen.

In some communities, where there may be no local agency equipped to meet specific needs of discharged servicemen, USO can perform a valuable service in bringing to the attention of the community, through the Council of Social Agencies or other co-ordinating groups, the advisability of organizing its resources for the purpose of fulfilling the responsibility to discharged servicemen and women. (See supplement 1A, section on Community Organizations, page 11)

(1) Wherever the problem is emerging, the USO Staff Conference should discuss the USO's part in the community program and should bring the matter to the USO Council for further consideration.

(2) The USO Staff Conference should meet with the executives of the local agencies represented in USO to discuss with them areas of responsibility and methods of referral.

USO

Supplement II
Field Service Bulletin #36
Subject: Program and Services of USO Operations in Communities Adjacent to Hospitals

August 29, 1944

Field Service Bulletin #36 describes the general approach of USO Program and services for returning servicemen. The following statement describes in greater detail the program and services rendered by USO in communities near hospitals for hospitalized servicemen who have been returned from overseas combat duty. It endeavors to point out some of the values to be emphasized in serving this group of men who visit USO Centers in nearby communities.

USO Clubs are at present located near a large proportion of Army General Hospitals, Reconditioning Units and Station Hospitals. In most situations the men on pass from hospitals visit USO Clubs and take part in its program and services on the same basis as the men in nearby military posts. The specific consideration which USO gives to the needs of hospitalized men who visit Clubs implies no departure from its established program nor does it in any way single out this group of men.

Functions of USO in Serving Hospitalized Servicemen Who Visit USO Centers in Communities.

It is the function of USO to meet those needs of hospitalized servicemen who can be served through the resources and techniques at its disposal in accordance with its established program. On the whole, these men will be served most effectively when the total program is responsive to their needs and interests and they are absorbed into it on the same basis as the men in training and other constituents. Program developed along these lines will be directed toward helping them continue or reestablish normal, healthy social relationships. It will carefully avoid any tendency to focus unduly or negatively on any difficulties which they may have in

adjusting. Segregated activities for hospitalized servicemen will be discouraged except in cases where hospital authorities request special programs for special purposes.

Values which are Emphasized in USO Centers

The hospitalized serviceman derives value from his contact with USO by the very fact that he removes himself from the medical surroundings to an environment largely civilian - one to which he is more or less accustomed as a serviceman, one that he recognizes as normal and not associated with his illness. The activities in which he should participate are those which he formerly enjoyed as an able-bodied serviceman or civilian. When he is active in such a setting he is likely to respond as a healthy, able-bodied person rather than as an ill person.

This attitude is encouraged by having contact with people who, while accepting his disability or handicap, are interested in him as a person and react to his personality. The careful selection and training of civilian volunteers insures this approach and makes it a significant factor in the USO Program.

USO Centers in communities near hospitals may provide much needed service by doing the following things:

1. Providing a recreational program appropriate for patients, in that the program reflects their interests and provides a healthy outlet for these interests; also, that it provides opportunity to mix with civilians who are trained to accept them as people.

2. Providing individual services to the men and their visiting relatives.

3. Meeting special requests of the military authorities and of the American Red Cross.

ACTIVITIES

All activities in which hospitalized men are able to participate are open to them. Emphasis, however, is given, not to the activity itself but to the opportunity which it presents for the men to develop satisfying social relationships with congenial people. At the same time, because the activity is the avenue of attaining social satisfactions, mastering it becomes important and assistance is provided. The man with an artificial leg who learns to dance in a USO Club scores a double achievement. He not only masters a skill which is important to him - he also faces the critical challenge of participating, not as a handicapped person, but as an able-bodied man. Skillful planning by professional workers and trained junior hostesses provide conditions that encourage such participation. In such a way, opportunities for successful participation are so apparent that any temptation to fall back on the handicap as a means of "getting by" is avoided.

PARTICIPATION

Activities should not be rigid or fixed and should be characterized by an atmosphere of informality. It should at all times be possible for the men to move with ease from dabbling in crafts, to dancing and then to conversing with a group. Under these conditions, they are able to find their own way of participating.

At the same time, there are many men to whom participation means sharing the responsibility for planning the events and activities in which they take part. Those who are able to participate in this way should be invited into servicemen's councils and planning committees made up of able-bodied servicemen, civilian volunteers and junior hostesses.

The capacity to take responsibility and to be actively interested in others, is in no way limited by a physical handicap. Great skill, however, is required to find opportunities for this kind of participation. The USO club which involves the hospitalized and disabled men in the planning and conducting of the program not only provides a group of men with a valuable means of self-expression - it also demonstrates to them and to all participants that a disability in itself need not limit a person's effectiveness or usefulness in social life. In encouraging such participation, however, the real value of the individual's contribution to the group, should be a primary consideration.

In USO Centers serving large numbers of men in nearby military and naval installations, the proportionately few hospitalized men who come to the club, may be slow to take part in the normal activities. Mature hostesses can help these men to feel at home by becoming acquainted with them, and finding people and activities that interest them.

AN INDIVIDUALIZED APPROACH:

An individualized approach to this group of men is essential, since they have a greater need for an individualized program. At this point it is possible to make such an approach, because of the comparatively small number of hospitalized men and the fact of their rather permanent location in one place.

It is entirely practical for the professional staff and volunteers to know enough about an individual to be of assistance to him in relating his important interests to the program. A sympathetic interest in him as a person, alert listening in conversation, and conversations with chaplains, medical officers, special services officers, occupational therapists and Red Cross workers are some of the means of gaining more understanding about the needs of particular individuals.

In many instances, hospitalized men who have been in the service for a long time and who have been returned from combat duty, have lost contact with the interests they pursued in civilian life. In addition, those who are disabled may think of themselves as being different and are not always likely to express themselves spontaneously.

Knowing the person as an individual is necessary if he is to be helped to find an activity or to create one that he can use for his satisfaction and growth. Care must be exercised to see that no strain is placed upon the man. Junior Hostesses should be quick to see the first signs of fatigue or strain in a dancing partner and to find an inviting way of suggesting a cup of coffee or a snack at the refreshment bar. The same sensitivity is required in any situation in which the man may feel that, in order to "make good" socially, he must act as though his handicap does not exist. Cards, table games and conversations can at times produce strain when persisted in beyond the point of natural interest. The skillful leader focuses interest but does not allow situations to grow which place demands upon the man. Although he as a person is the center of attention, the fact of his disability is not denied.

PARTICIPATION IN SOCIAL LIFE OF COMMUNITY

Insofar as possible the social life of the community should be enjoyed by hospitalized servicemen in the same way as by other USO constituents. However, a more selective and planned use of these resources is necessary in the case of this group of men. Home hospitality should be available to those who are attracted by it and who are able to participate in it.

In order that it be effective and beneficial, people offering such hospitality should be carefully selected and assisted in developing sound attitudes toward disabled, handicapped, or other hospitalized servicemen.

If possible, the men should be invited to homes of people with whom they may have some interests in common. This may lead to gatherings of small groups of men on a more or less regular basis in various homes. In many cases it may be sound to see that invitations to home hospitality are not confined to hospitalized servicemen but that these men are invited together with the able-bodied men.

Upon volunteers themselves will fall a large share of the responsibility of developing an effective relationship with the men. They should become acquainted with individual men in the informal setting of the USO Center rather than to rely upon the professional workers to refer men to them.

Planned trips to points of interest in the community is another form of hospitality which is popular with some men. Such excursions should have an air of informality and can well be planned in connection with social events at the USO Club or in the home of a volunteer.

Events in the community such as concerts, dinners, picnics and other gatherings should be open to these men. However, in such cases, a group of civilian volunteers should be well oriented toward helping these men feel at ease in such surroundings. When they are invited to such occasions, it will be easier to find satisfaction if they go with a group of people with whom they are familiar and have already established an effective relationship.

INDIVIDUAL SERVICES

The essential personal services required by the majority of men are well provided for through the Army Personal Affairs Bureau, the American Red Cross, Special Services Officers and Chaplains. However, many incidental services which are at times important to the men can and should be given by USO. All of the customary USO services given to the general constituency should be available.

At the same time it is of greatest importance to hold in mind that the Army treatment for handicapped men is directed toward making the men self reliant and responsible for taking care of themselves to the fullest extent possible. Services should be rendered, employing this motivation when possible by helping these men to help themselves.

SERVICES TO VISITING RELATIVES

Because hospitalized servicemen are often located in the general hospital nearest their home, considerable family visiting takes place. Visitors should be made to feel at home and assisted in any way possible. Those who stay in the community for some time and who find little to do between visiting hours, may be very glad to take part in the social life of the USO Club. Some of the typical services which they may require are:

1. Information
2. Location of rooms
3. Care of children during visiting hours
4. Help in adjustment to facing new problems
5. Referrals to sources of information on compensation veterans' benefits, vocational guidance, job placement, etc.

Individual services to the men and their families should be discussed in the USO staff conference and planning should take place on a common basis with regard for the special function of the Travelers Aid.

Hospital authorities and the Red Cross should be informed that USO is ready to perform these and other services.

MEETING REQUESTS OF MILITARY AUTHORITIES AND RED CROSS

Many of the services which USO can render will depend upon the local situation. Near one general hospital, for example, Army authorities suggested special activities for a group of men under treatment, who did not wish to take part in regular activities in the rather crowded quarters. In such cases USO

should try to obtain appropriate facilities and provide the requested activities.

Occupational therapists, Red Cross workers and Special Services Officers may want to refer individuals or groups of men to special activities in the USO such as photography, folk dancing, ballroom dance classes and others. Such activities should be arranged for and scheduled on request.

Working in close cooperation with established agencies and community groups, USO should arrange for the use of local facilities such as swimming pools, recreation fields, gymnasiums, parks and others, so that they can be available upon request. Entertainers and speakers can be utilized to supplement the regular hospital program. USO Junior hostesses may be requested for hospital dances or parties and should be arranged for on the invitation of the Red Cross or Special Services officers. USO can perform a service by learning what people there are in the community who can respond to such invitations.

USO workers should acquaint themselves fully with hospital programs and be ready to offer useful supplementary services.

USO SERVICES TO RETURNING VETERANS

An Outline of a Paper by Hugh M. Gloster, Associate Regional Executive, United Service Organizations

I. The magnitude of World War II

II. Problems of demobilizing the armed forces

III. Problems of returning veterans
- A. Transferring to civilian life
- B. Finding a job or other occupation
- C. Mental handicaps
- D. Physical handicaps
- E. Financial difficulties
- F. Personal and family troubles

IV. Organization of public and private agencies to serve veterans
- A. The Retraining and Reemployment Administration
- B. The National Committee on Service to Veterans

V. USO preparation for services to returning veterans
- A. Re-education of professional staff members and volunteer workers concerning:
  1. Needs of returning soldiers
  2. Program adjustments to meet these needs
  3. Other agencies serving veterans
  4. Problems requiring referral
  5. Referral procedures and techniques
- B. Provision of literature concerning agencies serving veterans, mustering-out payments, and legislation in behalf of veterans
- C. Development of local resources file on services to veterans
- D. Consultation with military authorities and the American Red Cross

VI. USO services to hospitalized veterans
- A. Recreational activities
  1. Types
     - a. Club programs
     - b. Hospital programs
     - c. Home hospitality
     - d. Community activities
  2. Individualized approach
     - a. Interest in the veteran as a personality
     - b. Avoidance of curiosity, pity, sorrow, or horror in viewing disabilities
     - c. Development of self-reliance and the will to get well
     - d. Encouragement of special talents or accomplishments of patient

e. Avoidance of strain on patient
f. Informality

3. Setting
   a. Cheerful environment not associated with illness

B. Personal services to families of hospitalized men
   1. Location of rooms and housing
   2. Information services
   3. Arrangements for care of children
   4. Referrals to public and private agencies
   5. Case work and counseling

VII. USO services to discharged veterans
   A. Personal services
      1. Referrals to public and private agencies
      2. Aid in establishing effective relationship with another agency
      3. Case work and counseling
   B. Assistance in re-establishing discharged men in civilian life
      1. Introduction of men to normal community activities
      2. Interpretation of needs of men to local communities by sponsoring:
         a. Clubs and meetings for educating citizens in the proper treatment of veterans
         b. Hostess organizations concerned with provision of natural companionship for returning young men
         c. Distribution of authoritative articles and beneficial short stories dealing with returning soldiers
         d. Radio programs and platform discussions treating problems of re-adjustment faced by veterans

USO

UNITED SERVICE ORGANIZATIONS, INC.

Enclosure for
Supplement 1
Field Service Bulletin #36
Subject: Questionnaire on Local Resources

The functions and legal responsibilities of federal agencies are described in Supplement 1A. The local operations of these agencies, their relationship and cooperation with other organizations will vary from community to community. It would be advisable for each club to build up a resource file containing in easily available form all information concerning ex-servicemen. Such a file should be prepared jointly by the staff conference. The following questions are designed to aid you in finding out about the resources for discharged servicemen and women in your community. It is for your convenience only and is not to be returned to us.

I. INFORMATION CENTER

a. Has a single Information Center for servicemen been established in your community?

b. Where is it located?

Office hours?

c. Which agencies and organizations are represented in it?

d. What are its functions?

Counseling and referral?

Job placement?

Legal advice?

e. Who are the interviewers?

Which fields do they represent?

II. DRAFT BOARD

a. Where is your draft board (s) located?

Office hours?

b. What is the name (s) of the Reemployment Committee man?

When is he available?

When is he absent, who represents him?

III. U.S. EMPLOYMENT SERVICE

a. Where is the U S E S office located?

Office hours?

b. Who is the veterans' employment representative?

c. What services is he prepared to render?

Job placement of veterans.

Selected placement for disabled veterans.

Counseling concerning:

Civil Service examinations and openings.

How to follow through claims filed with the Veterans Administration.

Possibilities for functional training and rehabilitation thru State Vocational Rehabilitation Service.

Referral to appropriate agencies.

IV. VETERANS ADMINISTRATION

a. Does your community have a regional office of the Veterans Administration?

b. Where is it located?

Office hours?

c. If not, where is the closest regional office of the Veterans Administration?

d. What OTHER ORGANIZATIONS IN YOUR COMMUNITY WILL FILE CLAIMS?

V. U.S. CIVIL SERVICE COMMISSION

a. Is there a U.S. Civil Service Commission regional office in your community?

b. Where is it located?

Office hours?

c. If not, where is information available about U.S. Civil Service examinations?

Preparation for U.S. Civil Service examinations.

U.S. Civil Service Openings.

d. Has Civil Service preference been granted to veterans in your state and city?

VI. PRIVATE ORGANIZATIONS

A successful adjustment of the returning serviceman to his community may depend on many other factors in addition to a job. He may need assistance from private organizations about his personal and social adjustment. All organizations who have a contribution to make will be called upon to utilize to the utmost their experience in working with individuals or families in providing counsel, education and recreation. The services and facilities of private organizations will in no way duplicate the work of the federal agencies.

As this bulletin, Supplement 1, is devoted mainly to the functions of the federal agencies it is possible only to mention the services of the private organizations. Future bulletins will give more information regarding their programs.

a. Which private organizations are prepared to provide services and activities for ex-servicemen and women?

YMCA

YWCA

CYO

YMHA

Jewish Community Center

Salvation Army

Travelers Aid Association

Fraternal organizations

Schools and Colleges

Case work agencies

Others

b. What are their available recreation facilities?

c. What programs do they offer?

d. What other services are they prepared to render?

e. How do they inform servicemen of their programs?

VII. COMMUNITY SPONSORED RECREATION FACILITIES

What other recreational facilities are available in your community?

VIII. AMERICAN RED CROSS

a. Is there a Red Cross chapter in your community?

b. Where is it located?

Office hours?

c. What services to ex-servicemen and women does it offer?

Counseling?

Financial Aid?

Home Service?

Others

IX. VETERAN'S ORGANIZATIONS

a. Which veteran's organizations are represented in your community?

b. Where are they located?

Office hours?

c. What facilities and services are available for ex-servicemen and women?

X. GENERAL INFORMATION

What laws pertaining to benefits for veterans of the present war have been passed by your state?

BENEFITS & SERVICES AVAILABLE FOR VETERANS

Prepared for the information of ex-servicemen and women by the American National Red Cross, Washington, D. C.

These benefits concern primarily veterans of World War II. Many are also available to others who have served since April 6, 1917. For more detailed information, and for assistance in obtaining benefits to which you are entitled,

CONSULT YOUR RED CROSS CHAPTER

Released January 31, 1946. Subject to change by legislation enacted after that date.

TYPE OF BENEFIT	BASIS OF ELIGIBILITY	NATURE OF BENEFIT	ADMINISTERING AGENCY
PENSION OR COMPENSATION FOR DISABILITY SERVICE-CONNECTED	Disabilities resulting from injuries or diseases incurred in or aggravated by active service. Discharge under conditions other than dishonorable.	$11.50 to $115 a month depending on degree of disability, World Wars I and II. $8.63 to $86.25 peacetime service. Additional benefits for helplessness, blindness, loss of, or loss of use of, limb, etc.	Veterans Administration office having jurisdiction over place of residence.
PENSION FOR DISABILITY NOT SERVICE-CONNECTED	90 days' active service during World War I or II, or, if less, discharged for disability in line of duty. Discharge under conditions other than dishonorable.	$50 per month for permanent total disability. Increased to $60 after continuous receipt for 10 years, or age 65. Income limitations.	Veterans Administration office having jurisdiction over place of residence.
READJUSTMENT ALLOWANCE (unemployment insurance under GI bill)	In active service on or after Sept. 16, 1940, and prior to termination of World War II. Must have had 90 days' service, or, if less, discharge for disability incurred in line of duty. Discharge under conditions other than dishonorable.	Compensation $20 per week, less any wages received in excess of $3. 8 weeks' benefits for each month of first 90 days' service. 4 weeks per month thereafter. Maximum number of weeks 52. Self-employed veteran entitled to difference between net earnings and $100 per month.	Veterans Administration through state unemployment compensation agency.
UNEMPLOYMENT COMPENSATION —STATE	Veteran must have accrued credits prior to entering service. No service requirements.	Credits preserved and available after discharge. Can be used prior to use of rights under Readjustment Allowance.	State unemployment compensation agency.
LOAN GUARANTY	In active service on or after Sept. 16, 1940, and prior to termination of World War II. Discharge under conditions other than dishonorable. Service must have been for 90 days or more; if less, discharge for service-incurred disability required.	Administrator of Veterans' Affairs may guarantee up to 50 percent of a loan for purchase or construction of homes, farms, or business property, or farm or business equipment. Maximum guarantee $4,000 on real estate; others $2,000.	Veterans Administration office having jurisdiction over place of residence.
FEDERAL VOCATIONAL REHABILITATION (in schools, colleges, or industry)	Active service on or after Sept. 16, 1940, and prior to termination of World War II. Discharge under conditions other than dishonorable. Minimum of 10 percent service-connected disability causing a vocational handicap requiring training.	Vocational training or school expenses paid. Training pay plus full disability pension, with minimum of $105 per month if single, $115 if married. Additional allowances for dependents.	Veterans Administration office having jurisdiction over place of residence.
STATE VOCATIONAL REHABILITATION	Need for training to overcome vocational handicap due to disability. No service requirements.	Tuition, books, and tools for training; necessary treatment and appliances; and maintenance under varying circumstances are provided by joint state-federal funds.	State Vocational Rehabilitation Division—state capital city.
EDUCATIONAL PROGRAM (provided for by GI bill) (Public Law 346, 78th Congress, as amended.)	In active service on or after Sept. 16, 1940, and prior to termination of World War II. Discharge under conditions other than dishonorable. Service must have been for 90 days or more; if less, discharge for service-incurred disability required.	One year refresher or retraining course. Additional period depending on length of service with maximum of four years. Educational expenses up to $500 per year paid. Subsistence allowance $65 per month if single, $90 with dependents. Short courses and correspondence work authorized.	Veterans Administration office having jurisdiction over place of residence.
REEMPLOYMENT	Service after May 1, 1940. Discharge under honorable conditions and application for reemployment within 90 days.	Entitled to reemployment under terms of Selective Service Act if prescribed conditions are met.	Reemployment committeeman of local Selective Service Board.
EMPLOYMENT	Service during a war period. Discharge under conditions other than dishonorable.	Vocational guidance and placement by veterans' employment representatives in U. S. Employment Service offices.	Local U. S. Employment Service office.
CIVIL SERVICE PREFERENCE—FEDERAL (also provided by some states)	Active service in time of war or service-connected disability. Separation under honorable conditions.	Extra credit points and preference allowed under certain conditions.	U. S. Civil Service Commission regional office. (Information at local post office.)

LOAN GUARANTY	In active service on or after Sept. 16, 1940, and prior to termination of World War II. Discharge under conditions other than dishonorable. Service must have been for 90 days or more; if less, discharge for service-incurred disability required.	Administrator of Veterans' Affairs may guarantee up to 50 percent of a loan for purchase or construction of homes, farms, or business property, or farm or business equipment. Maximum guarantee $4,000 on real estate; others $2,000.	Veterans Administration office having jurisdiction over place of residence.
FEDERAL VOCATIONAL REHABILITATION (in schools, colleges, or industry)	Active service on or after Sept. 16, 1940, and prior to termination of World War II. Discharge under conditions other than dishonorable. Minimum of 10 percent service-connected disability causing a vocational handicap requiring training.	Vocational training or school expenses paid. Training pay plus full disability pension, with minimum of $105 per month if single, $115 if married. Additional allowances for dependents.	Veterans Administration office having jurisdiction over place of residence.
STATE VOCATIONAL REHABILITATION	Need for training to overcome vocational handicap due to disability. No service requirements.	Tuition, books, and tools for training; necessary treatment and appliances; and maintenance under varying circumstances are provided by joint state-federal funds.	State Vocational Rehabilitation Division—state capital city.
EDUCATIONAL PROGRAM (provided for by GI bill) (Public Law 346, 78th Congress, as amended.)	In active service on or after Sept. 16, 1940, and prior to termination of World War II. Discharge under conditions other than dishonorable. Service must have been for 90 days or more; if less, discharge for service-incurred disability required.	One year refresher or retraining course. Additional period depending on length of service with maximum of four years. Educational expenses up to $500 per year paid. Subsistence allowance $65 per month if single, $90 with dependents. Short courses and correspondence work authorized.	Veterans Administration office having jurisdiction over place of residence.
REEMPLOYMENT	Service after May 1, 1940. Discharge under honorable conditions and application for reemployment within 90 days.	Entitled to reemployment under terms of Selective Service Act if prescribed conditions are met.	Reemployment committeeman of local Selective Service Board.
EMPLOYMENT	Service during a war period. Discharge under conditions other than dishonorable.	Vocational guidance and placement by veterans' employment representatives in U. S. Employment Service offices.	Local U. S. Employment Service office.
CIVIL SERVICE PREFERENCE—FEDERAL (also provided by some states)	Active service in time of war or service-connected disability. Separation under honorable conditions.	Extra credit points and preference allowed under certain conditions.	U. S. Civil Service Commission regional office. (Information at local post office)
HOSPITAL CARE (provided by Veterans Administration)	Service during a period of war or a service-connected disability due to war or peacetime service, with discharge under conditions other than dishonorable. For nonservice conditions veteran must certify inability to defray expense.	Complete care in a Veterans Administration hospital, including transportation. Emergency care elsewhere may be authorized by VA for service-connected disabilities. Prosthetic appliances supplied under certain conditions.	Nearest Veterans Administration hospital. (Authorization for admission should be obtained before patient goes to hospital. Veteran's physician can arrange by telephone in emergencies.)
MEDICAL TREATMENT AND PROSTHETIC APPLIANCES	Service-connected disabilities requiring outpatient care or prosthetic appliances. Prior authorization required.	Outpatient treatment by designated physician, including necessary medication. Prosthetic appliances provided through Veterans Administration.	Veterans Administration office having jurisdiction over place of residence.
DOMICILIARY CARE—FEDERAL (also provided by some state soldiers' homes)	Service during period of war or service-connected disability due to peacetime service, with discharge under conditions other than dishonorable. Must be so disabled as to be unable to earn a living and without adequate means of support.	Full care, including medical treatment in a Veterans Administration home.	Veterans Administration office having jurisdiction over place of residence.
NATIONAL SERVICE LIFE INSURANCE—Veterans of World War II only	Must be obtained during service in armed forces after Oct. 8, 1940. To continue insurance after discharge, premiums must be paid by veteran. Policy must be converted within 8 years of effective date if issued before Jan. 1, 1946, or within 5 years if issued later.	Waiver of premiums after 6 months' continuous total disability before reaching age 60. Death benefits payable under monthly plan as selected.	Director of Insurance, Veterans Administration, Washington 25, D. C.
REVIEW OF DISCHARGE, SEPARATION, OR RETIREMENT	Service during war or peace and discharge or separation other than by general court-martial.	Reconsideration of unsatisfactory discharge or separation, and, when warranted, change in type of discharge or separation.	Secretary of War's Discharge Review Board; Disability Review Board in retirement cases. Navy Department's Board of Review, Discharges and Dismissals; or Retiring Board.
PENSION OR COMPENSATION FOR DEATH DUE TO SERVICE	When death while in active service was the result of an injury or disease incurred in line of duty. When death after discharge was caused by service-connected disability. Discharge under conditions other than dishonorable.	Widow receives $50 per month with additional amounts for minor children. Dependent mother or father $45 per month; dependent mother and father, each $25 per month. (Above rates for World Wars I and II. Lower rates for peacetime.)	Veterans Administration, Washington 25, D. C., for World War II. VA regional office having jurisdiction over place of residence for World War I.
PENSION FOR DEATH NOT DUE TO SERVICE	90 days' service or discharge for disability in line of duty during World War I or II. Discharge under conditions other than dishonorable. No other requirement for World War I veterans. World War II veterans must also have had service-connected disability for which pension would be payable if 10 percent or more disabling.	Widow will receive $35 per month with additional amount for each minor child. Income limitations. No benefit for parents.	Veterans Administration, Washington 25, D. C., for World War II. VA regional office having jurisdiction over place of residence for World War I.
BURIAL ALLOWANCE—FEDERAL (also provided by some states)	War service, or discharge for disability incurred in line of duty, or in receipt of pension for service-connected disability. Discharge under conditions other than dishonorable.	Maximum allowance of $100 for cost of burial and funeral expenses and transportation of the body.	Veterans Administration office having jurisdiction over place of residence.
BURIAL IN NATIONAL CEMETERIES	Service during a period of war. Peacetime service qualifies if in destitute condition at time of death. Honorable discharge from last period of service in all cases.	Burial in national cemetery. Under certain circumstances may also include wife, widow, or children.	Superintendent of nearest national cemetery.
BURIAL FLAGS	Service during a period of war, or a complete enlistment, or discharged for disability incurred in line of duty. Discharge under conditions other than dishonorable.	American flag to drape casket and to be presented to next of kin at time of burial.	Veterans Administration or county seat post office.
HEADSTONE OR GRAVE MARKER	Last service must have terminated honorably.	Uniform type of headstone or grave marker furnished free, delivered to nearest railroad station.	Quartermaster General, U. S. Army, Washington 25, D. C. (for all services).

AMERICAN RED CROSS SERVICES AVAILABLE TO VETERANS

THROUGH HOME SERVICE

Information concerning government regulations and legislation affecting veterans and their dependents.

Assistance in preparing and presenting claims for pensions and other government benefits.

Consultation and guidance in personal and family problems.

Financial assistance on the basis of need for basic maintenance during the temporary period pending the first receipt of federal disability or death benefits and during periods when such payments are delayed or interrupted. Additional information regarding financial assistance is available at local Red Cross chapters.

JAN 4 1946

Commander Ralph A. Sentman
National Director of Veterans Affairs
American Retail Federation
1627 K Street, N. W.
Washington, D. C.

Dear Commander Sentman:

I have carefully reviewed the American Retail Federation's proposed Retailer-Veteran Community Program. I am much impressed both with the objectives which it is designed to attain and the soundness with which it has been conceived.

I have been of the consistent opinion that the veteran will encounter his principal need for practical assistance at the community level, and it seems to me that in your program of making available to him the advice and consultation of men who have become successfully established in businesses in the community to which he will return you are meeting a very apparent need.

I should like to assure you of the entire support of the Selective Service System in the furtherance of your program. I am sure you will find the State Directors of Selective Service most willing to cooperate with you to the end that veterans may be better served.

Sincerely yours,

Lewis B. Hershey

Mr. Ralph A. Sentman
National Director, Veterans' Affairs
American Retail Federation
1627 K Street, N.W.
Washington 6, D. C.

Dear Mr. Sentman:

This has reference to your Retailer-Veteran Community Program in the interest of assisting the retail-minded veteran to a position of economic security.

Unquestionably many veterans will be interested in establishing themselves in independent businesses, and it is my personal belief that the local community and many associations throughout the country and State and Federal Governments are under obligation to the veteran to assist him in every way possible in securing employment and in establishing sound business connections. The Veterans Administration is especially interested since the veteran may seek a loan under the provisions of Title III, Public Law 346, and if the loan is for that purpose, everything should be done to insure success.

I have read with a great deal of interest the results of the experiment conducted at Lancaster, Pennsylvania, and if the projects were carried on at other locations with the same interest and enthusiasm by established retailers and tradesmen, the veteran should benefit materially by the combined efforts of the advisory group.

The program as outlined in your booklet and the results thus far obtained prove beyond doubt that local communities, associations, organizations and State and Federal Governments can and should assist the veteran in readjustment to a gainful occupation.

Very truly yours,

Omar N. Bradley

Mr. Walter Morrow, President
American Retail Federation
1627 K Street, N. W.
Washington, D. C.

Dear Mr. Morrow:

I wish to congratulate you for your splendid program as outlined in the Retailer-Veteran Community Program booklet which has recently come to my attention.

As you know one of the major tasks of the Retraining and Reemployment Administration is to foster the formation of Community Advisory Centers and the more groups we can have striving for community cooperation, the more successful will be the readjustment of those whose lives have been disrupted by war. In addition, the practical aspects of helping to get the veteran back into successful business is most appealing to me. If we can be of any aid to you, please do not hesitate to call on us.

With kindest regards and every good wish for the success of your program, I am,

Very sincerely,

G. B. ERSKINE
Major General, USMC.
Personal Representative
of the Secretary of Labor.

Affairs
American Retail Federation
1627 K Street, N. W.
Washington, D. C.

Dear Mr. Sentman:

I want to thank you for explaining the program which the American Retail Federation has set up for providing practical advice and counsel to war veterans who contemplate entering the field of retailing.

Help of this kind is greatly needed, and the established local business man is the person who can best give it. I am glad to see that you are taking pains to integrate this program with existing community veterans programs, and the net effect should be most beneficial.

Through its Office of Small Business, the Department of Commerce will be happy to cooperate in this effort.

Sincerely,

H A Wallace

WASHINGTON

January 3, 1945

Dear Commander Sentman:

My study of the Retailer - Veteran Community Program convinces me that a determined, intelligent and persistent application of the plan will help to give practical effect to the solution of problems we have been anticipating and discussing during the last two years. It should be an effective adjunct to the governmental and other groups dedicated to the aid of our veterans as a widely deployed medium for wisely helping many of them to economic independence.

If my associates or I can help in any way, please command me.

Sincerely,

Watson B. Miller

NATIONAL EMPLOYMENT COMMITTEE
THE AMERICAN LEGION

S. E. REGIONAL FIELD OFFICE
AMERICAN VETERANS COMMITTEE
63 Auburn Avenue, N. E.
Atlanta, Georgia

May 26, 1948

Dear You All:

Enclosed is a copy of findings made and recommendations passed at the Regional Convention just held in Jacksonville, Florida.

At first glance you may think that it was "just another convention dedicated to passing resolutions but nothing else." Well, it was anything but that -- there was a minimum of speakers and a maximum of organizational effort. In fact, at least one-half of our time on the floor was devoted to organizational policy, techniques, and chapter activities with an emphasis on getting memberships and renewals.

I ask that you pay particular attention to the recommendations on organization. Please read and re-read them. Without compromising AVC principles in the slightest way, we hope to turn into a mass organization in the South. We must pay particular attention to the need for servicing Negro veterans in this region, and have therefore decided to set up as many chapters as possible in small Southern communities and rural areas. In many cases it will be impossible to attract white veterans, therefore we are preparing to establish chapters whose membership will be predominantly Negro veterans. The door will always be open to interested white veterans to join AVC.

I would like to hear from all chapters regarding the program -- particularly those chapters which were not represented at the convention.

Fraternally yours,

Jim Crawford

Jim Crawford
S.E. Regional Field Secretary, AVC

JMC:clk

P.S. Recommendations are presented in the following order: Organization; National and International Affairs; Civil Rights; Housing; Agriculture; Veterans Affairs; Education.

FINDINGS AND RECOMMENDATIONS
of the
S. E. REGIONAL CONVENTION, AVC
Jacksonville, Florida, May15-16 , 1948

ORGANIZATION

1. We recommend that in forming AVC chapters in the S.E. Region emphasis be put on servicing the Negro veteran as a recruiting and organizational medium. We further recommend that AVC keep a policy of forming chapters on an interracial basis wherever and whenever possible. If this is not possible in some localities because of problems peculiar to small Southern communities, we recommend that all-Negro chapters be formed on the basis of servicing the Negro veteran.

2. We recommend that Women's Auxiliary groups concentrate their efforts on veterans' service activities. In AVC chapters where the W.A. does not exist, we urge the organization of auxiliaries on the basis of veterans' services and parallel activities.

3. College chapters.

a) We wish to call to the attention of the National Planning Committee that the student movement has always been a militant, aggressive movement. AVC is not appealing to the student movement because college chapters have not been assigned militant, aggressive programs. These chapters, therefore, cannot compete with an aggressive movement such as the third party for the interest, time, or activity of student leaders. We suggest that the college chapters emphasize such issues and subjects as Universal Military Training, regional colleges, and the admittance of Negroes to graduate schools.

b) We wish to call to the attention of the national office the form dated May 10, 1948, which deals with student members who are leaving school. We request that a revised form should include a space for permanent address. (The present form specifies only the present or college address.) We ask further that lists of these permanent addresses be forwarded to the appropriate regional offices.

ORGANIZATION, continued

4. We believe that the constitution of the AVC should be changed to include the State of Louisiana in the S.E. Region. We urge that the National Planning Committee place this item on the agenda for the next national convention.

5. We ask the Regional Chairman to work out an arrangement with the national organization for servicing chapters in Virginia and Kentucky. We further ask that the Regional Chairman make every attempt to have Virginia and Kentucky removed from AVC's Southeastern Region.

FINDINGS AND RECOMMENDATIONS
of the
S. E. REGIONAL CONVENTION, AVC
Jacksonville, Florida, May 15-16, 1948

NATIONAL AND INTERNATIONAL AFFAIRS

National

1. We reaffirm recent national AVC statements concerning tidelands oil, inflation, and minimum wages.

2. We recommend that Congressional approval be given immediately for the U.S. to join the World Health Organization.

3. We urge that the committee appointed by the President to set up ten-year legislative goals for the health of the nation include in its definition of "health" the physical, mental, and economic welfare of the people.

4. We oppose the Mundt-Nixon Bill. Our American way of life has reached its present stage of development through free competition of ideas. The Mundt-Nixon Subversive Control Act is an attempt to enslave the minds of the people and their organizations through intimidation and fear. The infamous record of the House Un-American Activities Committee, which fathered the subject bill, is proof of the fact that irresponsible and uncontrolled interpretation of the terms "subversive" and "Un-American" by a governmental body with ill-defined powers menaces our democratic way of life. The phrase "advocating the overthrow of the American form of government", as used in this bill, can be twisted into a basis for criminal action against any individual or any group which may disagree with one or more of the policies of the present or future administrations. We hereby urge and petition both houses of Congress to defeat the proposed Mundt-Nixon Subversive Control Act of 1948 and any similar measure that may come before them.

5. We recommend reinstatement of the appropriation for expansion of Southern Rural Electrification through TVA, including the steam generator appropriation.

National Affairs, continued

6. We recommend reinstatement of the original plans for flood control on the Sewanee, the Tennessee, and other Southern rivers.

International

1. We recommend that U. S. foreign policy be based on democratic principles rather than on military expediency. The U.S. supports reactionary regimes in several instances in Europe, Asia, and South America as militarily expedient measures. By so doing, democracy has been eliminated as a choice for the peoples of these continents, leaving their choice only between communism and fascism. We insist that the peoples of other nations have the freedom to choose democracy, rather than fascism or communism.

2. Universal military training is, and has always been, repugnant to the people of the U.S. Further, we reaffirm our opposition to any measure including the principles of universal military training.

3. We recommend that the Congress of the U.S. immediately set the number of men required for the defense of this country. Further, that immediate adoption of the Doolittle Report be taken as a basis for reforming the present armed services in order to make the services attractive for voluntary enlistment to meet the quota.

4. Proposed peace conference. The fullest development of our democratic way of life can be achieved only under conditions of the most peaceful relationships with all other countries in the world. Fear of war and the expenditures of huge sums of money in preparation for war have prevented any but the most meagre measures for the betterment of the education, health, housing, and general welfare of our people. The present relationship, referred to as the "cold war", now existing between the two most powerful nations on earth, the United States and the Soviet Union, is causing the whole world to be drawn into two distinct, distrusting, and conflicting orbits. These same two great nations, acting in unity and cooperation, were able to inflict an overwhelming

International affairs, continued

defeat on the greatest aggregation of anti-democratic armed might that the world has ever seen. We strongly urge that the government of the U.S., and specifically the State Department, take every possible step to encourage the procedure initiated by the current exchange of notes between our government and the Soviet Union regarding the amicable settlement of our present differences and the establishment of more friendly relations. We believe that, in these days of atomic and biological warfare, no country can afford to brand any note, message, or other diplomatic approach from another power, dealing with any steps for the furtherance of peace or more amicable relations, as "suspicious" or "unworthy of attention" until there has been the fullest possible effort made to utilize such commitments in the interest of peace.

5. State of Israel. The State of Israel has declared its independence as a free democratic nation in accordance with the decision of the United Nations in its adoption of the Partition Plan of November 29, 1947. The new Jewish state is being attacked by invading armies of the Arab League, and the authority of the UN is being threatened. We therefore commend the President of the United States for his action in giving official recognition to the State of Israel. We urge that the President immediately lift the arms embargo placed upon the shipment of arms to the Middle East. We further urge that the Security Council of the United Nations immediately recognize the declaration of war by Egypt and the other Arab nations as acts of aggression to be dealt with by the full authority of the United States and all other civilized nations of the world. In order to curb this aggression, an embargo should be placed on military supplies and other moral and material assistance to the Arab nations.

FINDINGS AND RECOMMENDATIONS
of the
S. E. REGIONAL CONVENTION, AVC
Jacksonville, Florida, May 15-16, 1948

CIVIL RIGHTS

We recognize the fact that the pervasive gap between democracy and what we actually have is creating a kind of moral dry rot which eats away at the emotional and rational basis of democratic ideals.

We believe that racial and religious prejudices menace the growth and unity of the people in the Southland, and that prejudice is the greatest burden of the South. We reaffirm our opposition to "Jim Crow" laws and all other forms of racial discrimination by all individuals, by private businesses, by labor unions, and other associations and governmental agencies operating in the Southland.

We maintain that the Southern Governors, state and local officials, and responsible citizens have not only the authority to remove racial and religious discrimination from our lives, but the responsibility to instill a sense of "belonging" to each individual in the Southland.

We further believe that the dignity and freedom of the individual are the foundation of democracy, and every act which violates the dignity or denies the freedom of the individual is subversive of democratic principles. We favor man's rights over state's rights. In keeping with this basic precept, we recommend

1. The abolition of poll tax and white primary laws, the Boswell Amendment, and other legal devices which deny persons the right to vote because of race, creed, or color. Moreover, we maintain that it is the responsibility of state and local officials to use all precautionary measures to avoid racial intimidation of minority groups and violence prior to, during, and after elections.

2. The passage of such legislation by federal, state, and local governments as will guarantee to all individuals the right to safety and security of person.

3. The enactment of legislation to guarantee fair employment practices and provide equal job opportunities. We believe that the ineffective use of human resources cuts down the size of markets and the productivity of employees.

4. The abolition of all state laws and local ordinances which require groups, both organized and unorganized, and individuals to segregate themselves. We believe it to be the privilege of all groups and individuals sponsoring public or private meetings, conferences, and other activities to determine whether or not segregation will be maintained. State governments should establish sections within their

Department of Justice to challenge the constitutionality of city and other ordinances requiring segregation, and the federal government should establish a section within the Department of Justice to test the constitutionality of state laws requiring segregation.

5. The enactment of federal and state legislation forbidding the segregation of persons in taxis, busses, trains, airplanes, and other means of public conveyance because of race, creed or color.

6. The reorganization of the civil rights section of the U. S. Department of Justice to provide for the establishment of regional offices.For this purpose there should be a substantial increase in appropriations and staff to enable it to engage in adequate research and to act more effectively to prevent civil rights violations.

7. The establishment of a permanent commission on civil rights in the executive office of the President of the United States.

8. The establishment by the states of permanent commissions on civil rights to parallel at the state level the work of the proposed federal commission.

9. That AVC chapters promote meetings, discussion groups, and other educational programs designed to create a climate of public opinion within our communities favorable to civil and human rights.

FINDINGS AND RECOMMENDATIONS
of the
S. E. REGIONAL CONVENTION, AVC
Jacksonville, Florida, May 15-16, 1948

HOUSING

Adequate housing, within the financial means of all veterans and citizens, remains a primary domestic problem, particularly in the Southeast where average income has not kept pace with average costs of living.

1. We recommend that AVC take vigorous action to secure complete passage of the Taft-Ellender-Wagner Housing Bill, now before the U. S. House of Representatives. We urge that during the next four weeks each chapter and member of the S.E. Region of AVC bring pressure to bear on their particular congressmen to force passage of this bill. No satisfactory legislation has been adopted by the Congress or by any Southeastern state to provide the necessary financial resources, incentives, or controls essential to assure an over-all housing program, and we believe no other legislation proposed would establish so effective a program as the TEW Bill.

2. We urge passage of further legislation embodying the principle of co-operative housing projects for veterans, with substantial federal aid and guarantees.

3. We recommend modernization of building codes and practice of community planning by state and local governments. This would assist in providing more housing through use of new materials and methods, and assure sound construction.

4. The Housing and Rent Act of 1948 provides for changing the personnel of local rent control boards, and it is essential that members of these boards truly represent the interests of the group for whom they were appointed (i.e. tenants, landlords, public interest). We urge AVC chapters to survey their local boards and be vigilant in securing the appointment of personnel who actually represent the designated interests for which they were chosen.

HOUSING, continued

5. To speed the building of adequate housing, we recommend

a) that industry stress production of newer, better, less expensive materials.

b) that contractors, architects, and lending agencies charge lower percentage fees for lower-cost housing.

c) that labor abandon restrictive practices which increase costs through non-acceptance (without penalties) of new materials and methods.

d) that labor cooperate in increasing the number of apprentices for the building trades.

6. Retention of zoning practices, with respect to types of structures and establishments, which would sensibly establish harmony and equity, taking into consideration the needs and circumstances in each locality.

7. We ask help for veterans in judging prospective homes. We urge that all possible circulation be given to the principles and information set forth in the Atlanta Area Chapter's series, "Is It Worth It?"

8. In order to implement the Supreme Court's recent ruling on restrictive covenants, we recommend that AVC urge the several state and local legislative bodies to observe the ruling of the Supreme Court "to the letter" in all such cases.

9. We recommend that the S.E. Region set up a special committee, the purpose of which will be to study the practice of restrictive covenants with a view to making recommendations for alleviating housing conditions, especially in the S.E. Region.

10. We recommend that the NPC strongly urge that all chapters study the housing situations in their respective communities and insist that all chapters include reports on the same in their monthly chapter activity reports.

FINDINGS AND RECOMMENDATIONS
of the
S. E. REGIONAL CONVENTION, AVC
Jacksonville, Florida, May 15-16, 1948

AGRICULTURE

1. The nation's farmers have astounded the world with the abundance of their production. The continuance of this effort is the hope of the world and is necessary to assure the successful rehabilitation of war devastated countries throughout the world.

2. Government support of farm incomes should be limited to periods when consumer buying power is low. Government assistance should be through the encouragement of higher consumption of farm products by means of special programs, such as school lunch programs, and stamp plans.

3. The gap between the nation's ability to market products and the ability of farmers to produce them must be closed. Therefore we urge full appropriation by Congress of funds for marketing research as authorized under the Hope-Flanagan Agricultural Research and Marketing Act of 1946.

4. We recommend that the "Soil Conservation and Domestic Allotment Act" be continued and expanded so that its policy on good farming practices can be more widely applied. We commend the work of the Soil Conservation Service.

5. We believe that cooperatives should be fostered and encouraged as a matter of public policy. We oppose a special tax on dividends of cooperatives.

6. We favor the enactment of liberal credit practices and other legislation to foster family farm ownership.

7. We urge the state governments in the Southeast to recognize the absolute necessity for training 1,600,000 people who are at present being displaced from cotton production by mechanization. The "GI Bill" (Public Laws 346 and 16) affords financial resources to carry on a program of non-institutional vocational training in the rural areas, but it is up to the local State Departments of Education to establish such schools before the "GI Bill" can be utilized by the rural veterans. We urge the states to act immediately in establishing vocational

schools, and to make funds available with which non-veterans may receive similar training to that of veterans under the "GI Bill."

8. We urge Congress to strengthen institutional on-the-farm training by giving sufficient funds to the Veterans Administration for proper supervision of institutional on-the-farm training.

9. We ask the federal government to reopen the migratory farm labor camps and hospitals.

10. We recommend that migratory labor camp communities, privately owned and operated, be subject to the same regulations of health, education, and general welfare as are other communities in the state.

11. We recommend that present rural electrification legislation be retained without crippling amendments.

FINDINGS AND RECOMMENDATIONS
of the
S. E. REGIONAL CONVENTION, AVC
Jacksonville, Florida, May 15-16, 1948

VETERANS AFFAIRS

We believe it is the duty of our Southeastern Southern states to render every assistance possible to each man or woman physically disabled in service in the armed forces of the U.S. and to the immediate families of those who made the supreme sacrifice in defense of our country.

We further believe that this assistance should include adequate medical, financial, and other benefits and aids.

We further believe our Southeastern group of Southern states should be actively interested in a program of rehabilitation and reintegration of the veteran into his community and state.

1. Education and Training.

a) We recommend extension of the federal on-the-job-training program with added vigilance against abuses, and specifically the strengthening of standards for approval of training establishments and courses so that the veteran may receive adequate training in jobs with sound futures. We urge the elimination of courses which are in reality subsidies to employers and which provide them with cheap labor at government expense.

b) We recommend the raising of the income ceilings to $300 per month for single veterans, $325 per month for married veterans without children and $10 a month for each child for married veterans with children. We also recommend the elimination of the two-year limitation for non-apprenticeship on-the-job-training program.

2. Medical Program.

a) We recommend elimination of restrictions on all medical and hospital personnel so that at least no available licensed personnel will be barred from employment by the VA Medical Department.

b) We recommend an additional appropriation by Congress to meet the increased cost of hospital construction and maintenance. We also recommend that

out-patient treatment for non-service connected disability in VA hospitals be authorized. At present only those veterans with service connected disabilities are entitled to out-patient treatment. This policy has worked an undue hardship on many veterans who are unable to pay for private treatment.

3. Veterans Administration.

We recommend that the VA make available more beds in VA hospitals within the Southeastern states. An insufficient number of beds has worked an undue hardship on veterans needing immediate medical care. Additional appropriations to cover this expense should be demanded, particularly as the need for more beds in VA hospitals throughout this region has become critical.

4. States Action.

a) We recommend that the states employ more Negro representatives for administrative work in state unemployment and state service offices.

b) We recommend that the states within our region carry on an orientation program to acquaint veterans with their rights and benefits under existing state and federal laws.

c) We recommend a state law to assist veterans in obtaining loans for business purposes by setting up a program whereby veterans can borrow up to $3000 for six years at a maximum interest of 4% on the unpaid balance. The bank or lending institution which lends the money could choose between the two arrangements for protection of its investment: the state will guarantee 90% of each individual loan or 20% of a total sum which the lending institution elects to set aside for the program.

5. Pensions.

We recommend that congressional action be requested to obtain additional compensation to veterans' dependents while the veterans are hospitalized for service connected disabilities. The maximum compensation to the dependents during the period of hospitalization should be $100 per month or a portion thereof,

providing the continuous period of hospitalization is for more than 30 days.

6. Insurance.

On account of non payment of premiums veterans have permitted National Service Life Insurance to lapse, to the detriment of those veterans and their families and dependents. We recommend that legislation be adopted by the Congress amending the internal revenue laws to permit all payments made to the government for NSLI premiums to be non-taxable items. This would encourage reinstatement and continuation of National Service Life Insurance by the greatest number of veterans, particularly among those in the low income brackets.

7. Terminal Leave Pay.

We urge the removal of any deadline for applying for terminal leave pay benefits by the War Department.

8. Loan Guaranty.

a) We recommend the elimination by Congress of the status of the so-called "Supervised Lenders" and putting of all lending institutions on the same basis as "Non-supervised Lenders."

b) We recommend the revision of the Servicemen's Readjustment Act to provide VA with more authority to act against builders and lenders who do not comply with the rules and regulations.

9. Miscellaneous.

We urge the removal of Section 11 of Public Law 866 which denies a veteran the right of appeal to the courts for pension claims. We recommend the establishment of a separate administrative organization outside of the VA to adjudicate these claims.

10. Southern Negro Veteran Survey.

The Negro veteran in the South has not been adequately serviced by local, state, and regional veterans agencies, and the Negro veteran has therefore been deprived of most of the benefits of existing veterans' legislation. The AVC recognizes as one of its major functions the guarantee of fair and equal treatment

of all veterans. Therefore this Convention recommends that the major project of the S.E. Region of AVC be a scientific survey to establish the exact status of the Negro veteran in the region. We recommend that the S.E. Regional Chairman enlist the cooperation of such organizations as the Council of Social Agencies, the Southern Regional Council, the Urban League, and others equipped to assist in the execution of this project. We urge that the National Planning Committee of AVC set aside a portion of the AVC Civil Rights Fund for this project, and that they conduct a specific drive to raise funds for it.

11. Veterans' Handbook.

This Convention is agreed that AVC's organizational activity in the S.E. shall be directed toward forming new chapters to push for increased services to all veterans. Therefore, we recommend that a handbook be prepared, outlining in clear, simple language the rights, services, and benefits to which veterans are entitled and for the securing of which they are organizing into chapters.

FINDINGS AND RECOMMENDATIONS
of the
S. E. REGIONAL CONVENTION, AVC
Jacksonville, Florida, May 15-16, 1948

EDUCATION

1. Some political and educational leaders have suggested that regional colleges be formed in the Southeast. The present movement to further this aim is based on maintaining segregation in education in evasion of Supreme Court rulings. This Convention specifically opposes the establishment of segregated regional schools.

2. The Supreme Court has ruled in the Sipuel case that qualified individuals, regardless of race or creed, should be admitted to institutions for graduate and professional training within the state boundaries. Moreover, segregation in education is undemocratic and economically unsound. This Convention favors the admission of Negro students into any private or public college or university without discrimination, and the admission of white students to Negro educational institutions.

3. The educational facilities of the Southeast have long been inferior to those in other parts of the country -- the Army General Classification Test scores reveal that the relative performance of Southeastern and Northeastern men tested was white N.E., Negro N.E., white S.E., Negro S.E. -- and one of the contributing factors to this situation is the extremely low schedule of teachers' salaries in the Southeast. This Convention recommends that the minimum salary for teachers be set at $2400 per year.

4. Since the Southeast has a large percentage of the nation's children and a small percentage of the nation's income, we urge immediate passage of the federal aid to education bill now pending in Congress.

5. This Convention urges the establishment of adequate vocational training institutions to prepare the youth of the South for an increasingly industrialized society.

I. HOW THE IDEA DEVELOPED

THINKING ABOUT VALUES

A teacher in the group asked: "What kind of planning should be done in advance for a class, if students are to decide what is good to do?" The leader of the discussion smiled and looked around to see if there was any one who wanted to make a try at answering this question. This was in Savannah, Georgia and the group was composed of teachers and principals of schools in or near Savannah who were participating in a summer workshop for teachers.

Just as the leader of the discussion had smilingly tossed the question out to the group, they good-naturedly tossed it back to him. "Well," said the leader, "since we are at it, we might examine the question further. Instead of asking, how much planning should be done, we might ask: why plan at all. Don't students usually do what they like to do anyway when they are not under the supervision of the teacher or some other adult?" "You are certainly right," one person commented, "when you say that they do as they please. I have children in my class who come from homes which apparently offer nothing more to the children than a shelter, some food, and a few clothes to wear. As a consequence, these children exhibit all sorts of undesirable behaviors in school and on the streets." Then the discussion really began. Some commented by saying, "I think that...," others by, "I don't agree with...," and still others by "What we are saying seems to be this...." When it was all put together, the general feeling was as follows:

A MANUAL OF EXPLANATIONS

AND INSTRUCTIONS ON

A STUDY OF RECONVERSION
As it Affects War Workers and Veterans

BY

THE SOUTHERN REGIONAL COUNCIL
Room 432, 63 Auburn Avenue, NE
Atlanta (3), Georgia

INTRODUCTION

The Southern Regional Council is making a fact-gathering study of what has happened and is happening to war workers and veterans. With the network of able people associated with it as Fellows, the Council feels that it is in a position to make such a study. The Fellows of the Council live scattered about all over the area in which the Council is interested. Each Fellow now has a real opportunity to help the Council. If you, as a Fellow, cooperate, and if the other Fellows cooperate, by doing the work required to take some case histories on a sample basis, the Council feels that it can present a picture that will be representative of the South.

THE INTERVIEW SCHEDULE --- FAMILY AND VETERAN DATA

The Family and Veteran Interview Schedule form is set up with the family data on the front or first page, and with the veteran data on the back page. The questions you will attempt to gather answers on from the families you interview are set up in ledger form in order to give a graphic view, in one or two glances at the page, of the whole family and the veteran or group of veterans in one family.

We hope, by reducing the area of things we are inquiring about to such catagories as can be laid out in ledger form, that we have achieved as much simplicity as possible, simplicity and ease in running the interview, in working out methods of analysis, and in doing the actual analysis work. We

are not asking you to gather any data that we cannot in turn analyze and use in its entirety.

The only exceptions to categories laid out in ledger form are the last four questions on the first page. The 13th questions bears on the reliability of information given by the person or persons interviewed, and the 14th, 15th, and 16th questions center around the stability of the family from the beginning of the war to now and the outlook for stability of the family after the war.

Please make free use of the space supplied for "interviewer's comments" in giving us additional facts about the family. In addition, give your interpretation of facts supplied on the form and called for by specific questions. This will provide us with eyes for analytical interpretation of not only the one interview schedule involved, but also of all the interview schedules coming from your own locality. When you have finished the interview work, if you will write a summary report about war workers and veterans from your experience in running the interviews, you will be helping us to draw important conclusions from the study.

INSTRUCTIONS FOR

CHART ONE

Headings

Location: Please supply here the name of the town where you are interviewing, or, if a rural area, the nearest postoffice town.

Race of the Family: Supply here "white", "Negro", "Chinese", etc., whatever the race of the family is.

Interviewer's Name: Supply here your own name.

Survey Number: It may develop that we can repeat this survey several times, making periodic studies; but for the purpose of the present study, the survey number is "One" -- meaning that this is the first survey.

Interview Number: Number your own interviews in the order in which they were run - 1, 20, 54, etc.

Columns

You will notice from the heading just above the columns that the family you are interviewing is to be considered as it was in 1940. The members of this family in 1940 should include the natural group of people who were housed together as a single family unit, presumably using a single kitchen at that time; and children who might have been absent from the family shelter in 1940 but were still indentified with the household group: e.g. unmarried children away at school or at work, who had no homes of their own. Therefore, the family will be made up of the father and mother -- if both or either were living in 1940 -- plus all unmarried children, plus any married children who were separated from their husbands or wives and back home for the greater part of 1940, plus any married children who, together with their husbands or wives, might have been boarding with the home folks through the greater part of 1940, plus any relatives with no homes of their own, who might have lived with this family through the greater part of 1940. The family chart should exclude, however, any children who were married and living apart from this family in their own homes in 1940.

If you come across single persons (e.g., two girls sharing an apartment) do not pass them up. Get the data on the families which they represent. Make note of the residence of the parents or family heads after the names of such parents or family heads.

Note that the family chart falls into two divisions:: the IN 1940 division, which includes columns one through six; and the PRESENT division, which includes columns seven through twelve. Bear in mind that in the first division we want a picture of the family as it was in 1940.

Beginning at the left, the first bracket should give names of family members. Here please supply the given names of the members of this family in 1940. This will provide easy identification later for those members who are now in the armed services or, having been discharged, are veterans.

Present Age (column 1): Please supply the present age rather than the age in 1940, as this is the easiest way to avoid the trouble of computing the present age from the 1940 figure.

Sex (column 2): This is simply M for male, or F for female.

Family Relationship (column 3): This means the relationship

of that particular family member to the head of the family. If the father was dead in 1940, the mother would be considered the head of the family, if she was in 1940 the actual family manager. If, however, it is easily determined that an older son or daughter was the actual family manager in 1940, he or she would be considered the family head. Other family relationships will be "wife", "son", "daughter", "son-in-law", "daughter-in-law", "sister-in-law", "mother-in-law", etc.

Marital Status (column 4): Show the marital status as of 1940. Write mar. for married; sing. for single; sep. for separated.

Principal Occupation (column 5): This means the occupation at which each member of the family was employed for all or for the most part of 1940: "lawyer", "farmer", "farm helper", "mechanic", "nurse", "stenographer" -- whatever the occupation was. "School" as an occupation in 1940 indicates that the younger members of the family were in school and had no paid job.

Where Working (column 6): This means the town or nearest post office town to the place of actual work of each family member in 1940. It usually will be the place of residence, unless, of course, certain family members commuted from the town in which they lived to a nearby place for work. In such a case give the name of the town in which they actually worked.

Present Marital Status (column 7): (NOTE: Questions 7 through 12 draw out information on family and occupational changes since 1940) This means the marital status at the present time. This is intended to give a picture of the development of the parental family to new families, only, and does not purport to catch the moral side of marriage. Conceivably, one family member might have been married and divorced one or more times, then married or separated or divorced again. We are interested in the present marital status only, and not in delineating each step involved in previous marriages. This question is closely related to the next following question, and is not complete in its information without the supplementary information following the next question.

Year Marital Status Changed --if changed (column 8): This supplements the preceeding question by giving information on when the 1940 marital status changed. Give simply the year in which the change occurred. If a person who was single in 1940 married in 1942, separated in 1943, then

remarried in 1944, simply insert 1942. This gives the date of first breaking away from the parental family. Do not give dates of subsequent changes in marital status.

Present Principal Occupation (column 9): Give here principal occupation at which each family member is presently employed. Sometimes a person will be found to have two jobs. In this case give the principal or most important job. Again the information given in this column is closely related to the information to be given under the next following question and is incomplete without the supplementation given in the next question. The information given in these two columns is to be compared with the occupational information, as the family members were employed in 1940, with occupations in 1940. The purpose of these two questions is to catch advancements made in work skills and earning levels since 1940, or retrogressions, as the case may be. For analytical purposes we can use only the present occupation. In the pre-test interviewing, a case was found where two daughters took USES war work training in welding. One of the daughters did not take a war job, but secured instead a job as telephone operator, where she continues to work at the present time. The other daughter went to the Brunswick Shipping Yards and worked as a welder for more than a year, then returned home and secured her present job as a telephone operator. In giving adequate information on such a family, it is of importance to give enough additional information to show the work skill development of each family, if such information is readily available. Such additional information, however, will have to be shown in the space for the interviewer's comments and identified by the line letter and the column number. Prefix each comment or extension of remarks with the line letter and question number to which it relates. In case of family members who are at present in the armed services, simply state "armed services". If a family member is now in school and not employed in a paid job, regardless of whether that person is a returned war veteran or not, the "school" answer to the question is important to show preparation for future employment.

Year Present Occupation Began (column 10): This is closely related to and is almost a part of the preceding question, and has already been explained above. It is important to fill in this information, so please don't leave spaces blank under this question, as doing so will destroy the usefulness of the preceding question.

Where Now Working (column 11): This question calls for the actual town in which the member's place of employment is located, or the nearest postoffice town in case of farm or rural work. Answers to this question go much further than providing

a comparison with answers in column 6. Answers to this question show the absence of members of the family who may be away at war work. Taking the whole study, answers to this question may help delineate "labor sheds", and may also bring out something on housing conditions and distance people travel from residence to work. For full development in this question area, however, it will be necessary for the interviewer to give full particulars in the space for additional remarks. The question must be left blank, of course, for those family members who are presently in the Armed Service, as it is not permissible or desirable to seek information as to the whereabouts of service men and women.

What Kind Work Skill Training Received? Where? and When? (column 12): The more focal answers to these questions will be those courses offered under the sponsorship of USES, such as Welding, Blacksmithing, Assembly Line Mechanics, etc. The frequency of appearance of such war work skill training courses will be of vast importance to the future of the South. It will determine the improvement in work skill levels of Southern people. Such answers as Stenographic Courses, Business Courses, etc., are important, as the percentages of such training in the region will determine some of the potentials of the South, as well as reveal the desire of the people to improve their lot when given proper stimulation to do so. Please give full answers as to the year such training was received and the location of the place received.

Names of Members of the Family Who Were Present During the Interview (Item 13): Simply write the given names of the one or several family members, as shown on Chart One who were present during the interview. This enables both the interviewer and analyst to glance hurriedly back through Chart One to determine the age and family connection of the one or ones supplying the information. Also it can be assumed that information from family members, especially from the younger members will be more reliable if some other family member is present when the information is given.

What Places Has This Family Lived Since 1940? (Item 14): List each town or post office (if lived on farms) of different places this family has lived. This is important to show lack of stability and amount of dislocation of the family by reason of moving around, perhaps, from one war plant town to another. One family taken in the pre-test had made one movement from Georgia to a place in Canada, moved back to Florida, then to northern New York, then back to Georgia, all since the beginning of the war.

Does This Family Consider Its Present Place of Work and Living As Permanent or Temporary? (Item 15): The answer to this question might be simply "permanent" or "temporary". But this question is to be answered from the interviewer's judgment after discussing it with those interviewed. Any additional remarks that explain or qualify the pat answers by the interviewers will be helpful.

Does This Family Seem to Have Any Firm Plans for the Post-War Days Ahead? What Plans?(Item 16): This question, in two parts will be answered by the interviewer, based on his judgment after discussing the situation with those interviewed. It might be "Yes, will move back to farm left lying out, and can't rent to others, and want to move back anyway"; or "Prefers farming to city work and hectic housing situation" ; or "No, feels that we are out of so many things, such as automobiles and washing machines, that plenty of work will be going on where he is"; or "No, don't seem to have thought about what they may do after the war". All additional remarks will be helpful here. Try not to leave this question blank on any interview schedule. If interviewer has talked with them and still can't determine what their plans are, the correct answer would be usually "no plans", though in a few cases the interviewer might have to supply such an answer as "can't determine". In the latter case it would be well to add some remarks explaining the situation.

INSTRUCTIONS FOR

CHART TWO

As the general heading at left top indicates, this part of the interview schedule if for information on veterans who derive from the original family of 1940, also on veterans who have become affiliated by marriage with members of the original family. Husbands or wives of original family members are included becasue the original family members whose husbands or wives are now veterans are basically affected by veteran's problems.

While veterans may be relatively few in number in sample families at the present time, later on they will be almost as numerous as enlisted men now are. One of the chief values of this and later studies may be to trace the increase, and rate of increase, in number of veterans in their natural family settings, in order to push the veterans and their problems into public consciousness.

Name: In the bracket headed "Name" at the extreme left side of the page, list each family member who is a veteran by the member's "given" name. The given name affords ready identification with information listed on the front page.

When all family-member veterans are listed, skip a line and list "family affiliate veterans" by listing the family member's "given" name, not the affiliate's, and adding in each instance the word "husband" or "wife", whichever the case may be (E.g. "Jane's husband). By doing this a ready identification of veterans' problems can be made with information on the front page.

Present Age (column 1): The age of family members appearing again on this page is necessary to shortcut analysis work, as an entirely separate analysis will be made on the veteran's information. The present age of the "family member affiliate" appears here for the first time. Note:: give this age and subsequent information on the husband or wife who has married the family member, and not on the family member as this, of course, is information on each veteran, per se.

Sex (column 2): M or F, as the case may be. Again this repetition of some previous information is called for solely to expidite analysis work.

Occupation 1940 (column 3): In the case of a family member this information appears again purely for layout work in analysis; but, of course, this information on the veteran husband or wife of a family member appears for the first time, and it is very pertinent information. A s was explained for similar information asked for on Chart One, this means the main or most important occupation at which this person worked all or most of 1940. In case of family members, it is merely transposing information gathered in Chart One.

Occupation When Inducted (column 4): This means the job or occupation the veteran worked at, at the very time of induction. This will show any net change, due to the war, in occupation since 1940. In some cases, as shown by other studies, many professional people left off their normal professional work to take up essential war work. One business administrator of a large farm insurance company in the mid-West dropped his normal work to become an operator of a street bus in Washington, D. C. This may have happened in cases of people who still later may have been inducted into service. Of course many salesmen of goods and services discontinued during the war may have turned to other work, then later have gone into the army.

When Inducted (column 5): This simply means the date to the nearest month of the year when the veteran was inducted. This question is related to the previous question and also to all of the questions that follow which are concerned with war service and what may have happened in the way of additional training, etc., to the veteran while in the armed service.

Occupational or Professional Training Received While In Service (column 6): List any training, such as radio, blacksmithing, pilot training, mechanical training, bookkeeping training, etc., which might give the veteran added qualifications for livelihood work as he returns to civilian life. Many doctors, dentists, etc., were given training far beyond that received by them up to the time of their induction. D o not include strictly military training, which is of no particular value to the veteran as he returns to his work as a civilian.

When Discharged (column 7): This means the date to the nearest month in the year he was discharged.

Disability (column 8): Give the nature of any disability, such as loss of limbs, sight, hearing, or other impediments to his physical makeup and health. In other words, any disability he received as a soldier which would be a liability, occupationally or otherwise, as he becomes again a civilian.

Note:: Questions 5 through 8 are concerned with period of the veteran's experiences in the armed service to determine (1) his occupational advancement or retrogression, as a result of the service, and (2) the government's natural obligation to this veteran.

Job Placement Sought (column 10): This information may be difficult to get from a third person. If the veteran is absent, try to have the person you are interviewing call in the wife or mother of the veteran, who may know more particulars about the difficulties the veteran encountered in getting a job after leaving the service. The wife or mother may be hazy about the different agencies which are set up to aid veterans in reemployment. The veteran himself, in many instances, may be quite confused and ignorant of all such aid offered veterans. It is one of the purposes of this study to try to determine how much veterans and their families know about all these services. Government administrators, themselves, are not yet quite clear on methods and policies of government aid to veterans which must finally be coordinated to be of use to the veterans. List all such things as USES, Selective Service, Counsellors (for veterans) which are set up as reemploy-

ment aids. In addition, list anything the reporter may tell you such as Veterans Administration, Social Security Board, etc., to whom that veteran may have applied for aid in obtaining a job.

Results (column 11): Give here whether or not the veteran did get a job, each one of the several times he may have sought job placement aid. This question is closely related to and is a part of the preceeding question.

Business or Farm Purchase Aid Sought (column 12): The principal financial aids for business or private enterprise purposes are: (1) small loans for the establishment of small businesses, and (2) small loans (net $2,000) extended to veterans for the purchase of farm land, under certain conditions. Simply say "farm loans" or "business", but be sure to question closely on this, as it is not enough to state that the veteran knows about these loan facilities, but "so and so tried it and didn't get it, so I knew there was no use trying it, etc..." On the other hand, if the veteran tried to get a farm loan at two or more separate times, and for some reason one or more of these attempts were unsuccessful, we need to know about each attempt separately.

Results (column 13): This question is closely related to and is a part of the preceeding question. There are several conditions to be met by the veteran before a loan can be granted him either for the establishment of a small business or for the purchase of a farm. We need to know, in each case, the reason the officials gave the veteran for not granting each separate loan application made (if more than one application was made), and the reasons in the veteran's mind why the loan was refused. In other words, if the veteran evaluated that certain political or other pressures were present in his case which prevented his favorable consideration, we need to know it. S uch answers more properly belong in the place for Additional Comments with a notation, such as D-13, to indicate to what question the extension remarks belong.

Restored to Pre-induction Job. What Job? (column 14): There are certain reemployment rights extended each veteran under certain conditions which require the employer to restore the veteran to the last or equal job at which the veteran was employed at the time of his induction. We need to know here if this veteran did get restored to his job. We need to know further that the veteran did or did not seek his pre-induction job again. Many veterans have reported that they did not desire to be restored to their former job, that they now could

do more skilled work and had more opportunities than they had at the time of induction. We need to know the reason. If the reason is too complicated for a simple statement, then list the reasons as an extension answer in the Additional Comments.

Present Occupation (column 15): Give here the actual occupation at which this veteran is engaged at the present time. If it is a paid occupation, the present occupation affords a ready index to livelihood opportunities open to returning soldiers at the present time. If it is " school" this provides an index to the alertness of the veteran toward his future wellbeing. All in all, the answer to this question is full of meaning when it is compared with questions 3, 4, 6, 8, 9, 10, and 12.

INSTRUCTIONS ON SAMPLING

It is recognized that the sample readily obtainable with the Council's resources cannot be truly representative of the whole region. On the other hand, no facts are available at the moment, and what is obtained will be at least of help to us in outlining the picture.

The method of determining families to interview must be strictly random sampling.

It is necessary to take every precaution to see that no individual or personal bias of either the interviewer or the analyst infiltrates, even though unconsciously, into the results. We must employ some sample method that uses a chance system, but arbitrarily determines the particular house to use for sample families. Once that sample house is determined, we must interview every separate family living in that house, with certain exceptions for apartment houses. Otherwise, we might use some partiality in a number of similar situations, and the accumulative bias would seriously affect the results.

M any random sample methods have been used successfully by researchers, but with the limited time we can ask the Fellows to give to this work, the sample method we can employ must be extremely simple and practical. We have used one method on a pre-test basis that seems both easy and adequate. But for purposes of comparability between the several interviewers working on the study, each interviewer must use the same sample method. The interviewer should use it rigidly, allowing no small variations to creep in, no matter how insignificent.

We present the sampling method to be used in this study as follows:

Distribution by population with special groups within the population:

If there are special government-owned or other war housing projects in your sample town or city, or if there are cotton mills or mining villages in or near the sample town and city and these villages have special characteristics of their own, divide the interviews between the villages and the rest of the city on a population percentage basis and run them as if you were dealing with two sample communities.

How to select sample houses in the town or city.

1. Determine the distance from the principal (or largest) railroad passenger depot or terminal to the city limits, going directly east as possible. If there is no through street eastward direct from the station, take the nearest through street, right or left from the station and begin your counting at the point on this street nearest the station. This distance can be determined either by actually counting the number of blocks, or from a city map, or by measuring to the nearest tenth of a mile on the speedometer of an automobile..

2. Determine the street that crosses this street nearest the half-way mark from the depot to the city limits. Again this can be determined by actually counting the blocks, or from a city map, or by using an automobile speedometer to the nearest tenth of a mile.

3. After determining this half-way crossing street, turn right on this crossing street and begin counting the houses on the right side. Continue counting to determine the 17th house according to the procedure outlined below. This procedure is followed in order to introduce changes in direction and other chance variations necessary to scatter the sample houses about over the town.

When you reach the end of the block without reaching the 17th house, cross to the opposite side of the street and resume your counting with the first house in the new block (a new block is determined by the complete crossing of two streets; forks or street branches or alleyways are to be disregarded in determining the end of a block). Continue counting on this new side of the street until the 17th house is reached, crossing other blocks without any further changes in side of the street..

Once the 17th house on the street is found, it becomes the sample house. Ordinarily every separate family living in the sample house is to be interviewed, except in the case of apartments as noted below.

4. If no family living in the sample house is at home, or if the sample house is vacant for <u>any</u> reason, or if the family refuses to be interviewed, revert to the 16th house. If people in the 16th house in turn are not at home, revert to the 15th house, on backward through the 14th, 13th, etc., until a house with people at home is found. Interview every family in the final sample house taken, unless it is an apartment house

where many families live.

When several interviews (one for each separate family) are run in the same sample house (1) each interview is to be numbered separately, and (2) the number of each additional interview run in that same house is to be added, but set off in parenthesis. E.G. Interview Number 26 --(27,28); Interview Number 27 --(26,28); Interview Number 28 --(26,27) respectively for three interviews, numbers 26, 27, 28, taken in the same house.

In case the sample house found is an apartment house, take two families as follows:

Take the first family on your right nearest the entrance. If this family is not at home take any family nearest the entrance who may be at home. After interviewing the family on the ground floor, go to the top floor. Take the family at home nearest the stairs or elevator. Now, in case no family is at home on either the ground floor or the top floor, try the next floor downward from the top floor for the second family, etc. Apartment houses include any house housing four families or more, irrespective of whether the house be wood or brick or one or more stories high. In case the apartment has only one floor, take any two families.

Row houses are counted as a separate house for each entrance or group of entrances if these additional entrances serve apartments or separate housekeeping floors all of which are above the ground floor. And in the case of any large house having four or more families, treat this as one house, and treat any large house as one house for counting purposes, and each row house (if serving one family only) and each group of entrances serving one ground floor and all floors above it as one house for counting purposes.

6. After the first interview, begin your counting over again - from the first to the 17th house. Begin your new count (starting at one) at the next house to the 17th house and not at any substituted sample house, on the same side of the street, going in the same direction. Count from this house to the house at the end of the block. If the 17th house was the last house in the block, begin your new count at the first house across the block going in the same direction until you come again to a 17th house (which becomes the new sample house) or to the last house in the new block.

If your count of the last house in the block is an <u>odd</u> number, and is not <u>divisible</u> by three, turn left at the corner,

and resume your counting on the new block on the new street in the new direction with the first house on the lefthand side of the street.

If your count of the last house in the block is an even number, and is not divisible by three, turn right at the corner and resume your counting on the new block on the new street in the new direction with the first house on the righthand side of the street.

When the count reached at the last house is divisible by three, either an odd or even number, continue your counting straight ahead on the same side of the street in the same direction.

When the end of the first block, whether you have gone either right or left or straight ahead, is reached, alternate to the opposite side and resume your counting until you come to the 17th house, which becomes your next sample house. If necessary, find substitute sample house as outlined above.

What to do in case your street leads to a dead end, or is interrupted by a park, college, factory district or other non-residential area, or reaches the outer edge of town.

Move three blocks toward the principal depot, then resume your counting on the righthand side of the street. If the first three blocks toward the depot are still in a non-residential area, move three more blocks toward the station for another try. If it fails again, move three more, and on three blocks at a time until a residential area is found. If all this fails to locate in a residential area, and you are pulled completely back to the depot without finding a residential area, begin your whole sample location procedure over again, going first south, then west, then north, as the case may be, toward the city limits. Take the halfway street as a new starting point, proceeding as you did on the eastbound street.

Special note on sampling in rural areas.

No survey involving Southern people can be complete unless it covers rural families as well as city families. We realize that many of the Fellows do not have cars. We realize also that those who do have cars have terrific problems

in getting gasolene for driving needs. If you do have a car, we earnestly hope you can spare enough driving to interview a few rural families.

In order to be systematic in our sampling procedure, we are setting out a rural sampling plan to give us as many families as possible with as little driving as possible. The plan is as follows:

Locating sample starting point and sample families

Lead out onto the main road from your town to the nearest next town that is a county seat, whether that town is the county seat of an adjoining county or of the same county in which the sample town is located. Go two miles from the city limits of the sample town, and take the first public road that turns off either right or left from this main road. From where you turn, count every farm house and tenant house in sight within two hundred yards of the road on both sides of the road. Take the seventh house as your sample house, and interview all families living in this house. Continue your counting from this house, again taking all the houses in sight within two hundred yards of the road, finding the next seventh house for your sample house.

Determining any changes in direction

In case you come to another road, either crossing or forking off from or running into the road you are on, let the last house you have counted determine, on a chance method, the direction in which you are to continue your sampling:

If the choice lies between two directions, in case of a fork or turn off, if the count 'from the last sample house) of the house nearest the fork or turn, is an odd number, take the leftmost direction, continuing on; and if the count is an even number take the rightmost direction.

If the choice in direction lies between three directions , as in the case of a crossroad, if the count of the last house (from the last sample house) is an odd number and is not divisible by three, take the left turn; if the count is an even number and is not divisible by three, take the righthand turn. In case of either an odd number or an even number that is divisible by three, go straight across -- the road that leads off between the rightmost and leftmost turn.

In rural areas when roads are apt to lead off anywhere, and in any direction, situations may be encountered where the above plan cannot be followed to the letter. At some country church or country store crossing, five or six roads may come together. In case you have more than three choices of direction, use the number which would fall on the next house as a starting number and count the turns (roads leading off) round and round in a clockwise direction (excluding the road by which you have come to the community) until you have counted to seven. Take the road on which the count of seven falls.

INSTRUCTIONS FOR SAMPLING
IN NEGRO NEIGHBORHOODS

Allocation of interviews by population and neighborhoods within a town or city.

We must make every effort possible to have our sample representative of the Negro population in the town or city in which the sample is taken.

Consult with Negro organizations and their leaders, such as the Urban League, NAACP, Negro insurance companies, and other civic or business groups who know Negro neighborhoods. Designate to each neighborhood its percentage of the total Negro population in your town or city. Decide approximately how many interviews you can run and allocate the number of interviews proportionately among the important neighborhoods and communities.

Determination of the starting point and sample houses in the neighborhood.

Determine the approximate number of blocks along the principal or outstanding business or residential street in the neighborhood. Going away from the heart or central part of the sample town or city, turn right at the street that crosses and leads off to the right at a point nearest the half-way point of this principal street as it goes through the Negro community. Begin counting houses on the right side of this street. Take the seventh house as your sample house. After every seventh or sample house, start the count at one again. Interview every family living in the sample house, unless it is an apartment house. An apartment house covers any house, regardless of size or construction that houses more than four families.

In an apartment house, take as your sample families one family on the ground floor, and one family on the top floor, if the house has more than one story. Take the first family on your right, going in, nearest the entrance, or the nearest family to the entrance regardless of whether on the right or left.

For the purpose of counting houses, take every apartment house as one house, and each ground floor with all other floors directly above the ground floor in row houses, as one separate house.

Changes in direction

When a side street or residential alley-way leads off from the street, on your side of the street, while counting houses, determine whether or not you change directions in your sampling as follows: If the side street or alley-way is encountered between your last sample house and the next seventh house in your count, and you have a choice in directions, make the turn and resume your counting along the left side in the new block, (1) if the count from your last sample house to the last house before the side street is an odd number, and (2) if the sample house was the last house in the block as you encountered the turn-off. But when the latter is the case, limit your sampling on the new street or alley-way to just one sample house -- the seventh house from the last sample house. Then return to the street from whence you made the turn. Renew your counting on the same side of the street and in the same direction as you were going before making the turn.

However, when the count from your last sample house to last house as you encounter the side street is an even number, do not make any turn, but continue on the same side of the street, and continue your counting with the first house in the new block.

When you reach the end of a block caused by a complete crossing of your street by another street, the other street extending in both right and left directions, determine whether you change directions and which direction in the following manner::

(1) When the count from your last sample house to the last house in the block is an odd number and is not divisible by three, make the turn to your left (on crossing street) and resume your counting with the first house on the left side on the new street.

(2) When the count at the cross street is an even number and is not divisible by three, make the turn to your right (on the crossing street) and resume your counting with the first house in the block on your righthand side of the new street.

When your sample house was the last house in the block, go straight ahead on the same street you are on and resume your counting with the first house in the new block on the same side of the street.

When the count at the cross street is either an odd or

even number that is divisible by three, go straight ahead on the same street you are on and resume your counting with the first house in the new block on the opposite side of the street.

Dead Ends, etc.

When you encounter a dead end of a street, or when the Negro neighborhood ends along a street, revert to the last street from which you made a turn in order. Resume your counting from one continuing on this last street in the same direction and on the same side of the street as you would have if you had not turned off. In case this street was the principal business or residential street from which you determined your starting point, go back two blocks towards the heart or central part of town, make a righthand turn, and begin from a new starting point, by taking the first house on the righthand side of the street, as you turn.

GI Programs in the South—An Alabama Survey

By William B. Twitty
Field Representative, Veterans Services Division
Southern Regional Council, Inc.

ALABAMA sent about 300,000 men to the armed forces, and about one out of every three men sent or volunteered was a Negro. Today over 200,000 of these men who spent from three to five years of their life defeating the enemy have been returned. These men have many needs. I happen to be an Alabama veteran myself. I was interested to learn if this thing called the GI Bill, which provided me and other veterans with certain opportunities for the time we spent in service, were really so, or if it were just political talk and agency answer—agency answer that's always "No," or "Sorry, Mack, you're just a little late."

I drove 12,000 miles over the State of Alabama, and I talked with veterans from all parts of the state. I also talked to State and Federal workers who were hired to help veterans, and I talked to business men, labor, religious, political, and community leaders.

I tried to find out from officials what was being done for veterans all over the state. But I found no one in the state who really knew what was being done from Allsboro to Mobile. I live in Allsboro and knew what was going on there, but I had to go to Mobile to find out what was happening there.

Opportunities

Veterans in Alabama have by law certain opportunities and benefits. NEW SOUTH, in the February issue, grouped the main benefits under the headings of information, jobs and education.

1. *Information*: If an Alabama veteran is interested in a job, unemployment compensation, or apprenticeship training, he should go to the U. S. Employment Office. If a veteran wants to know about education, or job-training, or file a claim, he should go to the County Service Commissioner. The Service Commissioner is employed by the state to assist veterans, and there is one in every Alabama County. If the veteran wants his old job back he sees his draft board. For general information and exact details regarding training, claims, or other problems, he may see a veterans administration representative.

2. *Jobs*: Officials who talk to veterans daily say the men are interested primarily in two things: One, to train for a better job than they had before the war and, if they had no job, to train for a job offering good pay. Two, to go into business. They are not too particular about what kind of business, and are often interested in going into a business in which they have had no experience or training. Yet many veterans with families or folks depending on them find it urgent to start work at the earliest possible date. These men register with the U. S. Employment Office and, if they are not placed, are eligible for $20.00 per week until they find a job, or for 52 weeks. During the month of December the U. S. Employment Office, throughout Alabama, interviewed 81,329 veterans; placed 2,381, and had 26,993 in their active files waiting

Education and Crime

By Mary Ruth Graham
Research Assistant, Bureau of Public Administration
University of Alabama
(From Alabama School Journal)

WE who are interested in the role that the public school system plays in preparing boys and girls for profitable and constructive lives would naturally like to know in what measure education or the lack of education contributes to a person's failure to live a law-abiding life. How does the educational standard of Alabama's prison population compare with that of the general population? Is there evidence that ignorance among Alabama citizens could be blamed in part for the crime that exists in the state?

One-third Semi-literate

A tabulation has been made of all parolees released by the Alabama Board of Pardons and Paroles during its first five years of operation—from Sept. 15, 1939, to Aug. 1, 1944. This tabulation included data on the educational status of parolees. Since there is no evidence that the Parole Board has selected its parolees on the basis of education, it is reasonably safe to assume that the educational level for parolees in this five-year period would approximate the educational standard for the prison population during the same period of time. Hence, the term "parolee" educational achievement will be used interchangeably with "prisoner" educational level.

Of the 3,902 parole cases studied in light of educational achievement, 17.3 percent had never attended school at all, while the percentage of the general population of Alabama 25 years of age and over that has had no schooling is 6.7. This comparison reveals that almost three times as great a percentage of the parolees had never gone to school as was true of the general population. Furthermore, 37.6 percent, or over one-third of the parolee group, had gone no farther in school than the third grade. This means that over one-third of the people who go to prison are semi-literate at best.

At the same time, only 9.5 percent of the entire parolee group had attended high school. Of the general population in Alabama, 21.8 percent has attended high schools. In other words, the people who constitute the prison population of Alabama have attended high school at less than one-half the rate of the general population.

The disparity between the rates on college attendance is still higher. One and two-tenths percent of Alabama parolees attended college, as compared to 7 percent of the general population. Thus almost six times as great a percentage of the general population as of parolees have attended college.

Negro Schooling Lower

Further analysis of the relationship between crime and education has been made on the basis of race. While 9.4 percent of the white parolees had never been to school, only 3.2 percent, or one-third as great a percentage, of the general white population have had no school

A Chance for the Veteran —and for the South

By George S. Mitchell
Director of Veterans Services
Southern Regional Council

THE problem of building a richer civilization for the South is deeply involved with the problem of our returning veterans. If veterans, as they come home, can get their shoulders to the wheel of Southern progress we can be reasonably sure of our future; if not, the handicaps of the South will return more often and in worse forms. The opportunity we give our veterans has a direct bearing on the South's opportunity to build its future prosperity; fitting the veteran back into civilian life is a step toward fitting the South into the pattern of a higher American economy.

Congress did a good job of reflecting the will of the people when it outlined the rights and benefits of veterans of World War II. The help veterans are entitled to is generous. Whether they will get all that the laws make available depends on information and administration.

Benefits

The chief veteran benefits may be grouped as follows:

1. *Information*: The responsible Government agencies try to see to it that within reach of every veteran is a place where he can learn what help he can get in making readjustment to civilian life.

2. *Jobs*: Here the main responsibility rests, as it should, on the veteran himself. He has a statutory right to go back to his old job, or one like it, if he had a regular job before he went to war. If he had no permanent job before—as most veterans did not—he has to find one himself. He will get preferential help from the local U. S. Employment Service office, or he can ask his draft board to help him find a job. If he happened to have a Government job before he went into service, he can almost certainly get it back. If he plans to be self-employed, as businessman or farmer, he has a chance—though not a very good chance—to get favorable financing. He gets a clumsy preference in buying surplus commodities, which could be helpful if he plans to go in business for himself. If his business or farm yields less than $100 a month, the Government will make up the difference between $100 and what he actually takes in each month, for a year. If he can't find work he can get unemployment compensation.

3. *Pensions*: These are graduated to fit the degree of disability. The veteran who comes back well and whole is, of course, on his own. One of the major administrative tasks of state and federal governments for years to come will be the handling of claims for changes in pension status. Claims work is handled for the veteran free of charge.

4. *Education*: This is the master benefit. The Government makes it a principle that any veteran can get substantial help in making up for education lost because of the war. For the disabled, the Veterans Administration will work out a complete rehabilitation program, and will just about foot the bill. The veteran without disability can make his own choice of the kind of education he wants.

These are the Roots

America's Children—millions of them!

White, Black, Red, Brown, Yellow — and Mixtures of these.

All created in the image and likeness of God.

All vibrantly alive, carefree, and looking forward eagerly to the future.

All accepting those about them as fellow passengers on the voyage of life.

All feeling that the world will remain as rosy-hued as it is in their eyes today.

All marching into the future with heads high, and hearts filled with the wonder and joy of living—of being FREE Americans—

Truly are they the roots of all that we can ever hope to be!

What about these children of ours, America?

Shall we let these roots grow in TRUTH and BEAUTY as the Author of Creation intended that they should?

Or will those of us who have lived long enough, and narrowly enough to have our minds warped with TWISTED NOTIONS OF RACE AND CREED—tie millstones of HATRED and PREJUDICE about the feet of these young people of ours?

Shall we try to use eyes blurred by unjust customs and un-American traditions; hands roughened by too long a use of the master's whip; and souls bound by cords of "I-am-better-than-thou"—to try to paint for these young people another canvas to take the place of the one painted on Calvary's Hill to GLORIFY THE FATHERHOOD OF GOD AND THE BROTHERHOOD OF MAN?

Shall we? What about it, America?

Our Policy

Without abridgement of opportunity to acquire them because of race, color, or religion, our objectives for ALL Americans are:

1. **Educational, moral, living, and social standards of such a nature as to merit the good will and cooperation of their fellow Americans.**
2. **Understanding sufficient to recognize and respect character, wherever it exists.**
3. **Decent, livable home surroundings.**
4. **Adequate educational, health, and recreation facilities.**
5. **Economic privileges in keeping with their capabilities and achievements.**
6. **Full protection of the law.**
7. **The privilege of participating in civic, local, and national affairs.**
8. **The right to enjoy the privileges of American citizenship according to their merits, fitness and ability.**

Editorial Comment . . .

LEGISLATION ALONE WON'T DO IT

Time and again the question has been raised as to whether or not adequate legislation can remedy inequalities of opportunity that exist among the racial groups that make up our national life. It is our opinion that while laws will help in some instances, the idea of justice and fair play must emanate from the individuals that make up a community—rather than the laws that govern it.

"The law," according to Charles Houston, eminent Negro jurist, "is simply a body of regulations which have no content axcept as it is poured into them by people—by their customs, traditions and interpretations." And again, "Law is not self activating but it is set in motion by people—judges, lawyers, enforcement officers—and these human beings are products of the environments in which they live." It is upon these considerations that our opinions are based.

While legislation such as the Gaines Case in which ruling was made that facilities substantially equal to those available to white students must also be made available by the State to Negro students who desire them; the case dealing with transportation in which ruling was handed down that the right of Negroes to equal facilities for interstate train travel on Pullmans and dining cars, must be recognized; and the ruling that was made by the Supreme Court in the Texas Primary decision—means a great deal to the cause of Negro opportunity, it does not adequately take care of the situation.

It is a known fact that while all of this, and similar legislation, has been passed in good faith, it has been put into practice in very limited measures. One state sets aside $25,000 to be used as scholarships to provide the "facilities substantially equal to those of whites" for thousands of Negro youth of this state who are seeking higher education. One table is put behind a curtain in a dining car to furnish "equal facilities for interstate train travel" and six Negroes in a given community in the South are permitted to register for voting. Thus is the legislation, which we hailed with delight, satisfied. Of course we have redress to the courts—if we can raise the tremendous sums necessary to secure this redress. No people can afford to live in the courts—least of all the Negro.

Booker T. Washington's advice to the Negro, to make friends with his next door white neighbor, contained more wisdom than is evident on the surface (and this does not mean that one has to be an "Uncle Tom" to establish friendship.) Honest dealings, dependability, self respect and all other qualities that go to make up real manhood—win the acclaim of southern whites just as they do of people everywhere. Since the content of the law is "poured into it by the people who administer it"—and since most of the administering is done by white America, the Negro's salvation seems to lie in selling himself to white America in the finest way possible. The morale of each community that makes up this land of ours, will have to be lifted to such a level that the need of justice and fair play for ALL men within our borders will be seen.

While it is necessary that collective pressure continue to be exercised upon courts, legislatures, and other law enactment and enforcement agencies, it is equally necessary that the Negro cultivate the good-will of the white man as a friend and neighbor. A feeling of trust is developed between men working together in a community for civic and economic improvement. Such relationships permit members

of all groups to know and understand each other better. In this way the idea of the brotherhood of man and the Fatherhood of God becomes a living influence, and men do right for Right's sake. Under such conditions there are no evasions or halfway measures.

•

The $64.00 Question

The biggest stumbling block that has stood in the way of any appreciable degree of team work between white and black Americans, particularly in the South, has been the question of "social equality, social intermingling and intermarriage."

Our common destiny here in America is too closely tied up with world problems to think in terms of ourselves alone, and world problems are too big and grave to concentrate valuable time and effort upon such small, purely individual questions as those dealing with social tastes and emotions.

Every man has the right to choose his own friends, to have his own traditions, to say who shall enter his home. No man has the right to force himself upon another, or to gainsay his traditions. If the members of any group wish to bar the members of another group from its purely social affairs, the group is perfectly within its right to do so and the other group has the right to exercise similar restraint in so far as its own group's social activities are concerned. This is a part of man's inalienable rights. The acceptance of this apparently unquestionable fact would make possible a type of teamwork that would open up for this nation of ours, particularly the southern portion of it, an era of progress that would be unparalleled in past history.

Of course, it would have to be realized by all parties concerned that this "inalienable right" to accept or deny people obtains ONLY in the field of individual social tastes. No people have the right to bar others from the means of earning a decent living, getting education for their children, living in comfortable home surroundings, etc., and call these things "social equality." All such factors as these are economic and should be treated as such. The right to earn an honest living, to fill a job that one is qualified to fill, can, by no stretch of the imagination, be classed as a privilege that belongs to any one group. American ideals and principles would cease to exist and America would not be America—if such ideas were generally accepted by its people.

The things over which we disagree and hate each other seem so little when reduced to their simplest terms, that one wonders how an intelligent, enlightened people can stand in their own way so long. The average white American wants a decent, livable home, opportunities for those entrusted to his care, security against poverty and old age, the right of a free man in a free country (including friends of his own choice.) The average black American wants exactly these same things. This land of ours with its Christian heritage, its rich resources and its 130,000,000 people offers ample opportunities for both of these Americans to attain their desires. All that is needed is for each to be given the opportunity to develop to his fullest capacity in order that he might make his contribution to the common welfare. Why then, in the name of common sense, can't this be done?

•

"The greatest quality in a Nation is JUSTICE.

The greatest quality in man is LOYALTY.

Where there is loyalty there is safety, and where there is safety there is progress.

Treachery makes the worthless man.

Loyalty makes the good man.

Loyalty to your country, your friends, your beliefs, your ancestry, your promises and your purposes—is what makes Life worthwhile.

Loyalty is COURAGE and DEVOTION."—Ford Motor Company.

Pulitzer Prize Editorial For 1945

An editorial by Hodding Carter, published on August 27, 1945, in The Delta Democrat-Times, Greenville, Miss.

•

Company D of the 168th Regiment, which is stationed in Leghorn, Italy, is composed altogether of white troops, some from the East, some from the South, some from the Midwest and West Coast. Company D made an unusual promise earlier this month. The promise was made in the form of a communication to their fellow Americans of the 442nd Infantry Regiment, whose motto is "Go for Broke," and it was subscribed to unanimously by the officers and men of Company D.

In brief, the communications pledged the help of Company D in convincing the folks back home that "you are fully deserving of all the privileges with which we ourselves are bestowed." The soldiers to whom that promise was made are Japanese-Americans in the United States Army, and no troops have chalked up a better combat record. Their record is good.

These Nisei were selected by Gen. Francis H. Cox, commander of the military area in which they are stationed, to lead the final victory parade, so they marched 3,000 strong at the head of thousands of the other Americans. Their battle flag with three presidential unit citation streamers floating above them, their commander, a Wisconsin white colonel. leading them, some of the Nisei must have been thinking of the soul-carking days last October when they spearheaded the attacks that opened the Vosges Mountain doorway to Strasbourg.

Rescue of a Lost Battalion

Some of them were probably remembering how they, on another bloody day, had snatched the Thirty-Sixth Division's lost battalion of Texans from the encircling Germans, and how many of them were bearing scars from those two engagements which alone had cost the Nisei boys from Hawaii and the West Coast 2,300 casualties.

Perhaps these yellow-skinned Americans, to whose Japanese kinsmen we have administered a terrific and long overdue defeat, were holding their eyes higher because of the pledge of their white fellow soldiers and fellow Americans of Company D. Perhaps when they gazed at their combat flag, the motto, "Go for Broke," emblazoned thereon took on a different meaning. "Go for Broke" is the Hawaiian-Japanese slang expression for shooting the works in a dice game.

•

The loyal Nisei have shot the works. From the beginning of the war they have been on trial, in and out of uniform, in the Army camps and relocation centers, as combat troops in Europe and as front-line interrogators, propagandists and combat intelligence personnel in the Pacific, where their capture meant prolonged and hideous torture. And even yet they have not satisfied their critics.

Injustice Toward the Nisei

It is so easy for a dominant race to explain good or evil, patriotism or treachery, courage or cowardice in terms of skin color. So easy and so tragically wrong. Too many have committed a wrong against the loyal Nisei, who by the thousands have proved themselves good Americans, even while others of us, by our actions against them, have shown ourselves to be bad Americans.

Nor is the end of this misconception in sight. Those Japanese-American soldiers who paraded at Leghorn, in the commemoration of the defeat of the nation from which their fathers came, will meet other enemies, other obstacles as forbidding as those of war. A lot of people will begin saying, as soon as these boys take off their uniforms, that a Jap is a Jap, and that the Nisei deserve no consideration. A large majority won't say or believe this, but an active

(Continued on page 8)

Governor William M. Tuck of the Commonwealth of Virginia is here pictured with two officers of the High School Cadet Corps of the Richmond Public Schools. Thus does the Governor show his interest in what is being done by both the white and Negro youth of Virginia for the development of the manpower of the Commonwealth. This picture was used in two-tone color as the cover page for the May 1946 issue of the Virginia Education Bulletin.

Educating For Tolerance

According to Edwin R. Embree, President of the Julius Rosenwald Fund and chairman of Chicago's Mayor's Committee on Race Relations, our educational setup includes:

Twenty million young people enrolled in the nation's elementary schools; seven million pupils behind desks in the high schools of the country; one million, five hundred thousand men and women in the colleges and universities of America; three million who have already graduated, and approximately one million, three hundred thousands persons engaged in the teaching profession.

According to the commonly accepted definition of education, it is the job of this gigantic machinery to give those involved the knowledge, skills and understanding necessary to enable them to live successful lives among their fellowmen. It seems as if such a setup, working along the right lines, ought to be able to turn out millions of REAL Americans annually—Americans who believe in freedom, who have ideals based on democracy, who realize that ours is a land of many people, and our future welfare lies in giving ALL of these people the opportunity to make their fullest contribution to the American way of life.

PULITZER PRIZE EDITORIAL

(Continued from page 7)

minority can have its way against an apathetic majority.

It seems to us that Nisei slogan, "Go for Broke," could be adopted by all Americans of good will in the days ahead. We have got to shoot the works in a fight for tolerance. Those boys of Company D point the way. Japan's surrender will be signed aboard the Missouri and Gen. MacArthur's part will be a symbolic "Show Me."

Georgia's Citizens Council

Through the various activities carried on in connection with war needs, the citizens of Georgia learned that a great deal more could be accomplished for the common welfare if groups pooled their resources, their information, and their energies and worked together for the common good. In the light of this knowledge Georgia's Governor Arnall and its General Assembly brought into existence the Georgia Citizens' Council, composed of 21 outstanding men and women leaders from various civic groups, the church, and the business life of the state. The established objectives of this group are "to serve as a permanent adjunct of the State government to mobilize the civic, church, and service organizations in more effective programs to improve the human resources of the State."

This Council, in making a study of Georgia's human resources, found, among other things, that Selective Service tests showed 17 more Georgia men per thousand had been rejected for mental disease than the National average; that 16 more per thousand had been rejected for educational deficiencies; that 15 more white men and 55 more Negro men had been rejected for syphilis than the National average, and that 8 per cent more per thousand had been rejected for hernia than the National average.

The Youth Division of the Citizens Council, through the cooperation of various State Departments, found out that: only three out of every ten boys and girls who entered school in Georgia get beyond the seventh grade; ten per cent of the population of Georgia's state prison system is composed of boys and girls 12 to 18 years of age—not including the large number of inmates of homes for delinquent children.

As dark as Georgia's picture of human resources looks, it would, in all probability, be duplicated in many areas of the South were a similar comprehensive study made. The Citizens Council enlisted the voluntary services, advice, and counsel of more than 250 other outstanding professional and lay citizens and have gone to work with a will to improve Georgia's human resources.

Teen-age programs for both white and Negro youth are being carefully planned and executed under the supervision of trained workers; Community leaders are working with juvenile courts through a Parents and Community Coooperation Section; another group of 23 people is providing INCENTIVES for boys and girls to do community service in preparation for citizenship. Fifty Georgia counties are working through this Junior Citizenship Section for the selection of the BOY OF THE YEAR and the GIRL OF THE YEAR. In one county an outstanding Georgia citizen donated $500 bonds to be awarded to the White Boy and Girl of the Year and to the Negro Boy and Girl of the Year.

The Council, through its Child Labor Section, prepared and promoted Child Labor Laws that are designed to prevent all of Georgia's children from being exploited by unscrupulous employers, and from working in hazardous occupations. A Compulsory Education Law that requires children to remain in school until the age of 16 has been recently passed. Other phases of the Georgia Citizens Council deal with the expanding or recreational opportunities for youth and adults; the improvement of educational standards; the safeguarding of public health through the curbing of syphilis and other communicable diseases; and such other problems the solution of which will insure a better type of living for all of Georgia's people.

At an April meeting of the Council a poll taken among its members showed that it is the concensus of opinion among the members of this organization that "youth guidance for colored people is even more important than for whites." At this same meeting the Nehi Corporation of Colum-

bus, Georgia, offered the Council the services of a Negro welfare worker to assist in the promotion and planning of guidance work among the Negro youth of Georgia. The Council accepted the offer and agreed that the Teen-age Center Section and the Leadership Training Section of the Recreation Division would sponsor workshops and institutes for both white and colored leaders of Georgia.

A council member, in addressing that body recently, used these significant words: "We want the American way of life to survive, the Democratic way. But if we are to maintain our American way of life we must make it work." Georgia's Citizens Council, in seeking to build a better way of life for all of Georgia's people, is bound to make a definite contribution to the welfare of the State.

"HOME"

"The House Beautiful" magazine defines home in the following manner: HOME—Shelter from rain; protection from sun and snow; a shield from prying eyes; a place in which to eat, sleep, change clothes and take a bath, a spot to go when you want to be alone

A place that says to the husband, "Welcome home, Darling, here's your slumber chair and your paper and your slippers." And to the wife, "Relax Sweetheart, take it easy. Here's that dream world of mechanized housekeeping to bring you new leisure." To the children, "Why not bring your school mates over? Here's your new rumpus room, your own special play spot, full of your own things." And to friends: "Come in, join our fun—this is our hearthside, our haven, our home . . . the most wonderful thing that ever happened to anybody."

Then there's that other definition of HOME, the one given by the guy who didn't have any poetry in his soul. It went something like this: HOME—A filling station in the daytime and a parking lot at night.

Without Barrier Of Race

By CLARISSA K. DILLARD

Mrs. Dillard is a member of the faculty of Virginia Union University, Richmond.

•

Perhaps never before in the long history of mankind has there been a greater need for racial understanding. Moreover the great and significant theme of "One World" so ably espoused by Willkie and others after him is predicated on "respect for the individual."

The church, once interested largely in things celestial, has long since come to realize that good Christians must also be good citizens. And so, the Federal Council of Churches in America, at its recent Columbus, Ohio, meeting, went definitely on record as favoring liberalization and democratization of human conduct in America as between races, individuals, and people. Likewise the Negro Newspaper Publishers Association who might easily live handsomely simply publishing the doings and activities of people have felt it their responsibility and obligation to place squarely before our President the need to achieve the peace through effective cooperation here in America and indeed here in the South.

Harry Emerson Fosdick, speaking in New York several Sundays ago placed this issue before his constituents more succinctly than I have heard it before when he said "Life is not made of neutrals." Continuing, Dr. Fosdick declared "we do not have, habitually, three choices, pro, con, and indifference, but only two. These are as you may have guessed, pro and con."

What are the great questions today on which a man must be pro or con? That the ability to live together as brothers should and can be practiced in America, including the South, is the answer of one organization and the essence of the narrative which follows.

From the beginning of its existence the Young Women's Christian Association has been a trail blazer. Founded as it was to provide homes for women and girls who came into the cities, the association tried to help these young people adjust themselves to city life. The association organized Bible classes for the spiritual growth of the young woman and organized classes in the three R's for their educational advancement. Thus the Y. W. C. A. demonstrated the practicality of adult education. The public school took over the education of adults, and the "Y" looked to new fields of endeavor. Turning the glance inward, the Y. W. C. A. realized that "the abundant life" was not possible with so much emphasis on doing things for people; more can be done if the emphasis is placed upon work with people. It was the student group in the movement which came forward asking for a new purpose changed so that young women not members of certain restricted religious faiths could too become members. Through their efforts the whole Association came to a momentous decision to allow any one who made a personal pledge to be eligible for membership.

Again the student in studying the new purpose found the aim "to build a fellowship of women and girls devoted to the task of realizing in our common life those ideals of personal and social living to which we are committed by our faith as Christians." In this endeavor we seek to understand Jesus and to share his love for all people. In 1940 the matter of Negroes in most communities not being a part of the mainstream's was brought to the attention of the National Convention at Atlantic City, New Jersey.

An interracial commission was formed to study interracial practices within the association. This commission made a report of its findings and offered thirty-five recommendations. These were circularized to all associations for study.

War activities delayed the next convention until March 1946. In the meantime the Interracial Charter for the National Board was adopted. This charter which follows was discussed with all its implications at the convention. Its passage made the Young Women's Christian Association the first National Christian Organization to take a definite stand on race.

The Interracial Charter

The Young Women's Christian Associations of the United States since the early days have recognized their role in society as an organization for all women and girls, and particularly those who by reason of economic, cultural or social environment have not had opportunity to make their full contribution to the common life. To them the Association may potentially be, and often has been, a bulwark against unfavorable circumstance and a channel of creative endeavor.

Today racial tensions threaten not only the well-being of our communities but also the possibility of a peaceful world. Women of the minority races in America form more than one-tenth of the Association constituency, and have a direct claim to the organization's understanding and support. That this responsibility has been recognized and accepted is clear from the evidence of succeeding convention actions. In 1936, the convention voted that

"Associations should continue to work for the building of a society nearer to the Kingdom of God by attempting to create within the Association a fellowship in which barriers of race, nationality, education and social status are broken down in the pursuit of the common objective of a better life for all."

This fellowship without barriers of race, this better life for all is an accepted goal which we of the National Board strive to achieve. We shall be ever mindful of the variation in the number and range of difficulties to overcome any opportunities to progress. Wherever there is injustice on the basis of race, whether in the community, the nation or the world, our protest must be clear and our labor for its removal vigorous and steady. And what we urge on others, we are constrained to practice ourselves. We shall be alert to the opportunities to demonstrate the richness of life inherent in an organization unhampered by artificial barriers, in which all members have full status and all persons equal honor and respect as the children of one Father.

We humbly and resolutely pledge ourselves to continue to pioneer in an interracial experience that shall be increasingly democratic and Christian.—Reprinted from the Virginia Education Bulletin.

●

The United Negro College Fund

The United Negro College Fund represents one of the biggest and most successful projects in pulling together among people of all groups in private life today. It shows a high degree of inter-racial interest and a splendid spirit of inter-racial good-will. It is a big success not only from the standpoint of the funds raised to assist in higher education for Negro youth, but also from the standpoint of good Americanism. It is a matter of pride among America's people that the strong have always been willing to help those who were less strong. America's privately operated Negro colleges have made a large contribution to American welfare. It is only fitting that all of America's people help these institutions to make these contributions.

If you have not already made your contribution to the Negro College Fund —make it today. It is an investment in democracy.

Booker T. Washington and Industrial Education

Note: This letter was sent to us several weeks ago. Since then it has appeared in many of the leading papers of the country. Becaues of the urgent need of industrial training for millions of Negroes below high school or college level, we are printing it for the serious consideration of our readers.—The Editor.

Dear Editor:

Last week, I witnessed the unveiling of the bust of Booker T. Washington in the Library of New York University, and I saw it placed in the Hall of Fame among America's immortals. The selection of the name of Booker T. Washington was made by 100 outstanding nationwide electors who reviewed carefully, 30 years after his death, his contributions to the Nation in general, and to the Southland in particular. Profound thinkers of both races, speaking at the unveiling, expressed themselves as feeling that the philosophy of Booker T. Washington would go down through the ages as a benefit to mankind.

Dr. Jackson Travis of the General Education Bord, in paying tribute to Booker T. Washington, emphasized the fact that Booker T. Washington spent his life in the up-building of the South, was an apostle of goodwill, and stressed the soundness of his philosophy in adapting education to the needs of the people.

A few days before the election of Booker T. Washington to the Hall of Fame, the plantation on which he was born was acquired by a group of people who believe strongly in his philosophy. This group of individuals has organized the Booker T. Washington Birthplace Memorial, with headquarters at Rocky Mount, Virginia, to establish a program of service based on today's needs and in keeping with the ideals and teachings of Booker T. Washington. Never in history has there been such a need for the things which Booker T. Washington advocated as now, especially for good-will, for the economic building of the South, and for adapting education to the needs of the people.

In trying to take care of the many problems that arose in connection with War's emergencies, the country found that one of the greatest handicaps was the lack of industrial training. Surveys made by various groups and organizations indicate that there are not enough existing educational facilities to take care of industrial and trade training necessities. It was Booker T. Washington's idea to help the "man farthest down." There are thousands of Negro veterans and civilians who can not meet the requirements of regularly established high schools and colleges, but who could benefit by a training adapted to their needs and capabilities. Because of this great need, we are desirous of establishing a NATIONAL INDUSTRIAL TRAINING SCHOOL at the birthplace of Booker T. Washington in Franklin County, Virginia, to take care of the requirements of people of this type. It is thought fitting to establish this school at the birthplace of Booker T. Washington because he, possibly more than any other person in the Nation, advocated the cause of industrial training for the masses. There could be no greater tribute of appreciation to him from the American people than to cooperate in the establishment of such a school.

The individuals who are behind this program of service will be greatly encouraged to receive comments and help from the American public. Please address all communications to the Booker T. Washington Birthplace Memorial, Inc., Rocky Mount, Virginia.

Yours truly,
S. J. Phillips, President.

Will Unionizing The South Have Any Effect Upon Race Relationship?

Pulling Together Forum

Millions of dollars are being spent by organized labor to unionize the South. Ten million Negroes constitute a large portion of the South's labor supply. What effect, if any, will this movement have upon race relationship?

Public Opinion

Lucy Randolph Mason, Southern Public Relations Representative, CIO:

It was in the very deep South, a few weeks ago, that a man said to me, "I don't see how the CIO can organize in this state. Some of our industries employ mostly Negroes and in others both races work. The Negroes won't organize, and the white people won't join unions with them It just won't work."

He was wrong. It does work. Thousands of white and Negro workers are organized in the same unions in his state, and in every state on its borders. Southern wage earners of both races have found that they will not gain better working conditions and wages unless all the workers in a plant get together in one union for their mutual betterment. They know that the same economic problems face them both—problems that cannot be solved unless they tackle them together. The white workers know that to leave Negroes outside of unions gives employers a cheap labor supply constantly dragging wages down. The Negroes know that their best hope for wages lies in organization.

•

Bishop G. Bromley Oxnam, The Methodist Church, Bishop of New York Area:

"The organization of the worker in labor unions has not only lifted his standard in terms of education, health, and housing, but has brought a happier family life to thousands of American families, and, more, it has made a significant contribution to the preservation of American democracy."

•

Dr. Will W. Alexander, Vice-President, Julius Rosenwald Fund:

In the long run, it may turn out that the new attitude of labor toward Negro workers, as expressed by the CIO, will have more significance than the changes that have taken place in government employment patterns. Officially, the CIO has abolished the color line as to opportunity and privileges for Negroes in its unions. An educational division has been created in part for the purpose of bringing the rank and file of the CIO to accept the idea of the essential unity of all American workers without regard to race. Negro workers are finding in the CIO a champion where they most need it, among the masses of workers to which most Negroes belong. The CIO is, at the moment, the most promising force for correcting the inconsistencies in our racial patterns. Furthermore, its policy is already having an effect upon older, more conservative unions and is giving support to many liberal-minded employ-

ers who are willing to give Negro workers a chance.

•

Right Rev. Monsignor T. James McNamara, Cathedral of Saint John the Baptist, Savannah, Georgia (when welcoming Mr. Philip Murray at a meeting held in his honor, Atlanta, 1942):

"It is with supreme satisfaction that I find myself among those invited to address a word of welcome to Mr. Philip Murray, President of the Congress of Industrial Organizations, on the occasion of his visit to my native state, Georgia. I am particularly happy because **I see reflected in Mr. Murray's philosophy of labor relations a Christian mind and a Christian heart.** In him I find that sterling, informed type of Americanism which is determined that the fullness of meaning in our country's Declaration of Principle, as enunciated in its Declaration of Independence, shall be realized and attained."

•

William Y. Bell, Southern Regional Director, National Urban League:

As early as 1902 the American Federation of Labor made splendid pronouncements on racial equality in employment, but little was done to implement these pronouncements. The craft structure of the organization has militated against the protection of all workers, although in some specific instances locals have adopted democratic policies. During the war a number of these locals gravitated towards the industrial form of organization, but there is not a likelihood of a return to the craft concept.

•

Phillip Murray, President, Congress of Industrial Organizations:

The CIO stands foursquare against racial and religious intolerance. The "crusade," designed to win economic emancipation for colored people in the South, will be along strict trade union lines.

It is expected to draw the support "of all right thinking people in the U. S. A."

Harry Reid, CIO Official, Washington, D. C.:

"The South not only is incapable of making a normal contribution to the national life under present conditions, but is not self-supporting at decent level."

The situation is not one which affects Negroes or whites alone, but that both groups are in the same plight, suffering from economic and political discrimination evidenced by low wages, poor working conditions and frequent periods of unemployment.

•

Not Matter Of Race

"We are not organizing 'white workers' or 'Negro workers,' we are organizing all workers in an effort to increase the purchasing power of all of the people and thereby raise the standard of living for the entire South."

"The difference in Northern and Southern production, is due not to the capabilities of the workers, but to the exhaustion of both plants and workers, resulting from the failure of northern owners of southern plants to 'plow back' some of the profits in the form of improved plants and equipment and higher wages.

•

Public "Bilked"

"The corporations in the North which maintain plants in the South insist upon and get wage differentials between workers in the northern and southern plants. Yet these same concerns go out and market their products and charge the same price for goods made in the South as for those made in the North. As a result the people of America are being bilked out of millions of dollars by the continuation of these wage differentials."

"Our aim is the placing of the highest possible purchasing power in the hands of the people. Once that is accomplished the political and other aspects of the situation will be taken care of by the people themselves."

Ella JOINS C. O. R. E.

Dear Ma and Pa:

We have reached the end of the school year and I am not sorry. I have enjoyed my term's work immensely but I am just about broke so I welcome the opportunity to get out and earn some money. Of course, as I think about some of the experiences I had last year, trying to get the type of work for which I am qualified, I do not feel so enthusiastic about going through all of this again. However, since I must have funds to help me get through my last year at the University I am going out after a job and I am not coming back until I have found one.

Something happened the other day that might help me to be a little more successful in my job efforts this summer than I was last—I joined an organization called C. O. R. E. These letters stand for the words, "Congress of Racial Equality." Don't get excited, Ma. I'll explain. I know that you are afraid that I am seeking the type of social equality about which white people down our way seem to worry so much—but I am really too busy trying to build my life to even give this social business a thought. This organization which I have joined is not even mildly concerned about the "social affairs" of people. It is made up of intelligent people who recognize the right of every man to select his own friends, to say who shall enter his home, marry his daughter, or be admitted into his private life in any manner whatsoever. C. O. R. E. is only concerned about trying to secure for every American, regardless of color or creed, the rights and privileges of an American—to earn an honest living without being handicapped; to secure for his American dollars the same comforts and conveniences that others purchase with theirs, to live their lives free from fear, embarrassment and humiliation.

This organization is made up of broadminded whites and Negroes who are pulling together to try to build a better world for all of us. The members are courteous, law-abiding and Christian. They seek, in a friendly gracious manner, to show those Americans who would deprive other Americans of their rights, that they are being unjust, unkind and un-American. It is a splendid program based on Christian brotherhood and sound American principles. It recognizes those truths for which the greatest men of all times have lived and died. I am proud that I have been permitted to become a part of it. You may learn more about C. O. R. E. some day because branches are being organized in various sections of our country. I know at some time our section will be reached. I guess it will be a little harder to operate down there but I am sure a way will be found. So many fine white Southern men and women seem to be coming forward to help secure equality of opportunity for the Negro, that possibly C. O. R. E. will have an easier time operating there than I anticipate —here's hoping!

Well, school closed without anything eventful happening. There was the usual round of gaieties but not being a senior they did not affect me very much. The Junior-Senior Prom was an event of importance to which

I did not go. Several of my classmates insisted that I attend but I did not for several reasons—the most important being that I did not have the money to spare for an evening dress. This did not bother me. I came up here to get the benefits that the university has to offer, in order that I might take advantage, to a larger extent, of the opportunities that America presents to its youth who are prepared—and perhaps to be in a position to help pave the way for the opening of more advantages to our people. If I can achieve these goals, I shall feel that all of your sacrifices and all of the things I had to do without, were but a small price to pay.

I do wish that I were coming home this summer! I think if some Fairy Godmother would appear before me and ask for my greatest wish in life right now, I would say, "to be at home with Ma and Pa and the children." Since this is just a happy dream I'll make the best of the situation. When I grow too homesick on that job which I must find, I'll try to remember that this is my last summer. If everything goes well, and I shall be able to finish my work next year, I shall be too happy for words—and I know that all of you will share my joy with me, just as you have shared the sacrifices which it takes to secure these opportunities for me. I think all of our battles would be won if the real heart of America could realize the many sacrifices that a handicapped group, such as ours, has to undergo to get what should be the normal heritage of every American—the right to live and get an education.

With loads of love to all of you, I am, as always,

Your devoted daughter,
Ella.

Her Gift . . . A Lollipop

She was tiny and tousled and wandering blissfully somewhere in the golden age of four. The sunlight caught the sheen of her hair as she popped an inquisitive head around the holy water fount and I thought at once of spun gold and knighthood and wonderful ladies in shining brocade. Apparently she was looking for someone, for her small blue eyes searched every nook and cranny of the little chapel. At length she marched over to a cassocked figure kneeling at the altar rail. A hand, guided neither by shyness nor boldness, but the simple curiosity of babyhood, reached up and nudged the "mysterious one." He turned to her and immediately his handsome face shook hands with her heart. After a moment, I caught her half-audible whisper:

"Are there lollipops in Heaven?"

His forehead wrinkled in pretended thoughtfulness before he replied.

"Why, come to think of it, I don't believe there are . . ."

Storm clouds gathered in the small blue eyes.

". . . but I'm sure God likes them."

The storm clouds lifted and sunlight shone through.

Her answer was bright and sure and, somehow, full of words. The tightly clasped fist shot open and there lay the gift of gifts.

"For Him," she said gravely and placed it reverently in his big, broad hand.

He nodded soberly and, as she toddled back into the sunlight, he lay gently, devotedly on the altar rail . . . a lollipop.—Doris Cooney.

We Must Measure Up

Quite often kicks and complaints are made about conditions of living, of working, of treatment accorded the Negro by other groups. Before such complaints are made it would be a pretty good idea to check up on yourself. YOU MUST MEASURE UP BEFORE YOU HAVE A CASE WORTHY OF TAKING UP WITH ANYBODY. Heaven only helps those who help themselves—you can't expect men to be more lenient.

If you are a workman on the job, you have no right to expect the same wages that the other fellow gets—UNLESS YOU CAN PRODUCE IN THE SAME AMOUNT AND QUALITY THAT THE OTHER FELLOW PRODUCES. You have no right to complain about having to do work of the lowest heaviest type, if you do not qualify for something better.

If you run a business you cannot expect patronage from the public —UNLESS YOU CAN OFFER THE SAME TYPE OF EFFICIENT, COURTEOUS SERVICE THAT OTHER MEN IN YOUR FIELD OFFER.

If you apply for a job and don't get it, don't always blame it on your color or group. Maybe you didn't have the pep and personality that another applicant had. Many things that are charged to prejudice should be charged to personal inefficiency.

If workmen of other groups do not wish to work side by side with you, make a personal check before you call it un-American. Go over such points as cleanliness, politeness, respect for the rights of others, efficiency, training, etc. YOU MUST MEASURE UP TO THE STANDARD OF WORKERS IN THE GROUP WITH WHICH YOU SEEK TO WORK.

This business of measuring up holds good in personal attitudes as well as job contact. You have no right to complain when folks do not care to rub shoulders with you, when doing so brings about unpleasantness. If you are loud and vulgar; if you are dirty and smelly; if your behavior is coarse and common—if you have any or all of these undesirable traits, self respecting people do not want to have you around them. YOU MUST MEASURE UP TO STANDARDS OF DECENCY AND CLEANLINESS BEFORE YOU CAN EXPECT TO GET THE SAME KIND OF TREATMENT AND CONSIDERATION AS PEOPLE WHO DO MEASURE UP.

The whole story of group reaction is tied up in this matter of measuring up. Of course, it is a fact that many of us do measure up, but still fail to get the consideration that is justly due us. In this case the fellow who does not measure up is the millstone that's tied around our neck. We are weighed with our group. When the group is found wanting we must pay the penalty. That is not as it should be, but it is, AS IT IS. Since such conditions actually exist, each member owes it to himself and to every other member of his group, as well as to Society in general, to measure up.

The NEW JERSEY URBAN COLORED COMMISSION Section

Civil Rights In New Jersey

Neither before the Civil War nor after the adoption of the Thirteenth Amendment, did the status of slaves for free Negroes make any noticeable change. We are familiar with the pre-Civil War era and the Thirteenth Amendment which merely "prohibited slavery or involuntary servitude, except as a punishment for crime."

The "Black Codes" which were put into effect after the Civil War, were strongly worded and very strict. The whites felt justified for putting these Codes into effect because of the "carpet-bagger" and skalawag nuisances. The northern whites, who as a whole, were not familiar with the situation in the South, felt that the Negro would be given all the rights and privileges accorded the southern white man.

The radical element in Congress which was able to get control immediately after the war, was instrumental in passing the Civil Rights Act of 1866. Besides giving the Negro citizenship, the Act granted the Negro the "right to make and enforce contracts, the right to hold and convey personal or real property, to sue and be parties in the courts of the nation and to be given equal benefit of the laws, to give evidence in the same courts and to be subject to the same punishments and penalties as white persons, any law to the contrary, notwithstanding." The validity of the Civil Rights Act of 1866 might have been questioned if the Fourteenth Amendment had not been adopted in 1868.

Though the Civil Rights legislation was re-enacted in 1870, the laws seemed to be ineffective. Consequently, the legislation of 1875 provided that "all persons within the United States, regardless of race, color, or previous condition of servitude, and subject only to restrictions, established by law and applying to all citizens alike should be entitled to the full and equal accommodations and facilities of inns, public conveyances on land and water, theatres, and other places of public amusement." However, lower Federal Courts were divided in their decisions as to the validity of the 1875 Act. In 1883, the Supreme Court declared that the Fourteenth Amendment did not authorize direct legislation concerning Civil Rights Cases, thus declaring the Civil Rights Act of 1875 unconstitutional. After this ruling, there was no further attempt to enact a Federal Civil Rights Act, leaving further Civil Rights protection for Negroes to the good-will of state legislatures. In 1884, the State of New Jersey passed two acts in an attempt to combat segregation and discrimi-

nation. The second of these is known as the Civil Rights Act.

There are eighteen states in the North and West which have adopted Civil Rights similar to the Acts of 1875. All but one of the states refer directly to inns, hotels, roadhouses or taverns; all except two refer to restaurants and cafes; all but three refer to theatres; 5 mention music halls; 6 refer to bathhouses and bathing accommodations; 7 refer to skating rinks; 4 refer to bowling alleys; 4 refer to recreation parks; 3 refer to billiard and pool parlors; 2 refer to racecourses. Fairs, gymnasiums, shooting galleries, cemeteries, barber shops, beauty parlors, bootblacking stand, libraries, hospitals and clinics are mentioned, occasionally, in civil rights legislation.

Statutes 10:1-2 (Revised) to 10:1-6 give the present text of the New Jersey Civil Rights Statutes.

Revised Statutes 10:1-2. Equal rights and privileges of all persons in public places. All persons within the jurisdiction of this state shall be entitled to the full and equal accommodations, advantages, facilities and privileges of any places of public accommodation, resort or amusement, subject only to the conditions and limitations established by law and applicable alike to all persons.

10:1-3 EXCLUSION BECAUSE OF RACE, CREED OR COLOR UNLAWFUL.

No owner, lessee, proprietor, manager, superintendent, agent or employee of any such place shall directly or indirectly refuse, withhold from, or deny to, any persons any of the accommodations, advantages, facilities or privileges thereof, or directly or indirectly publish, circulate, issue, display, post or mail any written or printed communication, notice or advertisements to effect any of the accommodations, advantages, facilities and privileges of any on account of race, creed or color, or that the patronage or custom thereat of any person belonging to or purporting to be of any particular race, creed or color is unwelcome, objectionable or not acceptable, desired or solicited.

10:1-4. WRITTEN ANNOUNCEMENT OF DISCRIMINATION: PRESUMPTION.

The production of any such written or printed communication, notice or advertisement, purporting to relate to any such place and to be made by any owner, lessee, proprietor, superintendent or manager thereof, shall be presumptive evidence in any civil or criminal action that the same was authorized by such person.

10:1-5. PLACE OF PUBLIC ACCOMMODATION, RESORT OR AMUSEMENT DEFINED.

A place of public accommodation, resort or amusement within the meaning of this chapter shall be deemed to include any inn, tavern, roadhouse or hotel, whether for entertainment of transient guests or accommodation of those seeking health, recreation or rest; any restaurant, eating house, or place where food is sold for consumption on the premises; any place maintained for sale of ice cream, ice and fruit preparations or their derivatives, soda water or confections, or where any beverages of any kind are retailed for consumption on the premises; any garage, any public conveyance operated on land or water, and stations and terminals thereof; any public bathhouse, public boardwalk, public seashore accommodation; any theater, or other place of public amusement, motion picture house, airdrome, music hall, roof garden, skating rink, amusement and recreation park, fair, bowling alley, gymnasium, shooting gallery, billiard and pool parlor; any dispensary, clinic, hospital, public library, kindergarten, primary and secondary school, high school, academy, college and university, or any educational institution under the supervision of the regents of the state of New Jersey. Nothing contained in sections 10:1-2 to 10:1-7 of this title shall be construed to include, or to apply to, any institution, club, or place of accommodation which is in its nature distinctly private, or to prohibit the mailing of a private communication in writing sent in response to a specific written inquiry.

The complete history of New Jer-

sey's fight for justice for the Negro is recorded in the Fourth Annual Report of the Commission, chapter subtitled "The Most Paradoxical Chapter In The History Of The New Jersey Legislature."

New Jersey is nationally regarded as one of the foremost States in enacting liberal legislation to provide equal opportunity for the economic and cultural development of its minority citizens. Part II of the Fourth Annual Report is devoted in its entirety to the Civil Rights Laws of New Jersey. The Commission concludes that no phase of discrimination has a more dangerous influence than the denial of accommodation and the refusal of service because of race or color. The Report states that an analysis of the Commission observations indicate that the principal reasons why the Civil Rights Law has not effectively accomplished its purpose can be summarized in the following conclusions:

(1) The New Jersey Civil Rights Law, is not sufficiently understood by the groups who commit the violations and inflict the injuries. In many instances, the very existence of the law has been found to have been unknown.

(2) Operators of public places, as defined in Section 1-5 of Chapter 10, Revised Statutes of New Jersey should be made acquainted with the existence, intent and provisions of the Law.

(3) Law enforcement officers in every community of each county should be made aware of the existence, intent and provisions of the Law. An especial necessity not to ignore reported violations of the provisions of this Law should also be urged upon them.

(4) There should be some suggested force behind an Administration inspired movement to make the Law applicable and more effective.

The Commission has planned an accelerated educational campaign to be waged for the purpose of correcting the evils of the ineffectual and limited enforcement of the Laws. Segregation and discrimination, which as the means of avoiding personal contact, are the danger points of group relations. It is obvious that these are emotional outlets. The Commission recognizes the subjective basis for these anti-social outlets. In its Major Program, the Commission reports that ideal interracial cooperation does not involve much more than a recognition of a moral obligation of white citizens to treat minority groups as fellow citizens, entitled to an equal enjoyment of the rights and privileges of democracy and an equal share in the responsibilities and obligations of democracy. The Commission concludes that widespread discrimination in publc places against minorities could be gradually eliminated through an extensive fight against the myth of racial superiority and the fear of social censure.

The Commission outline provides for a statewide survey to obtain a true picture of the conditions in each of the larger communities of the State. An adequate supply of copies of the Civil Rights Law will be made available for wide distribution throughout the State. Cooperation of the newspapers of the State will be sought to aid this campaign by publishing articles prepared by the Commission's public relations staff.

The campaign will include a movement to obtain the voluntary posting of a small placard in all public places. The placard would be similar in size and design to the "No Smoking Allowed" signs observed in all public service buses; similar, also in design to the "No Liquor Served To Minors" signs which may be seen on the walls of most taverns and cafes serving drinks.

If the anticipated results cannot be obtained through the voluntary cooperation of the operators of the publicly licensed places, legislation will be proposed for enactment into law to make the posting of such a placard mandatory in all public places.

Communications will be addressed to the Prosecutors of each county requesting that they take cognizance of the prevailing situations and make some commitment urging the citizens of their communities to end discrim-

ination in public places against the colored population.

We have yet to gain a real foothold on the stairway to political democracy; and though many have become vaguely aware that social democracy is also a desired end, its progress is even less advanced than that of political democracy.

Race Relations Trends In New Jersey

(Editor's Note: In its Fourth Annual Report, the Urban Colored Population Commission for the State of New Jersey sums up, under four major heads, its achievements for the year. The 78 page, well bound and beautifully illustrated volume is a record of achievement which reflects great credit upon the men and women who make up this Commission. The following excerpt taken from this report gives a brief picture of what New Jersey is doing to establish democracy within its borders):

In New Jersey, the pattern for a successful formula is probably less confused; and more durable progress towards an ideal adjustment has been realized than is generally appreciated or widely recognized.

The hopeful state of affairs and philosophical outlook along the racial fronts in New Jersey is promoted by and results from an analysis and evaluation of the fruitful achievements of an enlightened and forward-looking program, initiated by the progressive administrations of a liberal state government.

A new conception of race, color and creed is emerging in New Jersey, and is being impressively indoctrinated and accepted by a large and increasing segment of the people in every community.

The imagination of the thoughtful and intellectually alert citizens of this State has been stimulated and diverged from an apathetic state to active and progressive consciousness —manifesting its newly-found articulation in humanitarian interests and vigorous endeavors; touching the whole range of civic reforms and social justice—and engaging in uncompromising struggles to achieve equality of democratic opportunities for the political, economical and cultural aspirations of all citizens without discrimination.

"Brotherhood of man and fatherhood of God" are no longer mere expressions of a religious ideology, but are being individually recognized as vital, economic necessities for the survival of democratic idealism; a test and symbol of the individual's intellectual preparedness and a measure of the individual's own basic value in the world of today and tomorrow.

It is important to emphasize, here, that it should not be inferred from the above that members of this Commission contend that New Jersey has eliminated all prejudices and practices of discrimination against its largest minority group. Rather, it should be frankly admitted that while New Jersey is probably foremost among the states in America to reaffirm the state's opposition to all forms of discrimination and bias directed against its minority citizenry and has enacted a long series of strong laws epitomizing the positive, democratic policy of the State government—the widest diversity of actual practices in the application of the laws can be found within the State's borders.

These incongruities in New Jersey's democratic attitude toward its colored citizens extend from complete integration on basis of equality in all political, economical, social and cultural activities in some communities to flagrant and humiliating instances of rigid segregation, in open and ignored violations of the laws of the State in other communities.

Camera Shots

Mrs. Emma Clarissa Clement of Louisville, Kentucky was selected by the American Mothers Committee of the Golden Rule Foundation as the American Mother of 1946. Mrs. Clement is 71 years old, the widow of a Bishop of the A. M. E. Z. Church, and the mother of 7 children all of whom are outstanding in American life today. She is the first Negro mother ever to be so honored. The following remarks made by a Kentucky white woman who voted for Mrs. Clement shows a spirit that is growing in America today:

"I never dreamed I would ever in my life vote for a Negro, but when I saw Mrs. Clement's record I knew I couldn't be fair and serve on the committee without recognizing it."

•

Mr. Hodding Carter, a white Mississippian, was awarded the Pulitzer Prize for the best editorial of the year on racial, religious, and economic tolerance. He is editor and publisher of the Delta Democrat-Times of Greenville. He has a reputation, according to The Montgomery Advertiser for fighting consistently for friendship among all races.

The Neglected Efficiency

By WILLIAM H. DINKINS

If any one word could express the genius of the Twentieth Century, perhaps that word might be "efficiency." In general use, efficiency is a high ratio of output to input, of value to cost. With a given amount of coal put into an engine, that engine is the most efficient which turns out the largest number of heat units or work units. We may also say that for a given output of work, that engine is the most efficient which requires the smallest supply of fuel. Or we may say that the most efficient engine is the one which has the smallest loss of power in its operation.

In the field of science and industry, the search is constantly for the machine or the method which will turn out work and get the best results with the least labor and material. Herein lies the reason for the constant research looking toward inventions. It is seldom if ever that an invention does an entirely new thing. What happens is that by a new invention an old thing is done in a quicker, or a better, or a more convenient way. An electric light is still a light. A candle light is a light. But the electric light has possibilities and conveniences which the candle light does not have, and the tendency is to use the electric light except in those cases where, for some special reason, a person wants to use a candle.

There are times when people, to use and perhaps to show their great supply of money, employ an inefficient means of accomplishing results. The extra cost is a show of extra resources. They delight in letting the world know that they have enough so that they do not have to be careful about the small efficiencies. And a man may be very particular about efficiency in his business, while he is very lavish and extravagant of energy at home.

These thoughts on efficiency lead from the field of material things into the field of human relationships and values. We have results which we wish to achieve in the minds of other people. Nations have results which they wish to achieve in the thoughts of other nations. We all want somebody or some group or some nation to do something that will be for our own benefit. The question is of how to get the thought and the action that are desired, how to get the other person or the other nation to think and do the things we want.

In this field of human activity, the field of human relationship, the tendency seems to be away from efficiency. Instead of trying to go as directly as possible, with as little waste motion and energy as possible, we tend to use the most difficult methods, the most expensive, the most inefficient. We tend to fight it out in some way or another. It may not be a fist fight, but there is a fight on some line. If the issues are large enough, and if the parties are nations, the method might be the inefficient method of war, which has an expensive and indeed terrible fuel, and almost it seems at times insignificant results in improving the relationships that exist between and among nations.

All the while, whether we are working as individuals, or as small groups, or as nations, the most efficient method is going unused. The most inexpensive and yet the most productive engine-fuel in the field of human relationship is love. Love will accomplish things that hate never will bring out. The warmth of love is a thing that must melt the most stubborn heart. Even punishment, when it is shot through with love, will get results which vindictiveness will never procure.

On a small scale we can see how love gets things done. Within the family, things are done for love which would never be done for money. The

weakest member of the family awakens the most love, and the one who is in the most danger, whether he is able to contribute or not, is the one who receives the most attention. And on the principle that where we put our treasure there also we put our heart, the very attention given to the weak member causes greater and greater love to go out toward him.

There seems to be no reason why the same kind of method will not work with groups and nations. If there is a need felt by humanity anywhere, some steps to help meet that need can be made by humanity elsewhere. This bit of reaching out in love will beget more love, and there will grow up the finest sort of feeling and relationship between one group and another, between one nation and another.

But pride is an enemy of love. Those who are down sometimes have a sense of false pride, which makes them not wish to accept things which are offered, but rather makes them want to do everything for themselves so that they will not be beholden to anybody. This too great independence of spirit will tend to drive away love that is offered. Yet the party who does the loving must still love, must still breathe the spirit of affection and care. Circumstances will change. Hearts will be moved. The argument of love will still win its point. One day the bud which was held in winter's grasp will succumb to the rays of the springtime sun, and will open in splendor and fragrance.

Whether one belongs to a weak or a strong group makes no difference in the duty and the opportunities of love. No one is excused from it. Not to love is to be cursed with a curse. We must remember that sometimes it is a good thing to let somebody do something for us. It will not do to be too independent, while nobody likes to see a person who is altogether dependent. It is a good thing sometimes to let somebody do something for us. And we can do something for somebody. The little unexpected givings are what make family life go well. The little unexpected givings will also make group and national life go well.

A lot of people would still be living, and a lot of homes would still be standing, if there were more love in the world. And this love could be given without compromise, without "taking a back seat." Love will rise beyond circumstance, and will meet the issue regardless of what may be. It will work for others when there is no need to be earning for one's own use. It will still collect the price, perhaps, but love will work, even when it does not need the price of the work. If the other party can pay, love will work; if he cannot pay, love will still work. The one thing that love sees is human need, distress, and opportunity, and it goes to work to fill the bill.

A diplomacy based upon love is one of the supreme needs of the world. For efficiency it cannot be improved upon.

Do You Read The "Ads"?

Here are some thoughts taken from advertisements that are well worth reading:

"To pray, to believe, to work, to struggle and surmount are more than mere verbs, somewhat tarnished in the petty vocabulary of the smart aleck sophisticate. They are IDEAS that even atomic energy cannot erase. They are the truths of old that we learn to venerate as much for their goodness as for their antiquity. We have watched them march through history to ruin tyrants."

"Hard work, Industry, Study, Effort and more Effort, Sweat and then more Sweat—these are the elements of success—not bright ideas, nor tricks, nor ideologies, nor angles."—Printer's Ink.

Signs of the Times

The country is better off economically than it has been for some time. As an evidence of this, church collections are higher than they were in the peak year of 1928. Many churches are out of debt and are setting up building and repair funds. Pennies and tokens are disappearing from the collection plates of the country.

•

The problem of dirty milk bottles is on its way to solution—a disposable aluminum milk bottle is in the making.

•

Reserve your criticisms of the fellow who spends so much of his time cruising along the boulevard in his car. He may not be neglecting his business. He may simply be using a dashboard radio communication between his car and home or office. The cost is cheap (to a guy who has money). Preliminary figures: $25 installation and $15 per month rental and service.

•

And now you may handle your "atomic troubles" in your own back yard. Atomic energy as a possibility for fuel is being studied by the Standard Oil Company of New Jersey, according to its President, Eugene Holman.

•

Beginning in 1947 a census of manufacturers and distribution will be taken every five years instead of every two years as was the case before the war. The Census Bureau says this will ease staff problems.

•

Government Agencies have asked Congress for $75,000,000 for "educational, informational, promotional and publicity activities." The State Department Cultural Relations program wants 30 million, the Treasury wants 11 million, Agriculture wants 9 million, and the War Department, 5 million. O. P. A. and the Commerce Department are willing to settle for a couple of million each. It seems as if there is quite a bit of publicity in the making, doesn't it?

•

Weather resistant hats for men are on the way (and they don't mean regular rain hats either), says Printer's Ink, and similar ones for women are being tested out.

•

By an almost unanimous vote of its 1,000 delegates, the 10th annual convention of the National Negro congress petitioned Trygve Lie, United Nations director-general, to submit the denial of constitutional rights to 13,000,000 U. S. Negroes to the international tribunal.

The historic move will create the first test of that phase of the UN charter which invites minorities to place problems of racial discrimination before the body. And for the first time in the long history of the cancerous race issue in the U. S., the current action brings the condition out of the domestic area and into the international limelight.

In conjunction with the appeal to UN, Revels Clayton, executive secretary of the National Negro Congress, sent a telegram to President Truman notifying him of the demand for "full freedom and absolute equality."

•

The American Jewish Congress has joined the fight to outlaw racial covenants.

The Negro Veteran... And G. I. Training Opportunities

A Survey Made by The Booker T. Washington Birthplace Memorial

Facts brought to light by the vast machinery which was necessary to the successful operation of the Nation in a state of war, indicated several weak places that need strengthening in our national life. Among these is the need for better trained, more physically fit man power. In an attempt to supply part of this need, as well as to show its appreciation to the millions of men who so valiantly served their country during World War II, the National Government has initiated, or made possible, a large program for veteran's training. It is too early in the picture to come to any definite conclusions as to the effective working of this program, but there are facts that indicate that thousands of veterans are not able to benefit by the government's intended help.

In an attempt to find out the extent to which the Negro veteran is being benefited by the G. I. Training Program, a Research Committee from the Educational Department of the Booker T. Washington Birthplace Memorial recently made a survey in 22 Negro colleges. The institutions studied, while limited in number, represented a cross-section of the educational opportunities now available to the Negro veteran. A compilation of facts submitted in this survey showed that:

(1) A total of 4,235 Negro veterans have enrolled in these institutions;

(2) A total of 3,451 Negro veterans have been denied enrollment in these institutions because of a lack of facilities;

(3) A total of 682 Negro veterans have been denied enrollment in these institutions because of a lack of sufficient academic training.

The heads of these 22 Negro colleges all stated that in their opinions there is not adequate, practical, vocational facilities available to take care of the needs of Negro veterans. It was the concensus of opinion too, that the masses of Negro veterans are interested in acquiring trades and industrial training. Since there were 900,000 Negro soldiers and 8,000 Negro officers who participated in World War II, this segment is rather small to draw conclusions from. It is large enough, however, to indicate needs and trends.

This information secured, the Committee next turned its attention to making a study of two other factors that need consideration if the Government's program is to bring about the desired ends in so far as this particular group of veterans is concerned. The first factor had to do with whether or not Negro veterans who are enrolled in educational institutions are getting a practical type of training geared to their needs and in keeping with their age levels. The second factor had to do with those veterans who are trying to take advantage of the government's program of help but who have been denied enrollment in educational institutions because of lack of facilities, or because they are not academically able to meet the requirements of regularly established high schools and colleges.

In making this second study, 1100 educational institutions were contacted. This number included high schools, County Training Schools, Vocational Schools and a few colleges. The response to questionnaires sent to colleges in the first survey was

practically 100%. The response received from the 1100 schools contacted in the second survey was a little less than 30%. In checking on why the response was so low in the second case, it was indicated that many of the institutions contacted had no program of G. I. Training whatever and did not deem it necessary to return the questionnaire.

Information received from 304 high schools, vocational schools and county training schools that responded to the second survey, disclosed the following facts:

(1) That a total of 1,264 Negro veterans have enrolled in these institutions;

(2) That 1,452 Negro veterans have been denied enrollment in these institutions either because of a lack of facilities, or because they could not meet the academic requirements of the schools they sought to enter.

(3) 297 of the 304 schools studied, stated definitely that there is not adequate, practical, industrial facilities to take care of the needs and desires of the returning veterans.

Opinions expressed by the heads of all institutions studied indicate that thousands of Negro veterans cannot take advantage of the government training program for the following reasons:

1. The framework of our present available educational structure is geared to take care of the needs of a normal-age school poulation at given levels of training. The veteran is above the normal-age for which our educational program is planned and, in thousands of cases, his level of training is below that which regularly established high schools and collegese require.

2. The elementary—high school—college division of our regular edutional set-up works admirably with students of the ages for which they are intended, but functions to the disadvantage of the masses of veterans. This is true for the reason that, in thousands of cases, the veteran cannot measure up to high school or college curriculum requirements and the elementary school into which he might fit academically does not offer the vocational training that he needs. The humiliation that would be caused by school attendance with little children would be too great even if it did.

3. Even in the cases of veterans that can meet high school requirements there are still too many problems and handicaps for the successful training of men with equipment and methods geared to meet the needs of teen-age children. As an evidence of a lack of proper facilities for veterans' training, even where they have met academic requirements, we quote from the questionnaire returned by a public high school in the city of New Orleans in which there are 241 veterans, the highest number reported enrolled among Negro high schools:

"We do not take care of the varied needs of G. I.'s as far as trade training is concerned."

Below is quoted directly, opinions of school heads over the country. These are but a few of the hundreds that were submitted is the survey. They are typical of all opinions expressed, and have been selected from southern territory because the masses of Negro veterans come from among the 10,000,000 Negroes who live in the South.

From Bristol, Va.: "There is apparent need for Negro personnel counselling. There is also definite need for facilities to teach auto mechanics, sheet metal work, plumbing and electricity."

From Columbus, Miss.: "Adequate courses are not offered. Colleges are filled."

From Dallas, Texas: "Inadequate shop facilities are a great handicap to actually helping veterans."

From Alabama: "There should be more provisions for on-the-job training in shop and mechanical work."

From Payne, La.: "A wider scope of training should be offered in trades and agriculture."

From Hopkinsville, Ky.: "More Negro staff workers are needed to properly inform veterans and more trades and business courses should be made available to them."

From Elgin, Texas: "The veteran has too much trouble gaining admit-

tance to institutions. There should be educational advantages opened to him at whatever academic level he possesses."

From Kingstree, S. C.: "The lack of adequate facilities in the school is proving a serious handicap to the veteran taking advantage of the government program."

From Louisville, Miss.: "The veterans want training but due to a lack of adequate facilities we cannot give them what they need and deserve."

From Richmond, Va.: "Most G. I's want vocational courses but they do not want to be in classes with children."

From Griffin, Ga.: "Because of a lack of courses that are of interest to the G. I., thousands are not taking advantage of the educational opportunities offered by the Government."

From Gary, Oklahoma: "On the job opportunities for training which would appeal to the veteran are not available."

Pressing Needs Indicated by the Survey

Facts disclosed by this study of conditions as they are currently affecting the Negro veteran, in so far as taking advantage of the government's program of intended help is concerned, indicate the pressing need of the establishment, through Federal Aid, of a practical trade and industrial school with courses built around the actual life needs of the veteran and geared to offer training at his age and academic level.

Since Booker T. Washington made such a great contribution to the field of Industrial Education it is felt that such a National Industrial Training Center should be established at the birthplace of Booker T. Washington in Franklin County, Va., as a part of the Memorial which is planned to do honor to his life and to perpetuate his ideals and teachings.

Voting In The South

Several years ago—on December 21, 1944, to be exact—32 Southern editors and writers, both white and colored, met in Atlanta, Georgia, to discuss the various laws and practices which serve to limit voting in the South. Out of this meeting there has come a printed report in the form of a 28-page booklet on "Voting Restrictions in the Thirteen Southern States." The following facts pertaining to laws governing voting in the South are taken from this report:

The State Constitutions of Alabama, Florida, Kentucky, North Carolina, Oklahoma, Tennessee, Texas and Virginia acknowledge, in some form, the rights of all citizens within the State. Practically all of these states, however, as well as the remaining Southern States have initiated some form of restrictions that have in past years rendered it almost impossible for Negroes to vote. In Alabama, the following qualifications are set up: Residence must be established for two years; the ownership of $300.00 worth of property; and the would-be voter must be able to read and write and interpret any article in the Constitution of the United States and the State of Alabama. The matter of interpreting the Constitution and the cumulative poll tax have been the major weapons in barring the Negro vote.

Arkansas has a $1.00 poll tax, which is a pre-requisite for voting, but the tax is not cumulative as in the case of Alabama. Florida, Georgia, and Texas, until recently, used the white primary to bar Negroes from voting. The recent ruling of the supreme court has removed this barrier. Georgia had a poll tax law, but it has also been removed. Texas barred its Negro votes by custom rather than by law.

Negroes participate in the election of Kentucky and there is a Negro member of the Legislature from Jefferson County. The Educational test constitutes the only voting restriction in North Carolina, except for a very lenient resident requirement and a bar against felons. In most parts of North Carolina, Negroes vote with ease.

Oklahoma instituted several handicaps that sought to discourage the Negro vote, but when an enterprising and intelligent Negro citizenry overcame this handicap, Oklahoma accepted the Negro as a voter. At present the Democratic party of this state prizes the Negro vote as one of its most valuable assets. South Carolina has no secret ballot in the general election; has a $1.00 non-cumulative poll tax for the general election, and has a primary. Tennessee has no white primary but has a poll tax requirement which is met by most voters. Negroes and whites in large cities vote in proportion to their population.

"THE CHURCH GOING HABIT IS A GOOD HABIT—CULTIVATE IT"

You Can Help In This Job

Do you want a BETTER AMERICA? If so why not join hands with PULLING TOGETHER to work for it. Wishing or letting things slide won't change conditions. It is up to you and me to work together to bring BETTER CONDITIONS about.

Maybe you are too busy to get out and talk to white and colored people about putting aside ill-will and hate and working together to build a finer land for all of us. Maybe you don't have the time to go out and try to convince white people that all Negroes are not bad, or to prove to Negroes that all white people are not unjust. Maybe you are too busy earning a living to do these things—but they need to be done. And you can do your part to help get them done, if you really want to. All you have to do is to send a one dollar ($1.00) subscription to this magazine and let it carry your message for you. Won't you do this today? We need your help. Just fill in the blank below and send it to

War Veterans

Read! Think!

What many of our comrades have missed and what our sons and daughters in service today will miss if we remain unorganized.

National Council of Negro Veterans, Inc.

B. H. MULDREW, National Commander
2325 Park Ave. Kansas City 1, Mo.

O. S. BOND, National Secretary
733 Parallel Kansas City 2, Kanss

WHY WAS IT ORGANIZED?

It was organized by a group of Negro veterans of World War I who, as members of other national veterans organizations in border states, had labored for more than twenty years trying to induce these organizations to accept, as members, Negro veterans in certain southern states. After this long period of fruitless labor and disappointment, these comrades finally decided that their interest would best be served and their progress much quicker through an organization in which Negro veterans could work all over the United States, unhampered and without discrimination.

WHAT IS THE NATIONAL COUNCIL OF NEGRO VETERANS?

The National Council of Negro Veterans is an organization of persons who honorably served in the armed forces of the United States.

PURPOSE OF ORGANIZATION

The National Council of Negro Veterans was organized to publicize and perpetuate the achievements of our heroes in the wars of the United States; to build a patriotic resistance to alien movements that would undermine our loyalty and patriotism; to safeguard our youth from the influence of such movements; to provide representation, before the Veterans Administration and other government agencies charged with dispensing aid to veterans, for veterans who in certain states, are denied the privilege of membership and representation in other national veterans organizations; to promote the general welfare of our comrades, their widows and orphans; to keep alive the spirit of comradeship among ourselves; and to pass on to posterity all benefits that may accrue from our association.

WHEN ORGANIZED:

During spring of 1940, plans for perfection of the organization were completed. Early in the summer, necessary papers of incorporation were drawn up and forwarded to state authorities at Topeka, Kansas, for action. In about thirty days, notice came from the incorporation department of Kansas that the application had been approved and the National Council of Negro Veterans was this 19th day of August, 1940, incorporated under laws of the state of Kansas for fifty years.

PROGRESS

Starting with nothing in 1940 the National Council of Negro Veterans now operates in fourteen states and is rapidly spreading into many new ones with many members in the armed forces overseas.

Immediately after the organization was incorporated a nine-point program was adopted setting forth the objectives of the Council and calling on all eligibles to join up and help push the movement to a successful conclusion. From those nine points the following have been accomplished or are moving rapidly forward:

1. Full representation in all departments of our national defense; Army, Navy, Marines, Aviation, Engineers, Aircrafts, Medical Department and Mechanical Forces.
2. Full representation in industries in peace as well as war.
3. Admittance of Negroes into schools of training for Officers.
4. Restoration of the Ninth and Tenth Cavalries and the Twenty-fourth Infantry to full strength as combat units.
5. The training of Negro enlisted men in all phases of modern warfare in peace and war times.
6. That this training of officers and enlisted men be maintained in peace time in proportion to our population.
7. To seek federal legislation that will give to American citizens protection against lynching and discrimination.

LEGISLATION

S. 305, a bill providing for the incorporation of the National Council of Negro Veterans, Inc., by the congress of the United States, was introduced in the senate January 7, 1945, by Honorable Arthur Capper, senior senator from Kansas. The bill was read twice and referred to the committee on Judiciary. Plans are now being made to get a hearing before the committee and urge favorable consideration. If enacted into law this will give National Council of Negro Veterans the same status as other national veterans organizations chartered by an act of congress. Application is already on file with the Veterans Administration, Washington, D. C., requesting that service officers of the N. C. N. V. be recognized in handling of claims of veterans before the administration and other agencies dispensing aid to veterans.

HOW THE NATIONAL COUNCIL OF NEGRO VETERANS IS CONDUCTED:

The supreme governing body is the national conventions. Between national conventions executive authority is vested in the national board of directors and the national commander.

POLITICAL ACTIVITIES:

The council is strictly non-political and its constitution provides that no elected officer in the National Council of Negro Veterans shall be a candidate for or hold any remunerative elected public office while an officer in this organization. Its meetings shall not be used to diffuse political information or indorse any political candidates. While the organization is strictly non-political, there is no attempt to place any restrictions on any member's political activities as an individual citizen.

RANK OF MEMBERSHIP:

It should be borne in mind that this organization is not a military body and no member shall be referred to in council meetings by his former military rank. The standing of any member in the organization depends entirely on his ability and his interest and service to the organization.

MEMBERSHIP AND WHO IS ELIGIBLE:

There are two classes of membership: members-at-large and members of local councils. Membership-at-large is permitted in communities where no local council is established. If there is a local council, membership must be through the local and the dues paid will be those charged by the local. Dues for members-at-large are $2.00 annually, divided as follows: 75 cents for state work and $1.25 for

national work. The national dues provide funds for issuance of membership cards, the national publication, and for maintenance and expenses involved by the national officers, boards, committees, commissions, etc., in discharge of their official duties. It is further provided that members-at-large, who are members of the armed forces of the United States or their Allies, shall be charged $1.00 annually for national dues as long as they remain in this status.

Any person with an honorable discharge from the armed forces of the United States or any person now serving in the armed forces of the United States is eligible for membership in the National Council of Negro Veterans, Inc.; provided that when separated from the service he does not receive a dishonorable discharge.

U.S. Department of Labor
BUREAU OF LABOR STATISTICS
Wage Analysis Branch
Washington

READJUSTMENT OF VETERANS TO CIVILIAN LIFE 1/

This article is a summary report on the readjustment experience of a group of veterans of World War II who were studied by the Bureau of Labor Statistics in March and early April 1946. The study was designed to illustrate the problems that face returning veterans and to indicate points which might warrant further and more thorough investigation. Although the findings check fairly closely with available general statistics on the status of the entire veteran population as of March 1946, it was not intended that the data collected in the present study could be generalized to apply to all veterans.

The problem of reabsorbing veterans of World War II into civilian life had not been resolved by March 1946 but substantial progress had been made. In that month the Bureau of Labor Statistics interviewed 2,432 ex-servicemen from a sample of 65 Selective Service boards in urban areas 2/ and found that 76 percent were working and 6 percent were going to school. Compared with men in the labor force as a whole, relatively fewer veterans were employed; but their position was better than that of men who had been attached to such war industries as aircraft, ordnance and shipbuilding. Sixteen percent of the veterans who were in the labor force when surveyed were jobless, in contrast with 6 percent of all men in the civilian labor force. On the other hand, the Bureau had found, two to three months earlier, that more than a fifth were unemployed among a group of former men war workers who had continued in the labor market. 3/

1/ Prepared in the Bureau's Wage Analysis Branch.

2/ The study covered veterans who, at the time of registration with their draft boards, lived in communities of 5,000 population or more, or in smaller communities in metropolitan areas. Names were picked at random from the files of boards in 80 communities of various size in 34 States. The selected draft boards were part of a 2 percent sample chosen by the Selective Service System to be representative in terms of certain characteristics of their registrants. Boards in the Selective Service Sample which were outside of metropolitan areas and did not cover communities of 5,000 or more population were not asked to supply names for this study.

Each regional office of the Bureau obtained from the Board within its area a predetermined number of names, the number being in the same ratio to the total sample for the study as the 1940 urban population of that region was to the total national urban population.

It is planned to resurvey the same veterans at a later date to determine the extent of their progress towards readjustment.

3/ See Monthly Labor Review, May 1946, "Workers' Experiences During the First Phase of Reconversion" p. 707 ff. Seventeen percent of the male war workers were unemployed in June and early July 1946.

PAGE PARTIALLY ILLEGIBLE

With respect to changes in earnings, the greatest gains were registered by those who left civilian employment before the round of pre-stabilization wage increases had been completed. In terms of weekly earnings, for example, increases ranged from 52 percent for those beginning military service before 1942 to 20 percent and 4 percent, respectively, for those beginning military service during 1942 and after 1942. Veterans who returned to their pre-service employers showed greater increase in earnings than those who took jobs with different employers.

While large numbers of the veterans abandoned their pre-service occupations and industries to enter new fields, the shifts were largely compensatory so that proportions engaged in various activities remained essentially unchanged. Slightly more than half of those who had been employed immediately prior to entering service had returned to their former employers.

About 1 out of every 11 veterans had moved from one community to another since separation. In all probability, a larger proportion of all veterans had migrated since many who were selected for interview could not be located. As compared with the pre-service situation, inter-regional migrants, for the most part, went West from the South and North Central Regions. The Northeast held its own.

EMPLOYMENT AND UNEMPLOYMENT EXPERIENCE

Employment

Jobs and the schoolroom accounted for over four-fifths (82 percent) of the veterans interviewed during March 1946, including little more than 1 percent working part-time and somewhat less than 1 percent temporarily laid-off. Looked at more closely, two-thirds of the veterans interviewed were employed for wages, salaries or commissions in non-agricultural activities, 2 percent were working on farms, 8 percent were self-employed, and 6 percent were attending school. About one out of seven was unemployed and looking for work.

Some of the veterans were waiting to enter school; while others were suffering from illness or disability which, at least temporarily, prevented them from seeking or accepting employment. In all, veterans who were neither working looking for work nor at school accounted for 3 percent of the total survey. 4/

4/ The coverage of this study is different from that of the Monthly Labor Force Reports on veterans in that the former excludes veterans who, at the time of Selective Service registration, lived in non-metropolitan communities of less than 5,000 population. Moreover, the veterans selected for interview in this study were picked sometime before the interviews began. Thus, some of those who were not yet in the labor market when their names were selected were looking for work or had found jobs by the time of interview. These factors probably explain why only 3 percent were found who were neither in the labor market nor at school as against a larger percentage shown by the Monthly Report in the Labor Force. The distribution of the remainder corresponds closely with that reported to be in the Monthly Labor Force reports for March 1946.

PAGE PARTIALLY ILLEGIBLE

As was to be expected, relatively more younger than older veterans were attending school. The former were more likely to have had their educations interrupted by military service. Their return to school at an age when most of them would normally have been working was in part, influenced by the availability of GI Bill assistance. It seems reasonable to suppose that the narrow range of jobs open to the younger veteran on his return, as illustrated by the relatively high unemployment of those under 25, may also have impelled some of them toward school as a means to widen their employment opportunities. Specifically, school attendance accounted for almost 12 percent of those under 25 years of age and less than 3 percent of the older veterans.

Although no conclusions can be drawn on the basis of only 140 Negro interviews in the sample, the indications are that the absorption of Negro veterans into civilian life has been less successful than that of whites. 5/

The Unemployed 6/

In general, the unemployed veteran was distinguished from the employed ex-serviceman in that he was younger, unmarried, and had relatively little schooling and limited employment experience.

Of the 1,971 veterans working at or seeking wage or salaried jobs, 18 percent were unemployed. This group included 25 percent of those 25 years of age or under but only 14 percent of the older men. Twenty-six percent of the single veterans, but only 12 percent of the married were unemployed. It is interesting to note that the wives of a third of the unemployed married veterans were holding jobs or seeking work in March 1946, whereas among the employed group only a fourth had wives in the labor market. Nearly a third of the jobless had been out of service more than 90 days but had not yet obtained their first post-separation jobs.

4/ Cont'd.

	NRLF	BLS study
All veterans in labor force or school	100.0	100.0
In labor force	94.0	94.0
employed	80.0	79.0
unemployed	14.0	15.0
In school	6.0	6.0

5/ The situation of the Negro veteran is a good example of the kind of problem which seems to warrant further investigation.

6/ Of the 2,432 veterans interviewed, 1,971 were either employed in non-agricultural activities for wages, salaries or commissions or seeking such employment. Certain sections of this analysis, including the present one, are confined to a discussion of the 1,971 employees and unemployed veterans. Only a limited amount of information was obtained from those who were students, self-employed, engaged in farming, or neither working nor seeking work.

PAGE PARTIALLY ILLEGIBLE

Veterans with relatively extensive formal education were more successful than the others in finding jobs. Only 14 percent of those who had completed high school, including men who had attended college, were unemployed; whereas 21 percent of the men with 3 years or less of high school training had been unable to find acceptable jobs.

The advantage in securing employment also appears to have been held by those with the relatively longest experience at the same type of work. Thus, veterans who had not worked in a single occupation for as long as a year before entering service showed a 32 percent unemployment rate as against 16 percent for those with longer experience in gainful employment. Occupationally, men who before entering service had been self-employed were unemployed to a lesser extent (13 percent)7/ than the group as a whole.

At first glance, it seems strange that men who had been separated from service before VE-Day appeared to be having greater difficulties in finding and keeping jobs than those discharged later. Nineteen percent of the earlier separatees were unemployed as compared to 14 percent of those released from service between VE-Day and the end of 1945. The explanation may, in part, lie in the fact that disability and physical or mental unfitness for service accounted for a large proportion of the pre-demobilization discharges so that men separated prior to VE-Day may have been at a disadvantage in obtaining employment.

The highest unemployment rates were for the group of men discharged after the beginning of 1946. Many of these were probably still exploring available job opportunities and this may explain why so high a proportion of them, 31 percent, were jobless.

The incidence of unemployment was markedly greater among Negroes than among whites, and among those who had not at any time returned to pre-service employers, compared with veterans who had resumed their old jobs.

Readjustment Allowances 8/

Indicative of the rapidity with which the veterans got started in civilian life is the fact that only 36 percent (716) of the 1,971 non-agricultural workers and unemployed veterans interviewed had applied for readjustment allowances. A small group (26) found jobs before they could draw their first benefit checks, and a number of others (52) were disqualified or ruled ineligible, so that less than 32 percent of the veterans interviewed actually received readjustment allowances. Of those who did, almost half (48 percent) drew four weeks' benefits or less. A few, 8 in number, were on the rolls for at least 40 weeks.

In addition to those who filed claims, 11 percent of the veterans had been involuntarily unemployed at some time following separation but had not applied for readjustment allowances. A third of this group explained that they had expected their unemployment to be brief. A sixth said they did not

8/ This section deals with the 1,971 veterans who were working for wages or salaries or were seeking work in non-agricultural activities.

PAGE PARTIALLY ILLEGIBLE

need the money and an approximately equal number stated what probably comes to the same thing--that they " did not want to bother." About 13 percent had not applied because they did not know they were entitled to readjustment allowances. The remainder supplied a variety of reasons for not seeking benefits.

Interval Before Starting Civilian Activity[9]

Nearly a third of those who took jobs or entered schools since separation did so within 2 weeks after becoming civilians. Almost two-thirds were working or in classrooms within 30 days, and five-sixths within 60 days. Only 7 percent took more than 90 days to get started on their first post-separation activity.

Possibly because of the need to wait for the beginning of school terms, students on the average experienced a longer post-service interlude than those who went into gainful employment. By the end of 30 days, only 44 percent of the prospective students were attending classes, with 31 percent still not in school at the end of 60 days, including 16 percent who remained inactive at the end of 90 days.

Veterans interested in operating a business of their own, also did so with considerable speed, although many were aided by the fact that they had "going concerns" waiting for them. More than two-fifths of the "self-employed" men were underway within 2 weeks after separation.

There was a small group, 12 percent of all those studied, who as of March 1946 had neither worked nor attended school at any time following separation. A few had been out of the service for only 30 days or less, but almost half had been separated for more than 90 days. This last group accounted for over 30 percent of the unemployed veterans. The great majority of those surveyed had not only gotten an early start in taking up civilian duties but were still engaged in work or study at the time of the survey.

JOB AND GEOGRAPHIC SHIFTS

Return to Pre-service Employer[10]

Under the Selective Service Act, an honorably discharged veteran who left his job to enter military service is entitled to reinstatement provided he meets certain conditions and provided, further, that the circumstances of his employer have not so changed as to make reinstatement impossible or unreasonable. A substantial proportion of the veterans surveyed appeared to

---

9/ This section deals with the entire group of 2,432 veterans interviewed.

10/ This section deals with those of the group of 1,971 veterans who were working for wages or salary or seeking work in non-agricultural activities, and who held jobs immediately before entering service.

have availed themselves of this right. Half (51 percent) of those who had jobs prior to entering service returned to their pre-service employers at some time after their separation from the armed forces.[11] A somewhat smaller proportion of Negroes made this choice than was the case for the group as a whole.

A small group (8 percent) claimed to have made some efforts to return but had not done so. Frequently, the attempt consisted of nothing more than an inquiry as to current wages and working conditions followed by a decision to seek work elsewhere.[12] Failure to secure reinstatement was commonly attributable to postwar curtailments or shut-downs in the establishments where the veterans had formerly worked.

More of the older than younger men took up their pre-service jobs.[12] Among the likely explanations for this difference by age are: (1) The older men tended to have greater family responsibilities and the resultant need for security made them more cautious about relinquishing their reemployment rights. (2) They also had longer employment records prior to entering service and, therefore, had probably acquired greater familiarity with their own capabilities and the market for them. Compared with younger men, the jobs to which the older veterans could return were probably more worthwhile resuming.

Physical disabilities seem to have been no significant obstacle to resuming work with former employers, although some veterans could not perform their prewar duties. Those reporting disabilities returned to pre-service jobs in virtually the same proportion as the others.

Men who entered the services early in the war showed considerably less inclination than later entrants to return to former employers, a difference probably related to age, since induction of older men started late. Of those whose service began before 1942, 38 percent returned in contrast to 52 percent of those entering in 1942 and 1943, and 60 percent of the later entrants.

Just as the first into uniform were less apt to return to their former employers, so too with the first out. It was found, for example, that of the men separated from the armed forces before VJ-Day, a somewhat smaller proportion returned to pre-service employers than was the case among later separatees. The difference between the two groups would be even greater if men out of service less than 90 days and whose reemployment rights were still valid though not yet exercised, had been excluded. The smaller ratio of returnees among those separated before VJ-Day probably reflects, among other things, the attraction of relatively high-wage war jobs which were no longer available to those released later.

11/ Some of these men may have been reinstated despite their failure to meet all the conditions specified in the Act.

12/ Of those 25 years of age and under, 44 percent returned; the proportion rose to 50 percent in the case of those aged 26 through 31 and to 59 percent for those 32 or older.

Industrial and Occupational Shifts 13/

Changes involving a shift from their "usual" 14/ pre-service type of work were largely compensatory so that the distribution of the veterans among industries and occupations remained essentially the same as before inductions. Exceptions were mining and government with a drift away from the former and an influx into the latter. About 9 percent of the veterans held government jobs in March 1946, as compared with 6 percent before entrance into the armed services. On an overall basis, more than half of the veterans reporting pre-service employment were employed in their "usual" pre-service industries in March 1946.

The character of the shifts made is illustrated by the 657 veterans reporting manufacturing as their usual pre-service industry. Only 433 were still in factory employment in March 1946, yet the total number so engaged was 659. The 224 who had left manufacturing were scattered among all the major industrial groups 15/ except agriculture, forestry and fisheries. The 226 recruits to manufacturing, replacing those who left, came from all fields of work.

Similar shifts took place within specific manufacturing industries. For example, 36 veterans reported electrical machinery as their usual pre-service industry while 35 were so employed in March 1946. However, only 23 were of the original group; the other 13 had transferred to food, apparel, printing, rubber, leather, stone, steel, nonferrous metals, and transportation equipment plants as well as to trade, public utilities, and the service industries.

Migration 16/

The war resulted in a vast movement of internal migration in the United States, the general character of which has been modified only to a small degree by postwar shifts in population. Veterans of World War II, some of whom had also worked in war industries, participated in this geographical reshuffling. Compared with their pre-service situation, 14 percent more were living in the West in March 1946 with California the chief gainer. Almost

---

13/ This section deals with the group of 1,971 veterans who were working for wages and salaries or were seeking work in non-agricultural activities.

14/ The veterans were asked to state what they considered their "usual" pre-service occupations and industries. Those who had not had as much as a year's experience in a single occupation or industry were tabulated as having no "usual" occupation or industry.

15/ Mining; construction; trade; finance; insurance and real estate; transportation; communication and other public utilities; service and government.

16/ This section deals with the 1,971 veterans who were working for wages and salaries or were seeking work in non-agricultural activities.

half of the veterans who migrated from one region 17/ to another went to the West at the expense of the South and North Central States which lost 2 and 3 percent, respectively. The Northeast held its own.

Since a considerable amount of movement takes place within the boundaries of a single State, the inter-regional measure of migration does not give a complete picture of the changes made. In all, 9 percent of the veterans surveyed (including the inter-state migrants) moved from one community to another after separation. 18/ Among veterans living alone without dependents the proportion moving was almost three times as great. Married veterans with no children also changed communities to a somewhat greater extent than the average. Asked how many times they had moved since separation, more than five-sixths of all the migrants reported having moved only once. About one-ninth had moved twice and a few, 3 or 4 times.

Migration data for Negroes are too limited to justify generalization. The findings, however, are interesting. Of 122 Negro veterans, only 5 had lived in the West before entering service. By March 1946, 10 out of a total of 11 Negro inter-regional migrants had moved to the West. The largest contingent came from the South which contributed 7 of its 58 pre-service Negro residents.

The overwhelming majority of the veterans seem to have settled down by the time they were interviewed. Fewer than 3 percent were planning to move out of the communities in which they were then living.

EARNINGS EXPERIENCE

Earnings

Veterans who were employed for wages or salaries in March 1946 averaged $46.75 a week or $1.05 per hour 19/ for an average workweek of 44.3 hours.

Returning veterans benefitted by wage increases obtained by civilian workers during their absence as shown by the fact that in March 1946, most of the ex-servicemen surveyed were earning substantially more than on their last pre-service jobs. The greatest gains were registered by those who left

---

17/ The Northeast, North Central, South and West were the regions used in analyzing the direction of migration.

18/ Because of difficulties encountered in locating veterans who had moved, it is probable that the extent of migration is understated in this survey.

19/ These averages include on-the-job training subsidies received by 26 of the 1,536 veterans reporting March 1946 earnings. The subsidies amounted to $90 a month for 20 of the veterans and $65 for the others.

PAGE PARTIALLY ILLEGIBLE

civilian employment before the round of pre-stabilization wage increases had been completed. Average hourly earnings 20/ in March 1946 showed an increase of 55 percent for men who began military service in 1941 or earlier and a 26 percent gain for entrants during 1942. The wage stabilization program became effective in the latter months of 1942 and this is reflected in the 12 percent average increase registered by those entering service subsequently.

Weekly earnings show a similar pattern. Increases above pre-service levels were 52, 20 and 4 percent, respectively, for those beginning military service before, during and after 1942. The small gain (4 percent) of the latest entrants reflects a reduction of working hours from high wartime levels as well as relatively small increases in average hourly earnings, the latter being influenced in part by loss of overtime premium pay.

Men who left civilian employment in 1942 or before averaged $45.15 a week in March 1946 as compared with $49.35 for those whose service began later. On an hourly basis, the early entrants averaged $1.02 in March 1946 and the others, $1.11. The difference may be due to the fact that older men, with presumably better paying jobs, were inducted later than the younger men, many of whom were beginners in industry.

On the average, veterans who returned to their pre-service employers showed greater increases in earnings than those who took jobs with different employers. For example, men who entered service in 1942 and who were working for their pre-service employers in March 1946, had increased their weekly and hourly earnings by 27 and 30 percent, respectively, over pre-service levels. The corresponding figures for those working for different employers were 12 and 20 percent.

Veterans working for their pre-service employers in March 1946 also held the advantage in terms of dollars and cents for they averaged $48.65 per week and $1.09 per hour as compared to $44.30 and $1.00 for those who had changed employers.

Ignoring time of entry into service and resumption or non-resumption of previous employment, it appears that the average veteran was earning approximately $6.60 per week and 19 cents an hour more in March 1946 than in his last pre-service job. His weekly earnings had risen 16 percent; his hourly, 23 percent; and his average weekly hours of work had dropped 5 percent.

The characteristic differential in earnings as between Negroes and other workers was also evidenced in the present survey. Negro veterans earned an average of $35.10 a week in March 1946 as compared to $47.35 for white veterans. This differential of more than $12 a week reflects the limited range of jobs open to Negroes and the resultant differences in occupational distribution. For example, only a sixth of the Negroes who were craftsmen and manual workers were employed at skilled jobs in March 1946 as compared to more than a third of the others. Negroes were much more heavily concentrated in unskilled and in service jobs. Comparing the pre and post-service periods, the gap between the earnings of the Negroes and of the others remained about the same in dollar terms.

20/ Hourly earnings data are gross figures obtained by dividing weekly hours worked into gross weekly earnings, including premium overtime pay.

1946	418	130	31
Schooling:			
3 years of high school or less	1,088	230	21
4 years of high school or more	875	125	14
Pre-service work experience:			
One year or more in single occupation	1,669	261	16
Less than one year in single occupation	294	95	32
Return to pre-service employer:			
Returned	934	35	4
Did not return	901	276	31
No pre-service employer	105	34	32
Physical disability:			
Physical disability that might affect employment or earnings	480	95	20
No such disability	1,478	256	17

1/ Employed for wages, salaries or commissions, and unemployed. Excludes farmers, farm laborers, self-employed and students. Totals for some of separate characteristic breakdowns are less than 1,971 because of omission of veterans not reporting with respect to characteristic involved.

2/ Includes separated.

3/ Widowed or divorced.

Table 3 - CHARACTERISTICS OF VETERANS RETURNING TO PRE-SERVICE EMPLOYERS

Characteristics	Number who: Had pre-service employer	Number who: Returned to pre-service employer	Percent who returned to pre-service employer
Total	1,835 1/	934	51
Age:			
25 years and under	627	279	44
26 to 31 years	647	326	50
32 years and over	557	327	59
Color:			
Negro	115	51	44
White	1,720	883	51
Employment status, March 1946:			
Employed	1,524	899	59
Unemployed	311	35	11
Time of entrance on active duty:			
1941 or earlier	276	106	38
1942 and 1943	1,362	710	52
1944 or later	197	118	60
Date of separation:			
Before VJ-Day	355	158	45
VJ-Day or after	1,479	776	52
Physical disability:			
Disability affecting employment or earnings	455	227	50
No such disability	1,368	700	51

1/ Some veterans did not report with respect to certain of the characteristics. For this reason, the figures in the sub-sections of this table do not in all cases total 1,835.

Table 4 - DISTRIBUTION OF VETERANS BY USUAL 1/
PRE-SERVICE, AND MARCH 1946 INDUSTRIAL GROUPS

Industry group	Number: Usual pre-service industry	Number: March 1946 industry	Percent 3/: Usual pre-service industry	Percent 3/: March 1946 industry
Total	1,971	1,971		
Mining	27	14	2	1
Construction	106	99	7	6
Manufacturing	657	659	42	41
Wholesale and retail trade	314	282	20	18
Finance, real estate, etc	49	54	3	3
Transportation, communication, etc	164	191	10	12
Services	181	162	11	10
Government	86	148	5	9
Sub-total	1,584	1,609	100	100
Agriculture, forestry and fisheries	59	4/		5/
Unemployed and seeking work	-	356		
No pre-service employment	90	-		
Pre-service employment but no usual industry 2/	219	-		
Not reported	19	6		
Sub-total	387	362		

1/ The industry in which the individual had worked longest was considered his usual industry. However, if he was employed for extensive periods in more than one industry, he was considered as usually attached to the industry in which he was most recently employed prior to entry into the service.

2/ Includes veterans with less than one year's experience in a single industry.

3/ Discrepancies due to rounding.

4/ Veterans engaged in farming during March 1946 are excluded from this tabulation.

5/ Percentages not computed because categories not comparable for both periods.

Table 5 - DISTRIBUTION OF VETERANS BY USUAL 1/
PRE-SERVICE AND MARCH 1946 OCCUPATIONAL GROUPS

Occupational group	Number		Percent 4/	
	Usual pre-service occupation	March 1946 occupation	Usual pre-service occupation	March 1946 occupation
Total	1,971	1,971		
Professional and semi-professional	50	59	3	4

3/ Includes 3 who know they weren't eligible, 2 who didn't know where or how to file, and 2 unemployed due to labor disputes.

REPORT TO THE SECRETARY OF WAR ON VETERANS' READJUSTMENT BY LT. COL. W. ROCKEFELLER

Prior to V-E Day, a total of nearly 15,000,000 men and women had been inducted into the Armed Forces of the United States. Eleven months have passed since the cessation of hostilities, and a total of approximately 13,000,000 service personnel have been processed through Separation Centers and have retuned to civilian life. The lessons learned in the demobilization following World War I prompted both the Army and Navy to leave no stone unturned in the development of a processing technique which would facilitate to the maximum this most difficult transition. The irresistible pressure of public opinion in the war weary nation placed speed of demobilization above all other considerations. The War and Navy Departments readily recognized that such a policy would drastically curtail the effectiveness of aids which they had designed to acquaint the veteran with his rights and how to obtain them, as well as the conditioning for the changes that he might expect to find had taken place during his many months' absence, but under the circumstances the problems seemed impossible of solution.

Even though realizing that with separation all legal responsibility on his part for the individual ceased, the Secretary of War was quick to sense a moral responsibility and the possible effect that haphazard readjustment of veterans to civilian life would have on the good name of the service. In order to keep himself currently appraised of the situation he directed the writer to make a nation-wide survey. (For areas covered, see attached itinerary).

For the writer to better understand exactly what was available to the veteran, conferences were arranged with General Bradley of the Veterans' Administration and General Erskine of the Retraining and Reemployment Administration. These in turn were followed by time spent in observation at Separation Centers and discussions with the Commanding Generals of certain Service Commands and their Personal Affairs officers of the part that the Army is taking in the overall community picture. It has been a matter of considerable pride to see the high state of morale in the Separation Centers and to observe the efficient and conscientious manner in which the work has been carried out. It is equally gratifying to note the enthusiasm with which the personnel of the Service Commands are making themselves available to assist in any manner possible the solution of both individual and community readjustment problems.

Approach to the veteran's problem from a civilian point of view was attempted first through a variety of well-organized, hard-hitting Veterans' Service and Information Centers distributed through the Atlantic Seaboard states. In these contacts it was not only possible to gain a good understanding of the mechanics of readjustment on a community level, but also to observe individual veterans as to their attitude in and capacity for helping themselves. Concurrently with the study of Veterans' Service Centers more specific problems were gone over with local representatives of

Veterans' Administration, United States Employment Service, Draft Boards and State Veterans' Commission. Virtually without exception the Federal representatives were found to be cooperative and exceedingly well informed concerning the situation within their areas.

Further valuable information was gained in making visits to the myriad voluntary organizations, including Red Cross, Chambers of Commerce, Churches and Church organizations, and Veteran' Associations, as well as business men, professional men and educators. The last three groups were found to be particularly helpful in the evaluation of local conditions which make for a positive or negative influence on veterans' readjustment.

RESULTING CONFUSION:

Contemplating the rather lengthy lists of groups and individuals shown above who are directly or indirectly concerning themselves with veterans, it is distressing to find so little overall planned guidance and policy pattern for them to follow. In the opinion of the writer, in the majority of the communities of the country a greater or lesser degree of confusion has resulted. It is only thanks to the innate capacity of the American youth for self-sufficiency and adaptability that so large a percentage of returned service personnel have been able to thread their way through the maze of basically well-intentioned confusion and become reintegrated into the scheme of the community. True, many of them still have real problems, and have only accepted iterim jobs awaiting more suitable work. Most of these, with philosophic fortitude, are accepting reality with the confidence that they can and will work things out satisfactorily in due course. On the surface of the situation we might take pride and comfort (and many have) in the realization that so large a percentage of veterans have apparently so readily adapted themselves to the current mode of life, thus anesthetizing ourselves into complacency and indifference concerning the rest. Such a rationalization is, however, both unforgivable and irreconciliable with conscience.

GOVERNMENTAL RESPONSIBILITY:

No one thoroughly familiar with the situation is satisfied that the job of readjustment has been either adequately or thoroughly handled, with the possible exception of a few isolated areas. Rightly we might ask ourselves what is the cause of this situation. Initially and basically it would appear that the blame could be laid at the feet of the Federal Government for their failure, prior to the end of the war, to prepare and activate an overall plan, bolstered by strong leadership, to guide and encourage communities in shouldering their responsibility to the returning veteran. In the light of the initial omission the Federal Government could and should have established on the highest level adequate coordination of the more than fifteen Federal agencies who deal directly or indirectly with the problems of veterans. Up to this writing there is still no such coordination. With this lack of direction it is not difficult to understand why or how ill-feeling has sprung up, not only between Governmental agencies on all levels, but also between them and voluntary agencies, and finally even among the

voluntary agencies themselves. This sequence leads inevitably to distrust, confusion, misinformation, inefficiency and a general lack of interest--with the veteran, for whom these various agencies operate, being the chief sufferer.

With such a broad criticism it is not intended to imply that many of the agencies, both individually and collectively, have not done outstanding service, for they have; but the successful, smooth, cooperative operation has been thanks to the unselfish leadership within the specific agencies themselves rather than a result of sound advanced planning on a broad and national basis.

To suggest that lack of coordination has been the sole obstacle in the path of the most effective performance of our four chief Federal agencies dealing with veterans would be more than unjust. Let us pause for a moment to consider briefly some of the other influences which have bearing.

VETERANS' ADMINISTRATION:

Up until the time that General Bradley assumed the responsibility of the Veterans' Administration, the Veterans' Administration had been handling a routine problem, firmly controlled from Washington. With the cessation of hostilities their potential clientele expanded fourfold. Furthemore, whereas in the past their basic problems had been Claims and the operation of Veterans' Hospitals, now they have the additional burden of the administration of the benefits of the G.I. Bill without direct supervision. The expansion of plant and personnel to meet new demands on them would in itself have been a mammoth undertaking. Combine this with inadequate operational legislation and misunderstanding and the record of accomplishment and the sensitivity to need has been spectacular.

DRAFT BOARDS:

Local draft boards, under the provisions of the Selective Service Act, were not only charged with the induction of men into service, but also with the protection of their job rights on their return to civilian life. During the war these voluntary boards performed with exemplary sincerity and attention to duty. With the end of the war the laws which created Selective Service, proved inadequate for clear-cut rulings on many cases of disputed job rights. Bitterness and lack of confidence grew on the part of the veteran, as well as on the part of employers, in the months that followed and prior to the handing down of court rulings.

RETRAINING AND REEMPLOYMENT ADMINISTRATION:

Initially it was contemplated that Retraining and Reemployment Administration might act in the capacity of coordinator of those Federal agencies dealing directly and indirectly with veteran's affairs. An administrative reorganization of government has completely and totally emasculated the Retraining and Reemployment Administration. Today, judging from the reaction in the field, this Administration has all but outlived its usefulness.

UNITED STATES EMPLOYMENT SERVICE:

The United States Employment Service assumed its share of the burden of assisting the returning veteran with two strikes against it. The fact that during the war period USES had served as a pseudo police force, protecting maximum manpower utilization, caused the business world to view them with suspicion and resentment. Besides this, there has been the ever-growing pressure to return USES to state control, with a resultant adverse effect on the morale of their officers. There can be little question but that the return of this agency to state control will have an injurious effect on the placement of veterans.

COMMUNITY RESPONSIBILITY:

By pointing the finger so forcibly at the shortcomings of the Federal Government and its agencies, it is not intended to exonerate the community for its failures. Their only conceivable defense can be lack of knowledge of the problem. Without thoroughly understanding the psychological changes caused by military life or discipline, it is exceedingly difficult, if not impossible, for a non-veteran to understand why an average of three years of military service would have such a tremendous influence on the lives and thinking of so many veterans. Couple this fact with the actuality that an important majority of returned service personnel have tried to work out their problems quietly and calmly, it is not so difficult to see why so few community efforts have been realistic and dynamic.

INFLUENCE OF ARMY LIFE ON THE INDIVIDUAL:

With this situation in mind, and in order to facilitate future thinking and planning, let us digress for a moment to broadly interpret the effect of military life on the personality of the individual. The very nature of military operation is based on the highest order of discipline. Men are trained from the moment of induction to do nothing without the proper authority or direction. In short, every officer and man in the military service is dependent on and subject to the command of his superior. Certainly we have all read of the courage, initiative and ingenuity of the American soldier individually and collectively, but these incidents are a result of special circumstances rather than of basic and necessary regimentation. After a prolonged period of service, to find oneself once again a completely free agent with no one to give orders or make decisions, is a shock from which some are slower to recover than others.

Military action is based on group effort. Every man is part of a small intimate operating unit. Regardless of his duties he is always bolstered by the realization that he is sharing his effort, responsibility and experience with his "buddies", and that they collectively, in wearing the uniform, are supported, however intangibly and remotely it may seem, by the armed strength of the nation. On their return to civilian life there comes a feeling of "aloneness", which in some cases can grow and develop into a very real fear or neurosis. To stem these feelings the community must be ready to give sound guidance, as well as patient,

friendly understanding. Pampering is anything but a cure for the cause of these symptoms.

Vital to the success of any military operation is high morale. War, taken from any angle, is unpleasant and basically repugnant to the average American mind. In order to minimize the distasteful part of military service and to maintain morale, it has been necessary for both the public and the Command to instill in the mind of the individual in uniform a feeling of the importance of his part in the whole and reaffirm in his heart his capacity to make any sacrifice necessary, up to and including the supreme sacrifice. Such a philosophy is a pleasant and appealing one, and one often reluctantly shed with the uniform, as is evidenced by those individuals who, because of their service, now feel that the world justly owes them a living.

Another very tangible effect of war on many returning servicemen is physical or mental disability. Great strides have been made with the rehabilitation of that most dramatic portion, namely the amputees, which only total in the neighborhood of 17,000. Unfortunately, the most justifiable spotlighting of this group has forced from the stage thousands upon thousands of men who will suffer lesser limitations as the result of wounds, who have the constant threat of chronic disease, or have the ever-present and haunting fear of the recurrence of psycho-neurotic characteristics. Physically the indications may not be visible, but emotionally such things loom as monstrous obstacles in the path of an easy readjustment.

INFLUENCE OF ENVIRONMENT:

The fears and anxieties suggested above are frequently misinterpreted as being indolence, indifference and possibly even arrogance. Careful consideration should be given each individual prior to classing him as one unworthy of further aid and attention. If we stop to realize that approximately 10% of our total population was drawn into the service, it is self evident that a proportional share were drawn from environments of minimum opportunity. Most of them, along with the bulk of the personnel of the Armed Forces, saw part of their service outside the continental limits of the United States. They have had experiences which five years ago would have been fantastic even in a dream. They have been fed, clothed and cared for, perhaps in many cases better than their normal surroundings would ever have been able to afford. And on top of this, they had cash in their pockets, and a new standing in the world. It is only natural and human for those who have known a better life and felt a new confidence in the service, even though they may not care for the strict routine of the life, to accept the readjustment pay plan in the almost blind hope that that "golden opportunity" will come along which will obviate the necessity of returning to their former circumstances.

Readjustment to civilian life for this group is really a double readjustment; first, the shedding of the uniform, and second, the integration into a new community which is completely foreign to them, emotionally and more

than likely physically as well. The community and the nation would indeed be derelict if, at this stage of the game, they were to abandon those veterans whose lives were most thrown off balance by their service in the armed forces.

DISILLUSIONMENT CONCERNING G.I. BILL OF RIGHTS:

Not so long ago a weekly news magazine published a splendid and enlightening article on General Bradley of the Veterans' Administration and the Provisions of the G.I. Bill of Rights. Technically no one could have found fault with this article. Inwardly every American who read it might have had a warm, self-satisfied reaffirmation of his belief in the generosity of our great nation to veterans, except possibly those veterans who have attempted to make it work on a personal basis. The disillusionment was so well expressed in a letter written by a young captain who said: "Yes, I can benefit by the educational provisions of the G.I. Bill if I can find an institution that has room for one more student. Yes, I can get a loan to buy a house, if I can find a house for sale. Yes, I would like to profit by 'on the job' training provisions if I can find a job in a plant that is a participant in the program. Yes, I would enroll in the apprentice training if I could find a Union where the quotas have not long since been filled. Yes, I could get free hospitalization for my recently contracted illness if I could find a Veterans' Administration Hospital with a vacant bed. Etcetera."

The Government of the United States has been more than generous in showing monetary appreciation to the men and women of the Armed Forces for their service. There is the G.I. Bill, mustering out pay, and now the proposed adjusted terminal leave allowance. Likewise, there are millions of people and hundreds of organizations who, regardless of their motives, are assisting veterans with their problems. The fact still remains, though, that there are 1,766,000 unemployed veterans drawing readjustment compensation, thousands more unemployed who either do not need the readjustment pay or are too proud to accept it, and many others working, but far from happy or adjusted, at jobs in which they are grossly under-employed.

With the trend as it is, the passage of time can only aggravate what would seem to be anything but a satisfactory situation. On the one hand there is the veteran, whose disillusionment is growing into bitterness. On the other hand there is the public who, because it no longer sees vast numbers of uniforms, coupled with the fact that there is a G.I. Bill of Rights which it assumes provides for the veteran, accepts the attitude that its responsibility has been discharged. As tangible evidence of this attitude on the part of the public, one has but to ask the average Veterans' Service or Information Center director concerning community response to both the current and continued support of the Center. Or, using newspapers as a barometer, it is interesting to note that the number of clippings dealing with veterans' problems, clipped daily from twelve newspapers dotted across the country, has decreased by more than 50% since the first of February of this year.

CAUSE OF COMMUNITY FAILURE:

If one were asked to name the most common cause for failure of readjustment within a community it would be quickly attributed to a blatant lack of knowledge and understanding of the overall problem. The civilian, like the community who does not understand the problems of readjustment, has little interest in the veterans. There is even resentment of the provisions that have been made for the veteran to the point of antagonism.

It has been the observation of the writer from one end of the country to the other, that with the presentation of a few basic statistics combined with certain leading questions, it is more than easy to demonstrate to the civic leaders that the job of readjustment in their community has not been completed. Once this fact is established, various individuals will volunteer, almost naively, that they had sensed there might be something wrong but failing to know a possible solution had been tempted to simulate the ostrich. Discussions of successful programs in other areas incites considerable interest. Invariably the conference ends with the almost plaintive statement, "Please tell us what to do and we'll do it." Actually, however, guidance and continued stimulation is needed to prevent the continuance of the now chronic lethargy.

LOOKING TO THE FUTURE:

Much water has gone ever the dam. In retrospect it might be relatively easy to create the missing master plan referred to previously but the scene has changed. Today time is of the essence, if it is to be hoped that the sore of disillusionment will be healed before it becomes an ulcer of bitterness. Because time plays such an important part, whatever solution is found must be directed at the heart of the problem and be the essence of simplicity.

What are the major problems which confront the veteran? Varying with sections of the country we would find housing, employment, education, loans and disability, topping the list. Following these are such things as taxes, insurance, claims, legal aid, welfare, counselling, general readjustment and other miscellaneous problems. Let us consider in further detail the major headings.

HOUSING:

Housing across the nation is critical, to say the least. Currently all means are being brought to bear to ease the situation. The Federal Government, through the Housing Expeditor, is doing much with temporary housing and is attempting to stimulate new construction. Municipalities have assisted with the conversion of obsolete homes and non-residential buildings. Many communities have demonstrated what an aroused public opinion can do to uncover idle rooms and break down restrictions concerning children, etc., which have caused untold and unjust hardships on newly married veterans. Already there are visible results, but the shortage of truly adequate housing will be existent for years to come. In the meantime, a search must continue for more expeditious stop-gaps.

EMPLOYMENT:

The paradox of unemployment is indeed difficult of solution. We have seen that there are 1,766,000 veterans receiving readjustment pay, and untold numbers of others who are also unemployed but for one reason or another are not drawing the compensation to which they are entitled. Yet on no occasion has the writer discussed the problem of employment with the business element of the community without being informed in no uncertain terms that adequate labor cannot be found for the conduct of business.

There are many factors which contribute to this situation that should be carefully considered in making a true evaluation of the figures. In the first instance, we must recognize that better than two-thirds of those receiving their pay have been on the rolls for a matter of three months or less. Many of these are supplementing their savings while enjoying well-earned and legitimate rest and rehabilitation. Others have gone on the rolls to ease their financial burden while awaiting a given date to return to school. These individuals, plus the others who have previously followed a similar practice, are perfectly honest, self-respecting individuals who feel themselves masters of their souls and captains of their destinies.

As we cut deeper into the total we find the next sector, which is composed of those earnestly seeking employment. These men are intelligently using their readjustment pay to carry them through the period of time that they are conscientiously shopping for a job in which they will be happy, in which they can see possibilities for the future, and in which they can earn a decent living wage. The accomplishment of their mission is by no means a simple matter. Many of them appreciate the value of specific skills they learned in the service in terms of civilian jobs and are attempting to reflect this in setting their employment sights, but seldom do they find the employment manager who is either enlightened or interested. Many more of them realize the value of the intangible assets gained through military life - discipline, responsibility, precision and the ability to live and work with others, but invariably the suggestion that these things have monetary or employment value falls on deaf ears. These men are potentially good, solid citizens if they are given proper guidance and a chance to prove themselves. That neither is adequately available is cause for serious concern.

The final segment of the whole is composed of a group who are falsely using readjustment compensation as a means of delaying the day when they must face reality. Sometimes this philosophy is the result of regional wage levels and standards of living, which make the "rocking chair" money irresistible. All too often it is the result of a lack of self-respect, which makes the individual reluctant to shed with his uniform the rather special privileges which he has enjoyed in the service and resume his part as a self-sufficient citizen. It is high time that the nation realistically review the situation. Granted there has been a tremendous shortage of properly trained, experienced vocational guidance counsellors to assist with these more difficult readjustments, this is not a valid excuse. There is not a city, town or hamlet in the country that does not have more than sufficient graduates from the

school of life and experience who, if they were to make themselves available, could readily fill the gap. The task is not an easy one but it is our duty to seek out those who have refused to take the initiative in making their own readjustment. Through coordinated community effort they must be given intelligent, patient, kind, firm assistance in getting to see reality. Without such immediate attention to this situation, a philosophy dangerous to the individual and to the economy of our nation, is sure to grow.

EDUCATION:

The enthusiastic reception of the educational provisions of the G.I. Bill of Rights is staggering in its proportions. Nearly three million veterans have made application to take additional schooling. To date the educational institutions of the country have only been able to absorb approximately one in three. Interesting to note, and contrary to early expectations, a definite majority of those desiring to avail themselves of the educational provisions of the G.I. Bill of Rights, are primarily interested in either High School and related subjects or Vocational Training. Veterans are aware of the spectacular job done in training war manpower for specific jobs. Quite understandably, they feel a revival of such a program would be appropriate. There is little doubt that the monies invested in a program of this nature would be a sound investment.

ON-THE-JOB TRAINING:

Logically included in a consideration of veterans' education should be "on-the-job" training. Potentially the "on-the-job" training program can be the most useful aid for a majority of the more complicated readjustments. Unfortunately, no two people seem able to agree on the objective of the program. With such a situation existent it is not difficult to understand why the plan has not been better accepted, or how abuses have crept in. The mere fact that "on-the-job" training in all too many cases has turned into a racket both for the unscrupulous employer and the weak veteran, should in no way condemn it. A complete review should be made of it in its entirety. Uniform standards of approving "trainers" must be established on a national basis and appropriate legislation should be prepared to give supervision and control to the Veterans' Administration, where it rightly belongs. Lacking such drastic action, the inevitable destiny of "on-the-job" training is mediocrity and scandal.

G.I. LOANS:

Much has been said and written about the handling of the G.I. Loan. Initially servicemen and women were allowed to form false impressions concerning the objective of the Bill, as well as the mechanics of its administration. Hundreds of thousands had all kinds of unsubstantial pipe dreams concerning what they would do with the money they felt could be had merely for the asking. On their return to civilian life they beat a wide path to the banks seeking the key to transform their dreams to reality. The original Act was confused and made administration difficult. Loans had to be disapproved because of technicalities, and the resulting ill-will was heaped upon the bankers. Finally the Act was satisfactorily amended. Unfortunately,

this fact has not yet dissipated all of the early resentment. All too many bankers have failed to do their part to rectify this feeling with the advent of the revised Act, and have continued on for the greater part with an attitude of cautious conservatism which has in some instances turned to indifference.

In time of war the people of the nation unhesitatingly entrusted their young men with the destiny of the country. Their faith was well founded. Today the community could well continue to show their confidence in these same young men by giving them an opportunity to establish themselves in the community, be it through the purchase of a home, farm or business, and then stand by to aid them, at least until their roots are firmly grounded.

PHYSICAL OR MENTAL DISABILITY:

Mention has been made of mentally and physically disabled veterans. Public Law 16, which deals specifically with veterans suffering from service-connected disabilities, is appropriately generous and empowers the Veterans' Administration to go to great lengths in assisting these men both in rehabilitation and reintegration into community life. Every member of the Veterans' Administration recognizes the great importance of this responsibility.

The law providing for the operations of Veterans' Hospitals permit the Veterans' Administration to accept veteran patients with non-service connected ailments when beds are available. Pressure, practice and public opinion have brought about a situation whereby between 80% and 85% of the Veterans' Administration hospital beds are now filled with men in this category. Projected plans call for new construction to bring the capacity of Veterans' Administration Hospitals up to one quarter of a million beds. The cost of construction alone is staggering, but even more appalling to the poor tax-payers is the prospect of the annual operating and maintenance costs. Regardless of how efficient the Veterans' Administration may be in healing the sick and rehabilitating the weak, the job cannot be accomplished fully without intelligent community support.

Were one not impressed by the cold dollars and cents significance of the nation's veterans' health benefits, there is also the human side of the picture, It is not enough to assure the man who has gambled his life on the future of the country just medical care. We must stand ready to lend a helping hand which will restore him to a useful place in the community. The nation should welcome an educational program emanating from the Veterans' Administration, or from a citizens' committee in conjunction with the Veterans' Administration, which will enable them to accomplish the maximum rehabilitation of the patients in Veterans' Hospitals.

NEGRO:

No report dealing with the readjustment of veterans would be complete

without special mention of the plight of the Negro. Many of the Negroes inducted into the service, through their pay and allowances, have had for themselves and families a greater income than they had ever enjoyed previously. In the second place, a large majority have had travel experience both within and outside of the United States which surpass the realm of imagination. During their military tour of duty a great proportion of them have, at one time or another, found themselves in an environment for the first time in their lives where racial prejudice and discrimination was at a minimum or non-existent. On their return to civil life the Negro has found that many, and some rather drastic, changes have occured on the home front--the most spectacular of which are the tremendous population shifts from rural to urban life, from the south to the north and west, and the nostalgia resulting from the peak of industrial job opportunity which existed during the latter part of the war. Because of the fact that this opportunity did not occur until the nation had started scraping the bottom of the manpower barrel, Negro labor has been the first to be released with the closing down of war plants, thus adding aggravated unemployment problems to those caused by environmental dislocation. The veteran returning home filled with a new hope, ambition and expanded horizon, therefore finds himself viewing an exceedingly confused scene. His problem, under the best circumstances, would be a difficult one--but under current conditions there is a highly magnified frustration which in some areas is reaching unwholesome proportions. On the surface one might not sense the trend, for traditionally the white population finds it more convenient to ignore his black fellow citizens, thus maintaining that there is no problem. An impartial investigation readily indicates a rude awakening, and this in the not far distant future.

The record of progress which has been made by the Negro in almost every field over the past ninety years against the most unbelievable odds, is an achievement of which any people could be truly proud. For us or for them to plan for the future without a realistic recognition of the fact that, in spite of these spectacular advances, tremendous race prejudice is still existent would be myopic, to say the least. Since the white population is in the dominant position, it is more than appropriate for them to take the leadership in planning and assuring equal opportunity for all. The Negro, on the other hand, has a great responsibility in maintaining standards of performance and dependability, for it is only through demonstrated capacity that the shackles of prejudice may be cut away.

It may be noted that the writer has digressed momentarily from the Negro veteran per se and included the entire Negro population. This is necessary because his color nullifies the fact that he is a veteran. If the Negro veteran is to get equal opportunity it cannot be too strongly emphasized that now more than ever before in the history of our country, we must study the facts of racial prejudice and discrimination realistically, and act courageously. The Federal Government in Washington has formulated and put into effect a concrete program. The offices of Federal Agencies in the field have lagged way behind. This situation must be corrected to prevent it from detracting from the value of the intelligent Washington level leadership.

CONCLUSIONS

In conclusion we might summarize the situation by stating that the undirected and uncoordinated, though honest and sincere, efforts of many well-intentioned individuals and organizations throughout the nation has created a confusion which has made assistance to the returning veteran inadequate and haphazard. Governmental agencies and Veterans' Associations have been able to properly handle matters of a routine nature, and they have done so in good spirit. Over and above that, the aid that the veteran has received has been due more to luck than management.

As at the beginning, it might be well to state in the conclusions that neither the War or Navy Departments have any legal responsibility to the veteran once he turns his back on the Separation Center. This fact the public recognizes and accepts. However, because of the fact that the problems and dislocations which are being suffered by the individual seem to be a direct result of his absence in the Service, there is a sub-conscious antagonism toward the Armed Forces which cannot be ignored. This feeling is never allowed to die by the frequent Press headlines reporting morbid acts of an "Ex G.I." or "Veteran" who has been unable to master his readjustment.

Considering the magnitude of the job of demobilization and the rapidity with which it was accomplished, it is indeed a remarkable tribute to the military Separation Center system that the country has not been flooded with more such misfits, but there are still too many.

Accepting a moral responsibility as a fact, and recognizing the importance of maintaining and enhancing the good name of the Armed Forces, we might well ask ourselves what can and should be done, both within and outside the service, to further facilitate the readjustment of veterans.

WITHIN THE SERVICE:

1. Separation Center technique and orientation should be kept constantly in review, with close liaison on the community side, to ascertain that the information disseminated is closely in tune with actual conditions in the area being served by a given Separation Center.

2. Reports emanating from the Commanding Generals of our armies in both Europe and the Pacific clearly indicate the need for strict discipline and a high moral standard. A powerful educational program directed at the public is needed to demonstrate that without them the successful accomplishment of our peacetime mission is in jeopardy and the problems of readjustment for the veterans of the peacetime army will be greatly magnified.

3. The development of a vital, vigorous, perpetual, orientation program for the Armed Forces personnel. The underlying theme of this

program should emphasize the importance of citizenship, responsibility and pride of accomplishment.

4. The careful restudy of the policies and attitude of the Service toward racial minorities, with the idea of taking necessary corrective action if existing conditions indicate practices inconsistent with true democracy.

5. A restudy of that portion of the Army Recruiting Educational program which deals with both tangible and intangible assets gained in military service to see how it can be expanded to better prepare both the employer and the veteran for a sound evaluation of the veteran's capabilities.

OUTSIDE THE SERVICE:

Outside of the Armed Forces proper, every influence should be brought to bear to assist in the much needed reestablishment of good faith in the country on the part of the millions of veterans who have been needlessly disillusioned. As stated above, the time is late and fast fleeing. Remedial efforts should therefore be directed primarily at the major problems. Simplicity will be the greatest assurance of success. Listed below are certain areas in which prompt and forceful attention is needed.

1. The coordination of all Federal agencies dealing with veterans' affairs under the control of one individual who would have the authority to cut red tape and act.

2. The encouragement of the development of a vigorous educational program, either by Veterans' Administration or out of Government in cooperation with Veterans' Administration, to facilitate the integration and/or reintegration of veterans whose confidence and self-sufficiency has been shaken by wounds or illness, regardless of when or how such a handicap was acquired.

3. The encouragement of the organization of a citizens' body which, with the cooperation of existing agencies, will conduct a far-reaching employment drive designed to correct injustices and hardships that have been the lot of far too many deserving men, and will be so fearless that there will no longer be an excuse for those able-bodied veterans whose lack of self-respect would permit them to ride the bandwagon indefinitely, to continue living off the public.

4. Insistence on the national rethinking of the objectives of the "on-the-job" training program to the end that it may be made intellectually and administratively into the tool of readjustment which it so clearly could be.

5. The calling of periodic conference of the leaders of the National Veterans' Association with the appropriate heads of interested Federal agencies to discuss the problems of readjustment on the community level.

6. The active encouragement and support of those organizations devoted to the study and solution of problems involving racial prejudice and discrimination. No more vicious enemy has ever faced the nation than racial prejudice. What more appropriate challenge could be accepted by the leaders of our Armed Forces, whose victories against tyranny place them in an unequalled position, than to offer the same wise, tempered leadership on the home front against racial prejudice?

7. A public restatement of the objectives of the G.I. Loan program with the idea in mind of expanding the opportunities for veterans to capitalize on their abilities both for their own goodd and that of the community.

VIRGINIA STATE COUNCIL NEWS LETTER

PUBLISHED SEMI-MONTHLY BY PUBLICITY AND EDUCATIONAL COMMITTEE

Number 22 August 6, 1945

Brother R. Wray Alt did it again at Emporia, Virginia. He just won an election for the IWA-CIO at the Greensville Mfg. Co's plant in Emporia, Virginia; CIO 73, no union 20 with one ballot void.

The International Fur & Leather Workers Union-CIO won the election at the Keystone Tanning and Glue Co's plant at Iron Gate, Virginia, CIO 45 no union 18.

Brother Jack Clark, Sec-Treas. for Local 284 UFWA reports another victory for CIO at the Hooker-Bassett Co. in Martinsville, Virginia, UFWA-CIO 145 no union 24.

Brother Clark also reports that a petition has been filed for certification and representation at the Martinsville Novelty Co. in Martinsville, Virginia and they are ready to file one for the workers in W.M. Bassett Co. also in Martinsville, Virginia.

Brother Ray Phillips, a member of Local 675 PWOC has been signing up the workers in the G. B. Nettleton Lumber Co. in Covington and has turned in cards representing a majority of the workers in that plant to the CIO Regional Office. Brother Ted du Cuennois CIO Field Representative and Brother R. Wray Alt, Special Representative for IWA-CIO will meet with a Committee of these workers Thursday August 16th and make plans for recognition either by the Company or an NLRB election.

LOCAL 692 P.W.O.C. RECEIVES

$65,000.00

BACK PAY

The WLB ordered an increase of 5¢ an hour for the day shift workers, 7½¢ an hour for the 2nd shift workers and 10¢ per hour for the graveyard shift workers all retroactive to May 1st, 1944. This wage increase was ordered by the WLB when the Wortendyke Mfg. Co. and Local 692 PWOC were unable to agree on a contract at the experation of their old contract and it was then certified to the WLB in Atlanta, Georgia.

Contract negotiations have been completed between L.I.U. 1315 Distillary Workers and the Belle Meade Distilling Company at Belle Meade, Virginia. A form 10 has been forwarded to Atlanta, Georgia for 3½¢ per hour increase. The workers also receive an additional weeks paid vacation for 3 years service with the Company.

Local 27 Federation of Dyers, TWUA recently had election of officers and Brother Ira Leber long an active member in the Local was elected President and will assume the Presidents duties September 1st.

CIO

VIRGINIA STATE COUNCIL NEWS LETTER

PUBLISHED SEMI-MONTHLY BY PUBLICITY AND EDUCATIONAL COMMITTEE

Number 23 August 26, 1945

Brother R. Wray Alt reports that he will receive recognition for IWA as bargaining agent for Emporia Sash and Door Company on a card check. There are 35 employees involved. He also reports that Sister Rosella Sessoms has a majority of the workers signed up in the Portsmouth Lumber Company, Portsmouth, Virginia and will petition for an election in the very near future.

Brother Alt also reports that another organizer has been assigned to work with him in Virginia. Brother Alt will do the administrative work as well as organizing.

A dinner meeting of the Richmond Paper Workers Joint Board was held at Ewarts Cafe in Richmond, Virginia August 10th at which time all the officers of the paper locals in Richmond were present. Brother Frank Grasso, Ass't. Dir. PWOC-addressed the meeting and plans were formulated to organize all the unorganized paper workers in Richmond area.

A, Richmond, Petersburg, Fredericksburg and Charlottesville area mass meeting will be held in the John Marshall High School Auditorium, Friday, August 31st at 8:00 P.M. on post war economy. Each Local in the Area should have a large delegation there as I expect we will need their voting strength to pass some resolutions. Over 150 organizations have been invited to this meeting.

Brother Ernest B. Pugh, Va. CIO Regional Director will address a large mass meeting in Carlin's Park, Baltimore, Md. on Labor Day.

President Truman has announced that the Little Steel Formula is ended and that the War Labor Board may grant any increases as long as the Company will not need an increase in ceiling price to meet this increase in wages.

The shooting war is now over but we have one of the greatest fights ever to keep our members working. It is a big job but we can do it by: seeing our Congressmen, (they are home now) and ask them to support an amendment to the Fair Labor Standards Act to raise the minimum wage from 40¢ an hour to 65¢ an hour. Also to support President Truman's request that the Federal Goverment supplement the States Unemployment Compensation payments so that the unemployed will receive up to $25.00 a week. Another thing that we must all do is, organize the unorganized. As long as these people remain unorganized they are a threat to our working conditions and jobs. Everybody must work on the unorganized worker and sign him up. If your local has no application cards write to the CIO Regional Office stating what kind of industry the people work in that you want cards for and how many. The cards will bee immediately sent to you. Start to-day.

WE HAVE A BIG JOB TO DO TO PROTECT OUR JOB

SIGN UP THE UNORGANIZED WORKERS TO-DAY

If you should need help on any plant write or wire to C.I.O. Regional Office, 410 Law Building, Richmond 19, Virginia. or Boyd E. Peyton, Regional Director Textile Workers Union of America - CIO, 1112 Church St., Lynchburg, Virginia. Either office will arrange to have an organizer contact you at once.

During the past three months there have been 1105 elections held throughout the country of which CIO won 549 with 84,207 voting, AFL won 454 with 52,173 voting and Indepentent Union won 149 with 38,739 voting while unions were rejected in 232 elections with 41,889 voting.

WE WANT TO HEAR FROM YOU.

AROUND TOWN WITH THE RED FEATHER

A lot of kids have taken "trips". Tom didn't envy them much, because he was only eight. But Mary, who was twelve, had heard them talk, and Mary wanted more then anything else to take a "trip".

"All you have to do," she told Tom, "is stand beside the road and hold up your thumb."

Mary's thumb brought the car to a halt as they stood beside the highway just outside their home town. The kind man driving it believed they lived in Richmond. To Mary and Tom the car was a magic carpet that whisked them from home town hum-drum to a strange, far place of towering buildings, hurrying crowds, dazzling store windows and a roar of traffic. It was breath-taking.. It was exciting. And it was just a little frightening. This was their "trip".

"We've got to see the depot, "Mary told Tom. "Whoever heard of taking a trip and not seeing the depot?"

The watchful eye of the Traveler's Aid worker fell on Tom and Mary. Despite her kindness, they refused to tell who they were and where they lived. They made a brave effort to hide their fear behind what they believed was the best accepted movie-style of indicating they had "been around."

Gradually, through the interest and kindness of the worker the "mean parents who often whip us" were spoken of with timid fondness.

"Mama is an awfully good cook," Mary offered shyly.
"Wonder what she's going to have for supper?" Tom's voice was wistful.

It was easy then to get their names, that of their father, and their address. They were still talking when their parents were contacted and arrangements made for their return.

"Won't I have something to tell the kids!" Mary was eager to get started. The trip was over. Tom and Mary would always remember the ice cream the worker had given them while waiting for their parents ... their parents the Red Feather Service supported by the Richmond War and Community Fund through Richmonders contributions.

VIRGINIA STATE COUNCIL NEWS LETTER

PUBLISHED SEMI-MONTHLY BY VA. STATE CIO ORGANIZING COMMITTEE

Number 32 December 26, 1945

Local 403 IWA-CIO will have two elections in Richmond, Va. One in Ruffin & Payne Inc. and one in R. E. Richardson & Son, Inc. on January 4th, 1946.

Brothers Thomas R. Linn, Int'l Rep. for PWOC and Lloyd P. Vaughan, CIO Field Rep. have signed up a majority of the workers of the Lynchburg Gas Co., Lynchburg, Va.

A hearing that was set for December 18th before a Trial Examiner of the N.L.R.B. against the Harris-Woodson Candy Co. of Lynchburg, Va. on unfair discharge of Mrs. Edna Elder, President of L.I. U. 1274 United Candy Workers, and refusal to bargain has been postponed until January 7th, 1946. A strike vote under the Smith-Connally Act is scheduled to be held by the NLRB for the employees of this company in early January.

Brother Charles C. Weber who is an ordained Methodist Clergyman and a former member at the Union Theological Seminary in New York City is also an international representative for the ACWA-CIO. He is in Richmond organizing the Crawford Mfg. Co.

Brother Webber came to Richmond 10 years ago and organized the Friedman-Harry Marks Clothing Co., now local 88 ACWA, and as a result of that campaign the first unfair labor practice charge was filed against the company under the Wagner Act which was carried to the U.S. Supreme Court which upheld the constitutionality of the Act.

We wish Brother Webber every success and the CIO Regional Office will give him all our support and assistance.

Brother Max Sussman reports that Local 57, FTA, has completed negotiations on renewal of their contract with the Southern Biscuit Co. The workers will receive 10 cents per hour increase in wages making a 60 cent minimum, 6 paid holidays, and a more liberal vacation plan and a union shop.

Local 370, IF&WU, has completed negotiations on renewal of their contract with the American Lace Leather Co., and the workers will receive (men) 10 cents per hour wage increase; the women will receive 7½ cents per hour wage increase and three paid holidays.

Brother A. C. Emerson, business agent of Local 284 UFWA, Martinsville, reports that they have just completed negotiations for a contract with Fiber Board Container Co., (Martinsville plant) and the workers will receive a 55 cent minimum with a 5 cents per hour general wage increase, 1 and 2 weeks vacations, 6 paid holidays, maintenance of membership and dues checkoff. He also reports renewal of their contract with the American Furniture Co., and the workers will receive 5 cents general increase now and 5 cents in May 1946, also a vacation with pay.

Virginia C.I.O. Regional Director, Ernest B. Pugh, attended the Labor Conference called by the Secretary of Labor on December 5-6th 1945. He also attended a farewell dinner for all the members of the War Labor Board Held in Washington on December 12th, 1945. He also attended the Executive Board meeting of PWOC in Cleveland, Ohio December 19, 1945.

At a regular meeting of the Executive Board of the V.C.P.A.C. held in Richmond, Va. December 18, 1945 the V.C.P.A.C was split up in to two units one of only CIO members to be known as the CIOPAC. The State Council Executive Board will meet early in January and will formalate a PAC program and also call a PAC policy meeting of delegates from all CIO locals in Virginia to set up our PAC program for 1946., the other unit will be set up by other than CIO members sponsored by the Southern Conference for Human Welfare and is expected to be called the Committee for Virginia. Both Committees will work together for the common goal.

VIRGINIA STATE COUNCIL NEWS LETTER

PUBLISHED SEMI-MONTHLY BY VA. STATE CIO ORGANIZING COMMITTEE

Number 34 January 26, 1946

The State Wide P.A.C. Committee meets in Richmond, Va. Sunday, Jan. 27th. Everybody must get behind this committee in order to protect their living conditions. There are several bills coming up including the Sales-Tax that we must have the vote to beat down when it comes before the people to vote on it. There is also the bill on taxing every person over 21 in Virginia, $4.00 a year, all our members must be prepared to vote.
Get behind your CIO-PAC and get everybody that you know to pay their poll tax, register and vote.
Our City elections are coming up this spring and we are all vitally interested in the kind of people that make our laws and spend our money.

PAY YOUR POLL TAX, REGISTER AND THEN VOTE.

Local 230 International Fur & Leather Workers Union reports that they have signed up all the employees in the shipping department of Benj. T. Crump Co. at Richmond and have asked the Company for recognition.

Local 675 State County & Municipal Workers of America now has around 1,000 members among the Richmond, Va. city employees, this Local is going to do a long needed job in Richmond, Va. They are not only going to get an increase in wages but are going to smash the Byrd Machine in Richmond.

The General Assembly is now in session in Richmond and so far there has been no anti-union legislation introduced but we must all be ready when your legislative representative calls on you to contact your Senator and delegate to do it at once. Brothers Ernest B. Pugh, Va. CIO Regional Director and Ted du Cuennois, CIO Field Representative have registered as lobbist for this session and are watching them close. Brother Silas Switzer, Bus. Agent for Local 11, Textile Workers Union of America is the State CIO Legislative chairman and will be called in whenever we need him.

SEND IN NEWS FROM YOUR LOCAL,
WE WANT TO HEAR FROM YOU.

Brother Charles Webber, National Representative for the Amalgamated Clothing Workers of America-CIO reports that he is making good progress organizing the employees of the Crawford Mfg. Company, Richmond, Va.

Brother Lloyd P. Vaughan, CIO Field Representative reports that the employees of the Lynchburg Gas Company are signed up 100% and that he has applied for a Local Industrial Union Charter, also that he has started negotiations with the Company on a contract. He also reports a large majority of the employees of the Russell Weill Distributing Company, Richmond, Va., have signed up and he has written the Company for recognition.

Brother Robert Turner, Int'l Representative for United Paperworkers of America reports he now has a campaign on at the Millhiser Bag Company, Richmond, Va.

Local 403 International Woodworkers of America has been certified as bargaining agent for the employees of Ruffin & Payne, Inc. and R. E. Richardson & Sons, Inc. Richmond, Va. and negotiations have started for contracts in both plants.

Brother N. A. Welch, Education and Publicity Committeeman for Local 202 Textile Workers Union of America-CIO reports that the CIO Members in Covington, Va., have turned the town upside down, instead of the Bankers and Industrialist running the town the people have taken over and are running it for a change. Rent control has been established and now the administration calls and asks the Union's advice on any thing that would affect the people in any way. He also reports completion of negotiations on renewal of contract for Local 202 Textile Workers Union of America and they received a improved sick and health plan, a better vacation plan and an average of 11¢ per hour wage increase.

Fraternally yours,

VIRGINIA STATE COUNCIL NEWS LETTER

PUBLISHED SEMI-MONTHLY BY VA. STATE CIO ORGANIZING COMMITTEE

Number 35 February 6, 1946

Brother Edmund F. Ryan, Regional Director for Textile Workers Union of America, reports that the Textile Workers won an election in Luray, Va. at the Luray Textile Corp. CIO 63, no union 49 votes.

Brother John McMahon, National Representative for the Amalgated Clothing Workers of America, reports that the Clothing Workers won an election in Martinsville, Va., at the Jobber's Pants Company. CIO 688 votes no union 319 votes.

Brother Lloyd P. Vaughan, CIO Field Representative reports that he has petitioned for an election to the N.L.R.B. in the Russell Weill Distributing Company at Richmond, Va. He has 95% of the employees signed up. He also reports that he has a majority of the workers signed up in the Smithfield Ham and Products Co. and P.D. Gwaltney Co. both meat packers in Smithfield Va. and will petition the N.L.R.B. For elections in these plants today.

Brother R. Wray Alt, International Representative for the International Woodworkers of America reports that he now has negotiations on renewal and new contracts going on in 11 woodworking plants in Virginia.

Anti-labor legislation has been reported out of the Senate Committee on General Laws in our General Assembly now in session in Richmond, Va. Another Anti-Labor bill will have a hearing this afternoon and I am sure it will be reported out too. Every Local Union must call a special meeting and have post cards and have every member write their Senator and Delegate to ask for a recorded vote and to vote against S.R.#12 and H.B.# 114. This must be done at once. The Senators at the hearing on S.R.# 12 laughed at labor and told us that as we didn't have any voting strength they didn't have to listen to us.

A State wide P.A.C. meeting was held in Richmond, Va. on Sunday, January 27th and had about 200 delegates present from all over the State. The speakers were: Brothers Allen S. Haywood, CIO Vice-President and Director of Organization, James B. Carey, CIO Secretary & Treasurer and Ted Dudley, Assistant to Sidney Hillman, Director of National P.A.C. A program was adopted at this meeting for setting up a Va. CIO-PAC. and an Executive Board meeting will be held in the very near future to get our PAC under way in Virginia.

SEND IN NEWS FROM YOUR LOCAL!

WE WANT TO HEAR FROM YOU!

Your legislative representatives need your help now badly on Capitol Hill. Start those letters and post cards coming to your Senator and Delegate at once asking them to vote against S.R. 12 and H.B. 114. Also start a flood of letters to your Congressman and Senator Byrd asking them to vote against the Case Bill. There is another anti-labor bill to be introduced to take away the right to strike from other groups of workers. As soon as I get a copy of the Bill I will let our members know what it is and be ready to again write your representatives to vote against it. Big business is out to try and break Labor Unions now like they did after the First World War.

ALL OF OUR MEMBERS MUST PAY THEIR POLL TAX, REGISTER AND VOTE, IF WE EXPECT TO BE ABLE TO CONTINUE TO HAVE COLLECTIVE BARGAINING. DELEGATES AND SENATORS WHO CONSIDER THE LABOR VOTE NOW NO LONGER CARE ABOUT IT AS IT IS SO SMALL. WE HAVE TO PROVE TO THEM THIS YEAR THAT WE HAVE A LARGE VOTE AND LEAVE A FEW OF THOSE SENATORS HOME THIS FALL. WE CAN DO IT, BUT WE MUST VOTE AND SEE THAT ALL OUR FRIENDS VOTE TOO.

PAY YOUR POLL TAX - REGISTER - THEN VOTE.

Fraternally yours,

VIRGINIA STATE COUNCIL NEWS LETTER

PUBLISHED SEMI-MONTHLY BY VA. STATE CIO ORGANIZING COMMITTEE

Number 36 February 26, 1946

Brother Carl McCaleb, Sec.-Treas. of Local 400 International Fur & Leather Workers Union, reports that they have just completed negotiations on their first contract with the Keystone Tanning & Glue Company at Iron Gate, Va. They will receive a 5¢ general increase retroactive to Sept. 1, 1945, a $50.00 bonus for all old employees and a $25.00 bonus for those with less than 3 months service, a $50.00 victory bond to all returning veterans, vacation with pay, senority, maintainence of membership and check-off, also in the event that they are cut back to 40 hours a week the contract may be reopened on wages. The Local is well pleased with these gains.

Local 230 International Fur and Leather Workers Union reports that all the employees of the Shipping department of Benj T. Crump have signed up in that Local and have received recognition from the Company on a card check and negotiations have been entered into for a contract.

Brother R. Wray Alt, Int'l Representative for the International Woodworkers of America reports that he has completed negotiations between Local 389 International Woodworkers of America at Portsmouth, Va. and the Portsmouth Lumber Company and that they got a very satisfactory contract. He also reports that negotiations between Local 403 International Woodworkers of America and Ruffin & Payne, Inc. and R. E. Richardson & Sons both of Richmond, Va. are progressing and expect to have contracts there soon.

Brother Charles Webber, National Representative for the Amalgamated Clothing Workers of America, reports that his campaign at Crawford Mfg. Company, Richmond, Va. is gaining momentum.

An election will be held at the Russell Weill Distributing Company in Richmond, Va. March 1, 1946. The employees in this plant have signed up 100% so we have no fear of loosing this election.

SEND IN NEWS FROM YOUR LOCAL!

WE WANT TO HEAR FROM YOU!

A State CIO-PAC executive board meeting was held in Richmond, Va. February 17th and Brother Boyd E. Payton was elected as Executive Director of the State CIO-PAC along with Brother Charles Webber as assistant Director. We expect our PAC to get into high gear now.
Now is the time for everybody to pay their Poll Tax, Register and be ready to vote for public officials who are NOT out to break labor Unions. Several Anti-Labor bills have been introduced and some have passed. Senator Byrd has been in Richmond everytime one of these bills came up to assure their passage. Your Legislative representative must be backed up by votes or he cannot do a thing on Capitol Hill.

PAY YOUR POLL TAX, REGISTER AND VOTE

Brother Robert Turner, Int'l Representative for United Paperworkers of America, reports that negotiations between Local 692 United Paperworkers of America, and Wortendyke Mfg. Company of Richmond, Va. have broken down and Conciliation Service has been called in to assist in reaching a settlement.

Brother W. D. Hand President of Local 243 United Federal Workers of America reports that he received the following telegram from Vice-President of the Federal Workers L.E.Tempest:
"House Naval Affairs Sub-committee this morning reported De Lacy seniority bill favorably to full Naval Affairs Committee which should act next week. Bill as reported follows United Federal Workers of America policy". Brother Hand also reported that he had received letters from both Senator Byrd and Congressman Daughton saying that they will do everything possible to have the Vinson-Trammel Act put into operation.
He also announces that there will be an open meeting at 229½ High St. Portsmouth, Va. on March 1, 1946 to take up the Seniority and Vinson-Trammel Bills.

Brother Robert Boyer, District Representative for United Steelworkers of America, reports that the Steelworkers successfully concluded two strikes in Roanoke, Va. One at Virginia Bridge Company envolving 450 workers and the other at Walker Machine and Foundry Corp. The one at Virginia Bridge, won the workers there an increase in wages in the amount of 18⅓¢ per hour, begining Bebruary 16, 1946 with 9⅓¢ per hour retroactive to January 1, 1946. Walker Foundry employees gained wage increases of from 10¢ per hour to 20¢ per hour and a new contract which the Company terminated when they went on strike. This has been a great victory for these workers because it is the biggest single increase in wages either of the plants have ever had.

Brother Boyer also reports that the workers at E. J. Lavino & Company Lynchburg, Va. will also be benefited by an 18⅓¢ per hour general increase with back pay of 9⅓¢ per hour through negotiations with the Company. They were not on strike.

He also reports that negotiations are being conducted by the Steelworkers for wage increases on the above basis at the following plants:
Lynchburg Foundry Company at Lynchburg and Radford, Va., American Brake Shoe Company, Portsmouth, Va. and National Bearing Metals Corp. Portsmouth, Va.

Brother Thomas R. Linn, Int'l Representative for the United Paper-workers of America reports that Local 675 United Paperworkers of America and West Virginia Pulp and Paper Company at Covington, Va. have completed negotiations on renewal of their contract and that the workers will receive 12¢ per hour general increase. He also reports that Local 1014 United Paper Workers of America and Meade Corp. at Lynchburg, Va. have completed negotiating a new contract and the workers will receive 13¢ per hour general increase with shift differential, vacation with pay, paid holidays, maintainence of membership and check-off.

He also reports that he has petitioned for an election in the Old Colony Box plant in Radford, Va.

Brother Ernest B. Pugh, Virginia CIO Regional Director has been sick for the past week. We all hope he has a speedy recovery and will soon be back on the job.

VIRGINIA STATE COUNCIL NEWS LETTER

PUBLISHED SEMI-MONTHLY BY VA. STATE CIO ORGANIZING COMMITTEE

Number 37 March 6, 1946

Brother J. C. Oliver, President of Local 1013 United Paper Workers of America reports that his Local has just completed negotiations for a 13¢ per hour general increase for the employees of the Bedford Pulp & Paper Company at Big Island, Va.

CIO won an election for the employees at Russell Weill Distributing Company Richmond, Va. CIO 46 votes no union 1 vote.

Local 403 International Woodworkers of America has just completed negotiating new contracts for the employees at R. E. Richardson & Sons, Richmond, Va. and their contract includes 5¢ general increase per hour with maintainence of membership and overtime after 8 hours in any one day. Also Ruffin & Payne of Richmond, Va. which includes a UNION SHOP the first one in the woodworking industry in the South, also 2½¢ per hour general increase, vacation with pay and other standard clauses. The above contracts were negotiated by the writer assisted by Brother R. Wray Alt, International Representative for the Woodworkers and a committee from each plant.

Brother Robert Turner, International Representative for the United Paperworkers of America reports that he has petitioned the N.L.R.B. for elections in Milhiser Bag Company, Richmond, Va. and Chesapeake Corp. West Point, Va.

The writer has petitioned the N.L.R.B. for an election at the Albemarle Paper Mfg. Company, Richmond, Va. for the Foremen.

SEND IN NEWS FROM YOUR LOCAL!

Brother A. B. Emerson Bus. Agt. for Local 284 United Furniture Workers of America reports that elections will be held at the Johnson Carper Furniture Company, in Roanoke, Va. on March 7th and one at the W. M. Bassett Furniture Company in Martinsville, Va. March 18th.

He also reports that Local 284 United Furniture Workers of America reopened their contract on wages with the Gravely Novelty Furniture Company in Martinsville, Va. and have negotiated a 2½¢ per general increase in wages. He also reports that they also reopened their contract on wages at the Morris Novelty Company in Martinsville, Va. and got a 5¢ per hour general increase for the workers in that plant.

Are your members qualified to vote? Make a check in you Local. Be sure that those that are not qualified do so at once and then be sure that they VOTE. The General Assembly is now ANTI-LABOR and we must be in a position to leave several home next election.

PAY YOUR POLL TAX.

REGISTER.

THEN VOTE.

Richmond Industrial Union Council has set up a P.A.C. and expect to play a very prominent part in the Richmond City elections in April and June of this year. Has your Local set up a P.A.C.? You need one and should set up your committee at once and get every member and their friends qualified to vote.

There will be a meeting of the United Labor Legislative Committee, (AFL. CIO. & Railroad Brotherhoods) Monday in Richmond, Va. to map out a program for Political Action for the next two years.

PAY YOUR POLL TAX, REGISTER, THEN VOTE.

VIRGINIA STATE COUNCIL NEWS LETTER

PUBLISHED SEMI-MONTHLY BY VA. STATE CIO ORGANIZING COMMITTEE

Number 38 March 26, 1946

Brother Bernard Hiatt, Int'l Representative for the United Furniture Workers of America reports a victory for CIO at the Johnson-Carper Furniture Company at Roanoke, Virginia. CIO 210 votes no union 123 votes. This was a hard fought campaign with the Company doing everything within their power to keep the Union out. A large measure of the credit for this victory should go to Brother Silas Switzer, Bus. Agt. for Local 11 Textile Workers Union of America who worked night and day along with Brothers, Hiatt, Jack Clark and A. E. Emerson of the Furniture Workers and Brother Lloyd P. Vaughan, CIO Field Representative.

Brother Lloyd P. Vaughan, CIO Field Representative reports that a consent election has been agreed to at the Moore Milling Company in Salem, Va.

Brother Robert W. Turner, Int'l Representative for United Paperworkers of America, reports that a consent election will be held at the Hopper Paper Company in Richmond, Va. on March 28, 1946.

Brother Lloyd P. Vaughan, CIO Field Representative reports that Gualtney & Company, at Smithfield, Va. will not agree to a consent election and a N. L. R. B. hearing must be held and an election will have to be ordered. He also along with Brother Frank Chevz, National Representative for the United Federal Workers of America have set up a Local amoung the employees of the U. S. Veteran's Hospital in Roanoke, Va. and already have a large membership paying dues.

Brother Rex Kildow, National Representative for State, County and Municipal Workers of America is in Roanoke organizing the City employees there.

Brother Bernard Hiatt, International Representative for the United Furniture Workers of America reports that the election that was to be held at W. M. Bassett Furniture Co. Martinsville, Va. on March 18th was postponed until April 18th at the request of the Union.

Brother Thomas R. Linn, Int'l Representative for United Paperworkers of America reports that he has a majority of the employees of the Double Envelope Company, at Roanoke, Va. signed up in the Union and that he has petitioned for an election.

SEND IN NEWS FROM YOUR LOCAL!

WE WANT TO HEAR FROM YOU!

Brother Robert W. Turner, Int'l Representative for United Paperworkers of America, reports that Local 690 United Paperworkers of America has completed negotiations for renewal of their contract with Albemarle Paper Company at Richmond, Va. The workers will receive 12¢ per hour general increase in one plant and 13¢ per hour general increase in another plant also if the Company cuts the hours back from 48 hours to 40 hours the workers will receive an additional increase of 6¢ per hour, he also reports that negotiations between Local 692 United Paperworkers of America and Wortendyke Mfg. Company on renewal of their contract have been completed and these workers will receive 10% general increase with 6 paid holidays and a more liberal vacation.

Brother D. R. Eanes, Bus. Mgr. for the Pittsylvania County Joint Board, Textile Workers Union of America reports that they have completed negotiations for renewal of their contract with the Riverside-Dan River Cotton Mills, Danville, Va. and that the workers in these mills will receive from 5¢ to 25¢ per hour increase with the minimum wage raised from 55¢ per hour to 65¢ per hour. This will mean $3,500,000.00 added to the purchasing power of the people in this area.

Has your Local set up it's P.A.C. yet? Labor needs votes now more than ever before. All our member, their families and friends must pay their poll tax, register and be sure and vote.

Byrd is out to destroy labor in Virginia if we leave him alone. He must be defeated this fall and can only be defeated if CIO members get out the vote.

Richmond Industrial Union Council, PAC is supporting 16 candidate out of 20 seats on the Common Council and 4 out of 6 seats for the Board of Aldermen in Richmond on April 2nd in the primary. What are you doing in your town to cut the roots out from under the Byrd weed?

Number 39 April 6, 1946

Brother Thomas R. Linn, Int'l Representative for the United Paperworkers of America-CIO reports a victory for CIO at Old Colony Box Company at Radford, Va.

Brother Robert W. Turner, Int'l Representative for United Paperworkers of America-CIO reports a victory for CIO at Hopper Paper Company, Richmond, Va. CIO 86 votes no union 9 votes. Negotiations have started for a contract. He also reports that United Paperworkers will have an N. L. R. B. election at the Chesapeake Corp. at West Point, Va. on April 9th & 10th. The AFL has had the bargaining rights in this plant for several years and didn't do a thing for the workers until after the CIO started a campaign in there. In the past six months the workers have received wage increases from 15¢ to 46¢ per hour and we will need all the help that we can get in order to win this election. He also reports that a campaign has been started in the Virginia Fibre Company at Petersburg, Va.

The employees of the Russell Weill Distributing Company at Richmond, Va., have received their Charter and will be known as L. I. U. 1536, they have completed negotiations on their new contract all but wages.

The Foremen at Albamarle Paper Mfg. Company at Richmond have been chartered as L. I. U. 1538 United Foremen of America-CIO. The Company would not allow all the foremen that we asked for to be in the Unit so now we will have to have a hearing and the N. L. R. B. will have to set the Unit.

Brother Lloyd P. Vaughan, CIO Field Representative reports that an election will be held at the Moore Milling Company in Salem, Va. Monday April 8th. We also need help on this election.

Number 40 April 26, 1946

Brother Thomas R. Linn, Int'l Representative for United Paperworkers of America reports a victory for CIO at the Double Envelope Company at Roanoke, Va. CIO 33 votes no union 23 votes.

Brother Robert Turner, Int'l Representative for United Paperworkers of America reports that a campaign has been started to organize the employees of the Virginia Fibre Company, in Petersburg, Va. He also reports that negotiations have been completed on a new contract at the Hopper Paper Co., Richmond, Va., where the Paperworkers recently won an election. This Local has not been chartered but will soon be another paper local in Richmond, Va.

Brother Lloyd P. Vaughan CIO Field Representative reports that he has a campaign to organize the employees of the Clover Creamery in Roanoke, Va., and that the cards are comming in fast and he will be ready to petition for an election later this week.

The Va. CIO Regional Office has started a campaign to organize all the garage employees in Richmond, and has a large organizing Committee and expect a Local of around 800 members very soon.

Local 1536 L.I.U. has completed negotiations on their new contract with Russell Weill Distributing Company, Richmond, Va. The CIO won the election in this plant March 1, 1946 by a vote of 46 to 1 and the workers will receive under their contract 6½¢ general increase equal pay for equal work, 5 paid holidays when not worked, time and one half for all over 8 hours in any one day and double time for Sundays and 5 holidays, 1 and two weeks vacation and all the usual clauses in a CIO contract.

The CIO Organizing Drive will start in May. Every CIO member in Virginia will be expected to do every thing possible to assist this drive. Make contacts in all unorganized plants and turn their names and addresses over to their Local organizing committee who in turn will pass this information on to Brother George Craig who has been appointed by Brother Van A. Bittner, Director of the Drive as District Director for the State of Virginia for the CIO Drive. Who will for the present be located at, 410 Law Bldg., Richmond, Virginia.

VIRGINIA STATE COUNCIL NEWS LETTER

PUBLISHED SEMI-MONTHLY BY VA. STATE CIO ORGANIZING COMMITTEE

Number 41 May 6, 1946

Local 27 Industrial Union Marine Shipbuilder Workers of America wins unfair Labor Practices case against the Norfolk Shipbuilding & Drydock Company of Norfolk, Va. The N.L.R.B. ordered the Company to bargain with the Union and to reinstate 49 workers that they had discharged. The Company must notify the N.L.R.B. within ten days that they have complied with the order.

Mrs. Ethel Barnett, Office Mgr. for Local 675 United Paperworkers of America reports that they won the arbitration case for Roy Philipps and that he will be reinstated by the West Virginia Pulp and Paper Company at Covington, Va. with full senority rights. To the officers that handled this case goes the credit for a job,"Well Done".

The employees of the Hopper Paper Company, Richmond, Va. have completed and ratified their first contract with the Company which includes a Union Shop.

It has been just brought to my attention that the Textile Workers Union of America, Hosiery Division, has within the past month won an election in a Hosiery Mill in Pulaski, Va.

SEND IN NEWS ON CIO ACTIVITIES!

WE WANT TO HEAR FROM YOU!

Brother Ernest B. Pugh, Va. CIO Regional Director has just returned from Atlanta, Georgia where he attended a meeting of all the Southern CIO Regional Directors along with Brother Van A. Bittner Director of the CIO Southern Drive and his staff. Plans were laid at this meeting for the Drive which officially opened in Virginia Sunday May 5th at a meeting held in the A.C.W.A. hall in Richmond, Va. of all full time Representatives and Presidents and Delegates from the various Local Unions in the State. We have a big job to do in Virginia but we can do it if every CIO member will do their part by making contacts in unorganized plants and forwarding the names and addresses to the Regional Office, 410 Law Bldg. Richmond, 19, Va.

Brother Raymond Goff, Int'l Representative for the United Shoe Workers of America reports that they won a victory for CIO at Craddock-Terry Shoe Company, Farmville, Va. CIO 94 votes, AFL 69 votes. The AFL is protesting the election. After the election the Shoe Workers gave a Victory Party for the employees of that plant and practically all of the employees attended.

He also reported that the AFL's petition for an election in the Craddock-Terry Shoe Company's Lynchburg plants was denied by the N.L.R.B. and the Company asked the N.L.R.B. to reconsider the dicision and that was denied on April 24th then the AFL asked the Board to reconsider and were denied May 1st. Brother Goff has now written the Company for a date to start negotiations.

Brother Lloyd P. Vaughan, CIO Field Representative reports that he is petitioning for elections in the Clover Creamery Company at Roanoke, Va. and Roanoke City Mills, Roanoke, Va.

THE DRIVE IS ON, SET UP A ORGANIZING COMMITTEE IN YOUR LOCAL TO WORK WITH THE FIELD REPRESENTATIVES TO THE END THAT WE PROTECT OUR JOBS AND HOMES BY ORGANIZING THE UNORGANIZED.

LETS GO CIO

Fraternally yours,

T. D. Duncan Editor

EMPLOYERS' DIGEST

OF THE FAIR LABOR STANDARDS ACT OF 1938

40-HOUR WEEK EDITION

EXPLANATION. This digest has been prepared as a guide to employers' responsibilities under the Fair Labor Standards Act of 1938. Employers desiring further information concerning specific provisions should consult the Act and the regulations and interpretative bulletins listed on page 6.

PURPOSE

The Fair Labor Standards Act of 1938 (commonly known as the Wage and Hour Law) was enacted by Congress to prevent the use of the channels of interstate commerce to spread and perpetuate labor conditions detrimental to the health, efficiency, and well-being of workers and to wipe out unfair methods of competition based on such labor conditions.

PROVISIONS

Coverage. The wage and hour provisions of the law apply to workers engaged in interstate commerce or in the production of goods for interstate commerce.

Minimum Wages. No worker may be paid at a rate less than 30 cents an hour for the 6 years from October 24, 1939, to October 24, 1945; or less than 40 cents an hour thereafter. The minimum wage for any covered industry may be raised by wage order up to 40 cents an hour before 1945.

Maximum Hours. Each worker must be paid at the rate of at least one and one-half times *his regular rate* of pay for all hours worked over 40 per week after October 24, 1940.

Child Labor. Since October 24, 1938, goods produced in establishments, in or about which "oppressive child labor" has been employed, have been barred from interstate commerce.

RECORDS

Employers Must Keep Records. Clear, accurate, and complete records as required by law are the best protection against employee suits and prolonged inspections.

PENALTIES

The law provides for a fine up to $10,000, or, in the case of a second conviction, imprisonment up to 6 months, or both. It also permits the worker to collect in court double the back wages due him.

Note. The Fair Labor Standards Act *does not cover all employers.* Read paragraphs 1–5 and 35–40 to see whether it applies to you. If doubtful about coverage or compliance, get compliance form AD–85 from the nearest regional office, fill it out and send it back. See list of offices, page 6.

UNITED STATES DEPARTMENT OF LABOR
WAGE AND HOUR DIVISION ★ ★ ★ CHILDREN'S BUREAU

COVERAGE

1 The wage and hour provisions of the Act apply to each employee engaged in—

(*a*) Interstate trade, transportation, communication, or finance.

(*b*) Handling, mining, transporting, in any manner working on, or in any occupation necessary to the production of, goods which move in interstate commerce. [The Act provides certain exemptions. See paragraphs 38–41.]

2 An employee is covered by the Act if even a small percentage of the goods he works on is moved in interstate commerce.

3 Employees within the District of Columbia and the Territories and possessions are dealt with on the same basis as employees working in any of the 48 States.

4 Employees are engaged in the production of goods for interstate commerce where the employer, at the time of production, has reason to believe the goods will be moved in interstate commerce, or will become a part or ingredient of goods (such as buttons on shirts) which will be moved in interstate commerce.

5 The child labor provisions of the Act apply to establishments in the United States, Alaska, Puerto Rico, and Hawaii whose goods are shipped or delivered for shipment in interstate commerce.

WAGES

6 The minimum wage rate required by the Act is—
30 cents an hour for the 6 years from October 24, 1939, to October 24, 1945.[1]
40 cents an hour thereafter.

7 The Administrator may, by order based upon the recommendation of an industry committee, establish for any industry a minimum wage between 30 and 40 cents an hour or set special rates for Puerto Rico. Industry committees are composed of an equal representation of employers, employees, and the public. Employers should make sure whether or not a wage order has been issued applying to their industries. By August 15, 1940, wage orders had been issued setting minima up to 40 cents an hour for pulp and primary paper, leather, and all major divisions of the textile and garment industries, including shoes, hats, and millinery. For details, see list of wage orders, page 6.

8 The Act does not require that employees be paid on an hourly basis. Any method of payment (such as piece rates) may be used, provided it satisfies the wage requirements of the Act.

9 In computing wages for the purposes of the Act, the employer may include the reasonable cost of furnishing his employees with board, lodging, or other facilities if they are customarily so supplied. "Reasonable cost" does not include a profit to the employer or to any affiliated person. The cost of furnishing facilities which are primarily for the benefit or convenience of the employer (such as tools of the trade) may not be included in computing wages.

HOURS

10 The maximum standard workweek provided by the Act is 40 hours per workweek after October 24, 1940.[1] These are not absolute limitations upon the number of hours an employee may work. The Act merely requires that work above these weekly limits shall be paid for at the rate of at least one and one-half times the *employee's regular hourly rate of pay.* [See paragraphs 19–24.]

11 A workweek is seven consecutive 24-hour days. It may begin at any time of any day of the week, but no changes in the workweek may be made for the purpose of evading the overtime provisions of the Act. There is no limitation on the number of hours that may be worked in any one day.

12 There may be no "averaging" over two or more workweeks. Time lost for any reason (sickness, etc.) during one workweek may not be made up in any succeeding workweek without payment at overtime rates for all hours worked in the succeeding week over the statutory maximum.

13 Compensation for overtime must be paid in cash and at the time when the employee customarily receives his compensation. Under certain conditions overtime may be compensated for by a "time off" or a "prepayment" plan. Write for regulations governing use of this plan.

RECORDS

14 Employers covered by any provisions of the Act must keep records, though no definite form is required. The only requirements are the following:

(*a*) Records must be kept for at least 4 years either at the place of employment or at an established central record-keeping office.

(*b*) All such records must be open for inspection and transcription by representatives of the Wage and Hour Division, and they must be in such condition that an inspector can easily obtain the information listed in paragraphs 15 and 16.

[1] From October 24, 1938, to October 24, 1939, the Act set a minimum wage rate of 25 cents an hour and a standard workweek of 44 hours; from October 24, 1939, to October 24, 1940, the standard workweek was 42 hours.

EMPLOYERS MUST KEEP RECORDS

Records should be sufficiently clear and complete to protect employers from employee suits

SAMPLE PAY-ROLL FORM[2] (NO PARTICULAR FORM IS REQUIRED)

Workweek ending ..... Date of payment (*f*) .....

Name (In full) (a)	Social Security Account No.	Hours Worked								Regular Rate of Pay (g)	Wages					
											Earnings			Deductions		Total wages paid (e)
		S (d)	M (d)	T (d)	W (d)	T (d)	F (d)	S (d)	Total hours (d)		At regular rate of pay for total hours worked (h)	Extra for overtime (i)	Total earnings	Federal old-age insurance taxes	Other (itemized)	
1. George Henry Harper	129-99-4231	----	8	8	8	8	8	8	48	62 cents per hour (60 cents per hour plus bonus).	$29.76	$2.48	$32.24	$0.32	--------	$31.92
2. Martha Jane Wilson	154-99-2176	----	8	8	8	8	8	5	45	50 cents per hour ($20 per week of 40 hours).	22.50	1.25	23.75	.24	--------	23.51
3. Henry Miller Hawkins	356-99-4578	----	8	8	8	8	8	7	47	46 cents per hour ($80 per month on a week of 40 hours).	21.62	1.61	23.23	.23	--------	23.00
4. Neil Connor	369-99-7241	----	8	8	10	8	8	8	50	30 cents per hour ($15 per week).	15.00	1.50	16.50	.17	--------	16.33
5. Janet Barber	270-99-1107	----	8	8	8	8	8	6	46	31 cents per hour (P.W., plus bonus).	14.26	.93	15.19	.15	--------	15.04

15 With regard to each employee, except those listed in paragraph 38 (see also paragraph 27), employers must keep the following information:

(*a*) Name in full; (*b*) home address; (*c*) date of birth if under 19; (*d*) hours worked *each workday and each workweek;* (*e*) total wages paid each workweek; (*f*) date of payment; and, in addition to the above, when hours over the statutory maximum (see paragraphs 10–13) are worked by the employee: (*g*) regular hourly rate of pay and basis upon which wages are paid; (*h*) earnings at regular hourly rate of pay for each workweek; and (*i*) *extra* earnings for overtime. With regard to employees listed in paragraph 39 (*a*), the employer need not keep the information listed in (*h*) and (*i*) above.

16 Where the actual cash wage paid is less than the minimum wage required by the Act and the employer is relying upon the furnishing of board, lodging, and other facilities to bring the wage up to the minimum, the records should show the cash wages actually paid and the amount claimed for board, lodging, and other facilities, which can in no case be greater than the cost to the employer.

17 There can be no substitute for an accurate *daily* record of the number of hours *actually worked* by each employee. The posting of a notice specifying the regular hours of work and forbidding overtime "without express official authority" does not release an employer from the obligation to keep a record of hours actually worked.

18 Waiting time constitutes time worked and must be recorded as such, whenever an employee is required to be on duty, on the employer's premises, or at a prescribed workplace, or when the time is too short for the employee to spend it for his own purposes.

Regular Hourly Rate of Pay

19 Rules for computing the regular hourly rate of pay are contained in paragraphs 20–24. Each rule is illustrated on the sample pay roll above.[2]

Agreed Hourly Rate

20 The regular hourly rate of pay is the agreed hourly rate plus production bonuses earned that week (if any) averaged over the number of hours worked that week. Illustration:

1. *George Henry Harper* (see sample pay roll) is paid 60 cents an hour plus a production bonus of 96 cents for the week. For 48 hours' work he earned $29.76 (60×48+96), exclusive of additional compensation for overtime, which gives him an average hourly rate of 62 cents ($29.76÷48). If he had not been paid a production bonus, his regular rate of pay would have been 60 cents.

Weekly or Monthly Wage for Regular Number of Hours

21 The regular hourly rate of pay is the weekly wage, or the monthly wage reduced to a weekly wage, averaged over the regular number of hours per week.

[2] Amounts used are based on time and a half after 40 hours a week.

Production bonuses earned any week should be included in that week's wage. Illustrations:

2. *Martha Jane Wilson* is paid $20 for a regular week of 40 hours. Therefore, her regular hourly rate of pay is $20 divided by 40, or 50 cents an hour.

3. *Henry Miller Hawkins* is paid $80 per month. His regular workweek is 40 hours. Therefore, his regular hourly rate of pay is 12 times $80 ($960 his annual pay) divided by 52 ($18.46 his weekly wage) divided by 40, or 46 cents an hour.

Weekly or Monthly Wage With No Regular Number of Hours

22 Where there is no regular number of hours per week, the regular hourly rate is the weekly wage, or the monthly wage reduced to a weekly wage, divided by the total number of hours actually worked in the week. Illustration:

4. *Neil Connor's* regular rate of pay is $15 a week, but his weekly number of hours fluctuates from week to week. One week he works 37 hours; the next 46, etc. Therefore, his regular hourly rate of pay changes weekly. In the week under consideration he worked 50 hours. His regular hourly rate in that week was $15 divided by 50, or 30 cents an hour.

Piece Work

23 The regular hourly rate of pay is the piece-work earnings (including production bonuses, if any) divided by the total hours worked each week. Illustration:

5. *Janet Barber* is a piece worker who is paid a piece rate plus a production bonus. In the week under consideration, she worked 46 hours and earned a wage of $14.26, including the production bonus. Therefore, her regular hourly rate of pay was $14.26 divided by 46, or 31 cents an hour.

24 The regular hourly rate of pay need not include any figure for extra overtime compensation.

25 *Earnings at regular hourly rate.* Paragraph 15 (*h*) does not include *extra* compensation for overtime. See column (*h*) of the sample pay-roll form.

26 *Extra earnings for overtime.* The extra pay for overtime illustrated in column (*i*) of the sample pay roll was computed by multiplying one-half the regular rate of pay [column (*g*)] by the number of hours over the statutory maximum worked by each employee.

27 An employer shall also keep records, giving only name in full, home address, and occupation, for each employee exempt from the wage and hour provisions of the Act under the exemptions listed in paragraphs 38 (*a*) and (*b*).

28 Special records must be kept for redcaps, employees engaged in industrial homework, those covered by agreements listed in paragraph 40 (*c*), and those who are paid more than one minimum rate during the same workweek. Copies of these requirements may be obtained from the Wage and Hour Division.

29 The signature of a worker on a time or pay-roll record will not relieve his employer from responsibility if the record is inaccurate.

30 Employers are reminded of the record requirements of the Social Security Act and of such State compensation or labor laws to which they may be subject. In many cases employers keeping records pursuant to these laws will have to make only minor adjustments to satisfy the requirements of the Fair Labor Standards Act.

PENALTIES

31 Employees may bring suits themselves or through an agent in any court of competent jurisdiction to recover unpaid minimum wages or unpaid overtime compensation. Employers violating the wage and hour requirements are liable for double the unpaid sums plus court costs and reasonable attorney's fee.

32 The Federal Government may prosecute criminally for violations of the Act, including the discharge of, or discrimination against, any employee who has filed a complaint. Upon conviction the employer may be fined up to $10,000 and, in the case of a second conviction, imprisoned up to 6 months. The Administrator and the Chief of the Children's Bureau may also ask a Federal district court to restrain violations of the Act by injunction.

33 It is unlawful not only to produce goods for interstate commerce in violation of the Act *but also to ship, deliver, or sell in interstate commerce goods so produced.* This is the "hot goods" provision. Any person found with such "hot goods" in his possession, even though he is not the original producer, may be restrained by injunction from shipping these goods in interstate commerce. He may also be subject to the criminal penalties of the Act if he ships them knowing or having reason to believe that they were produced in violation of the wage and hour provisions of the Act.

34 No provision of the Act shall justify an employer in reducing the wage or increasing the hours of work of any of his employees.

CHILD LABOR

35 The child labor provisions of the Act prohibit the shipment or delivery for shipment in interstate commerce of any goods produced in establishments in or about which "oppressive child labor" has been employed within 30 days prior to removal of the goods. "Oppressive child labor" is defined as—

(*a*) Employment of children under 16, except employment of children between 14 and 16 years of age in such nonmining and nonmanufacturing occupations as the Chief of the Children's Bureau determines not to interfere with their schooling, health, or well-being.

(*b*) Employment of children between 16 and 18 years of age, in occupations found, and by order declared, by the Chief of the Children's Bureau to be particularly hazardous or detrimental to their health or well-being.[3]

36 Employers can protect themselves from unintentionally employing a child under the legal age by having on file a Certificate of Age issued in accordance with regulations of the Children's Bureau showing that the child is above the legal age for employment in the occupation in which he is engaged.

37 The following are exempt from the child labor provisions of the Act: (1) Children employed in agriculture while not legally required to attend school; (2) children employed as actors in motion picture or theatrical productions; (3) children under 16 years of age employed by their parents, or persons standing in place of parents, in occupations other than manufacturing or mining.

EXEMPTIONS

Wages and Hours

38 The following are exempt from both the wage and hour provisions of the Act:

(*a*) Employees engaged in a bona fide executive, administrative, professional, or local retailing capacity, or in the capacity of outside salesman.

(*b*) Employees engaged in any retail or service establishment, the greater part of whose selling or servicing is in intrastate commerce.

(*c*) Seamen or agricultural workers; switchboard operators of small telephone exchanges; certain employees engaged in the sea food and fishing industry; employees of airlines, [street, suburban or interurban electric railways, local trolleys or local motorbus carriers],[4] or weekly or semiweekly newspapers with a circulation of less than 3,000, the major part of which is in the county of printing and publication.

(*d*) Persons employed within the area of production engaged in handling, packing, storing, ginning, compressing, canning, pasteurizing, drying, or preparing in their raw or natural state agricultural commodities for market or making dairy products.

Hours Only

39 The following are exempt from only the hour provisions of the Act:

(*a*) Employees of railway or motor[4] carriers which are regulated by the Interstate Commerce Commission.

(*b*) Employees of employers engaged in the first processing of milk into dairy products, in the ginning and compressing of cotton, in the processing of cottonseed, and in the processing of sugar beets, sugar-beet molasses, sugarcane, or maple sap into sugar or sirup (but not the refining of sugar).

Partial Hour Exemptions

40 The following are partially exempt from the maximum hour provisions of the Act:

(*a*) Employees in industries found by the Administrator to be seasonal. They may work up to 12 hours a day or 56 hours a week without payment of overtime rates, for a period or periods not exceeding a total of 14 workweeks in any 1 year.

(*b*) Employees of employers engaged in the first processing, canning, or packing of fresh fruits and vegetables; in the first processing, within the area of production, of agricultural commodities during seasonal operations; or in handling, slaughtering, or dressing poultry or livestock. Such employees are exempt from the maximum hour provisions of the Act for a total of not more than 14 workweeks in any 1 year.

(*c*) Employees working under an agreement, made as a result of collective bargaining by representatives of employees certified as bona fide by National Labor Relations Board. The agreement must provide for an absolute maximum of 1,000 hours' work in 26 weeks or 2,000 hours' work in 52 weeks. In the latter case, there must be a guarantee of a fixed annual wage or continuous employment for either 52 weeks or for 2,000 hours. In either case work over 12 hours a day or 56 hours a week must be paid for at the rate of time and one-half.

Learners, Apprentices, Messengers, Handicapped Workers

41 No learner, apprentice, messenger, or handicapped worker may be employed at less than the minimum wage except under special certificate issued by the Wage and Hour Division in accordance with regulations promulgated by the Administrator.

[3] As of September 1, 1940, occupations in or about explosives plants, the occupations of motor-vehicle driver or helper, and all coal mine work except a few surface occupations had been declared hazardous.

[4] This exemption does not always apply. For further information consult the Wage and Hour Division.

WAGE ORDERS[1]

(Issued as of September 1, 1940)

If your employees work in any occupation necessary[2] to the production of—	*They should be paid at least per hour*
HATS (including hatters' fur)	40 cents.
Straw and Harvest Hats	35 cents.
HOSIERY: *Full-fashioned*	40 cents.
Seamless	32½ cents.
KNITTED OUTERWEAR	35 cents.
KNITTED UNDERWEAR AND COMMERCIAL KNITTING	33½ cents.
LEATHER	40 cents.
MILLINERY	40 cents.
PULP AND PRIMARY PAPER	40 cents.
SHOES	35 cents.
TEXTILES (cotton, rayon, and silk)	32½ cents.
WEARING APPAREL:	
Men's Wear[3] (see footnotes):	
Clothing	40 cents.
Dress shirts, collars, and sleeping wear	32½ cents.
Leather and sheep-lined garments[4]	40 cents.
Rainwear[4]	40 cents.
Single pants and breeches (other than those of 100 percent cotton fabric)	37½ cents.
Single pants of 100 percent cotton fabric, overalls, coveralls, and work shirts	32½ cents.
Sportswear and other odd outerwear[4]	40 cents.
Underwear of woven fabric	32½ cents.
Women's Wear (see footnotes):	
Blouses, shirtwaists, neckwear, and scarfs	35 cents.
Cloaks, suits, and separate skirts[5]	40 cents.
Corsets and allied garments	35 cents.
Dresses	35 cents.
Infants' and children's outerwear	35 cents.
Robes[4]	35 cents.
Underwear, nightwear, and negligees of woven fabric[5]	35 cents.
Washable service apparel (women's and men's)	35 cents.
Accessories (see footnotes):	
Artificial flowers and feathers	35 cents.
Belts[4]	40 cents.
Caps and cloth hats[6]	40 cents.
Covered buttons, and buckles	35 cents.
Garters, suspenders, and armbands	35 cents.
Gloves and mittens (other than work gloves and mittens)	35 cents.
Work gloves and mittens	32½ cents.
Handkerchiefs[4]	32½ cents.
Ladies' handbags[5]	35 cents.
Men's neckwear and scarfs[3]	35 cents.
WOOLEN TEXTILES	36 cents.

[1] None of these rates applies to Puerto Rico.
[2] Includes clerical and service employees, such as stenographers, cleaners, sweepers, porters, etc.
[3] Includes boys'.
[4] Men's, women's, and children's.
[5] Includes children's.
[6] Men's and boys'.

Workers

★

how the WAGE-HOUR LAW affects YOU

TO ALL WORKERS

One of the best ways to enforce any law is to have everyone know what it means. These are the questions which most workers want answered about the Wage and Hour Law (officially called the Fair Labor Standards Act of 1938). Read this pamphlet carefully—it will help you. If you think your pay is less than it should be under the law, get in touch with the nearest Wage and Hour office or with the Wage and Hour Division, United States Department of Labor, Washington, D. C. A list of these offices is on page 16. A form to help you make inquiries or complaints is on page 15.

1st Edition Oct. 1939
2nd Edition Oct. 1940

UNITED STATES DEPARTMENT OF LABOR
WAGE AND HOUR DIVISION
WASHINGTON, D. C.

WORKERS' QUESTIONS

Have I a right to the benefits of the Wage and Hour Law?

Yes... if you are working for an employer who manufactures or processes goods later shipped outside the State.

Example: The Act applies, for instance, to employees (including watchmen, stenographers, etc.) of a furniture manufacturer in Grand Rapids, Mich., making chairs that are later shipped to Toledo, Ohio.

Yes... if you are working for a radio, telephone, telegraph, railroad, bus, or trucking company doing business across State lines.

Yes... if you are working for a wholesaler who either receives goods from outside the State or sells them across State lines.

Unless you are an executive, professional, outside salesman, fisherman, seaman, or farm hand.

Unless you work in a local retail or service establishment, such as a restaurant, hotel, grocery store, etc.

Unless you work for an airline, small weekly or semiweekly county newspaper, local street railway or motorbus company, as a switchboard operator of a small telephone exchange, or in a plant near the farm processing certain farm products for market.

How much should I get if the law applies to my work?

The law sets up "straight time" and "overtime." "Straight time" means the first 40 hours of work in a workweek. Time after 40 hours is called "overtime."

For straight time you should get at least—

30 cents an hour *until* October 24, 1945.*
40 cents an hour *after* October 24, 1945.

You must be paid at least the minimum rates whether you are paid on an hourly, piece rate, or any other basis. Waiting time must be counted as hours actually worked if you are *required* to be on duty, or if the time is too short for you to spend it for your own purposes.

Will I get a minimum higher than 30 cents before 1945?

Yes... if you work in an industry for which a higher rate has been set by the Administrator. He sets these higher rates if he approves the recommendation of an industry committee on which labor, industry, and the public are equally represented. By July 15, 1940, minimum rates between 30 and 40 cents an hour had been set for pulp and primary paper, leather, and every major division of the textile and garment industries, including shoes, hats, and millinery.

---

*Between October 24, 1938, and October 24, 1939, the minimum rate for "straight time" was 25 cents an hour.

If you work in any occupation necessary to the production of—*	*You should get at least per hour†—*
HATS (including hatters' fur)	40 cents
Straw and harvest hats	35 cents
HOSIERY: *Full-fashioned*	40 cents
Seamless	32½ cents
KNITTED OUTERWEAR	35 cents
KNITTED UNDERWEAR AND COMMERCIAL KNITTING	33½ cents
LEATHER	40 cents
MILLINERY	40 cents
PULP AND PRIMARY PAPER	40 cents
SHOES	35 cents
TEXTILES (cotton, rayon, and silk)	32½ cents
WEARING APPAREL:	
Men's Wear[1] (see footnotes):	
Clothing	40 cents
Dress shirts, collars, and sleeping wear	32½ cents
Leather and sheep-lined garments[2]	40 cents
Rainwear[2]	40 cents
Single pants and breeches (other than those of 100-percent cotton fabric)	37½ cents
Single pants of 100-percent cotton fabric, overalls, coveralls, and work shirts	32½ cents
Sportswear and other odd outerwear[2]	40 cents
Underwear of woven fabric	32½ cents
Women's Wear (see footnotes):	
Blouses, shirtwaists, neckwear, and scarfs	35 cents
Cloaks, suits, and separate skirts[3]	40 cents
Corsets and allied garments	35 cents
Dresses	35 cents
Infants' and children's outerwear	35 cents
Robes[2]	35 cents
Underwear, nightwear, and negligees of woven fabrics[3]	35 cents
Washable service apparel (women's and men's)	35 cents
Accessories (see footnotes):	
Artificial flowers and feathers	35 cents
Belts[2]	40 cents
Caps and cloth hats[4]	40 cents
Covered buttons and buckles	35 cents
Garters, suspenders, and armbands	35 cents
Gloves and mittens (other than work gloves and mittens)	35 cents
Work gloves and mittens	32½ cents
Handkerchiefs[2]	32½ cents
Ladies' handbags[3]	35 cents
Men's neckwear and scarfs[1]	35 cents
WOOLEN TEXTILES	36 cents

* Includes clerical and service employees, such as stenographers, cleaners, sweepers, porters, etc.

† These minimum rates do not apply to Puerto Rico—Special rates may be set for Puerto Rico.

[1] Includes boys'.

[2] Men's, women's and children's.

[3] Includes children's.

[4] Men's and boys'.

For overtime you should get at least—

Time and a half your regular hourly rate for all hours over 40 in any week.*

Unless you belong to a union which has an agreement with your employer that he will not work you more than 1,000 hours in 26 weeks; or 2,000 hours a year, guaranteeing you a year's wage. That union must be certified by the National Labor Relations Board. Under these circumstances, your employer has to pay you time and a half only when you work over 12 hours a day or 56 hours a week. Ask your union for further details.

Unless you work in an industry that *the Administrator has found to be seasonal under the law.* Then for a period not longer than *14 weeks a year,* your employer has to pay you time and one-half only if you work over 12 hours a day or 56 hours a week.

Unless you are engaged in first processing, packing, or canning fresh fruits or vegetables, or handling, slaughtering, or dressing livestock or poultry, or closely related work. Then for *14 weeks a year,* you have to be paid only straight time for time worked.

Unless you are engaged in first processing of farm products or in closely related work in a plant that is located near the farm. Then *for 14 weeks* of the year you have to be paid only straight time for time worked.

Unless you are engaged in first processing of milk, ginning or compressing cotton, processing cottonseed, or making raw or beet sugar. Then you have to be paid only straight time for all time worked.

---

*Between October 24, 1939, and October 24, 1940, overtime rates had to be paid after 42 hours. Between October 24, 1938, and October 24, 1939, overtime rates had to be paid after 44 hours.

Unless you are an employee of a railroad or *unless* you are a truck or bus driver whose hours are regulated by the Interstate Commerce Commission. Then the Commission's regulations as to hours are binding rather than the provisions of the Fair Labor Standards Act.

What happens if my employer violates the law?

If your employer is violating the law, the Wage and Hour Division can get a court order preventing him from doing so in the future, or it can prosecute him criminally. He may be fined up to $10,000, and, for a second offense, sent to jail for as long as 6 months.

Can I collect back wages?

You are entitled to sue your employer in court. If violation of the law is proved, *your employer may be compelled to pay you twice the amount due, plus court costs, and a reasonable attorney's fee.* The Wage and Hour Division will explain to you how to do this, if it is necessary. In many cases, however, the Wage and Hour Division has persuaded the employer to pay the back wages due and the workers have not had to go to court to get the money. Talk with the Wage and Hour Division first, and this may be done for you.

What shall I do if I think my pay is less than the law provides?

If you think you are not being paid at least the legal minimum wage or the overtime rates, get in touch with the nearest Wage and Hour Division office (see list on page 16).

Your name will be kept confidential.

If you can, talk personally with someone in a Wage and Hour office; if not, write without delay. Explain exactly how you are paid. The offices are glad to make appointments to see you out of working hours.

Your employer will be violating the law if he discriminates against you or fires you for making a complaint.

What is the Wage and Hour Division doing to enforce the law?

Inspectors of the Division visit plants to enforce the law. They look at time books, time-clock cards, pay rolls, pay checks, and other records of wages and hours. They figure the wages due under the law, to see that they have been paid. These inspectors may ask you questions at any time about the wages you receive and the hours you work. They need all the help you can give them to find out whether or not your employer is obeying the law.

How is overtime figured?

To find out what you should be paid for overtime, you must first calculate your *regular hourly rate of pay.* Then multiply that by one and a half for each hour of overtime (each hour over 40 hours a week). For instance, suppose your *regular hourly rate of pay* is 50 cents an hour and you worked 47 hours last week. One and one-half times your *regular hourly rate of pay* is 75 cents. You worked 7 hours over the limit of 40 hours a week. Therefore, you should be paid at least 7 times 75 cents, or $5.25, for your 7 hours of overtime in addition to "straight time" for the first 40 hours.

How do I figure my regular hourly rate of pay?

Piece rates. If you are paid on a piece-rate basis, you can find your *regular hourly rate of pay* by dividing your week's earnings (including any production bonus) by the number of hours worked that week.

Hourly rate. If you are paid an hourly rate, that hourly rate is your *regular hourly rate of pay.* If you are paid a production bonus in addition to your hourly rate, then you can find your *regular hourly rate of pay* by dividing your week's earnings (including that bonus) by the number of hours you worked that week.

Weekly, semimonthly, or monthly salary. If you are paid a weekly, semimonthly, or monthly salary, you can find your *regular hourly rate of pay* by dividing your weekly wage by the number of hours you worked.

To find your weekly wage, if you are paid a monthly salary, multiply the monthly wage by 12 and divide by 52. For a semimonthly salary, multiply by 24 and divide by 52.

If you work a regular number of hours each week, then you should divide your weekly wage by that regular number of hours in order to find your *regular hourly rate of pay.* This should be done even for weeks when you do not work your regular number of hours.

Can hours be averaged over more than one week?

No. You should be paid one and one-half times your *regular hourly rate of pay* for all hours worked over the limit in *any one* week.

Can my employer avoid paying for overtime actually worked?

No, he cannot, either by posting a notice forbidding overtime "without express official authority" or by making you sign a false or inaccurate time record or by any other means.

Suppose the employer does not keep records?

Sometimes a firm does not keep a record of hours worked and the wages paid. Sometimes its records are not true records. Both are violations of the law. You can, in such cases, help by keeping a record yourself of the hours you work each day, your rate of pay, the dates of your pay days and the amount you receive each pay day. Keep all pay or time slips given you by your employer. This will help the Wage and Hour Division find out whether you have been paid all the law requires. It will help you in case you have to sue your employer. The following is a sample of the record you should keep:

SAMPLE WEEKLY RECORD

Date week began ..... Total week's pay .....

Regular hourly rate of pay ..... How much of this for overtime? .....

Day of the week	Time start work	Time quit for lunch	Time start after lunch	Time quit for day
Sunday				
Monday				
Tuesday				
Wednesday				
Thursday				
Friday				
Saturday				

Are my rights under union agreements and under other wage and hour laws protected?

Union agreements or State or local wage and hour laws are not affected unless they set up lower standards than those in the Act. If a union agreement provides longer hours or less pay, the standards of the Act automatically take the place of these lower standards. The rest of the agreement is not affected. No provision of the Act can justify an employer in reducing your wage or increasing your hours of work.

Can lower rates be paid to learners, apprentices, messengers, and handicapped workers?

No learner, apprentice, messenger, or handicapped worker may be employed at less than the minimum wage except under *special certificate issued by the Wage and Hour Division.*

CHILD LABOR

How does the law apply to young workers?

The law abolishes "oppressive child labor,"* which is defined as employment of a minor—(1) Under 16. However, if he is *between 14 and 16* he may work in certain occupations if the hours and conditions of work are in

*The law prohibits shipments of goods across State lines if they were produced in an establishment in which oppressive child labor was employed.

accordance with regulations issued by the Children's Bureau, United States Department of Labor, Washington, D. C. If interested, write to the Children's Bureau and ask for these regulations. Occupations in which it would be "oppressive child labor" if a minor between 14 and 16 is employed are—

(*a*) Manufacturing, mining, processing occupations (including processing by hand or by machine); (*b*) operation or tending of power-driven machinery (except office machines); elevator or other hoisting apparatus; (*c*) public messenger service; (*d*) occupations declared to be hazardous by the Chief of the Children's Bureau (see below).

(2) Under 18 in occupations declared to be hazardous by the Chief of the Children's Bureau. Up to September 1, 1940, these are. All occupations in or about explosive manufacturing establishments; the occupations of motor vehicle driver or helper and all coal mine work except a few surface occupations.

The child-labor provisions of the law *do not* apply to a young worker—

(1) If he is under 16 and is employed by his parent or person standing in place of the parent, in occupations other than manufacturing or mining; or

(2) If he is employed in agriculture while not legally required to attend school; or

(3) If he is employed as an actor in motion picture or theatrical productions.

FOR FURTHER INFORMATION

If you are in any way doubtful as to whether you are getting the wages or overtime pay due you under the law, answer the questions in the information blank on page 15, and bring or mail it to the nearest field office (see list on p. 16) or to the Wage and Hour Division, United States Department of Labor, Washington, D. C. If you have any questions regarding the child labor provisions of the law, address them to the Children's Bureau, United States Department of Labor, Washington, D. C.

SAMPLE COMPLAINT FORM

What business is your employer engaged in? Manufacturing shirts
(Such as manufacturing, mining, transportation, wholesaling, etc.)

Does his product move out of the State? yes
(Yes or no)

What is your job? Sewing machine operator
(Such as, stitcher of shoes, truck driver, etc.)

How many hours a week were you hired to work? 40

State the wages you received:

Week Ending	*Hours Worked*	*Total Cash Received*	*How Much Was for Overtime*
Nov. 11, 1940	46	$11.50	none
Nov. 18, 1940	48	$12.00	none

Did you receive—Board ☐ Lodging ☐ Other Compensation ☐ in addition to above? no

Your name? Mary Doe Address? 532 Main St, Blanktown, Pa.

EXECUTIVE ORDER NO. 9250 (As amended by E. O. 9381 of Sept. 25, 1943)

PROVIDING FOR THE STABILIZING OF THE NATIONAL ECONOMY

By virtue of the authority vested in me by the Constitution and the statutes, and particularly by the Act of October 2, 1942, entitled "An Act to Amend the Emergency Price Control Act of 1942, to Aid in Preventing Inflation, and for Other Purposes", as amended by the Public Debt Act of 1943 (Public Law 34--78th Congress) as President of the United States and Commander in Chief of the Army and Navy, and in order to control so far as possible the inflationary tendencies and the vast dislocations attendant thereon which threaten our military effort and our domestic economic structure, and for the more effective prosecution of the war, it is hereby ordered as follows:

TITLE I

Establishment of an Office of Economic Stabilization

1. There is established in the Office for Emergency Management of the Executive Office of the President an Office of Economic Stabilization at the head of which shall be an Economic Stabilization Director (hereinafter referred to as the Director).

2. There is established in the Office of Economic Stabilization an Economic Stabilization Board with which the Director shall advise and consult. The Board shall consist of the Secretary of the Treasury, the Secretary of Agriculture, the Secretary of Commerce, the Secretary of Labor, the Chairman of the Board of Governors of the Federal Reserve System, the Director of the Bureau of the Budget, the Price Administrator, the Chairman of the National War Labor Board, and two representatives each of labor, management, and farmers to be appointed by the President. The Director may invite for consultation the head of any other department or agency. The Director shall serve as Chairman of the Board.

3. The Director, with the approval of the President, shall formulate and develop a comprehensive national economic policy relating to the control of civilian purchasing power, prices, rents, wages, salaries, profits, rationing, subsidies, and all related matters -- all for the purpose of preventing avoidable increases in the cost of living, cooperating in minimizing the unnecessary migration of labor from one business, industry, or region to another, and facilitating the prosecution of the war. To give effect to this comprehensive national economic policy the Director shall have power to issue directives on policy to the Federal departments and agencies concerned.

4. The guiding policy of the Director and of all departments and agencies of the Government shall be to stabilize the cost of living in accordance with the Act of October 2, 1942, as amended by the Public Debt Act of 1943; and it shall be the duty and responsibility of the Director and of all departments and agencies of the Government to cooperate in the execution of such administrative programs and in the development of such legislative programs as may be necessary to that

end. The administration of activities related to the National economic policy shall remain with the departments and agencies now responsible for such activities, but such administration shall conform to the directives on policy issued by the director.

TITLE II

Wage and Salary Stabilization Policy

1. No increase in wage rates, granted as a result of voluntary agreement, collective bargaining, conciliation, arbitration, or otherwise, and no decreases in wage rates, shall be authorized unless notice of such increases or decreases shall have been filed with the National War Labor Board and unless the National War Labor Board has approved such increases or decreases.

2. The National War Labor Board shall not approve any increases in the wage rates prevailing on September 15, 1942, unless such increase is necessary to correct maladjustments or inequalities, to eliminate substandards of living, to correct gross inequities, or to aid in the effective prosecution of the war.

Provided, however, that where the National War Labor Board or the Price Administrator shall have reason to believe that a proposed wage increase will require a change in the price ceiling of the commodity or service involved, such proposed increase, if approved by the National War Labor Board, shall become effective only if also approved by the Director.

3. The National War Labor Board shall not approve a decrease in the wages for any particular work below the highest wages paid therefor between January 1, 1942, and September 15, 1942, unless to correct gross inequities and to aid in the effective prosecution of the war.

4. The National War Labor Board shall, by general regulation, make such exemptions from the provisions of this title in the case of small total wage increases as it deems necessary for the effective administration of this Order.

5. No increases in salaries now in excess of $5,000 per year (except in instances in which an individual has been assigned to more difficult or responsible work), shall be granted until otherwise determined by the Director.

6. Except as provided in regulations issued by the Director, no decrease shall be made by any employer in the salary for any particular work below the highest salary paid therefor between January 1, 1942, and September 15, 1942, if the effect of the decrease is to reduce the salary below $5,000 per annum.

7. (Deleted)

8. The policy of the Federal Government, as established in Executive Order No. 017 of January 12, 1942, to encourage free collective bargaining between employers and employees is reaffirmed and continued.

9. Insofar as the provisions of Clause (1) of section 302(c) of the Emergency Price Control Act of 1942 are inconsistent with this order, they are hereby suspended.

TITLE III

Administration of Wage and Salary Policy

1. Except as modified by this Order, the National War Labor Board shall continue to perform the powers, functions, and duties conferred upon it by Executive Order No. 9017, and the functions of said Board are hereby extended to cover all industries and all employees. The National War Labor Board shall continue to follow the procedures specified in said Executive Order.

2. The National War Labor Board shall constitute the agency of the Federal Government authorized to carry out the wage policies stated in this Order, or the directives on policy issued by the Director under this Order. The National War Labor Board is further authorized to issue such rules and regulations as may be necessary for the speedy determination of the propriety of any wage increases or decreases in accordance with this Order, and to avail itself of the services and facilities of such State and Federal departments and agencies as, in the discretion of the National War Labor Board, may be of assistance to the Board.

3. No provision with respect to wages contained in any labor agreement between employers and employees (including the Shipbuilding Stabilization Agreements as amended on May 16, 1942, and the Wage Stabilization Agreement of the Building Construction Industry arrived at May 22, 1942) which is inconsistent with the Policy herein enunciated or hereafter formulated by the Director shall be enforced except with the approval of the National War Labor Board within the provisions of this Order. The National War Labor Board shall permit the Shipbuilding Stabilization Committee and the Wage Adjustment Board for the Building Construction Industry, both of which are provided for in the foregoing agreements, to continue to perform their functions therein set forth, except insofar as any of them is inconsistent with the terms of this Order.

4. In order to effectuate the purposes and provisions of this Order and the Act of October 2, 1942, any wage or salary payment made in contravention thereof shall be disregarded by the Executive Departments and other governmental agencies in determining the costs or expenses of any employer for the purpose of any law or regulation, including the Emergency Price Control Act of 1942 or any maximum price regulation thereof, or for the purpose of calculating deductions under the Revenue Laws of the United States, or for the purpose of determining costs or expenses under any contract made by or on behalf of the Government of the United States.

TITLE IV

Prices of Agricultural Commodities

1. The prices of agricultural commodities and of commodities manufactured or processed in whole or substantial part from any agricultural

commodity shall be stabilized, so far as practicable, on the basis of levels which existed on September 15, 1942 and in compliance with the act of October 2, 1942.

2. In establishing, maintaining or adjusting maximum prices for agricultural commodities or for commodities processed or manufactured in whole or in substantial part from any agricultural commodity, appropriate deductions shall be made from parity price or comparable price for payments made under the Soil Conservation and Domestic Allotment Act, as amended, parity payments made under the Agricultural Adjustment Act of 1938, as amended and governmental subsidies.

3. Subject to the directives on policy of the Director, the price of agricultrual commodities shall be established or maintained or adjusted jointly by the Secretary of Agriculture and the Price Administrator; and any disagreement between them shall be resolved by the Director. The price of any commodity manufactured or processed in whole or in substantial part from an agricultural commodity shall be established or maintained or adjusted by the Price Administrator, in the same administrative manner provided for under the Emergency Price Control Act of 1942.

4. The provisions of sections 3(a) and 3(c) of the Emergency Price Control Act of 1942 are hereby suspended to the extent that such provisions are inconsistent with any or all prices established under this Order for agricultural commodities, or commodities manufactured or processed in whole or in substantial part from an agricultural commodity.

TITLE V

Profits and Subsidies

1. The Price Administrator in fixing, reducing, or increasing prices, shall determine price ceilings in such a manner that profits are prevented which in his judgment are unreasonable or exorbitant.

2. The Director may direct any Federal Department or agency including, but not limited to, the Department of Agriculture (including the Commodity Credit Corporation and the Surplus Marketing Administration), the Department of Commerce, the Reconstruction Finance Corporation, and other corporations organized pursuant to Section 5d of the Reconstruction Finance Corporation Act, as amended, to use its authority to subsidize and to purchase for resale, if such measures are necessary to insure the maximum necessary production and distribution of any commodity, or to maintain ceiling prices, or to prevent a price rise inconsistent with the purposes of this Order.

TITLE VI

General Provisions

1. Nothing in this Order shall be construed as affecting the present operation of the Fair Labor Standards Act, the National Labor Relations Act, the Walsh-Healey Act, the Davis-Bacon Act, or the adjustment procedure of the Railway Labor Act.

2. Salaries and wages under this Order shall include all forms of direct or indirect remuneration to an employer or officer for work or personal services performed for an employer or corporation, including but not limited to, bonuses, additional compensation, gifts, commissions, fees, and any other remuneration in any form or medium whatsoever, (excluding insurance and pension benefits in a reasonable amount as determined by the Director); but for the purpose of determining wages or salaries for any period prior to September 16, 1942, such additional compensation shall be taken into account only in cases where it has been customarily paid by employers to their employees. "Salaries" as used in this Order means remuneration for personal services regularly paid on a weekly, monthly, or annual basis.

3. The Director shall, so far as possible, utilize the information, data, and staff services of other Federal departments and agencies which have activities or functions related to national economic policy. All such Federal departments and agencies shall supply available information, data, and services required by the Director in discharging his responsibilities.

4. The Director shall be the agency to receive notice of any increase in the rates or charges of common carriers or other public utilities as provided in the aforesaid Act of October 2, 1942.

5. The Director may perform the functions and duties and exercise the powers, authority, and discretion conferred upon him by this Order through such officials or agencies, and in such manner, as he may determine. The decision of the Director as to such delegation and the manner of exercise thereof shall be final.

6. The Director, if he deems it necessary, may direct that any policy formulated under this Order shall be enforced by any other department or agency under any other power or authority which may be provided by any of the laws of the United States.

7. The Director, who shall be appointed by the President, shall receive such compensation as the President shall provide, and within the limits of funds which may be made available, may employ necessary personnel and make provision for supplies, facilities and services necessary to discharge his responsibilities.

FRANKLIN D. ROOSEVELT

THE WHITE HOUSE

October 3, 1942

EXECUTIVE ORDER NO. 9017

Establishment of the National War Labor Board

WHEREAS by reason of the state of war declared to exist by joint resolutions of the Congress, approved December 8, 1941 and December 11, 1941, respectively, (Public Laws Nos. 328, 331, 332, 77th Congress), the national interest demands that there shall be no interruption of any work which contributes to the effective prosecution of the war; and

WHEREAS as a result of a conference of representatives of labor and industry which met at the call of the President on December 17, 1941, it has been agreed that for the duration of the war there shall be no strikes or lockouts, and that all labor disputes shall be settled by peaceful means, and that a National War Labor Board be established for the peaceful adjustment of such disputes;

NOW, THEREFORE, by virtue of the authority vested in me by the Constitution and the statutes of the United States, it is hereby ordered:

1. There is hereby created in the Office for Emergency Management a National War Labor Board, hereinafter referred to as the Board. The Board shall be composed of twelve special Commissioners to be appointed by the President. Four of the members shall be representative of the public; four shall be representative of employees; and four shall be representative of employers. The President shall designate the Chairman and Vice-Chairman of the Board from the members representing the public. The President shall appoint four alternate members representative of employees and four representatives of employers, to serve as Board members in the absence of regular members representative of their respective groups. Six members or alternate members of the Board, including not less than two members from each of the groups represented on the Board, shall constitute a quorum. A vacancy in the Board shall not impair the right of the remaining members to exercise all the powers of the Board.

2. This Order does not apply to labor disputes for which procedures for adjustment or settlement are otherwise provided until those procedures have been exhausted.

3. The procedures for adjusting and settling labor disputes which might interrupt work which contributes to the effective prosecution of the war shall be as follows: (a) The parties shall first resort to direct negotiations or to the procedures provided in a collective bargaining agreement. (b) If not settled in this manner, the Commissioners of Conciliation of the Department of Labor shall be notified if they have not already intervened in the dispute. (c) If not promptly settled by conciliation, the Secretary of Labor shall certify the dispute to the Board; provided, however, that the Board in its discretion after consultation with the Secretary may take jurisdiction of the dispute on its own motion. After it takes jurisdiction, the Board shall finally determine the dispute, and for this purpose may use mediation, voluntary

arbitration, or arbitration under rules established by the Board.

4. The Board shall have power to promulgate rules and regulations appropriate for the performance of its duties.

5. The members of the Board (including alternates) shall receive necessary traveling expenses, and, unless their compensation is otherwise prescribed by the President, shall receive in addition to traveling expenses $25.00 per diem for subsistence expense on such days as they are actually engaged in the performance of duties pursuant to this Order. The Board is authorized to appoint and fix the compensation of its officers, examiners, mediators, umpires, and arbitrators; and the Chairman is authorized to appoint and fix the compensation of other necessary employees of the Board. The Board shall avail itself, insofar as practicable, of the services and facilities of the Office for Emergency Management and of other departments and agencies of the Government.

6. Upon the appointment of the Board and the designation of its Chairman, the National Defense Mediation Board established by Executive Order No. 8716 of March 19, 1941, shall cease to exist. All employees of the National Defense Mediation Board shall be transferred to the Board without acquiring by such transfer any change in grade or civil service status. All records, papers, and property, and all unexpended funds and appropriations for the use and maintenance of the National Defense Mediation Board shall be transferred to the Board. All duties with respect to cases certified to the National Defense Mediation Board shall be assumed by the Board for discharge under the provisions of this Order.

7. Nothing herein shall be construed as superseding or in conflict with the provisions of the Railway Labor Act (Act of May 20, 1926, as amended, 44 Stat. 577; 48 Stat. 926, 1185; 49 Stat. 1169; 45 U. S. Code 151), the National Labor Relations Act (Act of July 5, 1935, 49 Stat. 457; 29 U. S. Code 151 et seq.), the Fair Labor Standards Act (Act of June 25, 1938; 52 Stat. 1060; 29 U. S. Code 201 et seq.), and the Act to provide conditions for the purchase of supplies, etc., approved June 30, 1936 (49 Stat. 2036; 41 U. S. Code, sections 35-45), or the Act amending the Act of March 3, 1931 relating to the rate of wages for laborers and mechanics, approved August 30, 1935 (49 Stat. 1011; 40 U. S. Code, Section 276 et seq.)

FRANKLIN D. ROOSEVELT

THE WHITE HOUSE

January 12, 1942

GENERAL ORDERS ISSUED BY THE NATIONAL WAR LABOR BOARD*
(Revised 10/20/43)

GENERAL ORDER NO. 1

(Relates to Directive Orders issued by the War Labor Board prior to October 3, 1942.)

GENERAL ORDER NO. 2

(Procedures established by the War Labor Board dated January 12, 1942 relating to the adjustment of labor disputes under Executive Order 9017 remain in ful force.)

GENERAL ORDER NO. 3

(a) The National War Labor Board hereby approves all increases in wage rates which were put into effect on or before October 3, 1942. Such approval includes increases first reflected in a payroll subsequent to October 3, 1942, if app cable to work done, and provided for by written agreement, or formally determined a communicated to the employees, on or before that date. An adjustment taking effect after October 3, 1942, or, regardless of its effective date, resulting from the award or decision of an arbitrator or referee made after October 3, 1942, is howeve subject to the approval of the Board, although the agreement providing therefor, or the order or agreement for arbitration or reference, may have been made prior to th date.

(b) All such increases shall be subject to the right of the Board to review and to order the discontinuance of further payment of all or part thereof.

GENERAL ORDER NO. 4

(a) Wage adjustments made by employers who, at the time the adjustment i agreed to, or if not made by agreement, at the time it is placed into effect, emplo a total of not more than eight individuals in all their plants or units, are exempt from the provisions of Executive Order 9250 October 3, 1942, and Executive Order No 9328 of April 8, 1943.

(b) Unless expressly extended, the exemption granted by this Order shall not apply to employers whose employees' wages, hours, or working conditions have been established or negotiated on an industry, association, area, or other similar basis, by a master contract, or similar or identical contracts.

(c) The exemption granted by this Order shall not apply to an employer w during any given year following October 3, 1942, in the case of wages, or October 2 1942, in the case of salaries, has made adjustments affecting eight specific employ

*Due to their limited applicability the complete texts of the following General Orders are not included in this release: 1, 2, 8, 11, 12-B, 14, 17, 18, 19, 20, 21, 23, 24, 25-A, 27, 28, 29. Brief notations regarding their contents are included in each case. Complete texts of any of these General Orders will be supplied upon request by offices of the Wage and Hour and Public Contracts Division.

(d) The Regional War Labor Boards may recommend to the National War Labor Board such exceptions to the Provisions of this Order as are necessary to effectuate the wage stabilization policies of the National War Labor Board, which exceptions, approved by the National War Labor Board, shall, unless otherwise specified, apply only within the territorial jurisdiction of the Regional Board recommending them.

GENERAL ORDER NO. 5

Subject to the requirements of General Order No. 31, wage adjustments may be made in wage rates of individual employees, without approval of the National War Labor Board, if they are incident to the application of the terms of a wage agreement which existed previous to or has been approved since October 3, 1942, or incident to an established or approved wage rate schedule covering the work assignments of employees and are made as a result of:

(a) individual promotions or reclassifications

(b) individual merit increases within established rate ranges

(c) operation of an established plan of wage increases based upon length of service within established rate ranges

(d) increased productivity under piece-work or incentive plans

(e) operation of an apprentice or trainee system

Wage adjustments made under this Order shall not result in any appreciable increase of the level of production costs and shall not furnish a basis either to increase prices or to resist otherwise justifiable reductions in prices.

Interpretation No. 1 to General Order No. 5

The fixing of a piece rate which was theretofore set only tentatively for trial purposes, and the re-setting of a piece-rate which was found to have been set in the first instance so as to yield less than the regularly established or normal amount prevailing in the plant for that type of job, are each "wage adjustments ... incident to the application of the terms of an established wage agreement or to established wage rate schedules" within the meaning of General Order No. 5, and may therefore be made without approval of the National War Labor Board.

GENERAL ORDER NO. 6

(a) The hiring of an individual at a wage rate in excess of the rate previously established in the plant for employees of similar skill and productive ability within the classification in which the individual is employed is a "wage increase" within the meaning of Executive Order No. 9250.

(b) If a wage rate or range of rates for a job classification has not theretofore been established by the employer for the plant involved, the rate or rate range should bear the same relation to rates or ranges of rates for similar classifications in the area as the existing rates or rate ranges in the plant bear to comparable rates or rate ranges in the area; provided, however, that schedules covering new establishments must be submitted for approval as provided in General Order No. 31.

GENERAL ORDER NO. 6-A

General Order No. 6, issued by the National War Labor Board on October 20, 1942, shall apply also to salaries subject to the jurisdiction of the Board. (For definition of such salaries, see General Order No. 9.)

Interpretation No. 1 to General Order No. 6

1) The creation of a new job classification in an existing plant.

a) Major considerations to be borne in mind in making rulings in these cases are that the rates for the new jobs should bear a direct relation to and be in balance with the existing rate structure in the plant. If comparison with other rates in the plant is not appropriate, then the new rates should bear the same relation to rates for similar classifications in the area as the existing rates in the plant bear to comparable rates in the area.

b) In these cases of creating new job classifications in existing plants the local Wage and Hour offices, guided by the above considerations and with the approval of the appropriate Wage and Hour Regional Director, may make final rulings except in unusual circumstances, for example where it is proposed to set up in an existing plant a new department of substantial size. In such exceptional cases, the application for a ruling should be transmitted by the local Wage and Hour office to the War Labor Board Regional Director and there be processed as set out below.

2) The establishment of a new plant.

a) Whether in a given case it would unstabilize wages in the area to permit a particular employer to fix the rates for a new plant at any level up to the maximum being paid in the area, or whether he should be permitted to pay only the average, or less than the average, will depend on his traditional wage history in relation to the wages of the industry generally, or of the area if he has theretofore operated in the area, the nature of the work in which he is engaged, the rates being paid for comparable work in comparable establishments, and other pertinent factors.

b) Applications in these cases should be transmitted, without a ruling by the local Wage and Hour office but with such information as said office may deem helpful, to the War Labor Board Regional Director. In his discretion the Regional Director may rule on the case or refer it for a ruling to a tri-partite panel. If the new plant is of substantial size and will employ a large proportion of skilled labor, the Regional Director should refer the case to a panel.

c) It will be proper and sometimes necessary for the Regional Director or the panel to hold hearings relative to the proper level at which the applicant's rates for the new plant should be fixed. To such a hearing should be invited interested representatives of industry and labor.

3) In all cases the applicant should show the data on the basis of which the proposed rates were determined.

GENERAL ORDER NO. 7

Since Title VI, Section 1 of Executive Order No. 9250, dated October 3, 1942, states that "nothing in this Order shall be construed as affecting the presen operation of the Fair Labor Standards Act," and since statutes and orders of the duly constituted authorities of the several states fixing minimum rates for certain types of workers carry out the true purposes and intent of the Fair Labor Standards Act, and are designed and intended to eliminate substandards of living within the meaning of Section 2 of Title II of Executive Order No. 9250, the National War Labo Board hereby approves increases in wages and salary rates made in compliance with such statutes and orders, provided, however, that if any changes in such statutes or orders are made or promulgated after April 8, 1943, increases directed thereby which would result in a wage or salary rate in excess of 50¢ per hour, may not be made without the approval of the Board.

GENERAL ORDER NO. 8

(This General Order relates to adjustments of wages or salaries paid in territories and possessions of the United States, except Alaska.)

GENERAL ORDER NO. 9

Adjustments in Salaries Totalling Not in Excess of $5,000 Per Annum

I. Jurisdiction of the National War Labor Board

Section 4001.2 of Part 4001 "Regulations Relating to Wages and Salaries," issue on October 27, 1942 by the Economic Stabilization Director and approved by the Pres dent provides in part that the National War Labor Board "shall have authority to determine whether any ... salary payments to an employee totalling in amount not in excess of $5,000 per annum where such employee

(a) in his relations with his employer is represented by a duly recognized or certified labor organization, or

(b) is not employed in a bona fide executive, administrative or professional capacity,

are made in contravention of the Act of Congress of October 2, 1942, or any ruling, orders or regulations promulgated thereunder."

In other words the Board has jurisdiction over the adjustment of salaries up to $5,000 a year, except for those employees employed in a bona fide executive, admini trative or professional capacity who are not represented by duly recognized or certified unions.

Section 4010.7 of said Regulations provides that "in the case of a salary rate of $5,000 or less per annum existing on the date of the approval of these regulati by the President" (namely, October 27, 1942) no increase shall be made without the prior approval of the Board.

The Board hereby defines what is meant by "employed in a bona fide executive, administrative or professional capacity"*.

Executive

The term "employed in a bona fide executive capacity" shall mean any employee --

(A) whose primary duty consists of the management of the establishment in which he is employed or of a customarily recognized department or subdivision thereof, and

(B) who customarily and regularly directs the work of other employees therein, and

(C) who has the authority to hire or fire other employees or whose suggestions and recommendations as to the hiring or firing and as to the advancement and promotion or any other change of status of other employees will be given particular weight, and

(D) who customarily and regularly exercises discretionary powers, and

(E) who is compensated for his services on a salary basis at not less than $30 per week (exclusive of board, lodging, or other facilities), and

(F) whose hours of work of the same nature as that performed by employees not employed in an executive, administrative or professional capacity do not exceed 20 per cent of the number of hours worked in the workweek by the employees under his direction; provided that this subsection (F) shall not apply in the case of an employee who is in sole charge of an independent establishment or a physically separated branch establishment.

Administrative

The term "employed in a bona fide administrative capacity" shall mean any employee-

(A) who is compensated for his services on a salary or fee basis at a rate of not less than $200 per month (exclusive of board, lodging or other facilities), and

(B) (1) who regularly and directly assists an employee employed in a bona fide executive or administrative capacity (as such terms are defined in these regulations), where such assistance is nonmanual in nature and requires the exercise of discretion and independent judgment: or

---

*For the convenience of employers and employees who have been accustomed to the practices prevailing under the Fair Labor Standards Act, these definitions have been taken from the regulations promulgated by the Wage & Hour Administrator, pursuant to Section 13(a)(1) of the Fair Labor Standards Act of 1938 (52 Stat. 1060), but no provisions of that Act or of any regulations issued thereunder are in any way applicable to the regulations and orders of the National War Labor Board.

(2) who performs under only general supervision, responsible nonmanual office or field work, directly related to management policies or general business operation, along specialized or technical lines requiring special training, experience, or knowledge, and which requires the exercise of discretion and independent judgment: or

(3) whose work involves the execution under only general supervision of special nonmanual assignments and tasks directly related to management policies or general business operations involving the exercise of discretion and independent judgment: or

(4) who is engaged in transporting goods or passengers for hire and who performs, under only general supervision, responsible outside work of a specialized or technical nature requiring special training, experience, or knowledge, and whose duties require the exercise of discretion and independent judgment.

Professional

The term "employed in a bona fide professional capacity" shall mean any employee who is--

(A) engaged in work--

(1) predominantly intellectual and varied in character as opposed to routine mental, manual, mechanical, or physical work, and

(2) requiring the consistent exercise of discretion and judgment in its performance, and

(3) of such a character that the output produced or the result accomplished cannot be standardized in relation to a given period of time, and

(4) whose hours of work of the same nature as that performed by employees not employed in an executive, administrative or professional capacity do not exceed 20 per cent of the hours worked in the workweek by such employees; provided that where such non-professional work is an essential part of and necessarily incident to work of a professional nature, this subsection (4) shall not apply, and

(5) (a) requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study, as distinguished from a general academic education and from an apprenticeship, and from training in the performance of routine mental, manual, or physical processes; or

(b) predominantly original and creative in character in a recognized field of artistic endeavor as opposed to work which can be produced by a person endowed with general manual or intellectual ability and training, and the result of which depends primarily on the invention, imagination, or talent of the employee, and

(B) Compensated for his services on a salary or fee basis at a rate of not less than $200 per month (exclusive of board, lodging, or other facilities); provided that this subsection (B) shall not apply in the case of an employee who is the holder of a valid license or certificate permitting the practice of law or medicine or any of their branches and who is actually engaged in the practice thereof.

II. Effective Date of the Board's Jurisdiction

Pursuant to Section 4001.6 of the said Regulations, increases in salaries which by written agreement executed on or before October 27, 1942, or by formal action communicated to the employees, on or before October 27, 1942, were made applicable to work done prior to October 27, 1942, do not come within the jurisdiction of the Board, notwithstanding such increases are first reflected in a payroll subsequent to October 27, 1942.

III. Salary Increases Which Do Not Require Board Approval

Subject to the requirements of General Order No. 31, salary adjustments may be made in salary rates of individual employees over which the Board has jurisdiction without the approval of the Board, if they are incident to the application of the terms of a salary agreement which existed previous to or has been approved since October 27, 1942, or incident to an established or approved salary rate schedule and are made as a result of:

(a) individual promotions or reclassifications

(b) individual merit increases within established rate ranges

(c) operation of an established plan of salary increases based on length of service within established rate ranges

(d) increased productivity under incentive plans

(e) operation of an apprentice or trainee system, or

(f) such other reasons, or circumstances as may be prescribed in orders, rulings, or regulations, promulgated under the authority of these regulations.

Salary adjustments made under this order shall not result in any appreciable increase of the level of production costs and shall not furnish a basis either to increase prices or to resist otherwise justifiable reductions in prices.

IV. Exempt Employers

Pursuant to Section 4001.11 of the said Regulations salary adjustments made by employers who employ not more than eight individuals are exempted from the provisions of Sections 4001.6, 4001.7 and 4001.8 of the said Regulations and may therefore be made without the approval of the National War Labor Board.

V. Statutory Salaries and Wages

The said Regulations, pursuant to Section 4001.13 thereof, are not applicable to any salary or wages paid by the United States, any state or political subdivision thereof, the District of Columbia, or any agency or instrumentality of any one or more of the foregoing where the amount of such salary or wages is fixed by statute. Adjustment in such salaries or wages may therefore be made without the approval of the National War Labor Board.

VI. Decreases in salaries of Less than $5,000 Over Which the National War Labor Board has Jurisdiction as Defined in Section I of This Order.

Pursuant to Section 4001.7 of the said Regulations, no decrease in a salary rate paid to an employee for any particular work, and over which the National War Labor Board has jurisdiction as defined in Section I of this Order, may be made by the employer below the highest salary rate paid for such work between January 1, 1942 and September 15, 1942, without the prior approval of the Board.

GENERAL ORDER NO. 10

The payment to employees, whose wage or salary increases are subject to the jurisdiction of the National War Labor Board, of a bonus, fee, gift, commission or other form of compensation customarily paid to such employees in the past may be continued without the approval of the National War Labor Board provided that,

(a) if in a fixed amount, the total amount so paid to an employee during the current bonus year does not exceed the total so paid to an employee for like work during the preceding bonus year, or

(b) if computed on a percentage, incentive or other similar basis, the rate and the method of computation are not changed in the current bonus year so as to yield a greater amount than that in the preceding bonus year, but a greater amount when resulting from the same rate and method of computation may be paid.

GENERAL ORDER NO. 10-A

A bonus payment made by an employer to an employee severing his employment for the immediate purpose of entering the armed forces of the United States does not require the approval of the National War Labor Board.

GENERAL ORDER NO. 11

(Permits employers who in good faith gave unauthorized increases on or before November 7, 1942 to file application with the War Labor Board on or before December 1, 1942, for retroactive approval.)

GENERAL ORDER NO. 12-B

(Supersedes General Orders No. 12 and No, 12-A)

(This General Order relates to wage and salary adjustments by states, their political subdivisions, or any agency or instrumentality thereof.)

GENERAL ORDER NO. 13

A. Title III, Section 3 of Executive Order No. 9250 of October 3, 1942, provides: "The National War Labor Board shall permit ... the Wage Adjustment Board for the Building Construction Industry ... to continue to perform its functions ... except insofar as any of them is inconsistent with the terms of this order." Pursuant thereto, the Wage Adjustment Board, constituted as hereinafter described, shall continue to perform the duty ascribed to it by Administrative Order No. 101, as amended, of the Secretary of Labor, and by the Wage Stabilization Agreement of May 22, 1942, between the Building and Construction Trades Department of the American Federation of Labor and Several Government Agencies, all in accordance with the further provisions of this order.

B. The Wage Adjustment Board for the Building Construction Industry shall consist of nine members, of whom three shall represent labor, three shall represent industry, and three, including the Chairman, shall represent the public.

C. Applications for approval of revision of rates subject to the Wage Stabilization Agreement of May 22, 1942, which revision would otherwise require the approval of the National War Labor Board, shall be submitted for approval to the Wage Adjustment Board. In acting upon such applications, the Wage Adjustment Board shall be subject both to the provisions of the Wage Stabilization Agreement of May 22, 1942, and to the requirements of the national wage stabilization program, as set forth in paragraph F hereof.

D. The Wage Adjustment Board for the Building Construction Industry shall, in addition to the powers set forth in paragraphs A and C hereof, have jurisdiction over labor disputes and voluntary wage or salary adjustments involving persons employed in the building construction industry (as hereinafter defined) who are not subject to the Wage Stabilization Agreement of May 22, 1942. The Wage Adjustment Board shall have power, subject to review by the National War Labor Board as provided in paragraph K, hereof, (1) to hear and issue directive orders, in labor dispute cases, and (2) to make final rulings on voluntary wage and salary adjustments requiring the approval of the National War Labor Board.

E. The jurisdiction of the Wage Adjustment Board hereunder shall, as heretofore, be limited to mechanics and laborers in the building and construction industry employed directly upon the site of the work.

F. In the performance of its duties hereunder, the Wage Adjustment Board, in addition to all pertinent policies of the National War Labor Board and the Director of Economic Stabilization, heretofore or hereafter announced, shall conform to the following principles and to any modification thereof hereafter promulgated by the National War Labor Board:

1. General considerations. In acting upon revision of wage rates, in dispute or voluntary cases, the Wage Adjustment Board is subject both to the provisions of the Wage Stabilization agreement of May 22, 1942, and to the requirements of the national wage stabilization policy. Approvable adjustments in such rates must meet both sets of requirements.

2. Sound and tested rates. The provisions of the May 12 supplement to Executive Order No. 9328 with respect to "brackets of sound and tested going rates" are inapplicable to the Building Construction Industry.

3. Little Steel. The Little Steel formula, as heretofore defined by the National War Labor Board, shall be applied by the Wage Adjustment Board in the following manner:

(a) No employee or group of employees is entitled automatically to a Little Steel adjustment.

(b) Generally, employees enjoying relatively high rates of pay should receive a smaller percentage adjustment than those receiving lower rates of pay.

(c) In applying the Little Steel formula to the wage rates for a particular craft, some or all of the full 15% otherwise allowable should be withheld where allowance of the full amount would have an unstabilizing effect on wages in the industry or area. This limitation should be invoked when the wage rates of the employees involved are relatively high compared to the wage rates of other employees in related work, and when the formula is applied to individual occupational groups in the highest wage brackets.

(d) No adjustment may be made which is in excess of the amount allowable under the Little Steel formula notwithstanding that the final rate resulting is below an appropriate Davis-Bacon rate.

4. Substandards. The Wage Adjustment Board may approve adjustments which are "clearly necessary to correct substandards of living," in accordance with the provisions of Executive Order No. 9328 and the May 12 Supplement.

5. Critical Needs of War Production. In rare and unusual cases adjustments not permissible within the above principles, which are, in the opinion of the Wage Adjustment Board, necessary to the critical needs of war production, shall be submitted through the National War Labor Board for the approval of the Economic Stabilization Director.

G. In the handling of dispute cases, the Wage Adjustment Board shall comply with all appropriate provisions of the "Jurisdiction and Procedure of Regional War Labor Boards," of April 15, 1943, as amended, and with the "Rules for Conduct of Hearings Under the War Labor Disputes Act," and all other pertinent rules of procedure of the National War Labor Board that may be hereafter announced.

H. In accordance with the requirements of Executive Orders No. 9250 and 9328 and the Supplement thereto of May 12, 1943, issued by the Director of Economic Stabilization, any wage or salary adjustment approved or order

by the Wage Adjustment Board "which may furnish the basis either to increase price ceilings or to resist otherwise justifiable reductions in price ceilings," or, if no price ceilings are involved, which may increase the costs to the government of a product or service being furnished under a procurement contract, shall become effective only if also approved by the Director of Economic Stabilization. Notice to this effect shall be contained in all rulings and orders requiring this approval which are issued by the Wage Adjustment Board.

I. All applications for the revision or adjustment of wage rates within the jurisdiction of the Wage Adjustment Board shall be filed directly with the Wage Adjustment Board, Washington, D. C., Requests for the revision of wage rates subject to the Wage Stabilization Agreement of May 22, 1942, which are presented by local labor organizations affiliated with the Building and Construction Trades Department of the American Federation of Labor, shall be filed only with the approval of the international or national labor organization, and shall be submitted through and approved by the Building and Construction Trades Department of the American Federation of Labor.

J. (1) All applications for the voluntary adjustment or revision of wage rates shall contain, or the Wage Adjustment Board shall, before acting on the application, procure, a statement by the employer as to whether the adjustment or revision if approved (a) may furnish the basis to increase price ceilings or (b) may furnish the basis for an application by the employer for an increase to the government in the price of any product or service. If the statement is in the affirmative as to (a), the Wage Adjustment Board shall send to the Office of Price Administration a copy of the application and a copy of its ruling at the time of issuance thereof. If the statement is in the affirmative as to (b) and an adjustment of the type that requires the approval of the Economic Stabilization Director is approved by the Wage Adjustment Board, the Wage Adjustment Board shall send to the appropriate procurement agency of the government a copy of its ruling at the time of issuance thereof.

(2) In any wage dispute case where it appears that the wage adjustment recommended or ordered may furnish the basis to increase price ceilings, the Wage Adjustment Board shall send to the Office of Price Administration a copy of the recommendation of its panel or hearing officer at the time of its transmittal to the parties and of its directive order when issued. In any wage dispute case where it appears that the wage adjustment ordered may furnish the basis for an application by the employer for an increase to the government in the price of any product or service and the adjustment is of the type that requires the approval of the Economic Stabilization Director, the Wage Adjustment Board shall send to the appropriate procurement agency of the government a copy of its directive order when issued.

(3) In all cases where the approval of the Director of Economic Stabilization is required, the Wage Adjustment Board shall, after its ruling or order is issued, send the case to the National War Labor Board for transmittal to the Director of Economic Stabilization. The Wage Adjustment Board shall, upon being notified, advise the parties of the action taken by the Office of Price Administration or by the Director of Economic Stabilization.

K. All rulings of the Wage Adjustment Board on wage and salary adjustments, and all directive orders of the Wage Adjustment Board in dispute cases, shall have the same effect, and be subject to the same provisions for stay and review by the National War Labor Board, as rulings and orders of the Regional War Labor Boards, as set forth in Section VII of the "Jurisdiction and Procedure of Regional War Labor Boards," as amended.

L. The Wage Adjustment Board shall transmit regularly to the National War Labor Board copies of its decisions and rulings hereunder, which, when issued, shall be made available to the public, and such additional data and report as the National War Labor Board may from time to time require.

GENERAL ORDER NO. 14

(This General Order relates to wage and salary adjustments for civilian employees of the War Department, the Army Exchange Service, and government-owned, privately operated facilities of the War Department.)

GENERAL ORDER NO. 15

Where under the provisions of a bona fide collective agreement there has been established an impartial chairman, umpire or arbitrator whose duties include the fixing of rates for new jobs, his decisions so rendered need not be submitted for approval to the National War Labor Board, provided that:

(1) The rate for each new job shall be fixed in an amount which is directly related to and in balance with the established rates of the other jobs covered by the agreement, and shall be consistent with the Board's Wage Stabilization Policy of November 6, 1942.

(2) A bi-weekly report of rates so fixed shall be transmitted to the Division of Review, Analysis and Research of the National War Labor Board together with sufficient information to establish the aforesaid relationship and balance.

(3) Such decisions shall be subject to the Board's ultimate power of review but any modification or reversal thereof will not be retroactive.

(4) The establishment of such rates should not result in any substantial increase of the level of costs and shall not furnish a basis either to increase price ceilings of the commodity or service involved or to resist otherwise justifiable reductions in such price ceilings.

GENERAL ORDER NO. 16

Adjustments which equalize the wage or salary rates paid to females with the rates paid to males for comparable quality and quantity of work on the same or similar operations, and adjustments in accordance with this policy which recognize or are based on differences in quality or quantity of work performed, may be made without approval of the National War Labor Board, provided that:

(1) Such adjustments are reported, when made, to the Division of Review, Analysis and Research of the National War Labor Board together with sufficient information to show that they are in accordance with the policy referred to above;

(2) Such adjustments shall be subject to the Board's ultimate power of review, but any modification or reversal thereof will not be retroactive

(3) Such adjustments shall not furnish a basis either to increase price ceilings of the commodity or service involved or to resist otherwise justified reductions in such price ceilings.

GENERAL ORDER NO. 17

(Authorizes the Office of Price Administration to establish area pay scales for certain of its employees.)

GENERAL ORDER NO. 18

(Authorizes the Navy Department to pass on wage and salary adjustments of its civilian employees.)

GENERAL ORDER NO. 19

(Procedure relative to the approval of adjustments in the rates of pay of employees of the Federal Reserve System.)

GENERAL ORDER NO. 20

(Procedure relative to the approval of adjustments in the rates of pay of employees of the U. S. Employment Service.)

GENERAL ORDER NO. 21

(Authorizes the Department of Interior to pass on wage and salary adjustments for certain of its employees.)

GENERAL ORDER NO. 22

(A) No clause contained in any labor agreement, commonly known as an "escalator clause", relating to wages or salaries subject to the jurisdiction of the National War Labor Board regardless of when the agreement was made, which provides for an adjustment in wage rates after October 3, 1942, or an adjustment in salary rates after October 27, 1942, because of changes in the cost of living, shall be enforced, where such adjustment would result in rates in excess of fifteen per cent above the average straight time hourly rates or equivalent salary rates prevailing on January 1, 1941.

(B) Adjustments within the fifteen percent limit must be submitted for approval by the Board in the usual manner.

GENERAL ORDER NO. 23

(Relates to wage and salary adjustments in the Territory of Alaska.)

GENERAL ORDER NO. 24

(Authorizes the Department of Agriculture to pass on wage and salary adjustments of its employees and employees of its instrumentalities.)

GENERAL ORDER NO. 25-A

(Authorizes the Tennessee Valley Authority to pass on wage and salary adjustments of its employees, and of employees of contractors engaged by the Authority in certain instances.)

GENERAL ORDER NO. 26

(a) Adjustments in the wages or salaries of employees engaged in rendering hospital services and employed by a non-profit organization which maintains and operates a hospital will be deemed approved without submission to the Board, providing that such adjustments do not raise the wages or salaries beyond the minimum non-inflationary going rates for similar occupational groups in the labor market area.

(b) Monthly reports of such adjustments shall be submitted by each such organization to the National War Labor Board's Division of Review and Analysis, together with such information and data as the said Division or the Board may from time to time require.

(c) Such adjustments shall be subject to the National War Labor Board's ultimate right of review on its own initiative, but any modification or reversal thereof will not be retroactive.

GENERAL ORDER NO. 27

(Authorizes the National Housing Agency to pass on wage and salary adjustments of employees of the Federal Public Housing Authority, the Defense Homes Corporation, and those employed by property managers of Defense Homes Corporation projects.)

GENERAL ORDER NO. 28

(Authorizes the Joint Committee on Printing to pass on adjustments of wages and salaries of employees of the Government Printing Office.)

GENERAL ORDER NO. 29

(Delegates to the Director General of the Pan American Union the power to make wage and salary adjustments affecting employees of the Pan American Union.)

GENERAL ORDER NO. 30

In accordance with the provisions of Section 4 of Title II of Executive Order 9250, increases in wage or salary rates which do not bring such rates above 40¢ per hour may be made without the approval of the National War Labor Board.

GENERAL ORDER NO. 31

The following regulations supplementary to General Orders 5, 6, and 9 relating to wage and salary schedules and to plans for making individual wage and salary adjustments under such schedules are hereby adopted:

1. Employers of 30 or Fewer Employees

Without regard to the requirements of General Orders 5, 9, or 31 an employer of 30 or fewer employees may, without approval of the National War Labor Board, make individual increases in the wage or salary rates of his employees for particular jobs as a reward for improved quantity and/or quality of work or service, provided that

A. The total of such increases to any individual employee (subject to National War Labor Board jurisdiction) shall not exceed 10 cents per straight-time hour during any year (beginning July 1, 1943), and the total amount expended on such increases during any such year shall not exceed an average of 5 cents per straight-time hour for all the employees in the establishment 1/ whose wage or salary rates are subject to the jurisdiction of the National War Labor Board.

B. Such increases shall not be made the basis of an application to the National War Labor Board for approval of increases to eliminate intra-plant inequities.

C. Such increases shall not result in the payment to any employee of a rate in excess of the highest rate paid by the employer between July 1, 1942 and June 30, 1943, for jobs of similar skill, duties, and responsibility.

D. Such increases shall not result in any appreciable increase in the level of production costs and shall not furnish a basis either to increase prices or to resist otherwise justifiable reductions in prices.

E. Such increases shall not be made contrary to the terms of any collective bargaining agreement covering any or all of the employees of such employer.

Such employer is not precluded from applying to the National War Labor Board for approval of a schedule of making individual wage or salary adjustments, as provided below for employers of 31 or more employees.

1/ The term "establishment" as used throughout this General Order normally means a place of business of an employer. Such place of business may be a physically separate unit or a unit which is customarily distinguished for administrative purposes. An example of a physically separate establishment is a plant or a retail store. An example of an administratively separate establishment is a research laboratory or a general office.

II. Employers of 31 or More Employees

An employer of 31 or more employees may make individual increases in the wage or salary rates of his employees under General Orders 5 and 9 without National War Labor Board approval only under a schedule which conforms to the following standards.

In order to have a "schedule" within the meaning of General Orders 5 and 9, an employer must satisfy the following two requirements: He must have (a) job classification wage or salary rates or rate ranges and (b) a plan for making individual adjustments within and between such wage or salary rates or rate ranges.

A. Job-classification rates or rate ranges properly in existence do not require approval of the National War Labor Board.

1. A job classification is a category of jobs or positions which are similar in nature and content and in required amount of knowledge, skill, experience, and responsibility. A job classification involves more than a mere descriptive title; the classification must be clearly defined and described. Where jobs differ as to knowledge, skill, experience, and responsibility, there should be different job classifications. (For example, typists, stenographers, and secretaries should each be considered separate job classifications because the respective work differs as to skill, content, and responsibility. These three categories may not be grouped together in one job classification.)

2. A job classification rate exists where an employer pays a single rate rather than a range of rates for a given job classification. Jobs remunerated on a piece-rate basis are normally considered to be in single-rate job classifications.

3. A job classification rate range exists where an employer pays, for a given job classification, a number of rates varying from a clearly designated minimum rate to a clearly designated maximum rate.

   a. A mere descriptive job title and a poorly defined or extremely wide rate range is not a job classification rate range.

   b. The minimum and maximum rates are not necessarily the lowest and highest rates being paid at a given time for a particular job classification. For special reasons (e.g., lack of experience or superior ability) particular employees may be receiving less than the minimum or more than the maximum rate. Moreover, it may happen at a given time that no employee is receiving the actual minimum or maximum rate for a particular job classification.

4. Job classification rates or rate ranges properly in existence are those (as defined above) which were (a) in existence prior to October 3, 1942; or (b) those resulting from permitted or approved adjustments subsequent to that date; or (c) rates set for new jobs under either the former or the revised General Order No. 6.

Improper adjustments of rates for job classifications or for individual employees are not a basis for determining a job classification rate or rate range.

B. A plan properly in existence does not require approval of the National War Labor Board.

1. A plan is an orderly, definite procedure or a group of procedures for making adjustments, within specified limits, in the wage or salary rates of individual employees (a) within particular job classifications and (b) when they move from one job classification to another.

   Such a plan ordinarily includes (a) tests and procedures for determining whether employees are to be given individual rate adjustments; and (b) limits on the number of adjustments, the timing of adjustments, and the average or total amount of money to be granted in the adjustments over a given period of time. (It is not essential that a given plan include all the foregoing items.)

2. A plan properly in existence is one (as defined above) under which individual rate adjustments are made in conformity with the provisions of (a) a collective bargaining or other bona fide, established agreement which was in effect on June 30, 1943; or (b) written statements, minutes, or memoranda of the employer which were in existence and effect on or before June 30, 1943; or (c) a plan approved by the National War Labor Board or by any of its authorized agents or agencies; or (d) the plan outlined below.

C. Employers who have no plan properly in existence (as defined under (a), (b), or (c) of the paragraph immediately above) may adopt the following plan without obtaining approval from the National War Labor Board. Employers who wish to replace properly existent plans with the following plan may also do so without Board approval (but see Section III-A-5 below):

1. Merit increases or automatic length-of-service increases

   (a) Merit increases are individual wage or salary rate adjustments made as a reward for improved quantity and/or quality of work or service. Automatic length-of-service increases are individual adjustments usually made automatically at the end of specified periods of satisfactory service.

   (b) Both such increases must be made only within job classification rate ranges (as defined above).

   (c) The total of such increases to any individual employee (subject to National War Labor Board jurisdiction) shall not exceed, during any year (beginning July 1, 1943), 10 cents per straight-time hour or more than two-thirds of the difference between the appropriate minimum and maximum rates, whichever increase is greater; and the total amount expended on such increases during any such year shall not exceed an

average of 5 cents per straight-time hour for all the employees in the establishment who are covered by the plan and whose wage or salary rates are subject to National War Labor Board jurisdiction.

2. Promotions or reclassifications involve individual adjustments which result from moving an employee into a different job classification. Promotions and reclassifications may be made between jobs which bear single rates as well as between jobs which bear rate ranges. When promoted or reclassified to a higher-rated job, an employee (subject to National War Labor Board jurisdiction) may receive a rate not in excess of 15 percent above his rate on his former job or the minimum rate for the new job, whichever is higher; provided, however, that where an employee has special ability and experience, he may be paid a rate within the appropriate range corresponding to such ability and experience.

3. Apprentice or trainee programs involve individual rate adjustments resulting from improvement, over specified periods of time, in the productive abilities of apprentices or trainees who are employed under a bona-fide apprentice or trainee program as defined below. Under these programs, adjustments may be made with respect to jobs which bear single rates as well as with respect to jobs which bear rate ranges. Apprenticeship or trainee programs for a given job classification -- with respect to length of apprenticeship or learner period; proportion of number of apprentices or learners to number of experienced workmen; and relation of apprentice or learner wage rate at various periods to the rate paid to experienced workmen -- should conform to the standards set forth in a collective bargaining agreement or in the applicable regulations of federal or state agencies. The re-examination or modification of existing apprentice or trainee programs in the interests of greater production for the war effort is not precluded. Any change in existing apprentice or trainee programs however, requires Board approval unless made in conformity with changes in the applicable regulations of federal or state agencies.

D. With respect to all schedules, (1) each job classification must be clearly distinguished and described; and (2) no appreciable increases in the level of production costs may result from individual rate adjustments, nor shall such adjustments furnish a basis either to increase prices or to resist otherwise justifiable reductions in prices; and (3) individual rate adjustments may not be made the basis for an application to the National War Labor Board for approval of wage or salary rate increases to eliminate intra-establishment inequities.

E. Records

Any employer who makes individual wage or salary rate adjustments pursuant to a schedule must hereafter keep available for a period of two years, records showing (1) for each job classification, (a) the rate or range of rates and (b) the description; (2) a statement of the plan of making adjustments within the rate ranges and between the rates or rate ranges; (3) the date when the schedule was established; (4) for each employee who received an adjustment, his name, the date hired, the date of and the reason for adjustment, the job classification, and the rate of pay before and after the adjustment.

No particular order or form is prescribed for these records, provided that the information required is readily obtainable.

III. Guides for obtaining Board approval where required.

A. All wage or salary rate schedules (as defined) which are not exempt from the requirement of Board approval (as stated above) must be submitted for approval to the appropriate Regional War Labor Board. In order that the making and the examination of such applications for approval may be facilitated, certain requirements are outlined below.

1. Proposed rate ranges (where it is desired to make individual merit or automatic length-of-service increases as well as promotions and reclassifications) should be set forth for each job classification involved.

2. Proposed single rates (where it is desired to make promotions or reclassifications but not to make merit increases or automatic length-of-service increases) should be set forth for each job classification involved.

3. Each job classification involved should be clearly distinguished and described.

4. So far as plans for making individual adjustments between rates or within and between rate ranges (either for existing establishments or for new establishments and departments) are concerned, a proposed plan should contain the following information with respect to one or more of the methods outlined below. The plan so submitted need not necessarily conform to the criteria of the plan set forth above which does not require Board approval.

(a) Merit increases: The average amount of increase to be given during any year for all employees covered by the plan; and the maximum amount (in cents per hour or in terms of the percentage of the difference between the minimum and maximum rates of the range) of the increase to be given during a given year to any employee.

(b) Automatic length-of-service increases: The average amount of increase to be given during any year for all employees covered by the plan; and the maximum amount (in cents per hour or in terms of the percentage of the difference between the minimum and maximum rates of the range) of the increase to be given during a given year to any employee.

(c) Promotions or reclassifications: The rate to be paid upon promotion or reclassification to a higher-rated job, whether the minimum rate called for by the new job or a rate in excess of such minimum; and if a rate in excess of

(d) Apprentice or trainee systems: The conformity of the plan with the standards set forth in appropriate collective bargaining agreements or in appropriate regulations of federal or state agencies with respect to the following items: length of apprenticeship or learner periods; proportion of number of apprentices or learners to number of experienced workmen in a given job classification; and relation of apprentice or learner rate at various periods to the rate paid experienced workmen.

The plan should also indicate the approximate percentage increase in payroll costs and in production (total) costs.

5. If there is a duly recognized or certified labor organization which is entitled to bargain on wage matters for any or all of the employees included in a proposed schedule or in a proposed change in an existing schedule, approval must be jointly requested, by the employer and such labor organization, of that part of the schedule which directly involves employees represented by such labor organization. Similarly, agreement with such labor organization must be obtained by the employer before he can adopt or change to the plan which does not require Board approval. If an agreement on any point cannot be reached, the parties may jointly submit the issues to the appropriate Regional War Labor Board for determination or may ask the Regional Board to refer the matter to the National War Labor Board for determination. Failing joint submissions, the matter will be treated as a dispute case.

6. Where an application includes more than one establishment, it shall set forth separately a schedule for each establishment or for each group of similar establishments.

7. Companies having establishments in more than one Region may apply for approval of schedule, where approval is necessary, in each of the Regions where the establishments are located or in the Region in which is located the company office at which the schedules are determined. In the latter case, the Regional Board may, if it considers that the application warrants national consideration, refer it to the National War Labor Board.

B. Any employer who wishes to make a change in one or more provisions of his properly existent wage or salary rate schedule (except changes in conformity with the plan which may be adopted without Board approval) may obtain consideration of such proposed change from the appropriate Regional War Labor Board without the necessity of having his entire schedule approved or reapproved.

W&P

COPY OF LETTER SENT BY PRESIDENT PHILIP MURRAY ON APRIL 13, 1944 TO WILLIAM H. DAVIS, WAR LABOR BOARD; MARVIN JONES, WAR FOOD ADMINISTRATION; CHESTER BOWLES, OPA; and FRED M. VINSON, OFFICE OF ECONOMIC STABILIZATION:

Gentlemen:

On April 7th you submitted a report to the President of the United States in which you stated:

> "The stronger controls provided by the congressional legislation of October, 1942 have been put into effect. As a result the cost of living, which before the 'Hold-the-line' Order was rising three-fourths percent a month, has for a solid year been held without change of any consequence.
>
> "It is true, as everyone knows, that there have been increases in some items, clothing, for example. But these increases have been fully offset by decreases in the prices of other items, notably foods. The general levels of the cost of living have not been permitted to rise. Indeed, the cost of living as a whole is slightly lower than it was a year ago today."

Within recent months, you have made public statements indicating just the contrary conclusion.

To every family in the nation which is confronted daily with the stubborn fact of rising living costs, your last report will, of course, come as a complete shock. Expressions from public officials which fly in the face of the living experience of the people do not inspire confidence or improve national morale.

We take this opportunity of bringing to your attention your previous announcements and the acts of your agencies which reveal a totally different story from that which you reported to the President of the United States.

1) To Mr. William H. Davis, Chairman of the National War Labor Board.

On November 5, 1943, Mr. Davis, in a letter to the Vice President of the United States transmitting a report of the National War Labor Board's activities for the preceding year, stated the following:

> "As the months fly by and the Board continues to hold wages at the general level of September 15, 1943, we become increasingly conscious of the fact that we are asking one segment of our society to do its part to protect all Americans from the ravages of inflation while at the same time a similar obligation has not been placed as heavily upon the shoulders of some of the other segments of this society."

We would appreciate any information which Mr. Davis can offer as to why that statement was valid on November 5, 1943 and yet on April 7, 1944 it can be said that the mandate of the law of October 2, 1942, to effectuate overall economic stabilization, has been accomplished.

Further, in November, 1943 the President requested Mr. Davis to set up a committee to investigate the facts pertaining to cost of living. The labor representatives of this committee have submitted their report. To date no other report has been prepared or submitted by any of the other members of the Cost of Living Committee. No official statement has therefore yet been issued by that Committee. Yet Mr. Davis, the Chairman of the Committee, undertakes to state very emphatically that "the general level of the cost of living has not been permitted to rise." Is the work of the Cost of Living Committee just a farce? Or if Mr. Davis had facts upon which to base a statement, why have they not been made available to the other members of the committee?

2) To Marvin Jones, Administrator, War Food Administration.

One of the economic factors encompassed in overall stabilization is farm and food prices. Under the law farmers are entitled to receive parity. The farm parity principle, most simply expressed, provided that prices of farm products principle is related to current prices paid by the farmer taking into account all wartime increases.

The Department of Agriculture therefore has an official index reporting the cost of living of farmers. This official index shows an increase from January, 1941 to December, 1943 of 42.6%. It is interesting to note that this index shows almost exactly the same rise in living costs as the report of the labor representatives of the Cost of Living Committee which is a striking contrast to the unrealistic conclusion of the Bureau of Labor Statistics.

Furthermore, since the cost of living to farmers has thus risen, under the parity formula, the prices of farm commodities must also rise. The official publication of the United States Department of Agriculture reports that the overall increase in farm prices between September 15, 1942 and January 15, 1944 was 21%.

Could you please explain how, in the face of this record, you can report to the President of the United States that "the general level of the cost of living has not been permitted to rise."

3) To Chester Bowles, Administrator, Office of Price Administration.

Executive Order 9250, issued by the President under the October, 1942 law, authorizes you in fixing, reducing or increasing prices, to determine price ceilings in such a manner that profits are prevented which in your judgment are unreasonable or exorbitant.

An exhaustive report prepared by your agency discloses that the profits of food corporations during the war period both before and after taxes have soared to a point that they represent the sorriest chapter of the war program. Wholesale food grocers realized twice as much on every dollar of sales in 1942 as in 1939. Sales were up 43%, but profits before income taxes rose over 200%. Profits before income taxes of fruit and vegetable canners were five times as great in 1942 as in the years 1936-1939, on less than twice the pre-war volume of sales. Profits before income taxes for the meat packers were over four times the pre-war level on only 83% higher sales.

It is these very companies that are involved in the production and distribution of the very items that go into the worker's breadbasket. Obviously these profits could not have been reaped unless food prices have soared.

On February 29th you delivered an address at the New York Times Hall. At that time you stated that:

> "It has been estimated that between 3 and 4 percent of the average cost of all food is due to black market operations. That means that housewives today are paying $1,200,000,000 as tribute to the black market in food alone.
>
> "In addition, there are millions of dollars in overcharges on the sale of clothing, and tires, and gasoline, and furniture, on second-hand refrigerators, and other home equipment."
>
> "Then, there is up-grading. For a time even some reputable butter merchants sold all their butter as the top-grade product. In a period of scarcity we find all eggs going at the top-graded prices. Similarly the cheaper cuts of steak are up-graded to become T-bones and tenderloins.
>
> "In the whole field of clothing the black market techniques are much the same....There is a deliberate cutting down in quality. There is up-grading in both basic fabrics and in finished articles."

In the face of these facts, how can you report to the President of the United States that "the general level of the cost of living has not been permitted to rise."

4) To Fred M. Vinson, Director, Office of Economic Stabilization.

Pursuant to the law of October 2, 1942, the President issued an Executive Order 9250 which established an Office of Economic Stabilization. The Director was given the authority to formulate and develop a comprehensive economic policy relating to the control of civilian purchasing power, prices, rents, wages, salaries, profits, rationing, subsidies, and all related matters - all for the purpose of preventing avoidable increases in the cost of living.

Since the issuance of that Executive Order, we have been confronted with the following facts: Congress repealed a regulation prohibiting salaries in excess of $25,000 after payment of taxes and other allowances.

Second, Congress enacted, over the President's veto, a tax law which served to relieve the greedy rather than the needy. This was one of the 7 points of the President's original economic stabilization program and therefore not effectuated.

Third, the mandate of the October 2, 1942 law that prices and wages be maintained as of their relationship which prevailed on September 15, 1942, has not been enforced. To meet this deficiency it was announced that there would be a general rollback of prices to the September 15, 1942 level through the general use of subsidies. But this commitment has not been carried out and instead the subsidy program has been severely limited and curtailed. Thus another item in the President's original economic stabilization program has not been effectuated.

Fourth, extortionate and unreasonable profits have not been eliminated. The United States Treasury reports that on the basis of the peacetime era, 1936-1939, inclusive, the estimated net profits of corporations before taxes in 1944 will be 449% of the peacetime annual average.

In the face of these facts, how can you report to the President of the United States that the mandate of the October, 1942 law has been put into effect?

Very truly yours,

s/ Philip Murray

Make the Minimum Wage Realistic

"Obsolete" is what President Truman terms the 40 cent minimum wage stipulated in the Fair Labor Standards Act.

"A 65 cent rate should be the minimum," said the public in a Gallup poll.

General recognition of the disparity between living costs and a pre-war minimum makes essential early consideration of the amendments to the Fair Labor Standards Act introduced in the United States Senate by Senator Pepper for himself and nine other Senators. The ten sponsors are Senators Dennis Chavez, New Mexico; Joseph Guffey, Pennsylvania; Harley M. Kilgore, West Virginia; Warren Magnuson, Washington; James Mead, New York; James Murray, Montana; Francis J. Myers, Pennsylvania; Claude Pepper, Florida; Elbert Thomas, Utah, and Robert F. Wagner, New York.

Summarized, the four amendments are these:

1. *Increase of the basic minimum:* the 40-cent minimum now in effect would be raised to 65 cents with an "escalator" clause which would raise the minimum to 70 cents after one year and to 75 cents after two years.

2. *Industry Committees:* these tri-partite groups would operate as under the present law but with additional powers to define job classifications and to set minimum rates for those classifications.

3. *Coverage:* the exemption of workers in the canning and processing of agricultural products "in the area of production" would be taken out of the law. This has caused constant difficulty in enforcement and has relieved many canners from paying minimum wages. Also, fish canneries, at present exempted completely, would be brought under the law.

4. *Child Labor* provisions are strengthened by the addition of a section carrying an outright prohibition of oppressive child labor by an employer engaged in interstate commerce or in the production of goods in interstate commerce. The present law prohibits the shipment in interstate commerce of goods manufactured by oppressive child labor but does not actually prohibit such labor. This would clarify the matter of employment of children by telegraph companies, a practice first declared illegal in a Federal district court but reversed by the Supreme Court.

Despite much-publicized high war-time wages, millions of American workers and their families are forced to live on definitely substandard levels because their earnings are not enough to provide even the barest requirements consistent with health and decency. This was proved beyond doubt in the hearings before a subcommittee of the Senate Committee on Education and Labor. Textile and clothing mill workers, tobacco plant workers, and cannery employees told this committee of their inability to buy milk for their children, struggles to pay the doctor for emergency operations, no money for proper clothing.

More than one-third of all workers in America receive less than 65 cents an hour. While these substandard wages are more characteristic of the service trades, outside the scope of the Federal law, nearly one-fourth of workers in the manufacturing industries (3,000,000 out of 13,000,000) were paid less than 65 cents an hour in April, 1944. These included workers in such war-essential industries as lumber, textiles, apparel, and in the electrical equipment and rubber industries./1.

Rising living costs always fall heaviest upon the underpaid. This is because a much larger part of the low-paid worker's earnings goes for food and clothing, the items which have risen most in price during the war. The Bureau of Labor Statistics cost of living index for January, 1944, showed a general price increase of 23.2 per cent above the 1941 level, but it showed a rise of 40 per cent in the cost of food and clothing.

Responsible public and private research agencies attest to the impossibility of working out a decent budget for a family of four on a 40 cents an hour basis. Most minimum wage budgets call for double that figure. The committee found these researches conclusive in deciding that the 65 cent minimum standard wage is an extremely conservative, if not inadequate, figure.

It is well to remind ourselves that families who live on substandard pay do not live to themselves alone. Not only do they lower the American level of health, education and well-being but they reduce the effective demand for the products of a growing industry. A significant relationship between income and physical fitness has evidenced itself in Selective Service records. In general the States with the lowest per capita incomes are those with the highest rejection rates.

William H. Davis, former director of economic stabilization, said, in testifying on the Pepper Bill, "The minimum wage law has been one of the most stabilizing factors in the country's economy" . . . and further, "It seems

1./ "Substandard Wages," Report from a subcommittee to the Committee on Education and Labor, United States Senate.

perfectly clear that where you have capable workers and an inexhaustible market, you have the making of economic prosperity. There are two essential steps. One is production, production, production. The other is a fair distribution of the proceeds of production."

On the State Fronts— The Leagues at Work

Massachusetts has become the sixth state to enact a law prohibiting discrimination in the payment of wages between the sexes for work of comparable character. *The Consumers League of Massachusetts* was the sponsor of the measure. The law applies to industrial and commercial employment, exempting domestic and agricultural employees and employees of charitable and educational institutions . . .

The Consumers League of the District of Columbia has made itself heard in hearings on the public housekeeping minimum wage proposals in which the spread of hours is a moot point. League members hope to keep the ten-hour spread limitation in effect. From an eye-witness account by Mrs. David Saxe of the steering committee: "It was interesting to hear the employer association men tell how their employees loved to eat all their meals at the restaurant and loved to work long hours with a four-hour break, and then to hear the unanimous protest from all the workers present. The employees whom the association men have in mind never show up." . . . *The Consumers League of Michigan* took the lead in calling together other organizations for a conference whose object was consideration of the full employment bill in the Congress. They report: "The Inter-Organization Committee for Full Employment legislation which was organized during the summer to work for the passage of the Murray-Patman Bills, did not drop any atomic bombs, but it did mail more than a thousand digests of S-380 to organization presidents and community leaders and got letters to all the Michigan Congressmen. The Detroit Committee will continue to serve as the local branch of the National Committee which is working in Washington for the passage of S-380." . . .

The Consumers League of New York has been giving vigorous support to the recommendations of the Retail Minimum Wage Board just approved by State Industrial Commissioner Corsi. The spear-head of the opposition came from the chain stores. The new order, effective November 12, provides that the basic minimum weekly wage in retail trade be set at 52½ cents per hour ($21.00 a week) for full-time employment up to 40 hours a week, and 57½ cents per hour for 30 hours or less in any week. It also provides that overtime pay be at the rate of 79 cents per hour for more than a 40 hour week in communities over 10,000. The new minimum will raise wages for about one-third of those now employed in retail stores up to the rate paid voluntarily by the other two-thirds of the industry and is in line with the wage rates established by previous minimum wage boards for other industrial groups. The approval of these recommendations might be regarded as a big dividend accruing to the Consumers League after its legislative and constitutional battle a decade ago which put minimum wage laws on the statute books of New York state.

Msgr. Ryan: Courageous Crusader

Msgr. John A. Ryan, widely influential leader of the liberal Catholics of America, who died in St. Paul on September 16, was a pioneer who lived to see many of the so-called "radical" proposals he fought for accepted as articles of faith even by many conservatives. Among these were the principles of a living wage, embodied in minimum wage legislation; laws against the employment of children in industry; collective bargaining; social insurance, and control of monopolies and speculation.

His active association with the Consumers League went back to the days when the first battles were being fought to establish the legality of the minimum wage laws and continued throughout his life. He served as president of the District of Columbia League and was one of the honorary vice presidents of the National League at the time of his death.

He expresses his feeling about this association in an article in *Commonweal* (May 26, 1934), reprinted in his autobiography "Social Doctrine in Action":

"I knew Florence Kelley for almost a quarter of a century. As one of the vice-presidents of the National Consumers League, of which she was general secretary, I worked with her on behalf of minimum-wage legislation and other laws for the protection of the weaker economic classes. I have never known any other person, man or woman, who labored with quite so much self-denial and effectiveness on behalf of 'the least of these.'"

On the Washington Front

Washington is a battleground where the policies of postwar America are being determined. Citizen awareness and participation were never more needed than now. Let your representatives in Washington know what you think about the issues of full employment, more adequate minimum wages, widening and improving social security.

Action is needed on many pending economic issues:

The Full Employment Bill

On September 28th the bill passed the Senate by a vote of 71 to 10. This constitutes a notable victory for the idea of government responsibility for planning for full employment. The battleground shifts to the House, where 115 members have lined up as co-sponsors of the bill.

As we go to press, the best way to help the bill is to get your congressman to be a co-sponsor. If 104 more congressmen sponsor the bill, then it can be passed even though there should be unfavorable committee action.

The Pepper Minimum Wage Bill

Letters should go to Senator James E. Murray, chairman of the Senate Committee on Education and Labor, and Representative Mary T. Norton, chairman of the House Labor Committee, endorsing the bill. Resolutions of organizations as well as individual letters will be helpful.

Wagner-Murray-Dingell Bill

No plans for hearings as yet have been announced. *Write* your congressmen asking when hearings will begin. *Write* Senators Wagner and Murray, and Representative Dingell expressing your interest.

The digest of the Wagner-Murray-Dingell Bill, which

(Continued on Page 4)

A 15-Point Program For the Rights of Migrants

Four to five mbillion Americans wandering the country in search of jobs each year.

Seven hundred thousand to 1,500,000 rootless, homeless, farm migrants trudging along the highways of the nation.

These are the estimates made by the U. S. Bureau of Labor Statistics and the War Food Administration regarding America's own displaced persons in the reconversion period. Who will make up this non-resident horde? Many will be discharged war workers; others, discharged service men. Still others will be the technologically unemployed farm workers who have been "tractored out" and who will be "pickered out" when the mechanical cotton picker becomes generally adopted. Others are the folk in decrepit vehicles who were driven from their marginal-producing land during the drought and the depression and have become the traditional Joads, unwanted except at picking time; no one's responsibility; no one's concern until it became apparent that industrial labor is not secure while labor in agriculture is unstable and unprotected.

The most comprehensive and constructive suggestions for an attack upon this whole problem which have appeared so far were made by Paul S. Taylor, professor of economics in the University of California, at an Institute on Migratory Labor Problems held in Princeton, N. J., in June. Taylor's proposals, briefly summarized, were:

(1) Recruiting of labor should be upon a unified national basis, not on a State and separate industry basis.

(2) Existing abuses in private employment agencies recruiting workers for interstate movement should be made subject to license and regulation by the Department of Labor.

(3) Public Law 45 should be completely overhauled. That law split the agricultural labor market into about 3,000 separate parts by giving each county agent power to deny Federal transportation assistance (gasoline and tire rations) to agricultural workers. By thus freezing farm labor, it increased at public expense the volume of importations of foreign workers for both agricultural and railroads, because it reduced efficiency in the use of domestic labor. In the proportion that the domestic labor market can be better organized, importation of foreign workers for railroads and agriculture should decline.

(4) Camps now operated for foreign seasonal workers and migrant agricultural workers by the War Food Administration (now Department of Agriculture) should be preserved and made the responsibility of the Department of Labor. The law which requires the Farm Security Administration to dismantle the camps should be changed to keep them operating when the need is increasing.

(5) The U. S. Department of Labor should reserve surplus war housing, including trailer housing, that is suitable for farm laborers. State labor departments could set up community housing arrangements, providing for purchase by workers who wish to settle. "Care will be necessary, especially in agriculture, to avoid reviving through careless property disposal, the discredited system of company housing."

(6) Agricultural laborers on industrialized farms, many of them migratory, should have the same benefits, under State and Federal laws, as those accorded other industrial workers, namely: social security, fair labor standards, and labor relations legislation. Jamaican and other foreign laborers imported to work in wartime agriculture and transportation were given, by international agreement, special guarantees of wages, hours, employment, medical care, housing and organization. These standards threw into high relief our failure to establish comparable standards for our own people.

(7) Care must be taken that industrial migrants across state lines are not disadvantaged under existing unemployment compensation and other protective legislation.

(8) Agricultural extension services, including home economics and similar programs should be extended to workers including the migrants, as well as farm owners.

(9) The Interstate Commerce Commission should be given legal power to supervise trucks and other vehicles used to haul laborers across State lines.

(10) States which have not already done so, should enact legislation to assure collection of wages, to regulate the labor of women and children wage earners, and to provide workmen's compensation and State inspection of private labor camps, particularly among agricultural migrants.

(11) Health and medical care should be brought by State and Federal legislation to migrants.

(12) "Long ago this nation decided that education was not a matter to be left to the economic ability of each child's parents to provide it." Laws are necessary in many States and school districts to make this principle effective among the children of migratory workers.

(13) Settlement laws, which require varying periods of residence as a condition of receiving public assistance, strike migrants with full force. First, as well as costly last, the Federal government should adopt a program of making its financial assistance conditional upon abolition of State settlement laws.

(14) Steps should be taken to avoid disenfranchisement of a class because its members move in search of work. Many States have already recognized this by provision for absentee voting by mail.

(15) Migration is affected by wise planning concerning the location of industry, the tenure, stability and size of the agricultural population, and fullness of employment. Citizens should begin now to study their own communities in order to ascertain and support policies which will ameliorate the situation both at home and throughout the country.

Taylor's concluding paragraph is trenchant;

"If migratory workers are not to become second-class citizens, to the detriment of all of us, we must generate a public opinion which will not tolerate that. We must make opinion effective by insistence that migrants shall be assured positively the full measure of public protections, benefits and rights which are due them as American citizens.'

Equal Pay for Equal Work Bill (S-1178)

Hearings on this bill to eliminate discriminatory wage practice based on sex are scheduled to begin Oct. 12 before a subcommittee of the Senate Committee on Education and Labor. Introduced by Senators Pepper (D., Florida) and Senator Morse (R., Oregon) the bill seeks to eliminate the "double standard" in wages for men and women doing the same work.

A resolution supporting the major principle of the bill has been approved by the 41 member organizations of the National Committee to Defeat the Un-Equal Rights Amendment and to Promote Equal Opportunities. The supporting organizations include many labor unions with a large percentage of women members, as well as such organizations as the National Consumers League, the League of Women Voters, and the National Board of the YWCA.

The danger of low-paid woman labor being used to under-cut the jobs and pay of returning service men is being stressed by the Senators and the organizations supporting the bill. Differential wage rates based on sex constitute a weak link in the wage structure that must be removed without delay. The bill, in principle, is in conformity with the decisions of the War Labor Board which established the rule of equal pay for equal work, irrespective of sex or race.

The bill provides that it would be an unfair wage practice for an employer engaged in, or affected by, interstate commerce to discriminate between the sexes by (1) paying a different wage to a female employee on the same job, and (2) laying off a female worker and replacing her with a male employee, unless it is for a good cause, or based on a non-discriminatory seniority system, or an Act of Congress which requires veterans' preference.

Administration of the Act would be in the hands of the Women's Bureau of the Department of Labor. The director would be empowered to investigate complaints, hold hearings, issue rulings and interpretations, and cease and desist orders. Enforcement or petitions for relief could be carried to the U. S. District Courts. The bill also provides for the setting up of industry committees, as under the Fair Labor Standards Act, for those industries where discriminatory wage practices are prevalent. These committees would make recommendations on job content and evaluation and on standards of training and employment.

Developments in the Senate committee hearings should be carefully followed. Communications to the sponsoring Senators will prove to them that the public would prefer this method of attacking discrimination rather than the proposed Equal Rights Amendment.

Equal Rights Amendment. A hearing on this proposal was held on September 28 before a Subcommittee of the Judiciary Committee of the Senate. Marvin C. Harrison, member of the Board of Directors of the National Consumers League and president of the Consumers League of Ohio, presented legal arguments in opposition to the bill. If you don't want to see the protective laws for women in your State thrown into constitutional jeopardy send letters *now* to all Senators reiterating your opposition.

Special Note: Reprints of Dr. Alice Hamilton's article, "Why I am Against the Equal Rights Amendment," which appeared in the July, 1945, issue of the Ladies Home Journal, are now available at five cents each. This reprint also carries the list of organizations allied in opposition. Secure copies from the National Consumers League, 348 Engineers Building, Cleveland 14, Ohio.

Full Employment—Wages and Democracy

By PHILIP CORTNEY
Vice-Chairman of the Board and Treasurer, Coty Inc.

Writer Asserts That We Are Confronted With the Dangers Inherent in the Full Employment Dogma Since World War I. At the Root of Unemployment in a Free Society He Finds the Wage Problem and Credit Mischief. He Is Convinced That We Cannot Avoid Going Into Experimentations and Therefore Advocates the Provision of Safeguards for the Private Enterprise System, Democratic Processes and Our Liberties. He Makes Some Tentative Suggestions of a Method of Approach to the Provision of Safeguards.

This article means to be an exhortation to foresight, wisdom and intelligent thinking. It means to be an appeal to both labor and free enterprise for the preservation of democracy and our cherished liberties. I wish everyone would understand that the full employment issue could be called more aptly "democracy or some form of totalitarianism."

I had better state at the outset what I wish to prove. It is my contention that, full employment bill or no full employment bill, we are already confronted with the dangers which the defenders of the free enterprise system ascribe to the adoption of the bill. Therefore, in this article, I am advocating safeguards against the dangers already potentially existent, and against the ill-effects of the full employment dogma.

Something good may come out of the discussions around the full employment bill. It may force us to think through thoroughly the problem of unemployment within the framework of a free enterprise system. I have repeatedly stated that a correct diagnosis of the 1929 depression and of the developments in the 1920's is of paramount importance for the direction of our minds and actions in the future. I was glad to find the same statement made recently in Beveridge's book, "Full Employment in a Free Society", in Torborgh's book, "The Bogey of Economic Maturity", and in the last edition of Charles Rist's book, "History of Economic Doctrines".

In my essay on the consequences of Lord Keynes' theories, I have stated that "the great depression has engulfed the gold standard". I was gratified to discover in an article published in the Aug 11 issue of the "Economist" bearing the title, "US Employment Prospects", the statement: "The great depression broke the gold standard." Thus, I believe it becomes more and more to be admitted that the gold standards is to be exonerated for responsibility among the causes of the great depression. Mr. George Torborgh, in the above mentioned book, has exploded the theory

that economic maturity was the cause of the great depression.

What then happened in the 1920's and why was the 1929 depression so profound and prolonged? The answer is, as I have endeavored to show elsewhere, that in the 1920's, a misdirected policy of credit expansion delayed readjustments which had become necessary because of the end of the war and the end of issuing paper money. This expansion of credit sustained a high level of prices and certain wages, which we had inherited from the war. When the credit expansion had to be stopped (in 1929), American economy remained permeated with the disequilibrium (lack of balance between various sections of the country), which has not been corrected and has only been concealed from us by the credit inflation made necessary by World War II. At the root of this disequilibrium, is a wrong wage policy, or a lack of wage policy.

It is within our power to muster money and credit. But have we a wage policy? Do we know what kind of wage policy we ought to have? Is it possible within the democratic framework to have a wage policy conducive to a high level of employment? The importance of these questions and the difficulty of solving the problems related thereto become clear when we discover that one of the outstanding defenders of economic liberalism, Mr. Ludwig von Mises, and one of the apostles of the full employment dogma, Sir William Beveridge, agree that the functioning of the system which has their personal preference, depends, in both systems, on the enlightened behavior of labor. In view of the importance of the wage policy, I wish to give a few short quotations from the writings of the representative protagonists of the two opposed schools of thought.

Mr. Ludwig von Mises stated in an address before the American Academy of Political and Social Science at Philadelphia: "One must convince the workers that the traditional union policies do not serve the interests of all, but only those of one group. . . . What is needed is not to throw dust into the eyes of the workers, but to convince them. They themselves must realize that the traditional union methods do not serve their interests. They themselves must abandon, of their own accord, the policies that harm both them and all other people." Mr. Mises' address attempted to make clear that unless the unions adopt a flexible and intelligent wage rate policy, unemployment can be avoided only through tremendous credit expansion.

Listen now to Sir William Beveridge (quoted from his book, "Full Employment in a Free Society"): "There is a real danger that sectional wage bargaining, pursued without regard to its effects upon prices, may lead to a vicious spiral of inflation with money wages chasing prices, and without any gain in real wages for the working classes as a whole. . . . To deal with this problem . . . a central organization of labor should devote their attention to the problem of achieving a unified wage policy which insures that the demands of individual unions will be judged with reference to the economic situation as a whole."

These two statements throw a vivid light on the nature of the problem with which we are confronted.

* * *

It is my firm belief that the Murray bill, or some modified form of it, will be adopted by Congress. As mentioned before, it is my contention that the dangers inherent in the bill are already potentially operative, and in point of fact, have been ever since the end of World War I. The full employment bill will add some additional dangers to the free enterprise system, arising from the mechanism of the bill, and from

the feeling that the Government is omnipotent in curing unemployment in a free enterprise system.

If my assumption that a full employment bill will be adopted is correct, then I think our efforts should be directed towards providing safeguards against its ill-effects, rather than fighting the bill. By so doing, the full employment bill may prove, in the long run, a blessing in disguise, because, to repeat again, we are already confronted with most of the dangers inherent in the bill.

Those who still doubt that we are moving into further social and economic experimentations, and that, willy-nilly, we shall have to give a test to the full employment theory, are asked to reflect upon their own answer to the following simple questions: "If we were again to have 10 to 15 million unemployed, what would be the attitude of the people and of the Government?" Unless I am grossly mistaken, the answer is obvious. The pressure on the politicians would be so great that they would move very far and very fast . . . and probably in the wrong direction. It is wiser to be ready for such an emergency and forestall the taking of hasty measures under the impulse of events and public clamor.

Besides, this issue has an international aspect which has been brought forth by Secretary Byrnes. The British hold the view that the impediment to international economic cooperation is the policy or impolicy of the United States. More specifically, the British ask how they can tie their money and economy to an economy (that of the United States) whose prospects of stability are uncertain. More bluntly stated, the British are afraid that the lack of equilibrium of the American economy will bring about another great depression. This explains the whole-hearted endorsement of Secretary Byrnes to the full employment bill, which is purported to be able to remedy the violent fluctuations in business in the United States.

There is little doubt, however, that the full employment dogma (as presently formulated by its protagonists) embodies serious perils to democracy and our liberties. I shall discuss further on the source and nature of these dangers, and some tentative remedies. It is admitted by the very friends of the full employment dogma that it carries with it dangers of inflation and threats to our freedom. What then should be our attitude towards this vital question? Everyone is in favor of a high level of employment. The disagreement arises only on account of the means. And on the answer to this question depends whether or not we shall save democracy.

The consequences of what we do or what we fail to do are incalculable. I suggest that the wisdom of the fathers of this republic be called to our help in tackling this problem. They, too, were confronted with issues which seemed insurmountable, and yet, by dint of thinking and effort, they found adequate solutions. I, therefore, am of the opinion that we should take a leaf out of the "Federalist", Letter 10, written by Publicus (Madison), wherein he discusses one of the greatest dangers to democracy, namely, the danger of factions. He states that liberty nourishes factions, but that the suppression of liberty would certainly not be the cure for the mischief of faction. After some other cogent arguments, he reaches the conclusion that the **causes** of factions cannot be removed, and that relief can only be sought in the means of controlling its **effects.**

Likewise it is my firm belief that the only politically practicable and sound approach to the full employment issue is to provide safeguards against its ill-effects. When we stop to think, the defense of our political and civil liberties rests mainly on the Bill of Rights.

In brief, my attitude in the full employment issue is based on the following three convictions:

(a) A full employment bill will be adopted.

(b) Even if it were not adopted, we are confronted with the causes of unemployment due to a wrong wage policy, and monetary and credit mischief.

(c) Full employment bill or no full employment bill, mass unemployment will not be tolerated.

* * *

To those who adopt towards the full employment issue an attitude of "black or white", and are inclined to reason that because it entails dangers, the only proper thing to do is not to adopt such legislation, I submit that their position disregards practical politics and social trends, and besides, is dangerous.

Difficult as it may be, we can contrive safeguards against the ill-effects of the full employment doctrine, and I offer hereafter some tentative ideas on the subject. Furthermore, I ask the defenders of free enterprise to reflect upon the political and intellectual obstacles in the defense of their ideas, sound as they may be. I shall point out some of these impediments.

(1) The Editor of the New York "Times," in an editorial published on August 5th regarding the Murray bill, states: "Such plans [to preserve private enterprise], experience shows, are usually drawn by people who have only the vaguest conception of how the private enterprise system really works. The way to preserve the private enterprise system, in fact, is not by a new plan, or a hundred new plans, but simply by permitting it to function." It is my contention that the Editor of the New York "Times" is absolutely right, but that he did not recognize all the consequences of his statement. It is a fact that very few people have a correct conception of how the private enterprise system really works. It is a further fact, I am afraid, that the very growth of democracy makes difficult the proper functioning of the economic-liberal machinery. Economic liberalism cannot function properly, except if the logic of its mechanism is properly understood and left free to work—and provided also there is a proper psychological climate. But who enjoys enough authority to teach the necessary conditions of a free enterprise system and to have his teachings accepted by everyone—or at least by the majority of the people?

Anyone who has attended a public forum between capable representative defenders of economic liberalism and of the new school (which for the sake of brevity, I shall call the "purchasing power school") has certainly been struck by the manifest handicap of the defenders of economic liberalism. Why? The answer seems to me obvious. What the defenders of the economic liberal school actually oppose to the "purchasing power school" is the doctrine of "equilibrium". Now, it is a fact that this doctrine is not understood. I have in my files a letter from a prominent professor of economics in one of the greatest American colleges, wherein he states: "I must confess that I have no comprehension whatever of exactly what the equilibrium theory is, or what it purports to illustrate or explain."

The defenders of the "purchasing power school" have simply to say: "to buy, you need money". This is a proposition which, because of its oversimplicity, and notwithstanding its speciousness, is easily understood by the "common man", as well as by theorists. The common man understands this kind of argument all the more easily as it appeals to his apparent superficial interests.

A fuller defense of the full em-

ployment issue usually runs as follows: "Unemployment and depressions are due to under-consumption and excessive savings. The amount of employment available depends on the volume of production. This, in turn, depends on the demand for goods and services. If we don't have high consumption; if we don't have a high standard of living on the part of the people, all of the tremendous productive resources of the United States will not be utilized. Therefore, high wages are essential to a full employment economy. The chief threat to full employment is the instability of private capital expenditure. When private enterprise cannot provide people with jobs, then it is up to the government to provide them through valuable useful public works."

I contend that such an argument is not easily refutable. When the defender of economic liberalism has to state his side of the argument, the poor devil is in a predicament. There is no simple explanation of the equilibrium theory. It requires much personal and serious thinking to be able to grasp it and draw the logical consequences therefrom. Moreover, these consequences are often not palatable to the common man because they may imply sacrificing immediate advantages for the sake of benefits in the future.

Even with the American intellectual, the credit of economic liberalism is low. Why? First of all, because he does not trust "capitalism" any more on account of what happened to American economy between the two world wars. (He is, in my belief, wrong on that score, because the doctrines of economic liberalism are not responsible for what happened to American economy; it would be truer to say that the unsatisfactory behavior of American and international economy is due to the disregard and the violation of the rules of economic liberalism.) Furthermore, the intellectual is not convinced that economic liberalism is the most essential safeguard against the emergence of an authoritarian state. And why should he be? Discussions among economists on the causes of depressions and unemployment serve only to confuse him and befuddle his mind to a point where he is unable to say what is right and what is wrong.

When discussing the causes of depressions and unemployment, we find some economists imputing their cause to under-consumption; others, on the contrary, impute it to inflationary spending. Some economists think that the cause of depressions is over-saving; some plead that it is under-saving. Some economists say that at the peak of a boom, we should increase discount rates; others say we should decrease them. Some economists think that the answer to the unemployment problem is low wages; others say it is high wages. Some economists attribute depressions to over-investment; some attribute it to liquid savings not being invested. If economists are unable to agree among themselves on the causes of depressions and unemployment, how can the ordinary individual or the legislator be expected to make up his mind about the proper thing to do?

It is often said that the capitalistic system needs a myth. This may be true, but what is even more important is that the necessary conditions for its proper functioning should be understood. It is obvious, however, that they are not. People are willing to defend a cause if they are able to understand it, or at least, if they think they do. It is a fact that most people have only the vaguest conception of how the free enterprise system really works.

(2) It is generally admitted that democracy cannot exist without economic liberalism, and there is much to be said in favor of the proposition that the distribution of political power produced by capitalism has made its proper

functioning extremely difficult. Though I would not go so far as to say, like some, that capitalism can no longer live under democracy, it is certain that the very growth of democracy and distribution of political power make its functioning difficult.

(3) I do not profess to know what the future holds in store for us, or what the answers are to a great many problems which are confronting the world after the war. I share, however, with many others, the conviction that widespread unemployment will not be tolerated by the masses. It will be too easy for any demagogue or for anyone who does not understand the implications of the full employment issue to howl: "Must we have war to have jobs?" I am also doubtful that the common man will have any sympathy for those who advocate "sanity" in the name of sound fiscal policies —or for the sake of our liberties. There again, the masses will be inclined to accept the reasoning that if we found money to build tanks, guns, and airplanes, we ought to find money to provide post-war jobs.

* * *

Unless I am grossly mistaken, a "full employment bill" in one form or another will be adopted by practically all countries. We must therefore make sure that the provisions of these bills will not destroy the private enterprise system. To accomplish this objective, I think that both psychological and legislative means will have to be used.

If the Government is to accept new responsibilities (of a kind of which the fathers of the Constitution never dreamed), then we should also provide for whatever safeguards are politically practicable in order to make sure that we do not break beyond repair our private enterprise system, losing, at the same time, our liberties. It is furthermore obvious to me that whatever safeguards we contrive must be democratic in their essence and understandable to the general public.

The question is whether there are such safeguards which would prove effective. I think that the means to protect the private enterprise system together with our liberties can be devised. Their effectiveness will depend on our vigilance, just as this is the condition for the preservation of the liberties guaranteed by the Bill of Rights.

To provide the proper protection for our private enterprise system and our liberties, we must have clearly in mind the nature of the dangers deriving from the assumption by the Government of its new responsibility to bring about conditions favorable to the maintenance of a high level of employment.

Taking into account the means which have been so far proposed for the Government's fulfillment of this new responsibility, I think that the sources of danger to private enterprise and our liberties can be summarized as follows:

(1) The national debt, or rather the interest on this debt (and therefore, the level of taxation) may become unbearable for the functioning of an individual enterprise system.

(2) The adjustments and readjustments of costs to prices (in particular, wages) may become not only inflexible, but practically impossible.

(3) The free market may be destroyed. (It seems to me that as long as we manage to keep a free market regulated by prices, we can be reasonably sure that the private enterprise system is functioning.)

With the above considerations in mind, I think the protection of the private enterprise system and our liberties may be secured by the following means, if the Government is to assume the responsibility of helping to create conditions favorable to a high level of employment:

Legislative Means

1. The Government should (on the advice of a body of experts) fix the maximum ratio of all taxes (whether Federal, State or municipal) to the national income. Taxes should be stable and so devised as to foster taking risks and individual enterprise.

2. The Government should relinguish its right to impose a control of exchange except in times of national emergency.

3. The Government should adopt a sound money policy and limit the liberty of credit expansion of the commercial banks.

4. The constant increment in production, technological progress, and the effect of saving concur to bring about lower costs of production. It should become a declared policy of business that the increase of efficiency be translated into lower prices because the diffusion of well-being and the increase of the standard of living of the country as a whole, is conditioned by a trend to lower and lower prices. (I ignore the aberrations in the level of prices due to purely monetary and credit conditions.) It should therefore also become a declared policy of the government that arbitration in labor disputes regarding wages should be governed by the objective of a lower trend in prices. The matter of agricultural prices may have to receive special consideration and adequate treatment.

5. In order to obtain the willing cooperation of labor in the wage policy advocated, I propose that a dividend should be distributed to the workers each time a dividend is distributed to the stockholders. The basis on which the proportion of the dividend to the workers is to be calculated is left open for discussion. The advisability of distributing a dividend to the stockholders should be left to the discretion of the management alone.

Psychological Means

1. As often as possible, the Government should through its most authoritative mouthpiece, the President, assert and reassert its conviction that democracy and liberty are not possible without private enterprise and competition. Such action (plus Number 5 of my Legislative Means above) may engender a faith in favor of economic liberalism which may become "the moral equivalent of socialism and communism".

2. The Government must declare that it is its responsibility to watch that the sovereignty of the consumer is at all times secure.

3. The Government will have to define clearly what is meant by "full employment." It is, of course, essential for the proper functioning of the competitive system that a certain reservoir of manpower be kept available. There must be competition in a private enterprise system, the motivating power of which is profit. There must be competition in labor as well as there is in capital, and in the goods produced.

4. The Government should make it clear that employment depends on profits and risk-taking by individuals and corporations. Profits, in their turn, depend a great deal on wage rates and taxes.

The implementation of the safeguards may, of course, require the creation of some new institutions.

It would be ridiculous to pretend that the above suggestions have any merit other than to indicate a possible method of a practical approach to the provision of safeguards to private enterprise and our liberties, if a full employment bill is adopted (and even if it is not adopted).

My insistence on psychological as well as legislative means may seem unusual, but the problems with which we are confronted are baffling ones. Personally, I am inclined to put as much weight on the psychological means as on the legal safeguards.

Take for instance the proposition that the preservation of our liberties is impossible without democracy, and that democracy is impossible without private enterprise and competition. Many people (paradoxically enough, mainly those who call themselves liberals) deny the proposition. The only authoritative voice I heard in this country asserting this credo with force is Dr. Nicholas Murray Butler.

The late Franklin Delano Roosevelt, in his message to Congress in 1940, I believe, stated that democracy has its roots in religion. This is another way of expressing one's faith in individualism and the dignity of the human person, but too philosophical for the general public to grasp the implication.

Take another instance. One of the great problems we shall certainly be confronted with is the rigidity of wages. By what criteria, and by whose decision is the right policy for wages to be determined in our badly functioning industrial society? The assertion of a goal of lower and lower prices may perhaps provide a guiding rule. Certain economists maintain that the private enterprise system requires for its proper functioning a slow, rising trend of prices. Personally I contest this view and I hold that the spreading of well-being and the increase of the standard of living of the whole nation can be brought about only if prices slowly but persistently show a trend to decrease.

There is perhaps no better and more appropriate conclusion to this article than Gladstone's peroration to his final appeal on the Irish Home Rule Bill in 1886:

"Think, I beseech you; think well, think wisely, think not for the moment but for the years that are to come."

Let Our People Live

A PLEA FOR A LIVING WAGE

by Joseph Gaer

CIO POLITICAL ACTION COMMITTEE—Pamphlet-of-the-Month No. 3

W & P

YOU

can have

Decent Wages

and

Working Conditions

if you

Go After Them

here's how

Better Pay and a Steady Job!

These two things are uppermost in the mind of every worker.

BETTER PAY means a better living for you and your family.

A STEADY JOB brings security to your home and removes the fear of constant lay-offs and firings.

Every worker knows that a good home and a good living for his family depend upon good pay and a steady job. If you are not getting enough pay, your entire family suffers. If you do not have a steady job, your family is often denied health and happiness. If you have to work too hard under bad conditions, you may become ill and lose your job—and again, your family suffers.

Every worker knows these things are true, but so far not every worker has learned how to do something about it. You are one of many millions of workers in America's great industries.

All of these workers have thought about better pay and a steady job just as you have. Millions of them have done more than think—they have acted. They have chosen the modern way to improve their conditions—ORGANIZE!

Get the Best Price

As a worker, you have only one thing to sell—your labor. And you are entitled to get the best price for it that you can. There is only one way to get a decent man's price for your work—get together with your fellow workers and sell your labor together. ORGANIZE! That's cooperation! That's collective bargaining! The United States Government protects your right to organize into unions and bargain for better conditions.

Your employer cannot deal with the problems of each worker separately. There are too many of you. So, he usually doesn't deal with you at all. Through a union, you can bargain with him on nearly equal terms. Without unions, you have no bargaining power. With unions, you have strength which the employer will recognize and respect.

"Take It or Leave It"

Try alone to get better conditions and you have to take what is given you. This is because you—one worker—cannot bargain; you can only ask. If you don't like what you get, you are plainly told, "Take it or leave it." You have to have a job, so you have to take it.

It is foolish to try to buck the tide alone. It is wise to band together with your fellow workers. It is modern Americanism to form a union that will give you and your entire group a voice in your working conditions.

Millions of workers have banded together in unions and today are receiving better pay and more benefits than unorganized workers can ever hope to get.

Like others you and your fellow workers want these benefits. Many of you are forced to work under bad conditions and at wages which won't permit a decent living. You can do something about this if you will go about it in the right way.

If you are ready to make the try, we will help you make a good job of it.

Problems All Alike

Your problems and needs are about the same as those of the man working next to you. The union gives you a chance to get together with him, to talk over your problems, and to find the best way of dealing with them. In your union, you can bargain with your employer for better pay, for getting work loads adjusted, for receiving equal pay for equal work done, with an even break for all. Your union can also help you to do something about safety and health on your job, about seniority and promotions, and many other problems which you and the others face.

In other mills and plants throughout the nation, workers have set up union organizations. They are now able to help you form your union and get union benefits. They realize that each new union makes the whole organization stronger. That is why they offer you their help and experience.

To get this help, you must show your interest and do your part of the work, but experienced union men can help you do a quicker and better job of it.

Labor unions have organizers to help workers start their unions. They will assist in calling and holding your first meetings, and in other ways to build your union. Your members will elect your own officers. These officers will be bonded and will handle your dues and other funds. Only you and other union members will vote how and when to spend union money. All business of your union will be in hands of your members, and your elected delegates will vote on officers for your own national organization.

To form a good sound union takes a little time. You can't hope to join a union today and have a contract tomorrow. But with the help we offer and the right cooperation on your part, you can soon have things going along smoothly and begin to realize the advantages of organization in a short while.

Even after your union is well established, you will continue to get help from your national organization. You will then belong to a great national movement of strength and influence. It has the

support of millions of other workers in your state and nation to offer you in return for your support.

This movement is not new. It has a long history of steady growth and progress. Its program is based on Unity, Fairness and Cooperation.

CIO Organizes All

We can't tell you here all about unions nor can we list all their advantages.

You will want to know this much, though: The CIO stands for Congress of Industrial Organizations. The CIO is a group of the nation's largest and most progressive labor unions.

Just like the workers themselves, these large unions found they could do more by working together. The CIO was formed for this purpose. The workers, members of unions, elect the men who head the CIO. About four million workers are brought together in this great American movement.

Automobile workers, furniture workers, textile and hosiery workers, workers in mines and steel mills, in newspaper plants and in private and government offices, chemists and tobacco workers, plasterers and electricians, clerks and sailors—in fact, workers in every industry or trade can belong to the unions that make up the CIO. Get into one of these unions now! That's the best way to a steady job and better pay.

What you read here makes good sense, doesn't it? Before you forget, why don't you find out more about this idea? There is much that we didn't have room to put here, but you can find out what you want by coming to the address stamped below, or you could just mail us a letter or phone us. We'll be glad to talk with you. There's nothing to lose, and you'll stand to gain with the millions of other union workers—if you'll stand with them.

**"No matter what you do,
There's a CIO union for you."**

EXECUTIVE ORDER No. 9328

("Hold the Line" Order)

By virtue of the authority vested in me by the Constitution and the statutes, and particularly by the First War Powers Act, 1941, and the act of October 2, 1942, entitled "An Act to Amend the Emergency Price Control Act of 1942, to Aid in Preventing Inflation and for Other Purposes," as President of the United States and Commander in Chief of the Army and Navy, and in order to safeguard the stabilization of prices, wages and salaries, affecting the cost of living on the basis of levels existing on September 15, 1942, as authorized and directed by said act of Congress of October 2, 1942, and Executive Order No. 9250 of October 3, 1942, and to prevent increases in wages, salaries, prices and profits, which, however justifiable if viewed apart from their effect upon the economy, tend to undermine the basis of stabilization, and to provide such regulations with respect to the control of price, wage and salary increases as are necessary to maintain stabilization, it is hereby ordered as follows:

1. In the case of agricultural commodities the Price Administrator and the Administrator of Food Production and Distribution (hereinafter referred to as the Food Administrator) are directed and in the case of other commodities the Price Administrator is directed to take immediate steps to place ceiling prices on all commodities affecting the cost of living. Each of them is directed to authorize no further increases in ceiling prices except to the minimum extent required by law. Each of them is further directed immediately to use all discretionary powers vested in them by law to prevent further price increases direct or indirect. to prevent profiteering and to reduce prices which are excessively high, unfair or inequitable. Nothing herein, however, shall be construed to prevent the Food Administrator and the Price Administrator, subject to the general policy directives of the Economic Stabilization Director, from making such readjustments in price relationships appropriate for various commodities, or classes, qualities or grades thereof or for seasonal variations or for various marketing areas, or from authorizing such support prices, subsidies or other inducements as may be authorized by law and deemed necessary to maintain or increase production, provided that such action does not increase the cost of living. The power, functions and duties conferred on the Secretary of Agriculture under Section 3 of the Emergency Price Control Act of 1942 (Public Law 421, Seventy-seventh Congress) and under Section 3 of the Act of October 2, 1942 (Public Law 729, Seventy-seventh Congress) are hereby transferred to, and shall be exercised by the Food Administrator.

2. The National War Labor Board, the Commissioner of Internal Revenue and other agencies exercising authority conferred by Executive Order No. 9250 or Executive Order 9299 and the regulations issued pursuant thereto over wage or salary increases are directed to authorize no further increase in wages or salaries except such as are clearly necessary to correct substandards of living, provided that nothing herein shall be construed to prevent such agencies from making such wage or salary readjustments as may be deemed appropriate and may not have heretofore been made to compensate, in accordance with the Little Steel Formula as heretofore defined by the National War Labor Board for the rise in the

cost of living between January 1, 1941 and May 1, 1942. Nor shall anything herein be construed to prevent such agencies, subject to the general policies and directives of the economic stabilization director, from authorizing reasonable adjustments of wages and salaries in case of promotions, reclassifications, merit increases, incentive wages or the like, provided that such adjustments do not increase the level of production costs appreciably or furnish the basis either to increase prices or to resist otherwise justifiable reductions in prices.

3. The Chairman of the War Manpower Commission is authorized to forbid the employment by any employer of any new employee or the acceptance of employment by a new employee except as authorized in accordance with regulations which may be issued by the chairman of the War Manpower Commission, with the approval of the economic stabilization director, for the purpose of preventing such employment at a wage or salary higher than that received by such new employee in his last employment unless the change of employment would aid in the effective prosecution of the war.

4. The attention of all agencies of the Federal Government, and of all State and municipal authorities, concerned with the rates of common carriers or other public utilities, is directed to the stabilization program of which this order is a part so that rate increases will be disapproved and rate reductions effected, consistently with the act of October 2, 1942, and other applicable Federal, State or municipal law, in order to keep down the cost of living and effectuate the purpose of the stabilization program.

5. To provide for the consistent administration of this order and Executive Order No. 9250, and other orders and regulations of similar import and for the effectuation of the purposes of the Act of October 2, 1942, the economic stabilization director is authorized to exercise all powers and duties conferred upon the President by that act, and the economic stabilization director is authorized and directed to take such action and to issue such directives under the authority of that act as he deems necessary to stabilize the national economy, to maintain and increase production and to aid in the effective prosecution of the war. Except insofar as they are inconsistent with this order or except insofar as the director shall otherwise direct, powers and duties conferred upon the President by the said act and heretofore devolved upon agencies or persons other than the director shall continue to be exercised and performed by such agencies and persons.

6. Except insofar as they are consistent with this order, Executive Order No. 9250, and the regulations issued pursuant thereto shall remain in full force and effect.

5th ALL-SOUTHERN NEGRO YOUTH CONFERENCE

Tuskegee Institute, Alabama **April 17, 18, 19, 1942**

As this CALL for the Fifth All-Southern Negro Youth Conference is issued, our country is at war. On all the ramparts of our far-flung battle lines, America's youth offer their lives that our nation may live. They die that we may preserve, in the face of the brutish attack of German, Italian and Japanese fascism, the heritage of social progress and human advancement bequeathed by the Declaration of Independence, the Emancipation Proclamation, and the 13th, 14th and 15th Amendments to the United States Constitution.

★

In such a war, no American can be relieved of the duty of sacrificial service. The tasks of war are hard tasks. The fruits of victory are dearly bought. The Fifth All-Southern Negro Youth Conference will convene to determine how Negro youth can more fully share in these tasks, how they can in larger measures contribute to the winning of the war.

★

Our discussion will center around concrete problems which the war has thrust to the forefront in American life.

1. How can Negro youth win greater opportunities to serve with dignity in the armed forces?

2. What can Negro youth do to increase their facilities for training and their placement in all phases of the expanding defense industries? How can Negro youth on the farms contribute more to the nation's war production effort?

3. How can Negro youth most speedily be integrated in the civilian defense program in the South?

4. How can we strengthen the foundations of democracy by improving the status of Negro youth in the fields of: health and housing; education and recreation; race relations; citizenship?

★

Negro youth are fighting for America. The Fifth All-Southern Negro Youth Conference will be dedicated to strengthening their fighting fitness and furthering their contribution. For this purpose we invite you to be present at Tuskegee Institute, Alabama, April 17th, 18th, and 19th, 1942.

Program*

FRIDAY, APRIL 17th

8:00 P. M. ..... CULTURAL EVENING

SATURDAY, APRIL 18th

8:00 A. M.-12:00 NOON ... OPENING BUSINESS SESSION
1. "Negro Youth Fighting for America" (Annual Report)
2. "Southern Youth Organizing for Victory" (Annual Report)
3. Discussion of Reports
4. Election of Conference Committee

12:00 NOON-1:00 P. M. ..... RECESS FOR LUNCH

1:00 P. M.-4:00 P. M. NEGRO YOUTH IN THE BATTLE FOR PRODUCTION
1. Ten Minutes Presentations:
   (a) Training
   (b) Industry
   (c) Agriculture
   (d) Labor Unions
2. General Discussion

4:00 P. M.-5:00 P. M. ..... RECESS FOR DINNER

5:00 P. M.-8:00 P. M. ..... NEGRO YOUTH IN CIVILIAN DEFENSE
1. Ten Minute Presentations
   (a) The Civilian Defense Councils—Their Programs
   (b) The Youth Auxiliaries in Civilian Defense
2. General Discussion

9:00 P. M.-12:00 MIDNIGHT ... "GRIND THE AXIS" BALL

SUNDAY, APRIL 19th

8:30 A. M.-11:00 A. M. ..... NEGRO YOUTH IN THE ARMED FORCES
1. Ten Mnute Presentations
   (a) The Army
   (b) The Navy
   (c) The Air Corps
   (d) Officers Training
   (e) Recreation and Welfare
2. General Discussion

11:00 A. M.-12:00 NOON ..... CHAPEL HOUR

12:00 NOON-1:00 P. M. ..... RECESS FOR LUNCH

1:00 P. M.-3:00 P. M. ..... STRENGTHENING DEMOCRACY'S FOUNDATIONS IN THE SOUTH
1. Ten Minute Presentations
   (a) Health
   (b) Housing
   (c) Interracial Cooperation
   (d) Freedom from Police and Mob Violence
   (e) Freedom to Vote
   (f) Freedom of Religion
2. General Discussion

3:00 P. M.-5:00 P. M. ..... BUSINESS SESSION
1. Introduction and Adoption of Resolutions
2. Election of Officers
3. Summary

5:00 P. M.-6:00 P. M. ..... RECESS FOR DINNER

6:00 P. M.-8:00 P. M. ... CLOSING SESSION—SPIRIT OF VICTORY RALLY

*This Program is Subject to Change.

*Sponsors act in their individual capacities. Organizations are listed for purposes of identification only

Information for Delegates

All organizations and agencies dealing with or interested in the problems of Negro youth, and national defense activities, are urged to send official delegates. All Councils of the Southern Negro Youth Congress, student clubs and councils, church bodies, trade unions, civic and social clubs, lodges and fraternal orders, and community and national welfare agencies, are urged to send delegates. Unattached, non-delegated individuals will also be accorded full rights of participation in the Conference.

Representation will be granted upon the following basis:

OFFICIAL DELEGATES

1. National and regional organizations may send five delegates representing the parent body.

2. State and local organizations, including branches of national bodies, may send two delegates for a membership of 50 or less. Where the membership exceeds 50, the state and local organizations may send one delegate for each additional 50 members or major fraction thereof.

3. No more than 15 voting delegates from any one organization will be seated.

4. Unattached individuals may register as delegates and may vote on Conference policy but not on organizational questions.

OBSERVERS

Organizations may send any number of observers to the Conference. Unattached individuals may also attend as observers. Observers may have voice on all questions but vote on none. No limitations are placed on attendance because of race, color, religious or political beliefs.

FEES

1. Registration fee for delegates is one dollar ($1.00)

2. Registration fee for observers is one dollar and fifty cents ($1.50)

3. Delegates are urged to make application for registration by mail in advance of Conference date.

4. Dormitory housing for seven hundred (700) delegates will be provided at fifty cents ($.50) a night on the campus. Special housing arrangements may be made upon request. All applications for housing must be made in advance through the Birmingham office.

5. Meals will be provided on the Tuskegee campus, and will average thirty-five cents each.

IN THE PUBLIC MIND

WE COMPARE NOTES WITH CANADA

. . . and check the results against the opinions of America's business and intellectual leaders. The topic: postwar relations between the U. S. and the British Empire. The consensus: for partnership without union.

CANADIANS see eye to eye with us on most points that concern Anglo-American relationships in times to come. They are even more favorably disposed than we are toward economic and political collaboration between the U.S. and the Dominion, and they are just as lukewarm as we to the idea of a political union, although, with a few plausible reservations, they like us very well.

These observations are based upon a comparison of results from polling a cross section of the U.S. public, as published in the FORTUNE Survey for last April, and a similar survey by interview in Canada. The close agreement found between the two countries is more than merely interesting. It has an important bearing upon the future of the English-speaking world.

During its seven years of existence, however, the FORTUNE Survey has shown that the mere measuring of public opinion at any given time, as though it were a static thing, has no final validity. It has demonstrated that people in a democracy are extremely responsive to changing circumstances and leadership. So this article affords not only a comparison of Canadian and U.S. opinion now, but also an investigation of what effective leadership thinks on the same topic, as a clue to the direction that opinion may take in the future.

In the tabulations that follow are included the answers given by two selected groups to mailed questions paralleling those asked of the U.S. and Canadian publics. One of the groups, "Business Leaders," comprises several thousand outstanding managers of U.S. business—the men in whose hands rests the economic destiny of our country (in so far as that destiny can rest with any body of men controlling private enterprise). The other category "intellectual leaders," is a hand-picked roster of about a thousand people who may have the direction of our nation's ideological destiny. They were chosen because they are men so placed—in teaching and the learned professions, in government and private enterprise, in opinion-forming and policy-making functions, and elsewhere in cogent positions—that what they believe has the best chance of being widely heard and of winning popular acceptance.

Is this a time for thinking ahead?

There is apt to be a great deal of well-taken exception to the notion that we now can think of the postwar settlement while the strategy and the timing of victory remain so obscure.

Which of these seems better to you—for us to win the war first and then think about the peace, or to start now thinking about the kind of peace we want after the war?

	U.S. public	Canadian public	Business leaders	Intellectual leaders
Win war first	58.8%	57.8%	49.9%	16.6%
Plan the peace now	33.1	39.0	46.5	79.1
Don't know	8.1	3.2	3.6	4.3

So the people on either side of our northern border are agreed, in almost equal majorities, that the thing to do is to act first and think afterward. Breakdowns show that this is more than a coincidence. It is a curious kind of kinship that crosses the boundaries of sex and geography. For example, U.S. and Canadian women are substantially less opposed than their men to planning the peace now; so are the people who live in the central wheat states, north and south of the border. (In times past our part of this region has been the stronghold of the dwindling wish for isolation.)

The businessmen agree with the American-Canadian public at large, but only by a small plurality. Many of them took the trouble to write letters to the effect that the pattern of victory is now so uncertain that the pattern of peace cannot be foreplanned. But the size of the dissenting minority may be a straw in the wind. The really striking variation comes from the U.S. intellectual leaders, who, by more than four to one, propose to keep their sights on the shape of things to come. This, coming from people who are mainly concerned with thinking and planning, is not surprising, but it is important. Eventually these idea men may persuade others that we should fight the war with an eye to the things toward which we believe we are striving.

Isolation? Cooperation? Union?

There would be little point in proceeding with this investigation if the majorities that do not believe in thinking now about the postwar world firmly declined to express an opinion as to what that world should be. But less than a tenth of all the people questioned had no definite answer to this question:

Which one of these six policies comes closest to what you would like to see your country do when the war is over?

	U.S. public	Canadian public	Business leaders	Intellectual leaders
Stay at home and have just as little as possible to do with any other country	11.1%	7.9%	3.5%	1.0%
Have as little as possible to do with any countries in Europe and Asia, but form a new union to include in one government all North and South American countries	6.9	5.8	4.4	1.1
Use our influence to try to organize the world for peace, but form no actual ties with any other country	26.2	9.4	22.4	9.2
Try to form a new league or association with all the different nations of the world and take an active part in making it work	34.3	33.8	43.6	61.2

THE NEGRO'S WAR

note

One-tenth of the U.S. population still has not a full share in America's greatest undertaking. Nine-tenths may have to pay the costs of wasteful discrimination.

Long acknowledged in the fields of music and dancing, the Negro's gift for creative expression now finds recognition in art. This season three important Manhattan galleries held exhibitions of contemporary Negro painting and sculpture. Among the most distinguished contributors to the shows were Romare Bearden and Charles Alston, whom FORTUNE *invited to illustrate this article. Bearden, who painted the frontispiece, is a graduate of New York University. He worked daytime as an employee of New York City's Welfare Department, painted at night in a Harlem studio, which he shared with Alston. Lately he enlisted in the army. Alston, who made the sketches on this and the following pages, is an M.A. from Columbia. He was a teacher of Bearden, as well as of Jacob Lawrence, whose pictorial history of the migration of his people appeared in* FORTUNE *last November.*

IN HARLEM they are still waiting for the employment boom. While war increases job chances elsewhere, there is little defense industry in New York.

FOR many months Japanese radio propaganda aimed at the Americas has capitalized the Negro and the tough deal he gets in the U.S. Take this English-language broadcast from Manchukuo (March 15, 1942) as recorded by American listening posts: "Democracy, as preached by the Anglo-Americans, may be an ideal and noble system of life, but democracy as practiced by Anglo-Americans is stained with the bloody guilt of racial persecution and exploitation." Last February the Detroit riot against Negro families who wanted to move into their lawful homes was a boon to the Japanese and, incidentally, also the German shortwave propagandists.

A specifically conditioned anti-Semitism has made certain inroads into Harlem; but so far the Nazis seem to realize how little chance the author of *Mein Kampf* has to be accepted as savior of Negroes and they do not address them openly. The Japanese, however, work hard. The clumsiness of their propaganda indicates the Japanese certainty of the Negro's readiness to turn against white America. They are making a mistake. As they are bound to find out, it makes no sense to apply Japan's strategy in Asia to the U.S. Negro—her gamble on the primitive thesis that peoples will choose sides in this world convulsion simply according to the color of their skins.

Although the American Negroes are undeniably in a critical state of mind, foreign agents still have pretty slim chances among them. America is all the American Negro knows. In fact, he is the isolationist par excellence; no other category of American has so few ties with the outside world. If nativity were really the measure of citizenship, the Negroes would excel any other national or racial stock in this country. Indeed, out of 12,865,500 Negroes (1940 census), 99.4 per cent are American-born and about 97 per cent are of purely native parentage. But of the U.S. white population nearly 10 per cent were born abroad and less than 70 per cent are of native parentage on both sides. Every attempt to revive for the American Negro alleged African allegiances has failed. Negro intellectuals, in a morose gesture of protest, may seek escape from frustration in an artificial nostalgia for an African civilization of their own; but as a whole, the American Negro community is at home here in the U.S., beyond any temptation from abroad, inextricably rooted into this country's soil.

An American who thinks with his skin

The Negro has grown with America, though his was a different pace. He has seen members of his race achieve high academic and civic honors in contest with white people. In the North he has learned to use all the gadgets of American civilization and feels himself equal, if trained, to any job. He is molded by American patterns of life. He has shared everything with his American contemporaries, particularly their disillusionment. But his is a specific skepticism: the fierce violent skepticism of a very young race. He lives in America, but then again he does not. Reminded every day of his color, sometimes he can't help thinking with his skin; worse even, sometimes his skin thinks for him. This is the irrational toll on his, and America's, rational way of life—an ever-present irritation, the steady denial of a normal American existence. The more hurdles he takes, the taller looms the last decisive one. His growing unrest is caused not by the lack but by the momentum of his progress. Being an offspring of America, he

FORMING AN INGOT, and a team, these white and colored war workers have learned to depend on each other. Lukens Steel at Coatesville, Pennsylvania, where this painting was done, has successfully used mixed labor for years.

JUNIOR WELDERS are learning the trade in an integrated NYA school in Astoria, Long Island. Nationally, 11 per cent of the agency's graduates are young Negroes. At present their job chances look better than ever before.

reacts as would any American in his position: he wants more.

The Negro wants more—but of America. He may occasionally find a gloomy sort of satisfaction when "the arrogant white folks" are taught a lesson about the efficiency of a colored people, any colored people; but even the most defiant and least astute American Negro senses that his fate is tied up with America's, and he realizes with a minority's instinct for self-preservation his selfish stake in an American victory. Defeated nations are neither generous nor rational. And no power on earth could save the Negro from the whiplash of a national catastrophe: it would scourge the least resourceful, most conspicuous minority with prompt and unabashed fury; it would destroy in one blow whatever the Negro has achieved or hopes for—and he knows it. That's why the Japanese gamble is a mistaken one.

Those colored people in Burma and Malaya who aided the Japanese invaders thought the white man to be the real intruder. But the American Negro certainly does not see himself as the native of a conquered colony. He is not disturbed by the principles of American government but by the fact that, as he feels, these principles are not fully applied to him. Sometimes these feelings explode violently in his press. Three months before the U.S. was attacked, *The Crisis*, a responsible and rather calmly edited Negro journal, stated: "We shall see what we shall see. Negro Americans might as well discover at the beginning whether they are to fight and die for democracy for the Lithuanians, the Greeks and the Brazilians, or whether they had better fight and die for a little democracy for themselves." This vehement statement expresses a widespread attitude: The American Negro is agitated not because he is asked to fight for America but because full participation in the fight is denied him. He is humiliated as a Negro because he is not fully accepted as an American.

Northbound journey into WPA

No serious review of the nation's status could ever overlook the contradiction between America's dream and the Negro reality. He has always been intimately involved in America's crises—sometimes retarding, sometimes accelerating the nation's march. This time America's battles for a fuller life have to be fought all over again, only on a higher and broader scale; and unavoidably the Negro takes the stage.

He is not the southern white man's burden any more. True, in 1940 three-quarters of our Negro population were still living south of the Mason and Dixon Line. But the South-North migration continues steadily. In Detroit the Negro community had grown from 5,700 in 1910 to about 150,000 by 1940; in New York City from 91,000 in 1910 to 152,000 in 1920 and 478,000 in 1940. The overwhelming majority found employment as unskilled laborers and in domestic or other service positions, only to lose it again in the depression of the thirties. Being Negroes as well as the most recently arrived labor group, they were marked for industrial decimation. During the thirties, up to 70 per cent of the Negro communities in Philadelphia, Chicago, and New York were on relief or WPA. In 1937, when Negroes were 6 per cent of New York's population, they constituted no less than 22 per cent of the city's relief load.

When after the lean years (and there were more than seven of them) prosperity came back, it pointedly avoided the colored unemployed. To illustrate: the Negro category on WPA rolls actually *rose* from 14.2 per cent in February, 1939, to 17.6 per cent in February, 1942. This was due not to any real growth of Negro unemployment, but to the fact that white workers enjoyed

THE FBI INVESTIGATED the leaders of the mob that prevented Negro war workers from moving into the Sojourner Truth Housing Project in Detroit last February and found behind the U.S. flag a coalition of fascist-minded groups. In April, Negro families began to move in, protected by state troops.

priority in reemployment by defense industries. Thus to be without a job during the defense boom was no longer an American fate, as it had been during the depression; it began to be a Negro fate.

Last September the U.S. Bureau of Employment Security inquired from selected defense industries the number of job openings the management expected to occur during the following six months; and for how many of them Negroes, if available, would be considered. The survey, concentrated on regions with considerable Negro labor, uncovered this fact: out of 282,245 prospective openings, 144,583 (51 per cent) were barred to Negroes, as a matter of policy. The answers were given at a time when labor shortage was beginning to make itself felt in many an industry, and to a federal agency—two months after the President had called for the abolition of discrimination in war industries.

The survey revealed little difference between employment trends in the South and in the North. Out of Texas' announced 17,435 defense jobs, 9,117 were barred to Negroes—but in Michigan the figure was 22,042 out of 26,904; in Indiana, 9,331 out of 9,979; in Ohio, 29,242 out of 34,861. Moreover, the inquiry failed to support the assumption that the job-seeking Negro's frustration starts only when he seeks skilled work. No less than 35,000 out of 83,000 unskilled jobs were declared closed to colored applicants. There are even regions where a Negro would be hired for skilled rather than for unskilled work. Illinois, for instance, reported 72 per cent of the prospective skilled jobs open to Negroes but only 7 per cent of the unskilled jobs. Obviously, where demand for labor heavily outweighs the supply, the skin color miraculously lightens.

Not even the most essential defense industries have sufficiently lifted race barriers. Aircraft industries reported 37,659 out of 64,859 prospective jobs closed to Negroes; electrical machinery 10,346 out of 20,792; chemicals 5,561 out of 8,033; iron and steel 20,397 out of 33,230. In general, the critical industries reported color restrictions rather above the average of 51 per cent. Shipbuilding is the one outstanding exception: out of 64,000 anticipated openings less than 28 per cent have been declared beyond the Negro's reach.

Management's actual experience with Negro labor has little to do with the habit of employment discrimination. Last December the National Industrial Conference Board presented in its management record the results of an extensive study of such experiences. One hundred and two selected managements of industries employing Negroes had been requested to rank colored and white employees on comparable skilled and semiskilled work. As to ability and skill, seventy managements graded Negro workers equal to their white colleagues, thirty-one poorer, one better than whites. As to production, eighty-five managements found Negroes equal to,

twelve poorer, five better than white workers. As to regularity in attendance, sixty-four managements reported Negroes to be equal to, thirty-two poorer, five better than white labor. The Conference Board closed its report with a suggestion "that all firms having suitable work of any nature should make an honest effort to hire colored persons in proportion to the total population of the area."

The President had anticipated this advice on June 25, 1941, with Executive Order No. 8802, warning government, employers, and labor that discrimination in defense industries is contrary to the country's fundamental interests and must not be tolerated. In the history of the U.S., this was the second presidential executive order with a direct bearing on Negroes; the first one was the Emancipation Proclamation. Seventy-eight years after they had been freed, the American Negroes got another American President's pledge—on the brink of another war.

The story of an executive order

The President's proclamation would have caused more enthusiasm among the Negroes, and probably a quicker response throughout the country, had it not been so clearly the result of pressure. America's Negroes, headed by A. Philip Randolph of the Brotherhood of Sleeping Car Porters, had announced a general protest march on Washington for July 1. A few weeks before the critical day, Fiorello La Guardia, then still in charge of the Office for Civilian Defense, requested them to call it off. When this was refused, the White House took the matter up officially. At a meeting with the President and ranking members of the Cabinet and the Office of Production Management, the suggestion of an executive order came from the Negro side of the conference table, and was coolly received on the other side. When only a few days were left for preventing an international embarrassment, the Negro leaders were shown a first draft, which committed defense industries but not government itself. The Negroes stood pat. Finally the President agreed to include an order to his own administration. And the march was canceled. But what could have been an inspiring demonstration of democracy at work came about as a compromise between hardboiled pressure groups.

This genesis of a great document has hampered its effectiveness ever since. To realize the proclaimed policy, the President's Committee on Fair Employment Practice was created, equipped with little more power than that of investigating the field and holding public hearings on glaring cases of discrimination. True enough, the committee (whose jurisdiction includes all racial, national, and religious minorities) has somewhat accelerated the nation's adjustment to a critical situation, but the adjustment itself was caused by practical necessity rather than by political or industrial statesmanship.

The character of this necessity has been well defined by the Baltimore *Evening Sun*, an avowed supporter of conservative traditions. Baltimore's trained-labor supply is now virtually exhausted, and 35,000 more defense workers may be required by the end of 1942. There has already been heavy migration to the city. Sewer, water, highway, transport, police, fire, school facilities are overstrained and will have to be enlarged even if no more people come to Baltimore. How can the city digest an influx of another 35,000 families? So far, no one has provided the answer. But Baltimore's Negro population of 167,000 could substantially lessen the pressure of labor need, if an extensive training program were carried out in time. Concluded the Baltimore *Evening Sun:* "We are not here concerned with the long-range social consequences which might result from the removal of some of these barriers [against the use of Negroes for skilled work]. We are thinking simply of the ironic situation Baltimore finds itself in right now: on the one hand a desperate shortage of skilled and semiskilled workmen for our war industries, and on the other hand the existence of a large reservoir of labor which is rarely considered when there is need for skilled rather than unskilled workmen. It seems to us that in this emergency a dispassionate and objective examination of the situation of the Negro in Baltimore's industries is called for."

In varying degree this is the picture of each U.S. city with a war-production boom and Negro labor reserves. And management is not unaware of the critical situation. Last September 53,000 out of 184,000 additional jobs in both skilled and unskilled categories were declared open to Negro applicants by companies that had never before employed colored labor of any kind.

Buck passing: poor policy

Theoretically, management should have fewer objections to hiring colored labor than any other part of the industrial team. The employer seldom has social contact with his workers anyway and

[*Continued on page 157*]

IN WASHINGTON, D.C., in an office of the U.S. Employment Service, Negroes are separated from white job seekers. In his military camp the Negro soldier gets training and food of the same quality, and in the same quantities, as his white fellow soldier. But if the camp is down South, he does not find much hospitality and recreation in the civilian communities outside. This, rather than experiences of their actual army life, is what Negro soldiers complain about. Every army's petty enemy, the boredom of repeated evenings spent inside the barracks, strikes the Negro soldier as just another liability of segregation.

The Negro's War

[*Continued from page 80*]

his primary concern is production efficiency and satisfactory investment return. This, and not a pedigree, is what management wants from labor—theoretically. In reality, a multitude of extra-economic motivations help to determine the employer's attitude. And nowhere are they stronger than in his dealings with men—in his employment policy.

Anything may happen, and sometimes does, when the first Negro workers enter a plant or an office—from a few minutes' slowdown to the walkout of aroused foremen, even to strikes of the entire personnel. If work is not directly disturbed, there may be in some cases the grievous problem of segregated cafeterias, washrooms, recreation facilities. Management is afraid of opening a formidable Pandora's Box of troubles. And employers who, recoiling from the implications of a nondiscriminatory hiring policy, tend to pass the buck to labor, have some impressive facts on their side. Moreover, they argue that the same government that insists on such a policy for private industry has not exactly established a working model in Washington. Yet a conclusive answer to all that has been given by the Employers' Association of Chicago, in a memo to its members: "Some employers have raised the objection that the attitude of their own employees forces them to discriminate. However true this may have been in the past, it is now the job of employers to influence their employees toward sacrificing such prejudices as a matter of patriotic necessity. It is not going to be easy—nor is it going to be easy to train a whole new army of unskilled men and women—but both must be done, and the employer must do it."

And it can be done. Consider the example of Lockheed-Vega. Once the management had made up its mind to employ Negro labor, foremen and supervisors were advised to see that the plan succeeded; and they accepted the responsibility, since evidently the management was resolved to carry out its intent. Last August, after the internal machinery had been fully set up, each of Lockheed's thousands of employees was provided with a firm statement of the management's policy; even if they had wanted to, the local unions could not have resented Lockheed's compliance with the Commander-in-Chief's executive order, which was extensively quoted in the communication. And then, one Negro worker after another was introduced into the plant—the one hundredth last November, by Joe Louis himself, cheered by the white workers. Today many hundreds of Negroes are working at Lockheed-Vega, mostly in production jobs, and the company reports no trouble.

Not every management in the U.S. has such elaborate industrial-relation devices at its disposal; nor are they indispensable. With different, though equally effective, methods the Wright Aeronautical Corp. in Cincinnati employed last April more than 1,000 Negro workers without any friction. A year ago Western Electric hired Negroes for the first time in its Kearny, New Jersey, plant and put them to work side by side with skilled white people. The experiment was a full success. No separate cafeterias, no separate washrooms, and no move to get them. The plant is producing highly complicated instruments; neither the work nor its quality was even slightly disturbed. The navy shipyards increased the use of Negro labor extensively during the last year, and all over the country colored yardmen are working practically shoulder to shoulder with white colleagues. There is, however, not a single production region that cannot provide the President's Committee on Fair Employment Practice with documented complaints.
